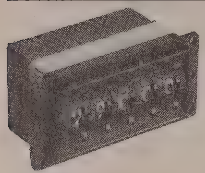
PRESENTING THE LONGEST-RUNNING SERIES IN THE BUSINESS

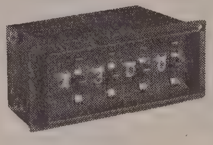
Innovative, Quality-Engineered Thumbwheel Switches Available Off-The-Shelf At Unbeatable Prices.



29000 SERIES
ECONOMY MINISWITCH

An economical miniswitch for high package density. Extra large in-line character readout. Width, .350" (8.9) and cutout height 1.020" (25.9)

- 10, 12 or 16 Dial Positions
- Many Output Codes and Configurations
- Message Units for Longer Legends
- Optional Dial Stops to Limit Rotation
- Rear-Mounted



43000/44000/45000 SERIES
MINISWITCH

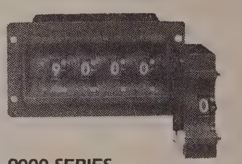
These low cost switches feature optional LED lighting and snap-together assembly. Field installable stops to limit dial rotation. Printed circuit boards with solder or pin terminations.

- Available in Most Popular Codes
- 10 Dial Positions
- .200" High, Up-Front Dial Characters
- 43000 — 500"(12.7)W x .980"(24.89)H
- 44000 — .315"(8.0)W x 1.220"(31.0)H
- 45000 — .315"(8.0)W x .961"(24.4)H

300/13000 SERIES
GENERAL PURPOSE DIGISWITCH

One of the most widely used thumbwheel switches, with more available options, output codes and special termination features than any other switch.

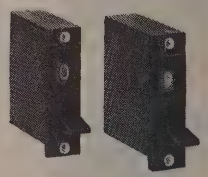
- 8, 10, 12 or 16 Dial Positions
- RFI Shielding Available
- Easy to Replace MIL-Spec Lighting
- Message Units for Longer Legends
- 13000 is Front-Mounted Version
- 300 — .500"(12.7)W x 1.380"(35.05)H
- 13000 — .500"(12.7)W x 2.00"(50.8)H



9000 SERIES
DIGISWITCH

The 9000 offers more available options, output codes and special termination features than any other fully-sealed MIL-spec switch. Rear-mounted, qualified to MIL-S-22710/12.

- 8, 10, 12, or 16 Dial Positions
- RFI Shielding Available
- Optional Replaceable MIL-Spec Lighting
- Dial Stops to Limit Dial Rotation
- Dimensions — .600"(15.24)W x 1.375"(34.93)H



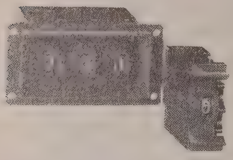
24000/28000 SERIES
LEVER SWITCH

24000: Bi-directional front panel sealed switch built to perform in any hostile environment qualified to MIL-S-22710/24.

- Optional, Replaceable MIL-Spec Lighting
- Individually Mounted Switches
- 24000 — .480"(12.19)W x 1.175"(29.84)H

28000: Minilever commercial switch that can be actuated in either direction.

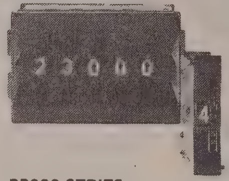
- "Upper" or "Lower" Window Location
- 90° Full Lever Travel
- 10 and 12 Dial Positions
- 28000 — .500"(12.7)W x .980"(24.89)H



200/700/8000 SERIES
MINISWITCH

Small switches for hostile environments, virtually impervious to sand, dust, oils, high humidity, salt spray and explosive atmospheres. Series 200 has potted wire leads, 700 — P.C.B. both qualified to MIL-S-22710/15 and /20

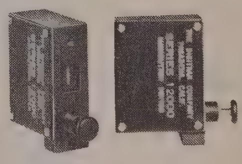
- 8, 10, 12 or 16 Dial Positions
- RFI Shielding Available
- Optional, replaceable MIL-Spec Lighting
- 8000: Commercial Version
- Dimensions 500"(12.7)W x .980"(24.89)H



23000 SERIES
"SNAP-IN" SLIMSWITCH

For applications where maximum panel density, good reliability and error-proof positive setting action are required. Switch width only .315" with cutout height of 1.221."

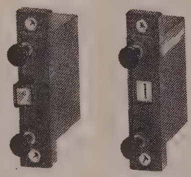
- 10 Dial Positions
- Snap-in, Front Mount—No Tools Required
- Large (.170" High) In-Line Characters



12000/53000 SERIES
MINIBUTTON

Reliable, contamination-proof switches for applications requiring panel sealing per MIL-S-22710. No supplemental panel cover or boot is required for sealing.

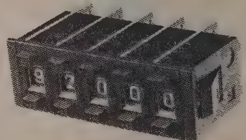
- Individually Mounted Switches
- Glass Window that Seals Switch Interior
- Metal Case — Facilitates R.F.I. Shielding
- Optional Replaceable MIL-Spec Lighting
- 12000 Series: Qualified to MIL-S-22710/17
- 12000 — .500"(12.7)W x .83"(21.08)H
- 53000 — .350"(8.89)W x 1.020"(25.91)H



63000/64000 SERIES
BI-DIRECTIONAL MINIBUTTON

Two-button bi-directional switches designed to meet all performance requirements of MIL-S-22710. Rear-mounted, panel sealed.

- 63000 — 8, 10, 12 Dial Positions
- 64000 — 16 Dial Positions
- Metal Case — No RFI Shielding Required
- Optional Replaceable MIL-Spec Lighting
- Individually Mounted Switches
- 63000 — .410"(10.41)W x 1.230"(31.25)H
- 64000 — .460"(11.68)W x 1.312"(33.53)H



92000/93000/62000 SERIES
DOUBLE PUSHBUTTON

These commercial switches are designed for applications where speed and ease of settings are important.

- Snap-together Assembly
- L.E.D. Lighting Available (92000)
- Low Cost, High Quality, High Reliability
- 10 and 16 Dial Positions Available
- Dial Stops to Limit Dial Rotation
- 92000 — .300"(7.62)W x .551"(14.2)H
- 93000 — .300"(7.62)W x .886"(22.5)H
- 62000 — .315"(8.00)W x .945"(24)H

NOTE: Numerals in brackets indicate millimeter equivalents.

More military and commercial thumbwheels and greater code selection than anybody else. And it's all under one roof to maintain the very highest standards of product quality and delivery.

American Electronic Components

1010 N. Main St. • Elkhart, IN 46514

Sensors. Hall effect. VR. Inertia.

Hall effect Magnetel© sensors for speed and position sensing. Wide operating temperatures (-40 to $+150^{C}$); wide air gap. Drop in, Bolt 'n Go. True zero speed. Power-up recognition. High data resolution. For cam and crankshaft; speed and position sensing; timing; throttle position sensing. Also general industrial controls and equipment.

Variable Reluctance Sensors. Typically used in applications where supply voltage is not available. Wide air gap; high signal output; wide temperature range (-40 to $+150^{C}$).

Inertia Sensors. Hermetically sealed. For low G-force (under 2 G's); tight tolerancing. Low contact resistance.

See postion sensing switches at right.

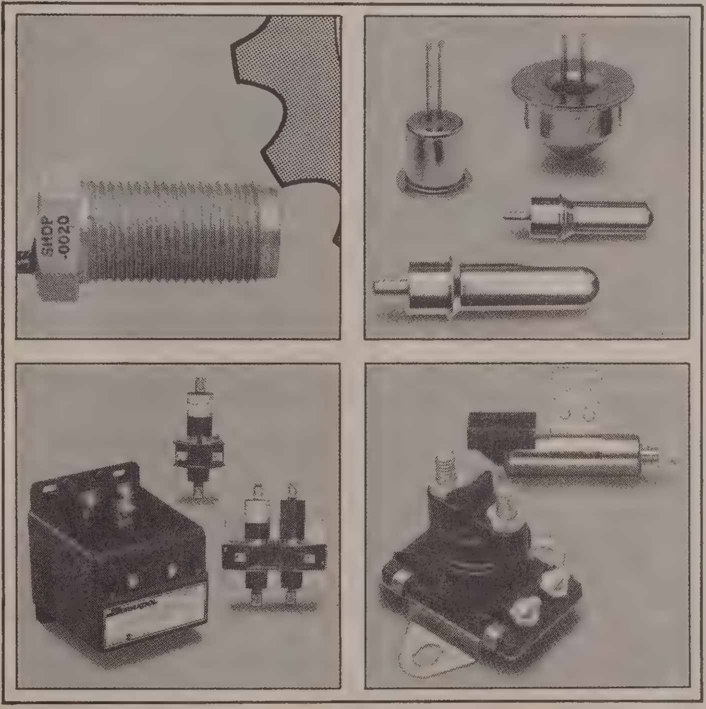
Custom Relays

Electro-mechanical. Hermetically sealed. Reliable. Ideal for hostile environments.

A first choice when continued, frequent switching would degrade mechanical device or when unusual environmental conditions or unpredictable transients are expected, or if replacement would be difficult or costly.

Applications include: resistive heating; injection molding equipment; industrial processing; oven/furnace controls; food processing; lighting and traffic controls; test/laboratory; high-voltage; capacitor discharge; motors and pumps.

Available with the following options: 1) General Purpose (UL defined) — 10-150 amps, for inductive, resistive, tungsten, and motor loads; 2) Special Purpose — 30, 35, 50 and 60 amps, for resistive or motor loads; 3) High Voltage — 10 amps, 2500 to 3500VAC; 4)Time Delay — 6-20 amps, 0.5-10 second delay.



Switches

Position-sensing. Tip 'n tilt. Tip-over. Motion. Liquid level. Specials.

Tip 'n Tilt. Electro-mechanical switches "make" when electrode is tilted below horizontal.

Tip-Over, Motion Switches: Specified by angle of liquid level. For sump pumps, waste and sewage treatment, fluid processing control panel indicators.

All switches are hermetically sealed and feature self-renewing contacts, long-life, low contact resistance, metal construction, NOT glass — virtually indestructible.

Single or dual electrodes, insulated, non-insulated, N/O or N/C, wide range of ratings, capacities, loads, leads, potting. Custom designs.

Solenoids

Robust, efficient coil design. Competitive pricing. Custom designs a specialty. High volume. Custom mounting. High pull-in force. Custom connections. Wide range of applications.

Fax 219-264-4681

*Committed to **exceeding** our customers' expectations.*

MINIGLOSSARY
POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

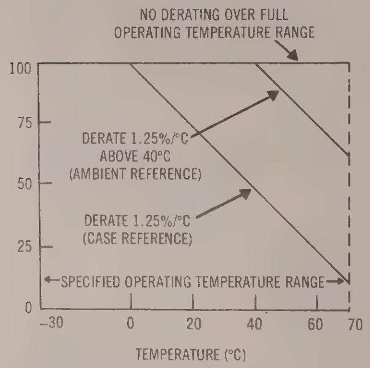

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

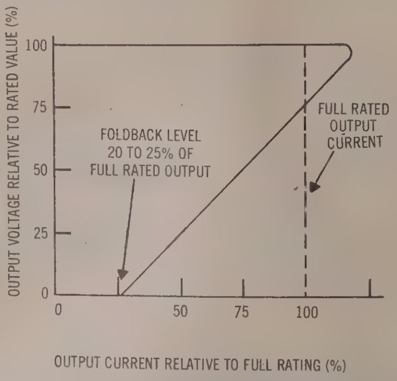

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

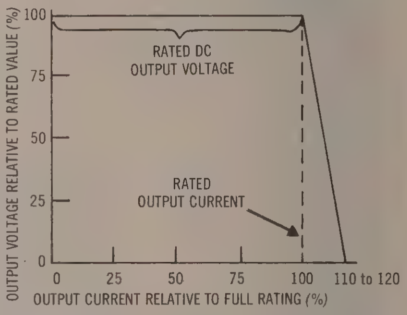

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(–) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

LIGHTED PUSH-BUTTON SWITCHES

DISPLAY ASSEMBLIES/ INTERLOCK SWITCH ASSEMBLIES/INDICATORS

ELECTRO-MECH provides a perfect blend of quality standard products with in-depth experience in answering unique requirements. Proven engineering designs are illustrated by the excellent performance characteristics of each ELECTRO-MECH lighted push-button switch, indicator, and display assembly. Low-bounce, long-life contacts, new innovations in legends, displays, field-service, packaging— all standard features. Whatever your applications, ELECTRO-MECH is prepared to answer your specific needs. Choose from any of the most popular models.

Technical specifications apply to all ELECTRO-MECH Switch models unless otherwise specified:

- **Ratings: 30 volts DC or 115 Volts AC; 2 amps resistive, 1 amp inductive**
- **Weight: 0.8 oz. (approx.)**
- **Operating Pressure: 2 lbs. + 1 lb.**
- **Plunger Travel: 3/16" (approx.)**
- **Actuations: 100,000**
- **Accommodates all "switchlines" standard lenses. Uses one T1-3/4, AN3140-327, 328, 330 bulb or neon lamp, 3 actuation modes standard**
- **Lenses: Available in ½" to 1" round and spare, plus various rectangular sizes.**

SERIES 8128
ELECTRO-MECH INTRODUCES ITS MINIATURE SPST LIGHTED SWITCH!

The 8128 is a SPST illuminated, momentary switch that mounts to the front panel and takes up only ¾" behind the panel. Lens L11 accommodates a T-1 sub-midget flange base lamp or LED.

SPECIFICATIONS:

- **Ratings: 30 VDC or 115 VAC; 1a resistive, 0.25a inductive.**
- **Weight: 1 gram (approx.)**
- **Operating Pressure: 24 ounces ± 8 ounces**
- **Plunger Travel: 0.075 (approx.)**
- **Actuations: 100,000 minimum**
- **Pushbutton Lens: Switch accommodates a 0.245 round lens (part number L11).**
- **Lamps: Lens accommodates a T-1 sub-midget flange base lamp or LED. The lamp is replaceable from the front of the panel.**

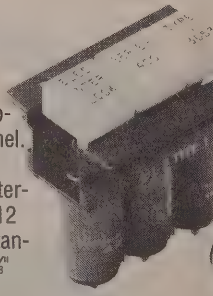
SERIES 20
A NEW CONCEPT OF FAST EASY SWITCH INSTALLATION AND DISPLAY DESIGN VERSATILITY

FEATURES:

- **Momentary or alternate action**
- **All bezel sizes mount in a ⅝" dia. round hole**
- **High density mounting ability–less than 3/4" centers**
- **Low profile appearance in one unitized housing**

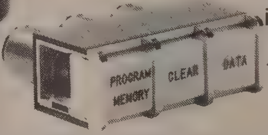
SERIES 400
MULTI-STATION SUB-PANEL ASSEMBLIES



Multi-station switch assemblies designed for sub-panel mounting by means of a flanged "U" channel. All standard ELECTRO-MECH switches can be incorporated with several types of mechanical interlocking/lockout actions between stations. Up to 12 stations in one or two row configurations. The standard center distance between switches is ⅝", ¾", ⅞" and 1".

SERIES 500
INTERLOCKING SWITCH ASSEMBLIES

Added beauty and long-lasting appearance with handsome chrome barriers between each switch or indicator. Independent or interlocking action. Ten types of tracking action and switching sequences. Up to 12 switches in single or dual row, ⅞" or 1" centers.



electro-mech
LIGHTED PUSH-BUTTON SWITCHES

COMMUNICATIONS/INDUSTRIAL CONTROLS/DISPLAYS
COMPUTER PERIPHERALS/INSTRUMENTATION

SERIES 2100

This version of our standard illuminated Pushbutton Switch features silver slide bar action. Add BR after part number for mounting on ⅝″ centers. Utilizes AN3140-T 1¾″or Neon bulb. All other specifications same as standard.

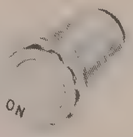
SERIES 3000

Illuminated Pushbutton switches with an integral hold-down coil which is activated with switch. Holds the push-button in the depressed position until coil is de-energized returning it to relaxed position. Available in all circuit configurations up to 6 PDT. Same specifications as standard model.

SERIES 4000 10 AMP

Low profile matches standard industry models. Momentary or Alternate Action design takes any standard lens size. 30 VDC or 115 VAC, 10 A Resistive, 5 A Inductive.

SERIES 5000



An exceptionally short momentary switch available in circuit configurations up to 2 PDT.

	1 PST		2 PST

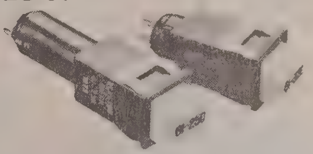
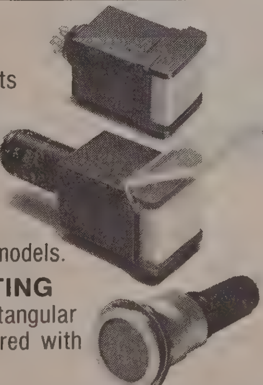
SERIES 61



ELECTRO-MECH's Series 61 switches are provided in ½-inch square, snap-in or hardmount configurations. Each low-profile unit is available in any function from SPST to 2PDT, each controlled with an independent circuit. The all plastic, unitized housing, helps insulate switch from other surrounding components. The 61 Series is also available in a standard PC Board mounting configuration.

SERIES 60
MOMENTARY SWITCH



Rear mounted "U" bracket accepts switch installation from front of panel.

LG SERIES SAFETY LENS

Available on all 67-single-station, double-barrier lighted push-button bezel switch models.

EL SERIES FLUSH MOUNTING

Available in round, square or rectangular styles. Specify switch model desired with "EL" suffix (i.e. 73 EL-2654).

SERIES 150
INTERCHANGABLE LENSES/FILTERS

Displays may be changed or buttons replaced. Non-wearing, clear-acrylic lens and filter buttons. Available in standard, Opaque or Contour.

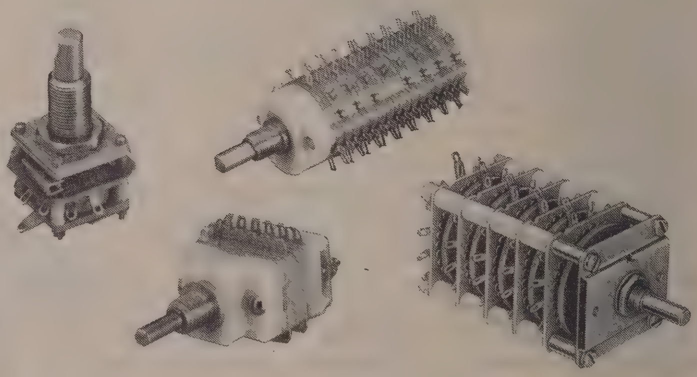
The W-I-D-E-S-T Selection of Electronic and Power ROTARY SWITCHES

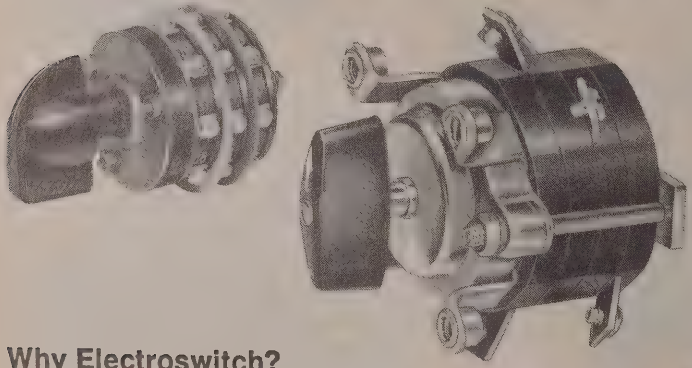
- Commercial
- Enhanced Commercial
- Military
- Electrical Utility

APPLICATIONS

Switch Ratings Range from under 1 amp to 200 amps

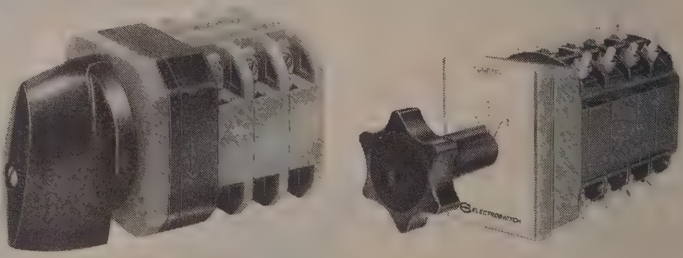
Whatever your needs...
Chances are there is a standard or custom Electroswitch product to meet your applications: from miniature electronic instrument and control switches ... to special mounts for PC boards ... to power detent-action types ... to snap-action units especially suited to DC applications ... to specialized control devices for the utility industry.





Options include:
tandem switches ... spring-return ... key-lock ... push-to-turn ... dual concentric shafts ... quick-connect terminals ... encoded contacts ... waterproof mountings ... and many, many more! **Plus Custom Designed switches** for unique needs.

Why Electroswitch?
We're now in our *fifth decade* of designing and manufacturing multipole rotary switches for demanding applications. This proven record of consistency and reliability should be a major factor in your selection of a rotary switch supplier.



Contact your nearest technical representative or the factory for detailed information and assistance in design and selection for your specific needs.

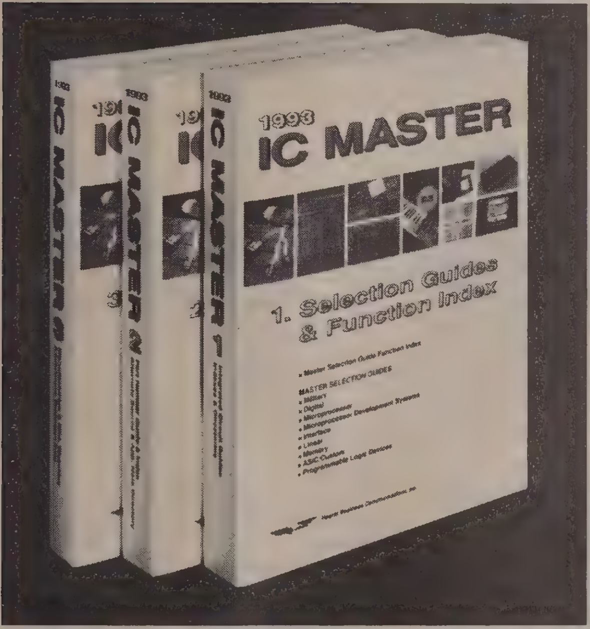
SUPER
TIME
SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take $10 off the subscription price!

IC MASTER

ELMA — Experience and precision for every High Quality switch application

Type 01

Type 01 switches are used when high quality and low cost are primary considerations. The type 01 can be panel or PCB mounted.

Positions: 1-12
Poles: 1-8
Switch Mode: Shorting and non-shorting
Contacts: Silver or 120 micro inch gold
Mechanical Life: Greater than 600K detents
Temperature Range: -40 to +85 deg. C
Contact Resistance: < 10 milli Ohm
Indexing angle: 30, 36, and 60 deg.

Type 02 MIL-S-3786/35

Type 02 switches are completely sealed and made to meet the rigorous requirements of MIL-S-3786/35. The type 02 can be panel or PCB mounted.

Positions: 1-12
Poles: 1-8
Switch Mode: Shorting and non-shorting
Contacts: 120 micro inch gold
Mechanical Life: Greater than 600K detents
Temperature Range: -40 to +85 deg. C
Contact Resistance: < 20 milli Ohm
Indexing angle: 30 deg.

Type 04

The type 04 is often use in applications where many positions or poles are required in a small package. The type 04 can be panel or PCB mounted.

Positions: 1-24
Poles: 1-24 standard, higher upon request
Switch Mode: shorting and non-shorting
Contacts: Silver or 120 micro inch gold
Mechanical Life: Greater than 1.2M detents
Temperature Range: -40 to +85 deg. C
Contact Resistance: < 10 milli Ohm
Indexing angle: 15 and 30 deg.

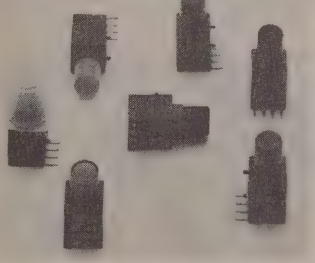
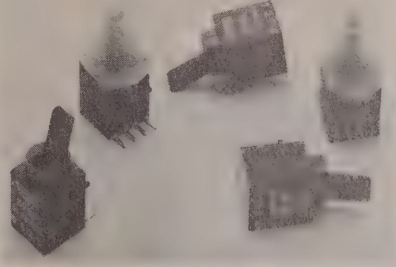
Type 09 Pushbutton and Toggle

The type 09 switches are excellent for front panel applications. They are completely sealed for cleaning after assembly.

Style: 2 or 3 position for toggle switches, push button or push button switch for push type
Poles: 2 poles for standard, 1 pole for lighted
Switch Mode: Shorting and non-shorting
Contacts: 80 micro inch gold
Mechanical Life: Greater than 100K activations
Temperature Range: -20 to +80 deg. C
Contact Resistance: < 50 milli Ohm



TYPE 09 PUSHBUTTON



TYPE 09 TOGGLE

Type 01, 06 and 08 Keylock

Our keylock switches are ultra high security, precision made for the most demanding applications. These switches are suitable for both panel and PCB mounting.

Switch: Uses our type 01, 06 and 08 high quality switches shown above
Mechanism: Swiss made high precision 5 tumbler design
Arrangements: Customer can specify: which positions key can be removed in, spring return positions, different keys which can access different positions on the same lock (access hierarchy).

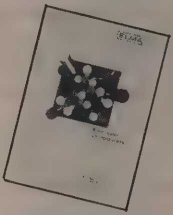
The Highest Quality Custom & Semicustom Switches For Medium To Low Power Applications



For complete information write or call for our *free* catalog today!

All ELMA products are available off-the-shelf and REASONABLY PRICED

ELMA Electronic has been designing and manufacturing state of the art switches for over 30 years. We have the experience and expertise to make the perfect switch for your special application. From high end audio to state of the art medical to switching networks for major phone companies, ELMA has the reliable solution. We will look at any application you have and work with you to find the best solution.

Our standard customs include the following:

1) Special length bushings
2) Special spindle lengths
3) Special spindle designs which may include: flats, roll pins, holes, drilled and tapped ends, slots, etc.
4) Hollow spindles for concentric shafts.
5) Dual concentric switch designs.
6) Custom spindle diameters.
7) Water proof switches sealed through the front panel with o-rings.
8) Dummy wafers
9) Custom mounting plates for mounting potentiometers or other third party devices.
10) Special wafer spacing and custom spacers or injected parts.
11) Spring loaded momentary contact positions.
12) Special materials.
13) Special push/rotary designs.
14) Large variety of options for keylock switches.
15) Custom wire harnesses to customer specifications.

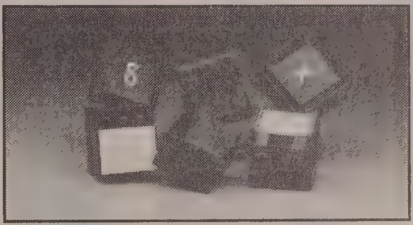
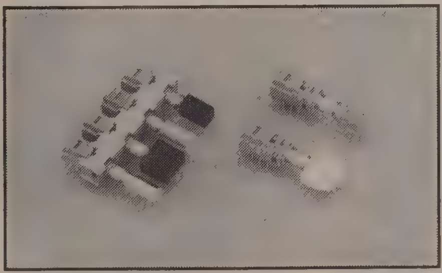
- Re-legendable caps

1100/1300 Series Mini-Tast Miniature Pushbutton Switches



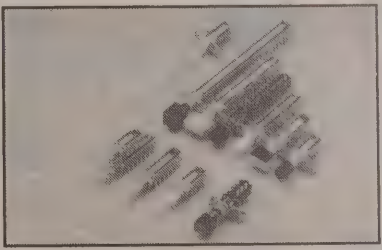
- Contact rating: 250 mA @ 60 VDC
- SPST, SPDT versions
- Self-cleaning, snap-action contacts
- Multiple LEDs
- Gold or silver contacts
- Life: >10,000 cycles

MTH Series Switches



- Available ganged or as individual modules
- 2, 4 or 6 pole configurations
- Six button styles in five colors
- Electrical life> 30,000 cycles

TA Pushbutton Switches



- Contact rating: 0.5 amp @ 100 VAC, 1 amp @ 25 VDC
- Available as single modules or ganged assemblies
- Momentary or alternate action
- Life: > 100,000 Actuations

Miniature Mercury Tilt Switches

- **Versatile** — Available to sense tilt, vibration or impulses for commercial, industrial or military applications
- **Reliable** — Hermetically sealed, oxygen-free atmosphere provides typical life of 250,000 operations and more
- **Rugged** — Welded metal cases
- **Wide choice** — Omnidirectional or planar
- **Precise** — Operate to tight tolerances

Notes:

1. Response speed depends on the damping fluid used, and is related to jitter reduction. Rated on a scale of 0 to 5, with 5 being heavily damped (longest response time).
2. Switches with other dampening factors are available. Consult factory.
3. Jitter is tendency for switch to change state 3° from operational point. Ranked on a scale of 0 to 5, with 5 being very susceptible to vibrations.
4. Values shown are for switch viewed so that pins are side by side. For values with pins in line (one behind the other) ask for product data sheet.
5. Vibration resistant TS77VRG will not change mode when subjected to a 3g sinusoidal vibration within a frequency of 5 to 2000 Hz when tilted 15° off normal axis.

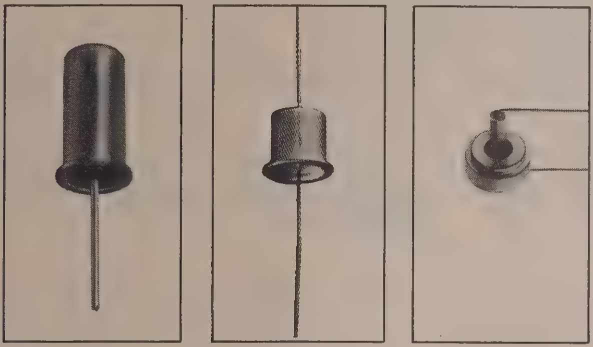
Mercury *(wetted and nonwetted)* and Mercury-Free Impulse, Motion and Proximity Switches

Impulse and Motion Switches: Less than 1G to 1,000G's



Typical impulse and motion switches. Reliability is enhanced by hermetically sealed, welded-steel cases. Models available with operating temperatures as low as −55°C.

Fifth Dimension Inc. offers a broad range of impulse and motion switches with operating points from below 1G to over 2,000G's. Uses for these switches include rocket fuzing (both impact and safing modes) and motion detection for security equipment. They may also be used where actuation is required caused by shock, vibration, jitter or centrifugal force. Contact configurations include:

NO — all mounting modes

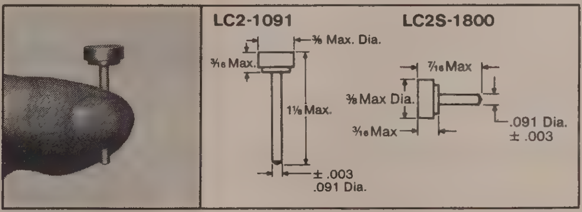
NC or NO — depending on mounting mode

Randomly Closed or Open — operates on leading edge of change of state occurring during motion

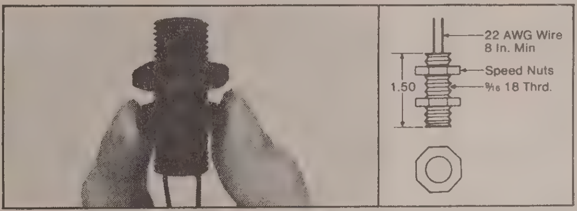
Additional details and specifications will be supplied in response to information about your requirements. Please call or write.

Magnetic Proximity Switches

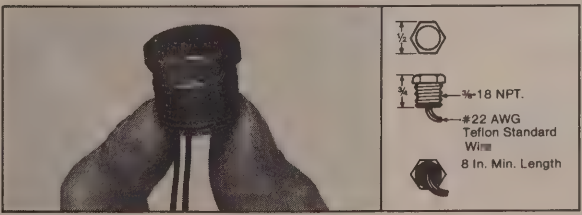
The LC2 mercury film switch used in Fifth Dimension magnetic proximity switches, unlike most mercury devices, operates in any mounting position. It can be triggered by a coil, for relay operation, or a by permanent magnet. It features: • Long life • No contact bounce • High reliability • Low contact resistance • High standoff voltage • Low cost.



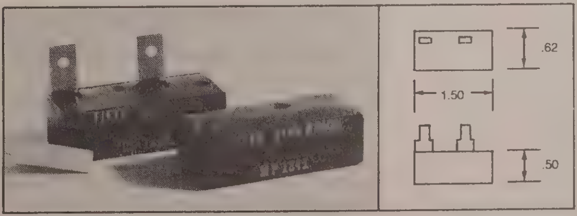
The basic LC2 mercury film switch may be mounted by adhesives or snap rings. Its welded steel contact chamber is hermetically sealed.



Easy-mount switch requires only a clearance hole for installation. Its entire body is threaded for easy adjustment. Matched drive magnet available.



Totally encapsulated limit switch is ideally suited to underwater operation. It mounts in a pipe thread. Various matching drive magnets available.



Versatile interlock switch is cast in epoxy in a high density polyethylene case. It can operate on magnetic or non-magnetic surfaces.

THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES is a unique index designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1993 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name and issue date of the applicable manufacturers' data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook" .

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

ORDER THE 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!

To order your 1993 Directory of IC Manufacturers' Data Pages,
Contact your local IC MASTER distributor or,

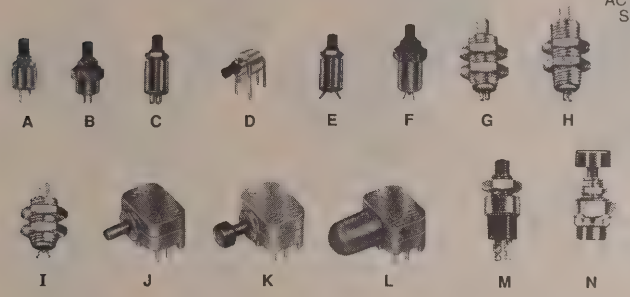
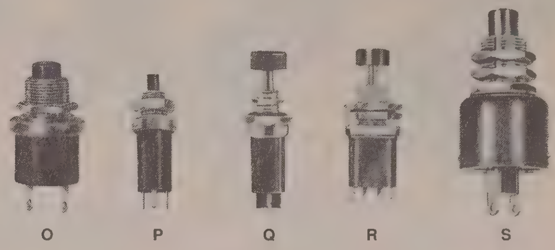
Pushbutton Switches

SMALL LOW CURRENT MOMENTARY SWITCHES WITH BUTT CONTACTS

50% ACTUAL SIZE



LOW CURRENT WIPING CONTACT SWITCHES AND HIGH CURRENT SNAP ACTION SWITCH



SPST = Single Pole/Single Throw, Momentary

SPDT = Single Pole/Double Throw, Momentary

NO or NC = Normally Open or Normally Closed

MINIATURE, BUTT CONTACT SWITCHES—FIG. A TO L

Gold contacts provide low level switching with maximum life in minimum space. PC, sealed, overtravel, right angle, and limit switch. SPST NO or NC, and SPDT types.

1 AMP BUTT CONTACT SWITCHES—FIG. M, N

Small, long wearing switches with silver contacts. SPST NO in standard, UL recognized and sealed types; SPST NC in standard and UL types.

1/2 & 1 AMP WIPING CONTACT SWITCHES—FIG. O

Self cleaning contacts for use in critical contact resistance circuits. SPST NO or NC, standard, and UL recognized.

1/4 AMP WIPING CONTACT SWITCHES—FIG. P, Q, R

Long wipe, double throw switches for low level switching. SPDT or DPDT, standard or sealed types.

10 AMP SNAP ACTION SWITCHES—FIG. S

Rapid make and break for higher current switching; audible click. SPST NO or NC, and SPDT types.

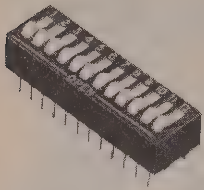
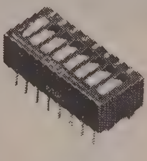
SPST DIP Switches

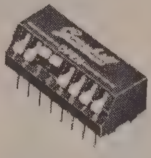
SINGLE POLE/SINGLE THROW DIP SWITCHES



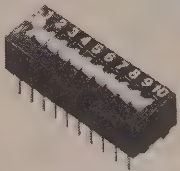
Raised Rocker



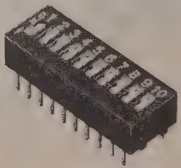
Recessed Rocker



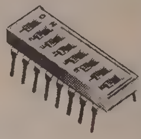
PIANO-DIP®



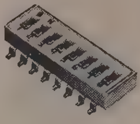
Raised Slide



Recessed Slide

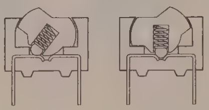


Machine Insertable



Surface Mount

- **High Pressure, Reliable Contact**
- **Sealed Bases as Standard**
- **Shock and Vibration Immunity**



ROCKER DIP SWITCHES—SERIES 76

Raised and Recessed Rockers and PIANO-DIP®

Rated to make and break 1 mA, 5 Vdc: or 50 mA, 30 Vdc: or 150 mA, 30 Vdc for 10,000 operations per position. Base contacts are copper alloy, gold plated 10 microinches minimum over nickel plate. Width is .380"(9,65mm); height is .315"(8,0mm) for raised rocker style, .267"(6,27mm) for recessed style, .301"(7,65mm) for the PIANO-DIP® switch. Grayhill Piano-Dip® standard is up-off. Contact Grayhill for up-on.

SLIDE DIP SWITCHES—SERIES 78

Raised and Recessed Slide Types

Rated to make and break 1 mA, 5 Vdc; or 50 mA, 30 Vdc; or 150 mA, 30 Vdc for 10,000 operations. Base contacts are copper alloy, gold plated 10 microinches minimum over nickel plate. Width is .380"(9,65mm); height is .315"(8,0mm) for raised slides and .265" (6,73mm) for recessed slides.

MACHINE INSERTABLE, MIDIP® SWITCH–SERIES 90

Compatible with leading TO-116 IC insertion equipment. Rated to make and break 10 mA, 30 Vdc; or 10 mA, 50 mVdc for 2,000 operations per position. Base contacts are copper alloy, gold plated 10 microinches minimum over nickel plate. Terminals are molded (sealed) into base.Top seal is polyimide film. Width is .290"(7,37mm) max.; height above board is .180"(4,57mm) max.

SURFACE MOUNTABLE SWITCHES–SERIES 90HBW

Compatible with surface mount assembly, including infrared reflow and vapor-phase soldering temperatures up to 260°C. Rated to make and break 100 mA, 6Vdc; or 10 mA, 50 mVdc for 2,000 operations per position. Contacts are copper alloy, gold plated 10 microinches minimum over nickel. Non-conductive parts are UL94V-0 rated plastic; top seal is polyimide film. Width is .290"(7,37mm) max.; height above board is .190"(4,83mm) max. Outline conforms to S0GN-0004 per EIA Standard PDP-100.

MILITARY QUALIFIED DIP SWITCHES

Switch part numbers containing the letter M are qualified to MIL–S–883504 per the following slash sheets: 76MSB Type = /01; 76MRSB Type = /02; 78MB Type = /04; 76MPSB Type = /11; 90MB Type = /12. These switches may also be ordered by the appropriate "M" number cross reference. For additional qualified DIP switches with double throw circuitry, see next page.

*TOP SEAL OPTION

To order top tape sealed, add suffix S to part number. Part numbers for the Machine Insertable, Surface Mountable switches and Military Qualified switches already have the suffix. See also paragraph above.

For prices, contact your local Sales Office, an authorized Distributor, or GRAYHILL. **Available From Your Local GRAYHILL Distributor**

Special Circuit DIP Switches

SERIES 78 SLIDE SWITCHES

- 2PST, 3PST, 4PST
- SPDT & DPDT – Separate Circuits

Ⓐ

Ⓑ

2 POLE, 3 POLE, AND 4 POLE, SINGLE THROW SLIDE SWITCHES (FIG. A)

Rated for 10,000 operations to make and break the following loads: 1 mA, 5 Vdc; or 50 to 150 mA, 30 Vdc. Base contacts are copper alloy, gold plated 10 microinches minimum over nickel plate.

Circuitry	No. of Positions	Length	Part Number
2PST	1	0.280	78F01
	2	0.480	78F02
	3	0.680	78F03
	4	0.880	78F04
	5	1.080	78F05
3PST	1	0.380	78G01
	2	0.680	78G02
	3	0.980	78G03
4PST	1	0.480	78H01
	2	0.880	78H02

To order top sealed switches, add the suffix S to the part number in the chart.

SPDT AND DPDT SLIDE SWITCHES WITH SEPARATE CIRCUITS (FIG. B)

Rating and materials are the same as the switches in Figure A. In Single Pole/Double Throw switches, each slide operates two adjacent separate circuits, opening one of them, while closing the other. (In Double Pole/Double Throw switches, 1 slide switches 4 circuits at once, opening circuits 1 and 3, while closing 2 and 4, etc.). This circuitry, used in telephone switching systems, makes these switches form, fit, and function equivalents. For true SPDT (DPDT) circuitry, adjacent terminal pairs may be tied with a printed circuit. Dot on the cover indicates the closed position of individual terminal pairs.

Circuitry	No. of Positions	Length	Part Number
SPDT	1	0.280	78J01
	2	0.480	78J02
	3	0.680	78J03
	4	0.880	78J04
	5	1.080	78J05
DPDT	1	0.480	78K01
	2	0.880	78K02

To order top sealed switches, add the suffix S to the part number in the chart.

For prices and discounts of all products on this page, contact your local Sales Office, an authorized Distributor. or Grayhill.

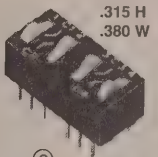
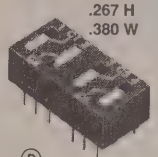
SERIES 76 ROCKER AND TOGGLE SWITCHES

- SPDT & DPDT – With Commons
- 3 Actuation Choices
- Standard or Military Qualified



Ⓒ



Ⓓ

Ⓔ

SPDT AND DPDT ROCKER AND TOGGLE SWITCHES WITH COMMON POLES (FIG. C, D, E)

Rated to make and break 50 mA 30 Vdc; and 125 mA 30 Vdc for 10,000 operations. Base contacts are copper alloy, gold plated 10 microinches minimum over nickel plate. SPDT (DPDT) circuits are 3 (6) terminal circuits for true SPDT (DPDT) switching and compact spacing. Common pole terminals are marked with a C, and first and second throws are marked as 1 and 2. Military versions are qualified to MIL-S-83504.

Circuitry And Type	Positions	Length	Part No. Raised	Part No. Recessed	Part No. Toggle

OCTAL, BCD, HEXADECIMAL OUTPUT DIP SWITCHES

Series 94H (FIGS. G, H, I) are ideal back panel switches to provide coded input to logic circuitry. Internally sealed, survives process assembly. Rated at 30 mA at 30 Vdc for 10,000 cycles of operation. One cycle is complete rotation and return. After life parameters: Contact Resistance 150 milliohms max.; Insulation Resistance 1000 megaohms min.; Dielectric Strength 250 Vac rms. Operating Temperature -40° to +80° C. Top Actuated terminals on 0.1 x 0.3 centers; Side Actuated on 0.1 x 0.1 centers.

Rotary Switches

561 HILLGROVE • P.O. BOX 10373 • LA GRANGE, ILLINOIS 60525 • PHONE: (708) 354-1040

SERIES 42D AND 44D 1 AMP ADJUSTABLE STOP ROTARY SWITCHES

Enclosed, interchangeable with fixed stop switches. Make/break 1 amp, carry 10 amps at 115VAC, resistive. Insulation resistance: 10,000 megaohms minimum. Non-shorting contacts. 3/8-32NEF bushing projects .437 (11,10). Flatted shaft projects .874 (22,2). Behind-panel-depth: 1-deck, 1.025" (26.04); 2-deck, 1.371" (34.82). **Series 42D:** 10-position switch, 36° indexing, 1" (25.4) diameter. **Series 44D:** 12-position switch, 30° indexing, 1.162" (29.51) diameter.

Type	Poles	Decks	Max. Positions
42D36-01-1-AJN	1	1	10

44D30-02-1-AJN	1	2	12
44D30-02-2-AJN	2	2	6

Also available in fixed stops; 45°, 60° or 90° throw, up to 6 poles, up to 12 decks and military qualified types.

SERIES 50 AND 51 200MA, 0.5" (12,7) DIAMETER ROTARY SWITCHES

Series 50 and 51 single-deck adjustable stop switches with non-shorting contacts. Make/break 200mA, 115VAC or 30VDC for 5,000 cycles; 100 mA for 20,000. Insulation resistance 10,000 megaohms minimum. Type number with **P** is PC mount, others solder lug. Type number with **C** is military style, others are not. **Series 50** is 36° indexing, **Series 51** is 30°. Approx. .578 (14,63) behind panel PC mount, .658 (16,71) solder lug. Shaft projects .625 (15,88).

Also available in fixed stops; 45°, 60° or 90° throw, up to 4 poles and military qualified types.

SERIES 56 200MA, 0.5" (12,7) DIAMETER ADJUSTABLE STOP ROTARY SWITCHES

Series 56 single-deck adjustable stop commercial grade switches with nonshorting contacts. Make and break 10,000 cycles at 200mA 30VDC resistive. Type number with **P** is PC mount others solder lug. Type number with **S** has shaft-and-panel seal, others do not. **30** indicates 30° indexing; **36**, 36° indexing. Approx. .377 (9,58) behind panel PC mount, .480 (12,91) solder lug. Shaft projects .625 (15,88).

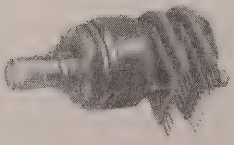
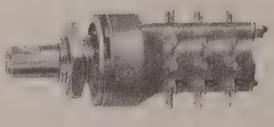
Also available in fixed stops, up to 4 poles.

SERIES 71 1/4-AMP, 0.5" (12,7) DIAMETER ADJUSTABLE STOP ROTARY SWITCHES



Style BF



Style B

Series 71 multi-deck switches are adjustable stop. Make/break 250mA for 20,000 cycles 115VAC or 30VDC. Insulation resistance: 10,000 megaohms minimum. Voltage breakdown: 500VAC minimum. Meet moisture, shock, salt spray, explosion and stop strength requirements of MIL-S-3786. **71AD** are standard style with solder lug terminals and 0.125" (3.18) diameter shaft and 1/4-32 bushing; **71BD** same but have 0.250" (6.35) diameter shaft and 3/8-32 bushing. **71ADF** are PC mount with 0.125" (3.18) diameter shaft; **71BDF** same but have 0.250" (6.35) diameter shaft. Switch diameter approx. 0.75 (19,05). **Suffix 30 or 36** indicates angle of throw by degrees. Behind-panel depth: 1-deck, 0.75" (19.05); 2-deck, 1" (25.4).

Coded Output Switches

561 HILLGROVE • P.O. BOX 10373 • LA GRANGE, ILLINOIS 60525 • PHONE: (708) 354-1040

26 SERIES BINARY CODED–1/2" DIAMETER FRONT PANEL SWITCH

0 7 6
GRAYHILL

- Shaft and Panel Seal
- 1 Pole with Adjustable Stops for
- 2 thru 8 or 2 thru 16 Positions

26 Series switch is rated to make and break logic compatible loads for 25,000 operation; a cycle is 360° and a return thru all positions. The four output terminals are on 0.3x0.2" (7.62x5.08) centers with the common terminal in the center; terminals are marked on the switch. The switch may have continuous rotation, or be adjusted to limit the rotation. All switches have shaft and panel seal. The panel seal ring can be removed to expose the stop pin holes on the front of the switch. Two stop pins are supplied with the switch. One or both may be used to limit the rotation as desired. Approx. .322 (8,43) behind panel plus terminals. Shaft projects .625 (15,88)

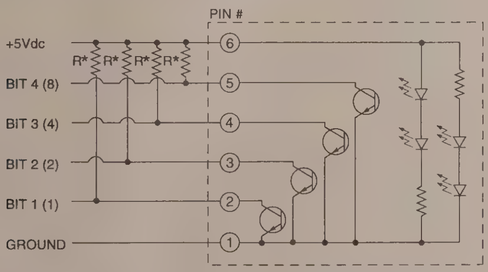
Type	Positions
26ASD22-01-1-AJS	16
26ASD45-O1-1-AJS	8

61 SERIES OPTICALLY-COUPLED ROTARY ENCODER SWITCH

61 Series is a solid state encoder that utilizes light passage or light interruption to be conductive or non-conductive in a phototransistor simulating contact closure or opening. Life is increased beyond 1 million cycles of operation. Encoder is rated at 5VDC, 30mA maximum; logic highs and lows depend on type of logic. Operating voltage: +5VDC. Switching current: 30mA max. Temperature range: -40°C to +65°C. Approx. .825 (20,96) diameter, 1.15 (29,21) behind panel, shaft projects .687 (17,45).

ABSOLUTE POSITION–BCD OR GRAY CODE OUTPUT

Unique output at each of sixteen positions. Same position is identified after power down and power up. No integral pushbutton available in this package size. Your choice of BCD or Gray code.

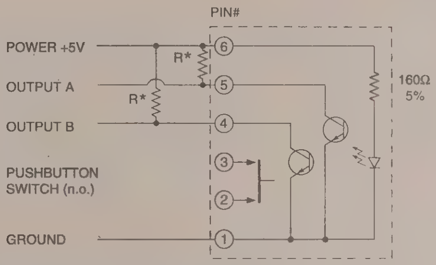


*External pull up resistors required for operation.
8.2kΩ is suggested for TTL; 3.3kΩ is suggested for CMOS.

Type	Code Output
61C22-03-01-01	Binary
61C22-04-01-01	Gray

2 BIT QUADRATURE CODE OUTPUT

Code output can be detected for direction of rotation and number of steps. Provides ability to move cursor on a screen or manipulate a readout. Integral pushbutton switch provides data entry.



*External pull up resistors required for operation.
8.2kΩ is suggested for TTL; 3.3kΩ is suggested for CMOS.

Output as related to switch positions is shown at right. Waveform is shown at left.

REED SWITCHES

HAMLIN INC

REED SWITCHES • REED RELAYS • POSITION SENSORS

QUALITY ELECTRONIC COMPONENTS SINCE 1949

HAMLIN INC.
612 East Lake Street
Lake Mills, WI 53551 USA
Phone 414/648-3000 FAX 414/648-3001

As the largest western manufacturer of reed switches, we offer the most diverse product line in the business. Dry and mercury wetted magnetic reed switches are designed and produced for reliable operation under the most hermetically sealed for safe dependable use in hostile atmospheres. We offer the benefits of both sputtered and electro plated contacts.

For detailed product information send for the Hamlin Reed Switch Catalog. The catalog provides complete information regarding specifications, dimensions, theory of operation, magnetic actuators, and reed switch application data.

For a comprehensive engineering Reed Switch Catalog, contact factory. (High Vaccum Available)

High Reliability Supported by Unique Technology.

Flux Scanning Method:

In spite of severe control of the sealing process, there is a slight probability that foreign matter such as magnetic particles may enter the glass. After extensive study in the detection of micro impurities, OKI has adopted the highly reliable flux scanning method. In flüx scanning, external magnetism is moved so that foreign matter near the reed is forced to jump to the contact part. The contact resistance then measured is used as the standard for the selection of characteristics. We have thus succeeded in remarkably improving the reliability of reed switches by replacing conventional visual checking with the latest flux scanning method.

EXCLUSIVE AGENT FOR **OKI** REED RELAYS IN USA AND CANADA

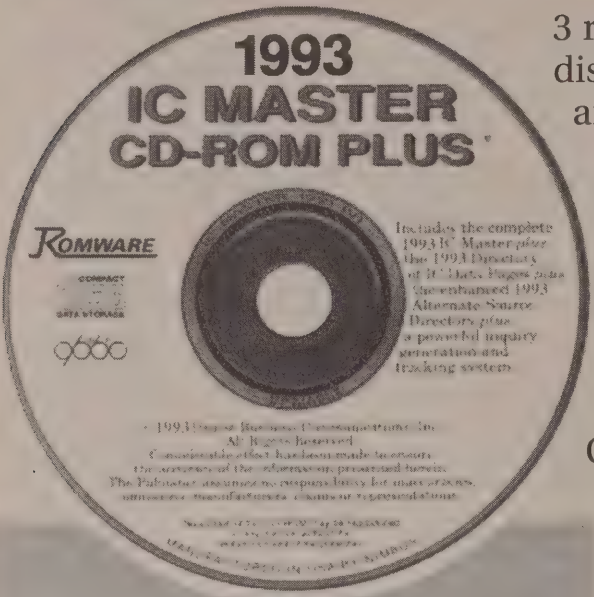
IC MASTER *CD-ROM PLUS*



1993
IC MASTER
CD-ROM PLUS
ROMWARE
Includes the complete 1993 IC Master plus the 1993 Directory of IC Data Pages plus the enhanced 1993 Alternate Source Directory plus a powerful inquiry generation and tracking system

3 reference sources on a single compact disk! **CD-ROM PLUS** is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. **CD-ROM PLUS** also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- **You can find the exact IC you need in seconds...**
- **Compare specs on your screen...**
- **Print the search results directly to your computer or printer!**

PLUS...

- **You can access over 1,100 manufacturer's data sheets and send them to your laser printer.**

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

JOIN THE CD-ROM BANDWAGON.

A Series Pushbuttons, Selector & Keylock Switches

Dimensions in inches (mm).

Features

- Compact .630"(16mm) diameter mounting
- Switching from 3A, 250V AC/DC maxmium down to 1mA, 5V AC/DC
- Oiltight IP65 or enclosed IP40 construction
- 1 Form C and 2 Form C contact configuration
- Pushbutton units available in non-illuminated and illuminated models
- Round, square and rectangular lens/buttons available in standard and large size
- Choice of LED and incandescent lamp
- Momentary or alternate switch action
- Keylock and selector switches available in 2 and 3 postions

Contact Ratings

Contact Configuration: 1 or 2 Form C
Contact Material: Gold-clad Silver
Maximum Switching Load: 3A, 250V AC/DC
Minimum Switching Load: 1mA, 5V AC/DC

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

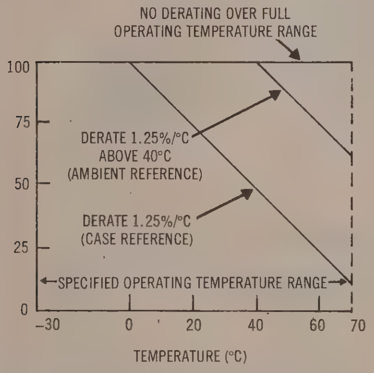

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

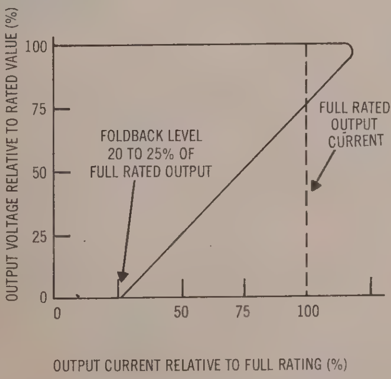

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

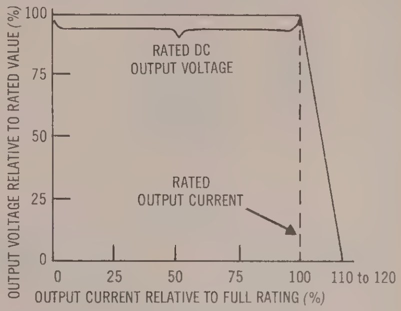

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

SWITCHLOCKS

Illinois Lock Company A DIVISION OF THE EASTERN COMPANY

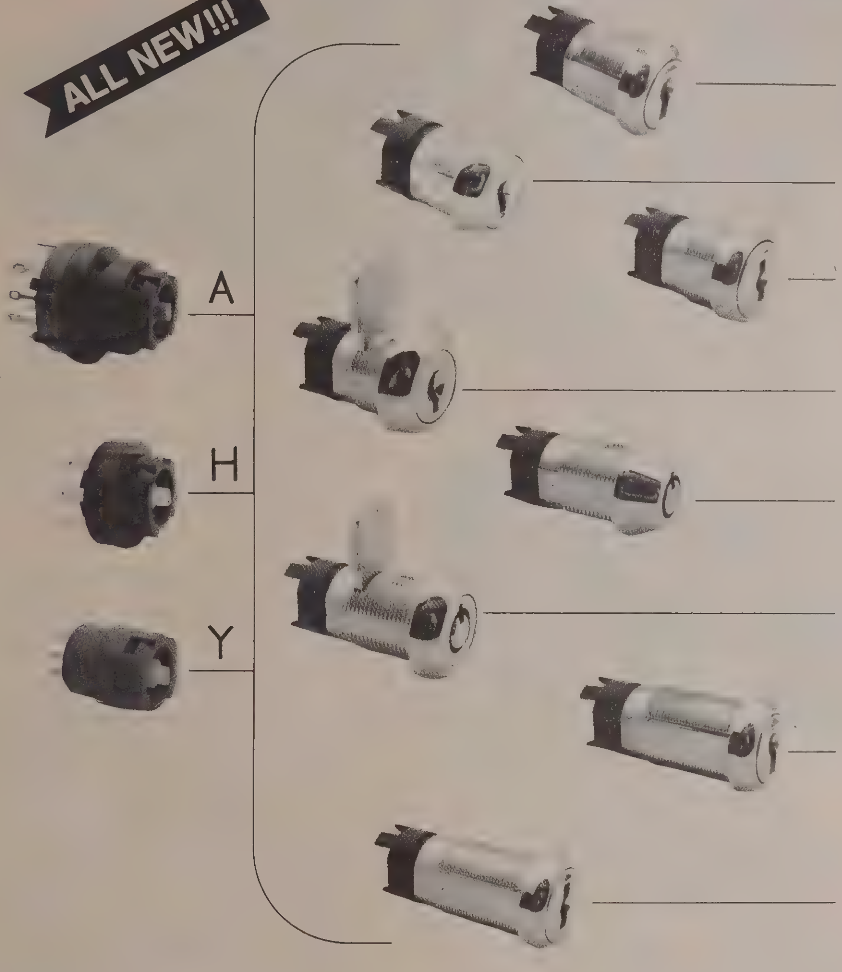
VERSATILE SWITCHLOCK LINE OFFERING VARYING LEVELS OF SECURITY ALONG WITH A WIDE RANGE OF ELECTRICAL RATINGS IN A CONVENIENT SNAP TOGETHER UNIT.

ALL NEW!!!



LQ25 5 TUMBLER MECHANISM. SINGLE BITTED KEY.

LQ26 4 TUMBLER MECHANISM. SINGLE BITTED KEY.

LQ27 6, 8, OR 10 TUMBLERS. DOUBLE BITTED KEY.

LQ28 CAM/SWITCHLOCK. 4 TUMBLER MECHANISM. SINGLE BITTED KEY.

LQ29 7 PIN TUMBLERS. TUBULAR KEY.

LQ30 CAM/SWITCHLOCK. 7 PIN TUMBLERS. TUBULAR KEY.

LQ31 MAINTAINING/MOMENTARY OR DOUBLE MOMENTARY. 5 TUMBLER MECHANISM. SINGLE BITTED KEY.

LQ32 THE 'DUO' MECHANISM. FEATURING A 14 TUMBLER SECURITY MECHANISM WITH A TRIPLE BITTED KEY

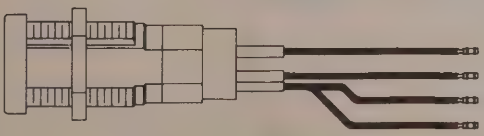
ELECTRICAL RATINGS

A SERIES
CONTACT RATING: Switch—2.5 AMPS @ 125 V AC or 28 V DC; 150 mA @ 250 V AC or DC (UL/CSA).

H SERIES
CONTACT RATING: 12 AMPS @ 125 V AC or 28 V DC; 6 AMPS @ 250 V AC; 1 AMP @ 125 V DC (UL/CSA).

Y SERIES
CONTACT RATING: 4 AMPS @ 125 V AC or 28 V DC; 2 AMPS @ 250 V AC (UL/CSA).

LET **Illinois Lock Company** BE YOUR HARNESS SUPPLIER.



SEND US YOUR REQUIREMENTS AND YOU CAN RECEIVE YOUR SWITCHLOCK QUOTATION WITH AND WITHOUT THE WIRE HARNESS.

WORLD'S LARGEST SELECTION OF SWITCHLOCKS FOR STANDARD AND OEM APPLICATIONS.

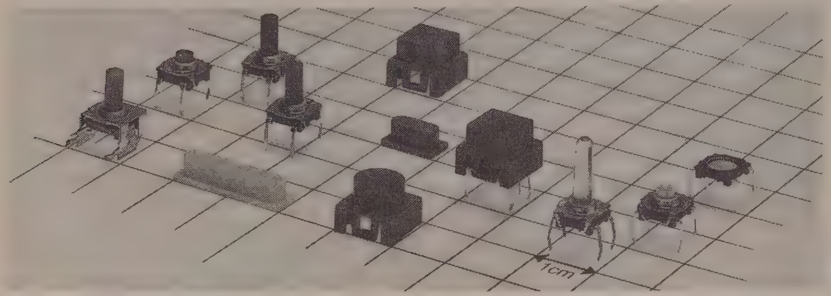
ITT Schadow

Key switches and Push Button Switches

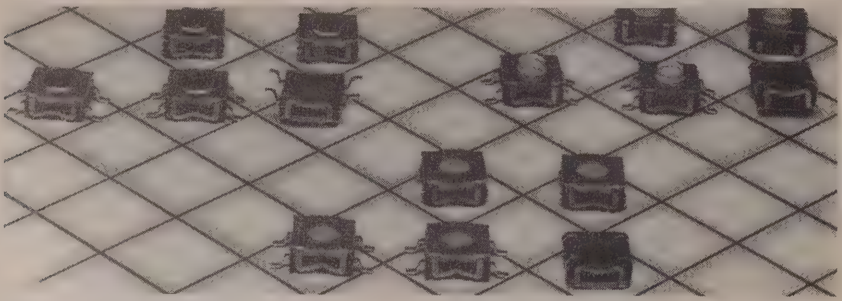


KSA SERIES

High Volume - Key Switches

The KSA family of Ultra-Miniature key switches are designed for applications needing compact PC board spacing. Furthermore, reduced processing cost and simpler material handling are direct results of the innovative KSA design. Constructed in a standard IC dimension, the KSA can be auto insertable and is available sealed to an EIA standard for soldering and washing.

- ☐ Sealed to flux
- ☐ Straight terminals for auto insertion
- ☐ Silver or Gold contacts
- ☐ Sealed for soldering and immersion cleaning per EIA 448-2 optional
- ☐ Bent terminals for board retention
- ☐ .200 x .300 (5.08 x 7.62) footprint size for compact designs
- ☐ ESD terminal for component protection
- ☐ Custom actuator lengths available, please consult factory.

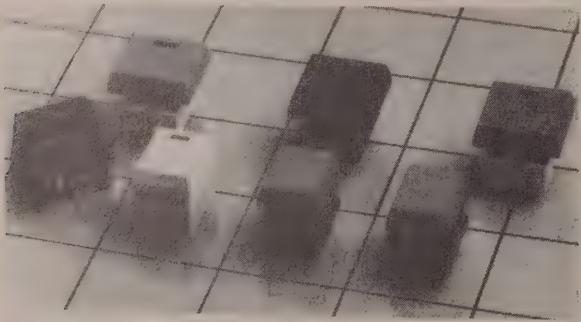


KSC SERIES

Surface mount Key switches

The KSC family of ultra low profile SPST key switches are designed for surface mounting technology (SMT). The KSC is the first surface mount key switch to sustain all the major (SMT) soldering processes. The KSC is also compatible with most automatic insertion equipment for reduced manufacturing assembly costs.

- ☐ Positive tactile feedback
- ☐ With or without raised actuator
- ☐ Operating force 160, 300, or 500 grams
- ☐ Silver or Gold contacts
- ☐ Tin plated terminals for easy soldering
- ☐ Gull wing or J-type terminal
- ☐ Conform to main soldering methods for surface mounted components
- ☐ Can be used with Major Automatic "Pick & Place" Machines
- ☐ Package is thermoformed tape on reel of 2000 pieces



DIGITAST

High Performance - Key Switches

Digitast is a versatile modular electronic component specially designed for use with dual in-line packages. The switch has vibration free, short smooth travel through it's pivoting cap design.

- ☐ Short travel .120 (3.00mm)
- ☐ Over center spring contact system
- ☐ Dual in line package dimensions
- ☐ Two standoffs for ease of cleaning and parallel mounting
- ☐ Long life: over 5 million operations momentary action
- ☐ Gold contacts
- ☐ Push/push action
- ☐ Custom caps available
- ☐ Tactile feel
- ☐ "Outstanding Design" award winner
- ☐ Double or triple caps for keyboard use
- ☐ Sealed terminals standard
- ☐ Incandescent STFB option
- ☐ Legending, 27 Cap styles
- ☐ SPDT contacts, ESD protection

ITT Schadow

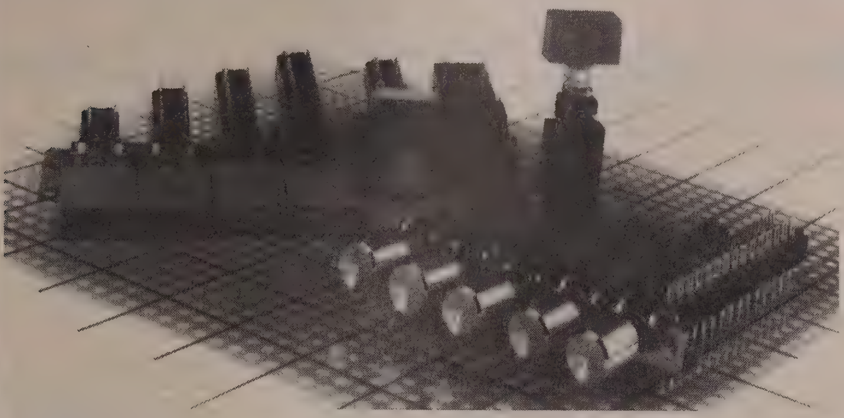
Key switches and Push Button Switches



F SERIES

Miniature Push Button Switches

F Series Push Button Switches form a versatile system of modules, and with almost infinite variations cover a wide range of applications.

- ☐ Constant coil spring tension at the contact points provide positive self-cleaning action
- ☐ Up to 16 poles per module
- ☐ Terminal styles optional
- ☐ Mounting frames (chassis) with maximum 23 positions and six variations of spacing
- ☐ Configurations with illuminated push buttons
- ☐ Configurations with lampless status indicators
- ☐ Custom designs
- ☐ Plunger extensions
- ☐ Enclosed housing
- ☐ Choice of power switches
- ☐ Line switches UL, CSA and VDE recognized and certified

DESCRIPTION

Only the terminal base of this unique switch is exposed to the soldering and cleaning process. The Mr. Clean Series 39 base is compatible with fluorinated, chlorinated and aqueous cleaning methods. After the cleaning process is complete, the switch body is snapped onto the switch base for a contaminant-free, reliable switch.

Bifurcated, silver plated switch contacts provide the proven switching integrity required for logic loads. The Mr. Clean Series 39 switch has a unique wiping, self-cleaning action that maintains contact reliability.

SWITCH SPECIFICATIONS

Characteristics:

Contact rating: 0.25 AMP @30 VDC max. resistive

Dielectric withstanding voltage: 1,000 VRMS (1 milliamp max. leakage)

Life: Momentary: 250,000 cycles

Maintained: 25,000 cycles

Button travel: .120 nominal

Operating Force: 8 Oz. nominal

Resistance to solder heat: 500°F (260°C) for 2 Sec.

MECHANICAL AND LED INDICATOR FEATURES

- ESD (Electrostatic discharge) resistant to 15 kV
- Compact size
- Contacts are designed for reliable low energy switching
- Switch contacts have Low audible noise—Low voltage noise
- Momentary and maintained action versions
- Compatible with most common soldering and cleaning processes*

*Deionized aqueous wash is recommended. Consult ITW Switches regarding your specific procedures.

MECHANICAL INDICATOR FEATURES

- Maintained action provides LSR function (Last Status Retention)
- "Snap-in, stay-put" design (patent applied for) keeps the switch in position during wave soldering
- Unique indicator provides dual color-coded status
- Status indicator function requires no power

ORDERING INFORMATION

Consult factory regarding any special requirements.

ITW PUSHBUTTON SWITCHES

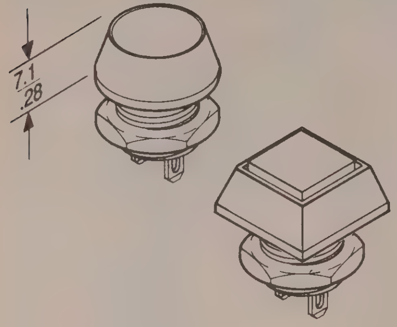
SERIES 59

Miniature Sealed Pushbutton Switch



FEATURES

- Non-spark material—
  To British NCB 481/1965
- Wide temperature range—Up to 125°C (257°F)
- Sealed product—To IP67
- High environmental specification
- Impact resistant
- Gold contacts
- U.S. Mil-S-8805D

ELECTRICAL DATA

- Dielectric strength—1000 VAC
- Insulation resistance—1 G Ω
- Contact resistance (max)—50 m Ω
- Current rating (typical)
  - —400 mA at 32 VAC resistive
  - —100 mA at 50 VDC resistive
  - —125 mA at 125 VAC resistive
- Life (max)—5 x 10⁵ cycles @ max power
- Switching power (max)—16 VA AC

MECHANICAL CHARACTERISTICS

Travel (nom)	2.3 mm (0.090 in)
Life(max)	6 x 10⁵ cycles
Operating force (nom)	3 N (14 oz)
Contact bounce (nom)	1 mS
Panel thickness (max)	3 mm (0.118 in)

ENVIRONMENTAL AND PHYSICAL DATA

Ingress protection	IP67 OF IEC 144
Shock	100G
Operating temp range	−55°C to +125°C (−67°F to +257°F)

MOUNTING INFORMATION

The Series 59 mounts easily into panels of minimum 1 mm (0.025 in) and maximum 3 mm (0.118 in) thickness. Front panel sealing to IP67 is achieved by a sealing 'O' ring fitted into a pre-machined groove on the body of the switch before it is inserted into the panel hole cut out.

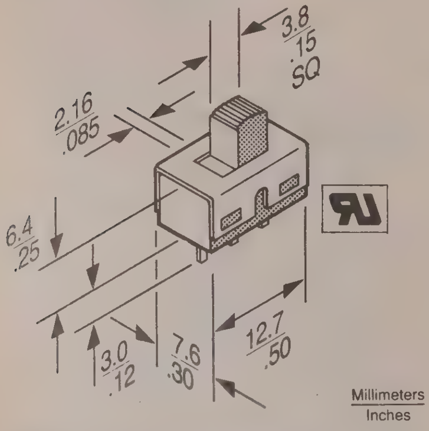
Button Color	Std. Round Bezel	Square Bezel
Black	59-111	59-211
Red	59-112	59-212
Green	59-113	59-213

Consult factory for non-standard options.

ITW SLIDE SWITCHES

MINI MIKE™

Miniature Snap-Action Slide



FEATURES

- Available in SPST, SPDT, DPDT, Form Z circuits
- Contacts are hard gold over barrier
- Terminal types—straight, PC, right angle PC
- Some versions UL recognized
- Available button heights from .10 to .50
- Custom actuators, terminals, button colors and hot stamping available
- Temperature range: −40°C to +100°C

Part No.	Circuit	Mount	Height	Color	Rating
023-021-031	SPST	Right Angle PC	.20	Black	1 amp @ 125 VAC
023-021-040	SPST	PC	.20	Black	1 amp @ 125 VAC

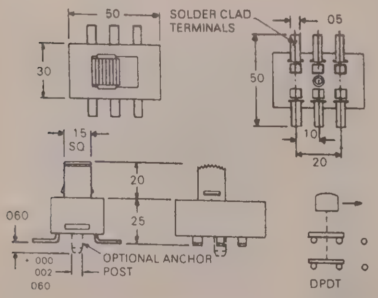
023-021-125	DPDT	PC	.20	White	100 ma @ 125 VAC
023-021-304	Form Z	PC	.14	Black	500 ma @ 125 VAC

MR. CLEAN® SMD

Contamination-Free Surface Mounted Slide Switch

Part No. 224-440-020

Inches



FEATURES

- Low cost anti-contamination two-piece construction
- Optional anchoring pin insures stability
- Eliminates solder flux and cleaning residue problems
- Designed specifically for surface mount applications
- 24mm tape or tube with terminal bases for automatic insertion
- Compatible with medium size pick and place machines handling standard SOIC and PLCC components
- Conforms to EIA Packaging Spec. #481A
- Glass-filled Ryton base withstands any type IR or VaporPhase processing
- Gold contacts are ideal for high reliability and low energy use

HOW IT WORKS

① Mount lower base half onto P. C. board manually or automatically. Then solder same as other components on board. Clean board in standard manner.

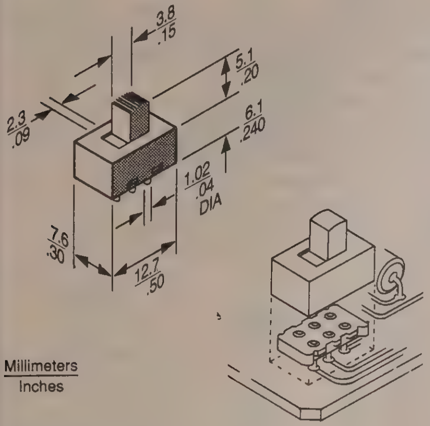
② After board is cleaned and dried—simply snap the clean uncontaminated upper switch half in place—by hand. No tools, special equipment or orientation needed.

ITW Switches 6615 W. Irving Park Rd. • Chicago, IL 60634
(312) 282-4040 • FAX (312) 545-4450

ITW SLIDE SWITCHES

MR. CLEAN®

Wave Solderable, Miniature Slide



FEATURES

- Low cost
- Anti-contamination design
- Unique 2-piece assembly
- Gold contacts
- Insert molded base
- Standard configurations: SPDT, DPDT,
- Life expectancy (mechanical): 10,000 actuations
- Temperature range: −40°C to +100°C

Part No.	Circuit	Terminal	Rating
124-240-020	SPDT	PC	250 ma @ 125 VAC
124-440-020	DPDT	PC	250 ma @ 125 VAC

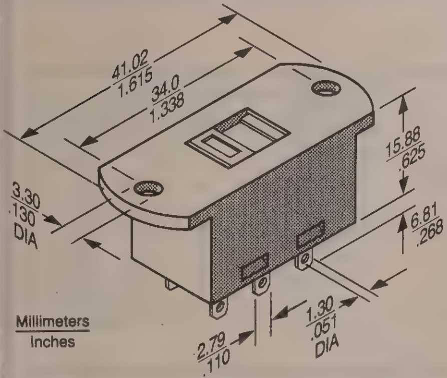
HOW IT WORKS

① Insert lower base half into P.C. board by hand or with automatic insertion equipment. Then wave solder same as other components on board. Clean board in standard manner to remove excess flux.

② After board is cleaned and dried — simply snap the clean uncontaminated upper switch half in place — by hand. No tools, special equipment or orientation needed.

SERIES SE

Line Voltage Selector



CEE24

FEATURES

- Variety of terminals
- Top of flush handle stamped to indicate which voltage is selected; various markings available
- Snap-in version available
- Electrical Life: 10,000 cycles
- Handle Height: Flush or ¹¹/₃₂
- International Approvals: UL-CSA-VDE-SEMKO Designed to meet requirements of CEE Publication 24 and the IEC
- Contact Ratings: UL, CSA & VDE – 10 amp 125 VAC; 5 amp 250 VAC T85

Part No.	Terminals	Dimensions
18-000-0016	110 QC	1.615L x .650W x .625H

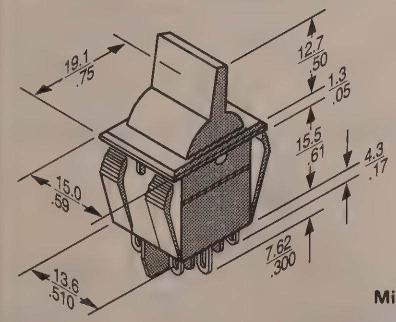
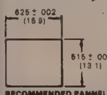
ITW ROCKER SWITCHES

SERIES P271/R271

Double-Pole Mini-Paddle and Rocker Switches





RECOMMENDED PANNEL CUTOUT: INCHES (MILLIMETERS)
SNAPS INTO PANEL FROM: .030" TO .093" THICK.
(0.8 TO 2.4) THICK

FEATURES

- Highly reliable double pole Mini-Paddle or Rocker Switches in the smallest sizes ever
- DPST or DPDT circuits available
- Large diameter solder terminal holes for faster soldering operations
- UL, CSA, VDE, SEMKO, DEMKO, NEMKO and SETI approved versions
- Quick and easy snap-in panel mounting
- Fits tiny .625 x .515 panel cutout
- Industry standard paddle and rocker styling and color
- Electrical Ratings

	125 VAC	250 VAC
Paddle	6A	4A
Rocker	5A	3A

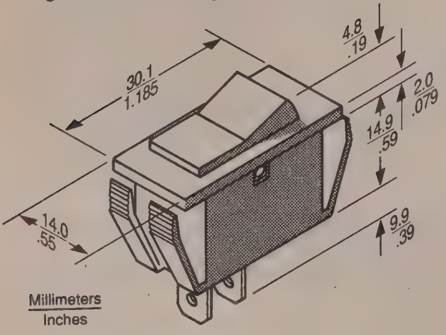
ITW ROCKER SWITCHES

SERIES 16X
SERIES 17X

Double-Pole and Single-Pole Lighted and Non-Lighted



FEATURES

- Snaps into panels from .015″ (0.4) to .125″ (3.2) thick
- Recommended cutout (16X): .48″ (12.2) x 1.08″ (27.4)
  (17X): .880″ + .005/–.000 (22.4) x 1.080″ ± .005 (27.4)
- Wide range of circuits, some VDE approved
- Variety of incandescent and neon lamps
- Terminal options—quick connect and solder lugs
- Variety of colors; including custom
- Matte or gloss finish
- Hot stamping & metal bezels
- Matching panel lights available
- Paddle versions available; non-lighted only
- Ratings: UL Recognized and CSA Approved

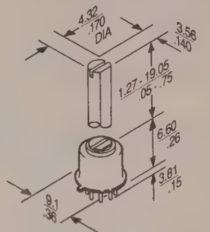
ITW ROTARY SWITCHES

SERIES TO-5 SPASAVER ROTARY



FEATURES

- Subminiature package size (.36" diameter)
- Up to 8 positions at 45° indexing, 1 pole
- Low energy switch contacts (gold over nickel plating)
- Glass to metal sealed header
- 0.025" PC terminals on 0.200" bolt circle
- Shaft diameter 0.172"
- Shaft length 0.31" on 0.56" from PC board
- Contact rating: 500 ma @ 125 VAC
- Life expectancy: in excess of 10,000 operations
- Options available: Vinyl protective boot and plastic knob

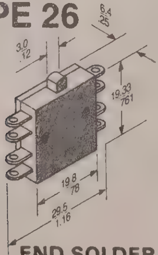
ITW BASIC SNAP-ACTION SWITCHES

TYPE 26



END SOLDER

MIL Spec

Millimeters
Inches

FEATURES

- DPDT (Form ZZ) contact arrangement
- Provides the option of controlling up to 4 isolated circuits
- May be wired externally to provide two commons to form standard DPDT (Form CC) switch
- Standard contacts are fine silver or gold plated
- End or side solder terminals
- Variety of actuators available
- Ratings: UL Recognized File No. E27957 8 Amps @ 125/250 VAC 75-80% PF
- 26-888051 and 26-988051 meets requirements of MIL-S-8805/77

MECHANICAL CHARACTERISTICS

Pretravel: .050 max.
Over travel: .012 min.
Operating Force: 12 ± 4 oz.
Release Force: 5 oz. min.
Movement Differential: .020 = .010 - .005
Operating Point - .396 ± .015 (from mounting holes)

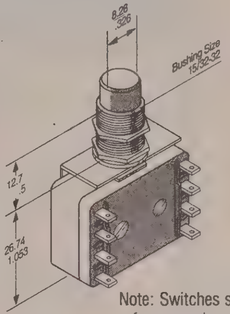
22-304	DPDT-DB (Form ZZ)	Side Solder
22-504	DPDT-DB (Form ZZ)	¼″ Quick Disconnect



Note: Switches shown for reference only and are ordered separately.

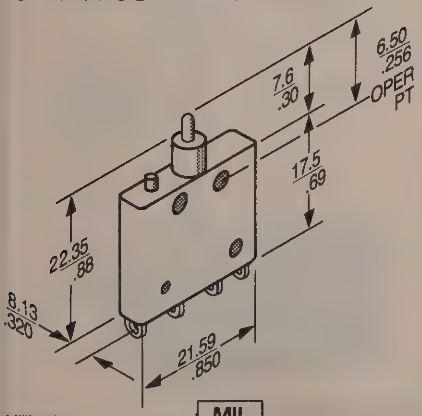
ACTUATORS–MECHANICAL CHARACTERISTICS*

Part No.	Actuator	Operating Force	Release Force	Pre-Travel	Over-Travel	Movement Differential	Operating Point
72-2080	Over Travel (2)* Plunger	17 ± 5 oz.	4 oz. Min.	.060 Max.	.215 Min.	.030 ± .007	.828 .031

(1)* when used with 22-104 Basic Switch or 22-204 Basic Switch
(2)* when used with 22-304 Basic Switch

ITW SEALED SWITCHES

TYPE 65



MIL Spec

FEATURES

- Ratings up to 15 amps resistive @ 28 VDC
- Provides the ruggedness and reliability to meet demands of industrial & military applications
- Available with variety of basic switches: Type 11, Type 16, Type 22
- Meets the (watertight) requirements per MIL-S-8805 enclosure design symbol 3
- Wide choice of circuitry, actuators and mountings
- Optional electrical connections — solder, quick disconnect or screw terminals
- Wire leads with or without connectors or plugs
- Temperature range for standard units −65°F to +185°F

SUBMINIATURE SEALED SWITCHES (SOLDER LUG TERMINALS STANDARD)

Part No.	Actuator	Circuitry	P.T.	O.T.	O.F.	R.F.	M.D.
65-2010	Pin Plunger	SPDT-DB Form Z	.050 max.	.012 min.	24 ± 8 oz.	8 oz. min.	010- 030
65-3010	Roller Lever	SPDT-DB Form Z	.120 max.	.025 min	16 oz. max.	5 oz. min	058 max
65-4010	Over Travel	SPDT-DB Form Z	.070 max.	.187 min.	.025 max.	8 oz. min.	.020 ± .010

Electrical Ratings: 5A IND — 28 VDC 5A RES — 125/250 VAC

MINIATURE SEALED SWITCHES

Part No.	Actuator	Circuitry	P.T.	O.T.	O.F.	R.F.
65-430098	Over Travel	SPDT-DB Form Z	.070 max.	.140 min.	4.0 lb. max.	1.8 lb min

Electrical Ratings: 7.5A RES, 7.5A IND – 28VDC 10A RES – 125/250 VAC

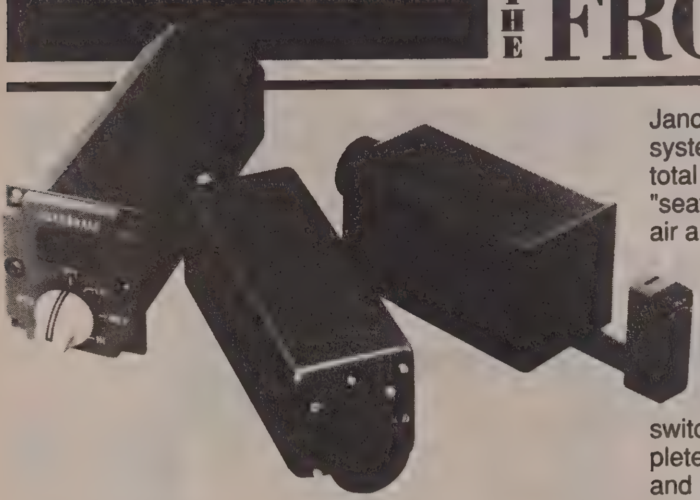
THE FRONT LINE IN



Janco MIL Spec, QPL rotary switches and switching systems are engineered for maximum reliability. This total dedication to quality has earned Janco switches a "seat" on virtually every commercial, space, and military air and spacecraft in the free world. These two pages provide basic specifications for Janco's five extensive families of standard rotary switches —all extensively field proven for critical applications. Working from these proven technologies, Janco engineers can easily customize a switch optimum for your application. Or for more complex switching functions, Janco can design and build complete switching systems that combine multiple switching and related electromechanical functions while decreasing component count, weight, and overall system size.

SERIES A

Miniature Rotary Selector Switches

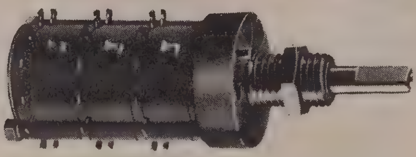
- Built to MIL-S-3786
- Life 10,000 Cycles
- Carry 10 Amp Continuous
- Make & Break 2-5 Amp Res. 115VAC/28VDC
- Torque to 5 In. Lbs.
- M Series QPL to MIL-S-3786/4

Index	Positions	Poles/Deck
15°	24	1,2,3,4,6
20°	18	1
22.5°	16	1,2,4
30°	12	1,2,3,4,6
36°	10	1,2
45°	8	1,2
60°	6	1
90°	4	1

SERIES AA

Designed for Maximum versatility, Series AA switches feature Series A configuration and performance with adjustable stops.

SERIES B

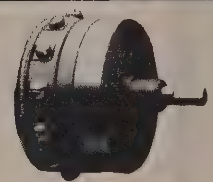


Micro-Miniature Rotary Selector Switches

- Built to MIL-S-3786
- Life 10,000 Cycles
- Carry 8 Amp Continuous
- Make & Break .25 Amp Res. 115VAC/28VDC
- Torque to 2 In. Lbs.
- M Series QPL to MIL-S-3786/13

Index	Positions	Poles/Deck
30°	12	1,2,3
36°	10	1,2
45°	8	1,2

SERIES C



Power Rotary Switches

- Built to MIL-S-6807
- Life 10,000 Cycles
- Carry 15 Amp Continuous
- Make & Break 5-10 Amp Res. 115VAC/28VDC
- Screw Terminals Only
- Torque to 8 In. Lbs.

Index	Positions	Poles/Deck
22.5°	16	1
30°	11	1,3
36°	9	1
45°	7	1,2
90°	4	1,2

TYPICAL APPLICATIONS OF JANCO SWITCHES

- ☐ E.C.M. System Switch, Instrumentation Console
- ☐ Windscreen Wiper Switch
- ☐ Fire Control Unit
- ☐ Engine Fire Shut Off Switch
- ☐ Tank Turret Sight Control Switch
- ☐ NVIS Green Lighting (Night Vision Imaging System)
- ☐ Temperature Selector Switch
- ☐ Software Data Loader
- ☐ APU Fire Control Switch
- ☐ Heating System (Cabin Temperature Control Switch)
- ☐ Combat Systems Display Console
- ☐ Safety Critical Power Switch
- ☐ Radar Warning Control

SWITCHING TECHNOLOGY

General Specifications

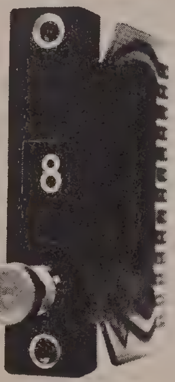
- All Switches Meet or Exceed Environmental Condition Requirements of MIL-S-3786 and MIL-S-22710.
  - Explosion Proof / MIL-STD-202
  - Salt Spray / MIL-STD-202
  - Sand and Dust / MIL-STD-202
  - Shock High Impact / MIL-STD-202
  - Shock Medium / MIL-STD-202
  - Vibration / MIL-STD-202
  - Altitude to 70,000 Feet
  - Moisture Resistance / MIL-STD-202
  - Thermal Shock / MIL-STD-202
  - Panel Seal
- All Switches Offer Maximum Protection Against RFI/EMI
- All Switches Are Totally Enclosed.

Options

- O-Ring Shaft and Panel Seal
- Combination of Decks
- Bridging Contacts
- Momentary Positions
- Adjustable Stops
- Solenoid Driven
- Solenoid Latched
- Keylock
- Gang Switches
- Concentric Shaft Switches
- Isolated / Guarded Positions

SERIES D

Pushbutton Rotary Switches



- Built to MIL-S-22710
- Life 50,000 Cycles
- Carry 3 Amp Cont.
- Make & Break. .125 Amp Res. 115VAC/28VDC
- Available with Standard or Coded Outputs, Special Codes Also Available
- M Series QPL to MIL-S-22710/18/23/30

	MIL-S-22710/23			MIL-S-22710/30	MIL-S-22710/18

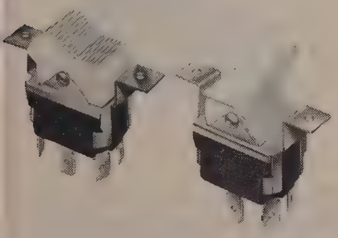
ROCKER AND PADDLE SWITCHES



- **Distinctive styling**—With your choice of standard or specially designed actuators to meet style requirements.
- **Reliability**—Mechanical excellence from one of the most experienced manufacturers of switches of this type.
- **Extra electrical capacity**—20 Amp models provide an extra margin of reliability.
- **Broad range of variations**—Terminals, circuitry, coverplates, actuators are available or can be engineered to fit your needs.

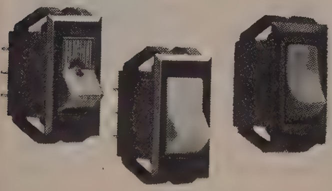
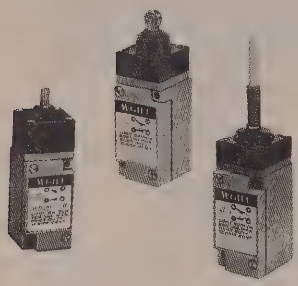
MINIATURE ROCKER SWITCHES



- **Choice of Stylette™**—(new softer designer lines that enhance product styling) **or standard miniature rocker switches.**
- **Choice of illuminated or solid** two surface smooth colored rocker.
- **Rocker colors available**—
  Light-Clear-Amber-Red-*Green-*Blue
  Non-lighted-White-Black-Red
  (other colors, consult factory).
- **Plastic snap-in bezels**—for fast easy installation.
- **Available in black & white bezels** (other colors, consult factory).
- **Terminals**—1/4″ quick disconnect-standard. Also available 16-ga. wire.
- **Lamps**—115V AC neon standard. Also available 6V AC or DC, 14V AC or DC, 28V AC or DC & 250V AC neon.

McGILL ELECTRICAL PRODUCT GROUP, VALPARAISO, IN 46383

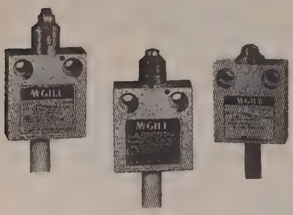
1506 SERIES ROTARY ACTUATED SWITCHES



- plug-in and non plug-in body styles with convenient on-the-spot adjusting
- wobble actuated switches have flexible levers that operate with any movement except direct pull
- rollers on side plungers in horizontal position
- head adjusts clockwise and counterclockwise
- light on indicator versions wire to N.O. circuit
- Meet NEMA 1,3,4, and 13 standards

Circuitry: SPDT, DPDT
Types: Side/Top Rotary, Maintained, Center Neutral, Plain Top, Roller, Roller-Side Plungers, Wobble, Coil Spring
Body Styles: Plug-in, Non-Plug-in 1/2″ or 3/4″ conduit
Make/Break Voltages: 120, 240, 480, 600 VAC; 120, 240 VDC
UL Listed
CSA certified

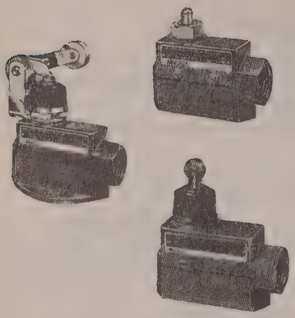
1505 SERIES MINIATURE PRE-WIRED ENCLOSED SWITCHES



- pre-wired at factory with industrial quality cable (SJTO)
- eliminate need to wire at switch, so they're ideal for use in limited access areas
- gang-mountable to build multi-plunger switch .63″ between plunger
- seals keep liquids from entering switch cavity
- complete range of actuators, including plain and roller plungers, and side rotary
- Meet NEMA 1, 3, 4, 12 and 13

Circuitry: SPDT
Types: Plain, Boot-Sealed, Roller and Cross-Roller Plunger, Side Rotary
Make/Break Voltages: 120, 240 VAC; 28 VDC
UL Listed
CSA certified

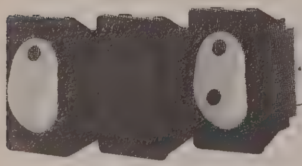
1502 SERIES COMPACT ENCLOSED SWITCHES



- side and flange mounted switches available with or without actuator seal boots
- combination insulator/seal cemented inside bottom enclosure
- lead washers seal mounting holes on side mount switches
- side mounts installed with #6 screwshead adjusted clockwise and counterclockwise operation
- removal of bottom enclosure exposes terminals for easy wiring
- NEMA 1 rated

Circuitry: SPDT, DPDT
Types: Straight, Roller Plunger, Roller Lever, One-Way Roller Lever, Manual, Coil Spring
Body Styles: Side or Flange mounted, with/without seal boot
Make/Break Voltages: 125, 250, 480, 600 VAC; 125, 250 VDC
UL Listed
CSA certified

0852 EURO-STYLED ROCKER SWITCHES



- patented sleek, rounded ultra-modern design
- rugged, reliable rocker mechanism proven in millions of applications
- fits standard cutouts
- available with moisture-resistant seals
- .187 spade, screw terminals, solder and wire leads optional

Circuitry: SPDT, DPDT
Types: one-light, two-lights, non-lighted with three different rocker colors: red, white, black
Electrical: 15A, 277V AC; 3/4 HP, 125-277V AC; 6-28V DC Incandescent; 115V Neon
Terminals: 1/4″ Spade
UL Listed
CSA certified

Lock-Out Switches

McGill's new lock-out switch is ideal for applications where safety is critical. Activating the switch requires two separate actions—so accidental operation of equipment or vehicles is virtually impossible. Based on a proven design, the switch is available in single and double pole models in a variety of colors and can be custom imprinted.

MEPCOPAL

Trimmers and Switches.

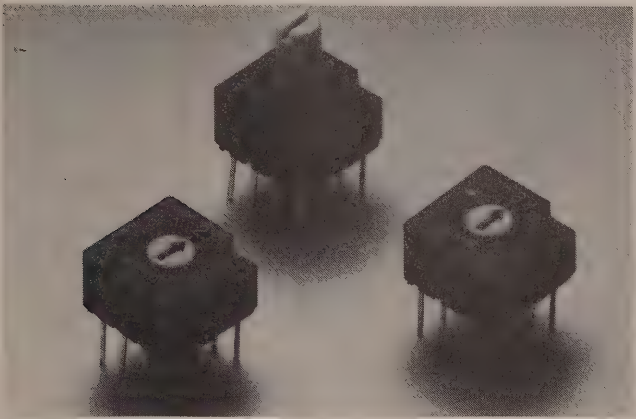
Selector, binary coded dip and key switches

Call 800-JIT1SMD (548-1763)
for additional information
or technical catalog.



SS-10 Series -
10mm dip rotary selector switch.

Sealed to allow for automatic processing. Rotary action for easy setting & stability. Precious metal contacts with self cleaning action. Available in 2 pole - 3 positions or 1 pole - 4 or 6 positions.

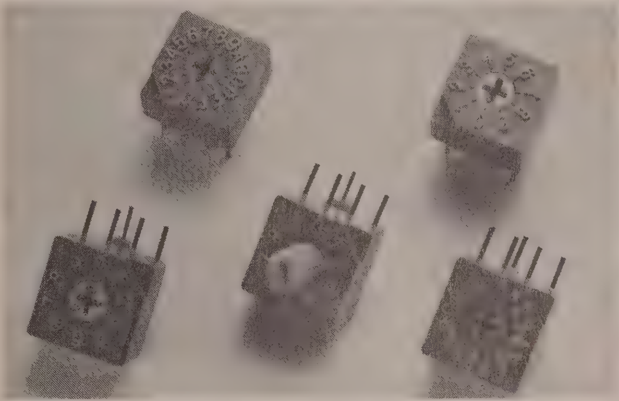
700/720 Series - Compact size keyswitches.

Model 700: 12mm low profile switch offers high reliability & contact rating plus tactile feedback. Surface mount style and assorted keycap types are available.

Model 720: 7mm microminiature switch offers high reliability in a rugged design with excellent solderability. Life span to 1 million operations

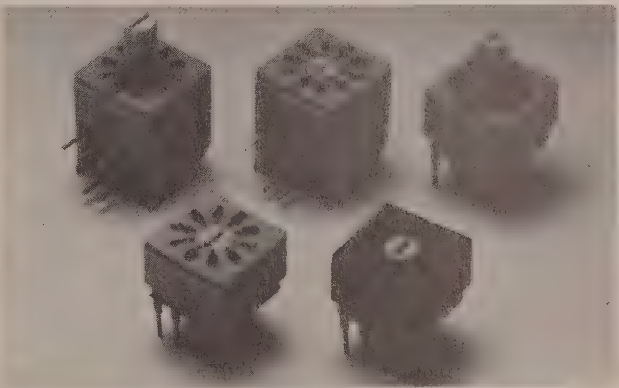
S-8000 Series -
7mm coded dip rotary switch.

8 (BCO) position, octal to binary, real or complementary code, top & side adjust available. Built with precious metal contacts and o-ring sealed for automatic processing. Pin compatible with conventional dip switches.



S-1000/2000 Series -
10mm coded dip rotary switch.

10 (BCD) or 16 (BCH) positions in real or complementary code. Sealed to allow for automatic processing. Built with precious metal contacts. Top or side adjust and knob style available. Pin spacing identical to piano key type dip switches.



S5000 Series - 11mm coded dip switch.

This unique switch is available with built in resistors and/or diode array. 10 (BCD) or 16 (BCH) positions in real or complementary code with precious metal contacts. Top or side adjust and knob style available. The S5000 series simplifies your circuit design.

SUBMINIATURE/MINIATURE BASIC SWITCHES

UX/UM are our newest lower cost subminiature switches. SM subminiature basic switches are a versatile collection of small size and ample electrical capacities. SX subminiature basic switches provide up to 7 amp power load capacity. V3 miniature basic switches put a 25 amp power load capacity and a choice of 11 other electrical ratings into a relatively small package. V7 miniature basic switches have electrical ratings up to 15 amp power load capacity, and offer two versions—commercial and European designed to meet all leading European approval agency requirements.

STANDARD BASIC SWITCHES

Power load switching and motor handling capacity are among the attractions of thumb-size BZ/BA standard basic switches. Double-pole double-throw switching is added by DT switches.

Where there's a need for reliable switching of high capacity systems involving DC motors and solenoids, MT magnetic blowout switches do the job. The 3MN has double-break switching.

SEALED AND HIGH TEMPERATURE BASIC SWITCHES

Specially adapted basic switches include: SE/XE environment-proof switches which protect subminiature SM/SX basic switches within a sealed housing; HM hermetically sealed switches are interchangeable in operating point with the SM switches; HS hermetically sealed switches which parallel the size and mounting scheme of the standard basic switches; and HT high temperature switches for use up to +1000°F.

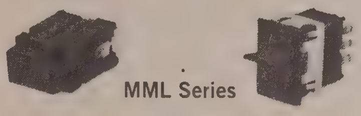
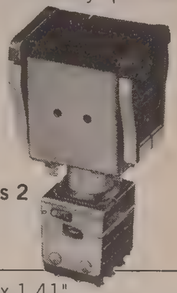
MANUAL SWITCHES

Many options in colors, legending, shapes, sizes, and mounting available as well as power, electronic or solid state switching. AML's comprehensive line blends with other panel components for total display harmony. MML provides a full line of manuals in an economical miniature package. Series 2 provides modular assembly with 1 to 4 section display. Many other pushbutton lines are available. Request Catalog 30 or Catalog 80 for military qualified products.

AML Series



MML Series



Series 2

Because of the many variations of these products a listing is not being given.

PHYSICAL DESCRIPTION **Panel Area**	Pushbuttons: .80" (20,5 mm) square. PB's, paddles, and rockers: .80 x 1.20" (20,5 x 30,5 mm).	PWB mount: .40" (10,2 mm) square and .60 x .40" (15,2 x 10,2 mm), except 2-pole power duty paddles and rockers.	1.0 x 1.41" (2,5 x 35,8 mm) .86 x 1.35" (21,8 x 34,3 mm)
Display	Pushbuttons: .59" (15,0 mm) square and .59 x .99" (15,0 x 25,0 mm). Transmitted, projected, and dead front full and split color. Rockers: Full and split color rockers, with lens. Paddles: Full and split color covers, with lens.	Pushbuttons: 26" (6,6 mm) square and .46 x .26" (11,7 x 6,6 mm). Transmitted color. Rockers: Optional lenses for transmitted color.	.85 x 1.08" (21,6 x 27,4 mm) buttons. 1-4 section display. Transmitted and projected color.
Illumination	Incandescent T-1-3/4 lamps—6, 14, 28 v LEDs—2.4, 5, 10, 15 V Neon lamps—125, 250 V	LEDs—1.7, 2.1, 2.2, 2.3 V Incandescent T-1 lamps—5 V (other voltage avail.) Neon lamps—125, 250 V	Incandescent T-1-3/4 lamps—6, 14, and 28 V.
Behind Panel Depth (max.)	1.7" (43,1 mm)	.67" (17,0 mm)	3.28" (83,3 mm)
Mounting	Snap-in individual, strip, matrix, sub-panel PC board mounting	Printed wiring board, snap-in strip, matrix.	Snap-in flange mount and units with mounting barriers for individual or strip mount.
Termination	Solder, quick-connect, PC board, push-on	Printed wiring board, solder, quick-connect.	Solder, quick-connect and screw terminals.
Sealing	Optional panel seal for pushbuttons.	—	Optional panel seal.
SPECIAL FEATURES	Keylock switches available for controlled access applications.	Mechanically interlocked switches provide latching functions.	Coil equipped units for remote operation (pull-in and hold-in)
CHARACTERISTICS **Electrical Data**	Solid State: 5 or 6-16 VDC Electronic Control: Up to 3 a., 125 VAC Power Duty Push buttons: Up to 10 a., 125/250 VAC Power Duty Rockers, Paddles: Up to 15 a., 125/250 VAC	Solid State: 5-24 VDC Electronic Control: Up to 1a., 125 VAC res. Hall Effect Keyboards

Back in 1968, we revolutionized the keyboard industry by introducing the Hall Effect Series—the first entirely solid state keyboard, and the first to feature such innovations as true N-key roll-over to reduce operator error in high performance applications.

Today, the Hall effect keyboard remains unparalleled in keyboard performance. We offer the Hall Effect Series as completely modular systems, with a choice of output type. So we can configure a keyboard that fits your requirements precisely, in very short order.

If you plan to build your own keyboard—or modify a standard design—you can buy solid state keyswitch modules separately for your special needs. And you can choose from a virtually endless combination of legends, shapes, and colors in sloped, stepped, or sculptured versions.

Request SD Series literature.

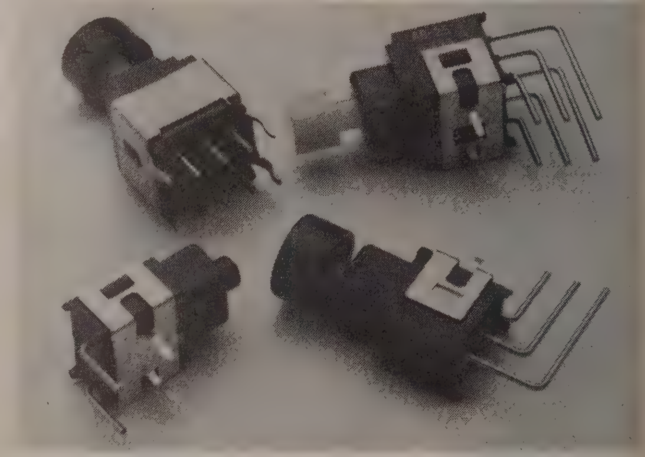
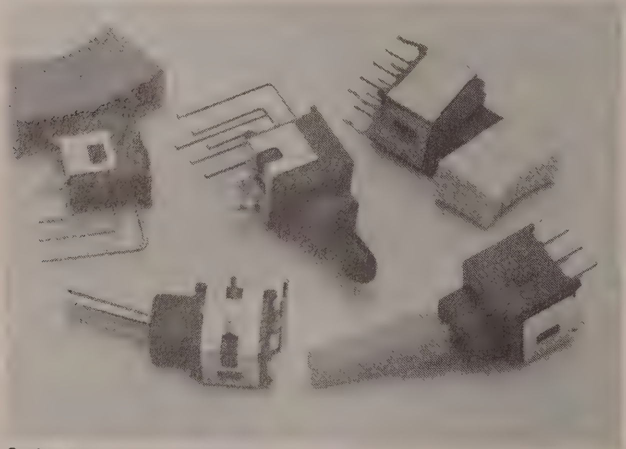
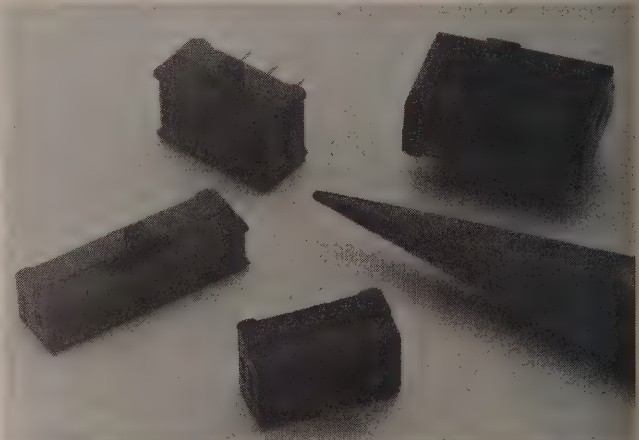
FAX (602) 998-1435



Series AB. Super-subminiature PCB washable pushbuttons. Sealed for automated washing/cleaning. High-rel contacts. SPST, SPDT & DPDT in ON-OFF & ON-ON momentary circuits. 0.4VA max @ 28V AC/DC max. Bracketed/unbracketed straight, right angle, vertical terminals. .213"/.183"/0.80" long plungers. Two cap sizes in red, white or black. **Call 602/991-0942. Ask for EEM Extension.**



Series A. Super-subminiature PCB washable toggles/rockers. Time & money saving automated washing/cleaning, plus ultra-reliable STC contacts. 0.4VA max @ 28V AC/DC max. SPST, SPDT & SP3T in all circuits. Bracketed/unbracketed straight, right angle & vertical .100" x .100" spaced terminations. Numerous toggles, paddles, rockers. **Call 602/991-0942. Ask for EEM Extension.**



Series SS. Unique! Micro-subminiature LED PCB slides. Slide switches as small as .257" x .402". Lighted or non-lighted. SPDT, SP3T &DPDT. 0.1A@30V DC. Top or side-actuated & .100" x .100" terminal spacing for maximum design flexibility. ON-NONE-ON & ON-ON-ON circuits. **Call 602/991-0942. Ask for EEM Extension.**

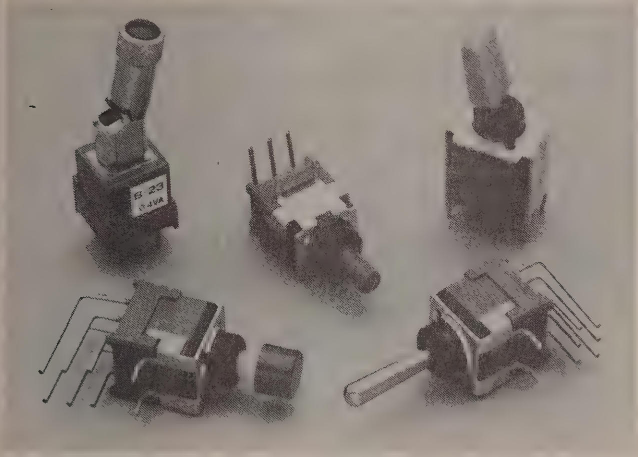
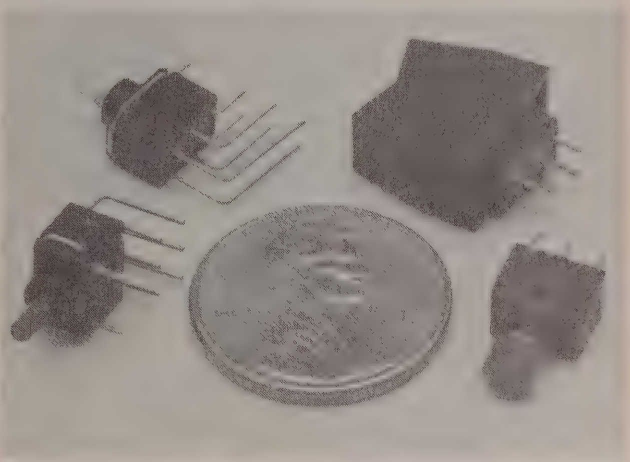
Scottsdale, AZ 85260
FAX (602) 998-1435



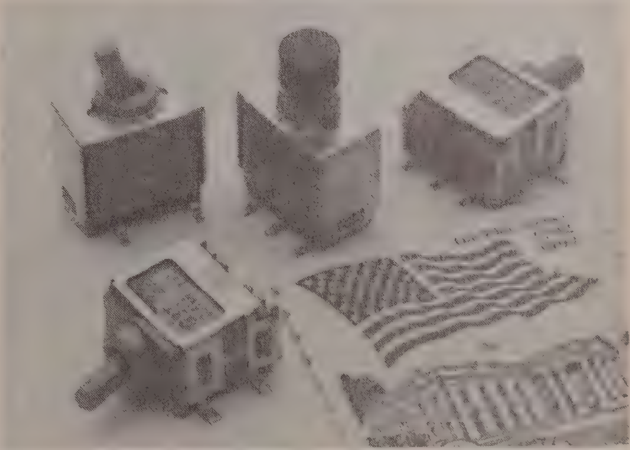
Series B. Antistatic super-subminiature PCB washables.
Antistatic-electricity toggles and pushbuttons. Rating: 0.4VA max @ 28V AC/DC max. SPDT, DPDT & SP3T in 6 circuits. Bracketed or unbracketed straight, right angle & vertical terminations with .100" x .100" spacing. Patented STC contacts. Unique locking lever versions.
Call 602/991-0942. Ask for EEM Extension.

Series SK. Compact bushing & panel mount keylocks.
Crisp detent, self-cleaning contacts, dust resistant interior. UL/CSA recognition, bushing mounted 3A rated SPDT with 1500V dielectric strength. Short .945" length behind panel. Washable types available with straight or right angle PC terminals.
Call 602/991-0942. Ask for EEM Extension.

Series AS. Super-subminiature, high reliability PCB slide switches.
Guaranteed minimum of 50,000 actuations. Rated at 0.4VA max @ 28V AC/DC. Single & double pole with numerous circuit options. Straight, right angle & vertical terminals — all with support brackets. Various actuator lengths available.
Call 602/991-0942. Ask for EEM Extension.



Series G. World's smallest washable PCB switches.
Toggles, rockers, pushbuttons & indicator lights one-third size of super-subminiatures. 0.4VA max @ 28V AC/DC max. Patented hi-rel STC contacts. .100" x .100" straight, right & vertical terminations. SPDT & DPDT. Sealed for automated cleaning. Weighs .25 grams.
Call 602/991-0942. Ask for EEM Extension.



Series G3. Micro-subminiature washable surface mount.
World's smallest & most reliable surface mount toggles & pushbuttons. Patented STC contacts. Straight or right angle gull-winged mounting. Vapor phase reflow solderable. SPDT & DPDT in numerous circuits. 500-device tape reel or 500-piece stick tube.
Call 602/991-0942. Ask for EEM Extension.

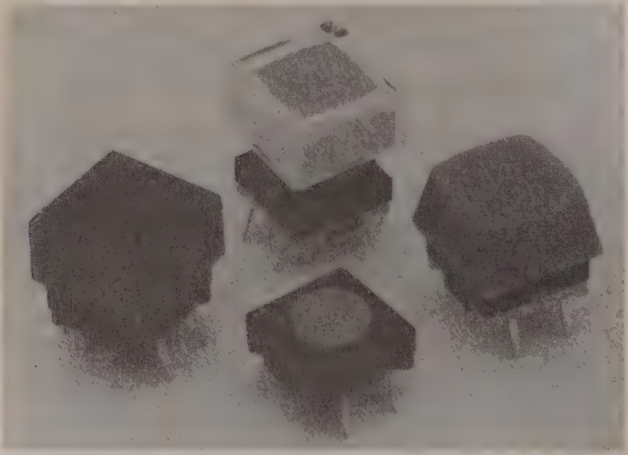
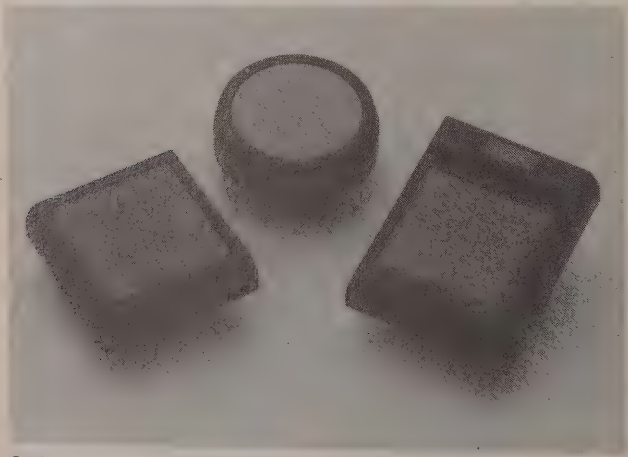
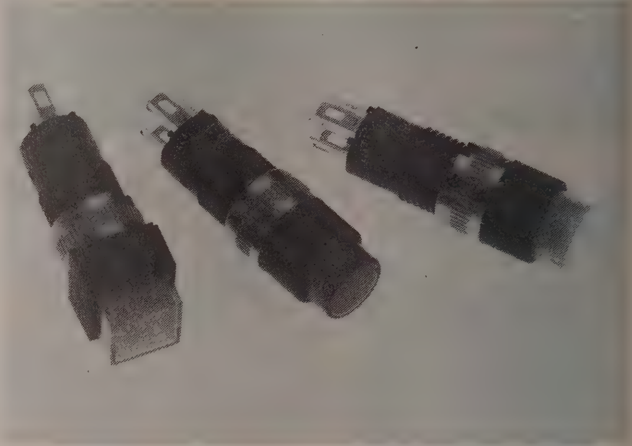
NKK SWITCHES
7850 E. Gelding Drive
Scottsdale, AZ 85260
FAX (602) 998-1435



Series JB. 5 million-actuation low-profile keypads.
Low profile, short stroke dome contact, SPST, OFF/momentary circuit. Short actuator 50mA or extended 125mA, both @ 24V DC max. Illuminated or non-illuminated types plus model for mounting under overlay. Numerous color and clear snap-on cap options.
Call 602/991-0942. Ask for EEM Extension.

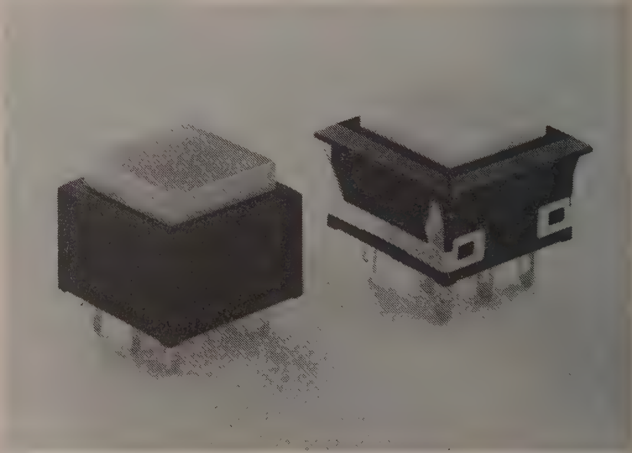


Series JF. Washable lighted/non-lighted designer keypads.
Space-saving decorative styles with or without LEDs. SPST OFF/momentary ON. Rated 50mA @ 24V DC. Round, square & sculpted actuators with choice of several colors. Contacts sealed & protected against splashes for exceptional long-life reliability.
Call 602/991-0942. Ask for EEM Extension.



Series HB. Ultra-small LED panel mount pushbuttons.
One-fourth size of std. lighted devices. Tiny .315" dia. body takes up less than 1" behind panel. Hi-visibility full-face or spot-illuminated caps relamp from panel. Self-cleaning contacts. SPDT with 0.1A max. @ 30V AC/DC max. rating. UL recognized.
Call 602/991-0942. Ask for EEM Extension.

Series KB. 1 amp & logic level lighted pushbuttons.
Miniature KBs allow front panel, bushing or snap-in mounting, plus optional adapters for straight or right angle PCB mounting. Several hi-visibility lamp choices, all relampable from front panel. SPDT, DPDT in maintained or mom. circuits. Hi-rel snap-action contacts.
Call 602/991-0942. Ask for EEM Extension.



Series UB. Space-saving lighted panel mount/PCB pushbuttons.
Half-inch body saves space behind panel or on PC board. Momentary or alt. action. Quick-break contact mechanism. 5A 125/250V AC, 5A/30V DC or logic level. SPDT and DPDT. Switch features special latchdown mechanism.
Call 602/991-0942. Ask for EEM Extension.

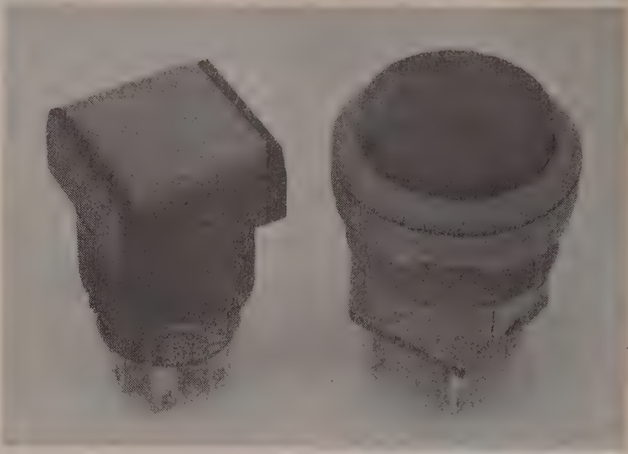
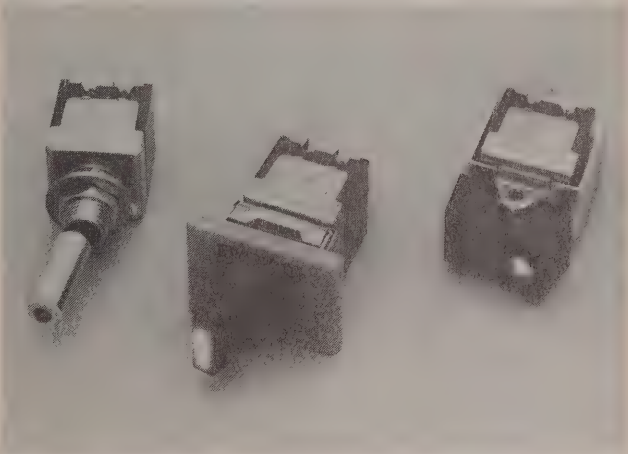
Series LB. 3 amp, million-actuation lighted pushbuttons.
SPDT, DPDT 3 amp with UL/CSA recognition or logic level. Maintained or momentary circuits. Single or bicolor LEDs. One million guaranteed actuations. Round, rectangular, spot-LED caps. Optional PC adaptor, splash/dust covers, barriers, etc.
Call 602/991-0942. Ask for EEM Extension.

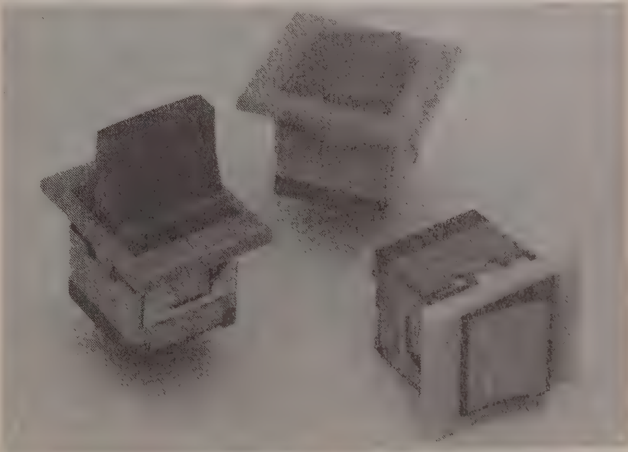
Series YB. Lighted panel mount pushbuttons with twin seal.
1 million mechanical actuations. Exceptional reliability ensured by double-seal design that protects contacts from dust, water, etc. Snap-in or bushing mount. 3A 125/250V AC, 3A 30V DC & logic level. Wide choice of lamps. Round, square & rectangular caps in several colors.
Call 602/991-0942. Ask for EEM Extension.



Series LB & YB. 3 amp panel-sealed lighted pushbuttons.
Extremely reliable one-million actuation switch features oil, dust, and watertight panel seal that meets IP65 of IEC 529 standards. SPDT, DPDT with UL/CSA recognition, or logic level. Maintained or momentary circuits. Numerous caps and other options.
Call 602/991-0942. Ask for EEM Extension.



Series M2100. Unique! Tip changes color with actuation.
Toggles, rockers/paddles with high-visibility LED that changes color with position of actuator. 6A/125V AC, 3A/30V DC & logic level ratings. LED circuit synchronous or isolated. Single color LED also available. Bushing, snap-in or flat frame mounting.
Call 602/991-0942. Ask for EEM Extension.



Series MLW. Power rated miniature snap-in lighted rockers.
5 amp industry first. 3 lamp choices with easy front panel relamping. Conserves space behind panel. Solid, designer and spot illuminated caps. 2 bezel sizes. Built-in protective cover, epoxy sealed solder lug terminals and anti-jamming interlocking actuator.
Call 602/991-0942. Ask for EEM Extension.

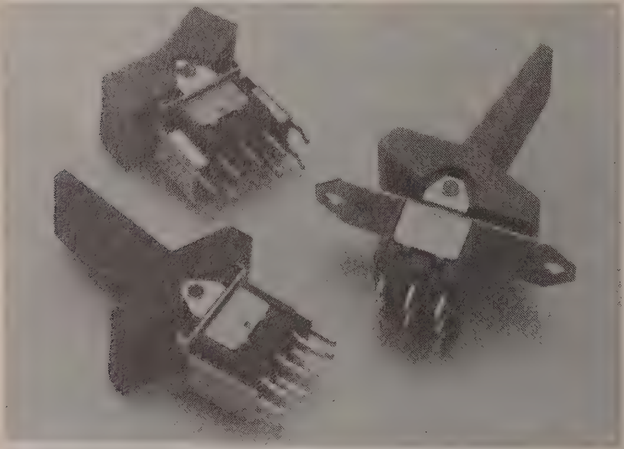
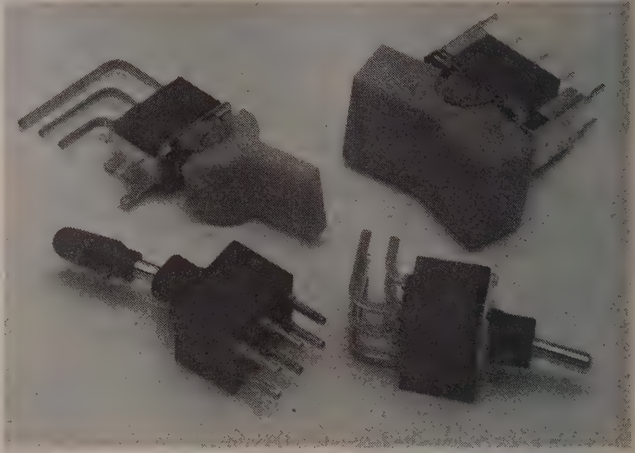
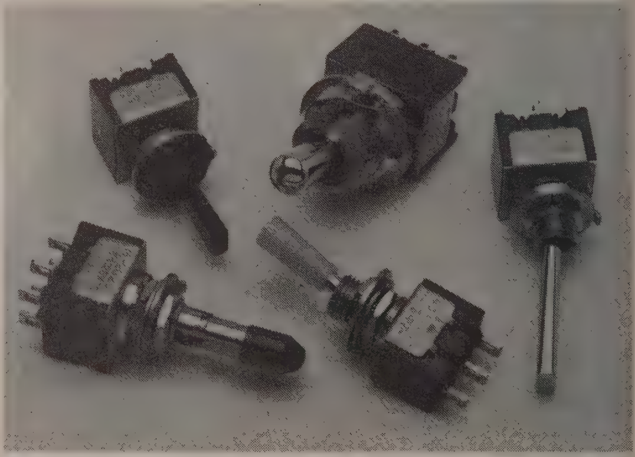
Series M. Bracketed PC mount subminiature toggles.
Sturdy, bracketed PC board switches with bushings offer exceptional reliability and flexibility. Choose 6 amp or logic-level rating. SPDT to 4PDT types in numerous circuits with straight, right angle or vertical terminations. UL/CSA recognition. Full range of toggle configurations.
Call 602/991-0942. Ask for EEM Extension.



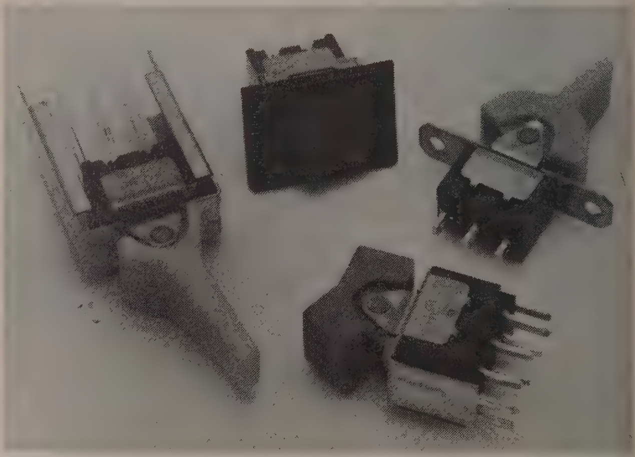
Series M. Large rocker/paddle subminiature switches.
6 amp & logic level, bracketed PC or flat frame mount. SPDT to 4PDT in all circuits. Terminals include straight (bracket or reinforced bracketed), PC, solder lug and quick connect. UL/CSA recognition. Large rockers & paddles in several shapes & colors. Easily legended.
Call 602/991-0942. Ask for EEM Extension.



Series M2T. Washable 6 amp subminiature toggles & rockers.
Huge selection for max. design-in flexibility. 6A/125V AC to logic level. UL/CSA recognition. Totally sealed for automated washing/cleaning. Anti-jamming feature for max. reliability. All popular terminations.
Various toggle/rocker/paddle choices. SP & DP in several circuits.
Call 602/991-0942. Ask for EEM Extension.



Series M. Subminiature hi-reliability panel mount toggles.
Extremely versatile, hi-rel UL/CSA recognized 6 amp or logic level switches fill thousands of application needs. SP through 4P in all circuit configurations. 1/4" 40 and 12mm bushings and seven terminal types. Various lengths of bat, flatted, locking and many other toggles.
Call 602/991-0942. Ask for EEM Extension.



Series M. Small rocker/paddle subminiature switches.
Flat frame, snap-in or PC mount for increased application potential. 6 amp & logic level, SPDT to 4PDT & 3T in numerous circuits and terminations, including right angle and vertical with supports. UL/CSA recognition. Paddles and rockers in several shapes, sizes and colors.
Call 602/991-0942. Ask for EEM Extension.

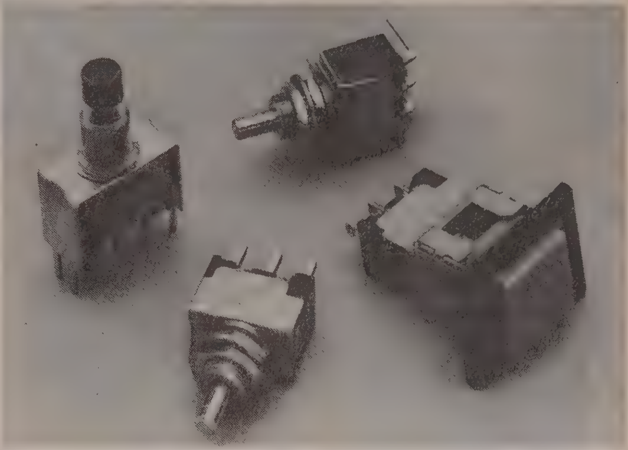
Series MB2000. Versatile 6 amp subminiature pushbuttons.
SP to 4P, momentary or alt. action. 6 amp to logic level. UL/CSA recognition. 1/4" 40 panel mount versions. Solder lug, quick connect, straight, right angle and vertical PC & wirewrap terminations. 7 cap colors. Optional mounting collars & splashproof boots.
Call 602/991-0942. Ask for EEM Extension.

Series MB2000. Lg. bushing panel mount subminiature pushbuttons.
Tremendous selection. SP to 4P in momentary or alt. action. 6A to logic level. UL/CSA recognition. 4 round, screw-on cap diameters. Splashproof boot. Round snap-in mounter. Round or rectangular shroud. Straight PC, solder lug, quick connect & wirewrap terminals.
Call 602/991-0942. Ask for EEM Extension.



Series MB2400. Subminiature 3 amp momentary pushbuttons.
Hi-rel, light-touch, snap acting contacts with high torque bushings, external insulating barriers, 1500V dielectric strength. SPDT, DPDT. 3A or logic level. Solder lug, right angle, vertical and straight PC with various bracket lengths & types. UL/CSA recognition.
Call 602/991-0942. Ask for EEM Extension.

Series M2B. Washable 1 amp PCB subminiature pushbuttons.
Hi-rel, light-touch, momentary snap acting contacts featuring totally sealed construction for automated washing/cleaning. 1A/125V to logic level. SPDT & DPDT with UL/CSA recognition. Vertical, right angle & straight PC with bracket. Snap-on caps in several colors & sizes.
Call 602/991-0942. Ask for EEM Extension.

Series MS. Unique! 6 amp compact subminiature slides.
Hi-rel contact & compact .500" x .469" dimensions for high-density, side-by-side mounting. SPDT & DPDT with 6A/125V to logic level. Epoxy sealed, solder lug, straight, right angle & vertical PC terminals. Two actuator sizes. Plus SP ON-ON-ON circuit. Lighted models.
Call 602/991-0942. Ask for EEM Extension.

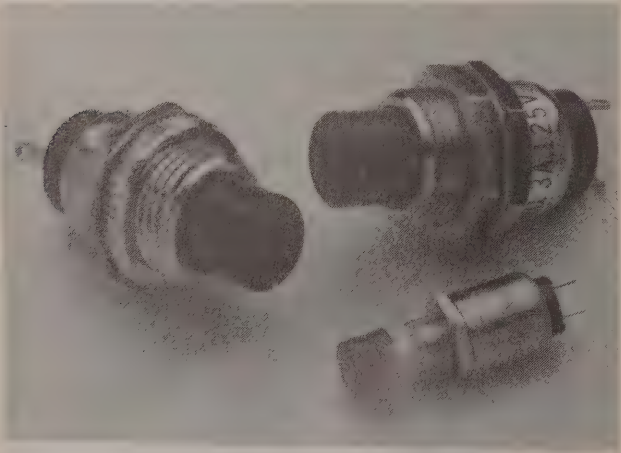
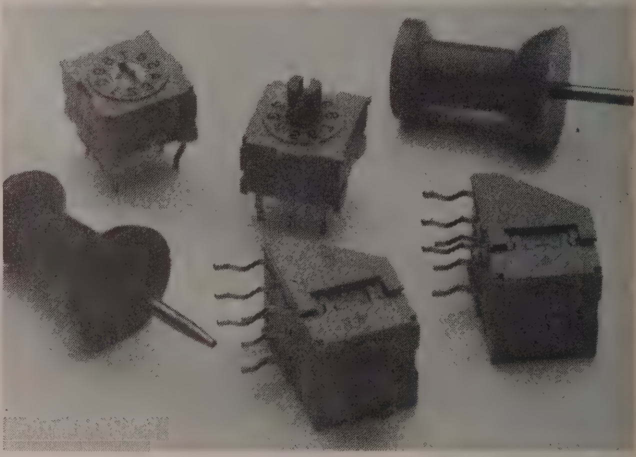
Series MR. Half-inch diameter miniature rotaries.
From logic level to 10 amp. PCB or panel mounting. Panel depths from .323" to .681". Single, double & four poles. 30°, 45°, 120° indexing and adjustable stop settings or continuous rotation. Washable and splash-proof models available. Knobs supplied.
Call 602/991-0942. Ask for EEM Extension.

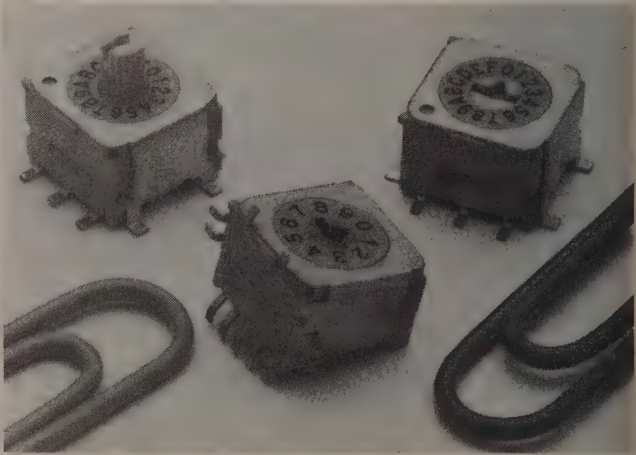


Series FB & SB. Momentary panel mount pushbuttons.
Tiny, hi-rel FB rated at 500mA @ 125V AC (UL) & 0.4VA max @ 28V AC/DC max. SPST in OFF/momentary ON with 3 cap colors. 3 amp SB UL/CSA recognized. Durable one-piece bushing/housing. Black or red plungers. SPST in N/C or N/O circuits. Solder lug termination.
Call 602/991-0942. Ask for EEM Extension.

Series DR. Washable binary coded DIP rotaries.
Screwdriver, shaft or dial actuated with high-visibility legends for PCB. Shaft actuated for panel mounting. Real or complement code. Decimal or hexadecimal. Self-cleaning contacts. Switching rating: 100mA/5V DC, non-switching: 100mA/50V DC.
Call 602/991-0942. Ask for EEM Extension.



Series ND. World's smallest binary coded DIP rotaries.
Washable thru-hole PCB in straight or right angle mount. Real or complement-coded with 10 positions decimal or 16 hexadecimal. Screwdriver or shaft-actuated with hi-visibility legends for easy code setting. 100mA/5V DC switching rating.
Call 602/991-0942. Ask for EEM Extension.



Series ND3. Tiny surface mount binary coded DIP rotaries.
Compact size for high-density side-by-side mounting. 100mA/5V DC. Gull-winged, vapor phase solderable terminals for greater stability during soldering. Screwdriver or shaft-actuated. Real or complement coded, decimal or hexadecimal. Packaged 500 devices per tape reel.
Call 602/991-0942. Ask for EEM Extension.

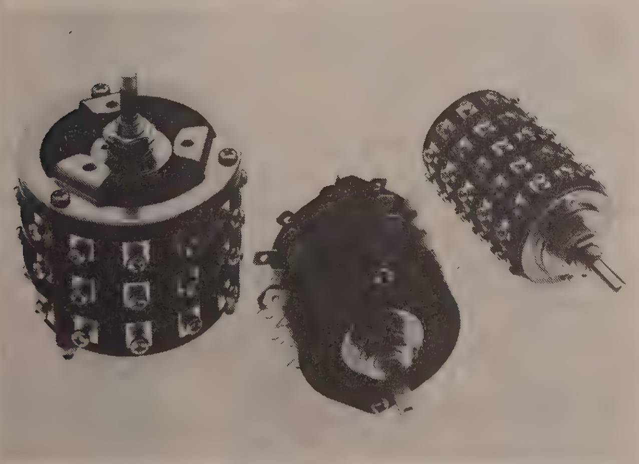
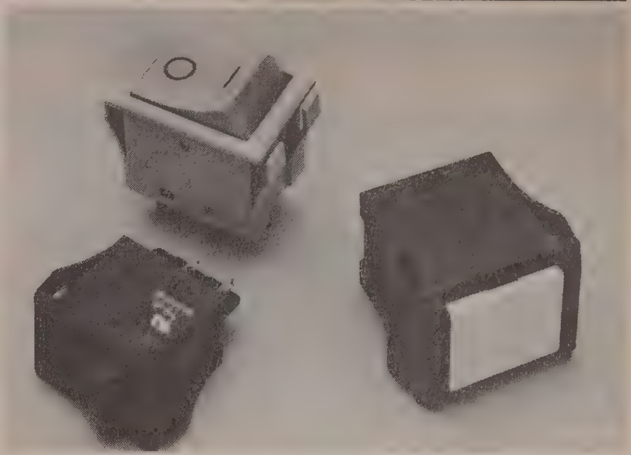
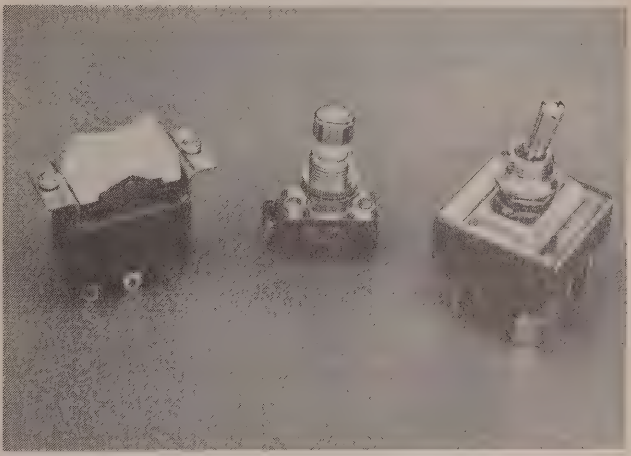
Series SCB. 5,000,000-operation panel mount pushbuttons. Snap-acting contact provides unrivaled lifespan. 5 million actuations for 10A, 1/3HP model, 1 million for hi-cap. 15A 1/2HP type. UL/CSA recognition. SP & DP. Momentary or alternate action. Numerous cap and shroud combinations available in various colors.
Call 602/991-0942. Ask for EEM Extension.



Series HS/PS/TS. Standard size to hi-cap 30 amp rotaries. Nonshorting TS: 1 through 5 poles, 2 through 11 positions, 6A (res. load) rating. Shorting or nonshorting HS: 1 through 6 poles, 2 through 11 pos., 6A & 12A ratings. Nonshorting PS: 1 through 5 poles, 2 through 11 pos., 30A (res. load), 10A (inductive load).
Call 602/991-0942. Ask for EEM Extension.



Series JW/JP. Snap-in mount TV rated rockers & pushbuttons. JW rockers & JP pushbuttons provide high inrush current capability to prevent contact welding. SP & DP maintained circuits. Model "L" has UL/CSA TV-8 rating; 16A 125/250V AC (res. load). Model "M" has UL/CSA TV-5 rating; 10A 125/250V AC (res. load).
Call 602/991-0942. Ask for EEM Extension.

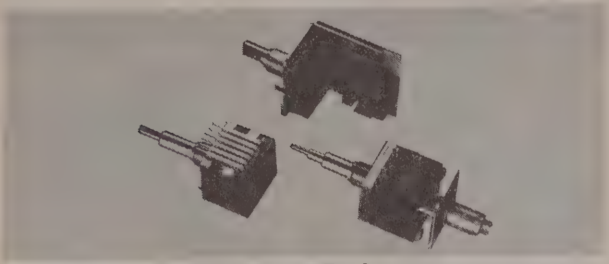


Series S/SB/SW Std. size toggles, rockers & pushbuttons. S Series: bushing mounted toggles with 1 through 4 poles, 6 circuits and 3A to 20A rating (res. load). Optional splashproof bushing. SB: 3A to 15A, 1 & 2 pole momentary or alt. action, bushing mounted pushbuttons. SW: 3A to 20A (with res. load) rockers. Flush panel mount.
Call 602/991-0942. Ask for EEM Extension.

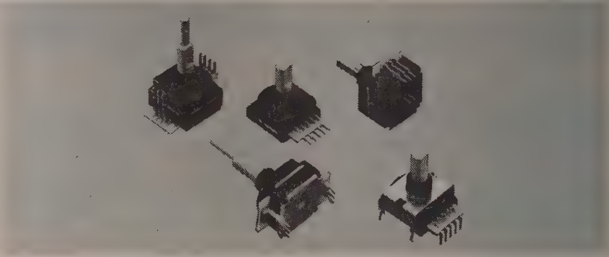
Series S/SW. High capacity AC/DC toggles & rockers to 50 amps. Series S toggles rated 30A/125V AC (res. load) & 50A/125V AC. 2 & 3 poles with maintained circuits. Bushing mounted, screw terminals. SW rockers rated at 30A/125V AC. Plus, 15A/125V DC (res. load) & 5A/125V (inductive load) models for hi-capacity DC applications.
Call 602/991-0942. Ask for EEM Extension.

Rotary Encoder Switches

OAK GRIGSBY™



MMP-Rel



LCE Encoder

Electrical Characteristics

Current Carrying Capacity	Resistive load. 250 MA at 28 VDC.
Shock Humidity	MIL-STD 202E.
Code Program	Shorting or non-shorting (non-shorting versions, up to 16 positions only).
Dielectric Strength	From pole to shaft 1,000 volts min.
Contact Resistance	75 milliohms max, over lifetime.
Contacts	Phosphor-bronze with silver inlay at interface with program disc. Gold inlays available upon request. External terminals are solder (60-40) plate except on die cut edges.
Codes	Hexidecimal, B,C,D, Gray and others on special order.
Switching Loads	1.5 MA at 115 VAC. 150 MA at 14 VDC.

Mechanical Specifications

Operating Forces	(torque over detents): 7 to 20 in./oz. ±25%.
Life	50,000 minimum cycles at rated load (250,000 cycles available)
Rotational position Stops	Per requirement.
Stop Strength	15 in./lb. min.
Operating Temperature Range	−55°C to +85°C (105°C optional).
Sealing	Terminals are insert molded into housing. Front and rear molded sections of module are interlock construction. Ideally suited for wave soldering.
Shafts and Hardware	Shafts and hardware are steel, cadmium plated and chromate treated, detent parts, including stops, are stainless steel.
Anti-Rotation Device	Flatted mounting bushing. .375" dia. × .320," double "D."
Concentric Shafts	Available.
Detent Angles	90°, 60°, 45°, 36°, 30°, 22.5°, 20°. 18°, 15°, 12.8°, 11.25°, 10°.
Molded Construction	Molded parts are Ryton R4 and Polyester PBT, chosen for heat resistance and electrical characteristics. Rated 94 V-O or better.
Disc. Construction	Program disc. is glass epoxy, copper clad with silver plating standard. Gold upon request.

Electrical Characteristics

Current and Voltage Ratings	200 MA at 30 VDC resistive. 150 MA at 115 VAC resistive.
Current Carrying Capacity	6 amps
Dielectric Strength	600 VAC min.
Insulation Resistance	10,000 megohms min., 50,000 megohms initial
Contact Resistance	Typical: 25 milliohms

Mechanical Specifications

Life	25,000 cycles
Rotational Torque	8 to 24 oz./in. at ambient conditions
Stop Strength	8.0 lb./in. min.
Shaft Orientation	Flat is opposite pole number one contacting position-standard
Detent Angles	Series 562-30° Series 500 - 36°, 45° and 60°

Material and Finishes

Switch Base	Diallyl Phthalate per MIL-M-14
Shaft & Stop Plate	Stainless steel passivated
Index Housing	Zamak with chromate finish
Terminals and Contacts	Brass with gold plate
Mounting Hardware	Mounting nut and lockwasher supplied unassembled

Military Type Switches - Series QPL

The Type 500 switches are provided in sealed or unsealed versions, with fixed stops and solder lug or PC terminals, to meet the requirements of MIL-S-3786/20.

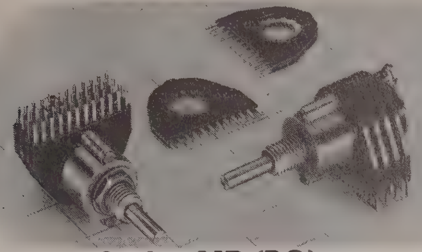
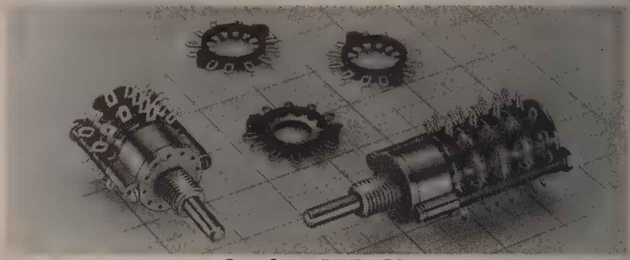
OAK GRIGSBY



Series MD (PC)



Series MD SL

Electrical Characteristics

Current and Voltage Ratings	150 MA. at 28 VDC resistive. 100 MA. at 115 VAC resistive.
Current Carrying Capacity	3 amps.
Dielectric Strength	600 VAC min.
Insulation Resistance	50,000 megohms.
Contact Resistance	25 milliohms max. at initial contact.

Mechanical Specifications

Life	25,000 cycles.
Rotational Torque	6 to 32 oz./in. depending on number of poles.
Stop Strength	10.0 pound-inches min.
Stops	Fixed or adjustable available.
Shaft Orientation	Flat is opposite pole number one contacting position.

Material and Finishes

Decks	Ryton R-4 for PC mount/thermoset for SL.
Shaft	Stainless steel passivated.
Index Housing	Zamak with chromate finish.
Rotor Contacts	Silver alloy. Gold plate optional.
Stationary Contacts and Terminals	Brass silver plate. Gold plate optional.
Mounting Hardware	Mounting nut and lockwasher supplied unassembled.

250 diameter shafts available upon request.

Lighted Pushbutton Switches

OAKGRIGSBY

OakGrigsby lighted pushbutton switches come in a choice of styles, colors, and mounting options. By choosing the base, pushbutton cap, mounting hardware, and lamp, the engineer is able to custom design the switch.

Bases

A wide range of electrical rating and contact configurations is available in both alternate (push-on push-off) and momentary action. Materials are as follows:

Contacts: coin silver (gold plate for low level)
Solder Terminals: coin silver or plated brass
Housing: anodized aluminum or thermoplastic

Type	Contact Rating	Switch Action	Circuit	Length (inches)	UL Approved	Low Level
830 860	.5 amp	Momentary	SPST Form A	2.312		
543 546	3 amp at 30 VDC	Momentary	SPDT-DB Form Z	1.594	X	 X
516 518	5 amp at 28 VDC	Alternate Momentary	SPDT Form C	2.188	X X	
520 521	5 amp at 28 VDC	Alternate Momentary	DPDT Form C	2.188	X X	
5710 5810	10.1 amp at 125/250 VAC	Alternate Momentary	SPDT Form C	2.25	X X	
5720 5820	10.1 amp at 125/250 VAC	Alternate Momentary	DPDT Form C	2.25	X X	
517 519	15 amp at 28VDC	Alternate Momentary	SPDT Form C	2.25		

Pushbuttons

All pushbuttons are high impact resistant plastic, and can be custom engraved.

Colors: red, white, orange, blue, green, and lunar.
Round: 1/2, 5/8, and 3/4 inch.
Square: 1/2, 5/8, and 3/4 inch.
Rectangular: 3/4 x 1 inch.

Hardware

The selection of mounting hardware includes recess mounting configurations with flush or barrier mounts, and low cost snap in styles. Also available are hardware kits which are splashproof, oiltight, and E.M.I. suppressed.

Lamps

All switches use T-1 3/4 midget flange base lamps. Some bases provide for neon lamp operation.

OAKGRIGSBY INC. 88 N. Dugan Rd., Sugar Grove, Il 60554 • Phone 708/556-4200 • FAX 1-800/432-9625

Indicators

Because of the wide variety of items in the OakGrigsby indictor light line, it is possible to select a standard unit to meet a precise requirement. These panel indicators embody the best of military and commercial materials and performance features. Materials, finishes, and workmanship are more than adequate for conformance to military, federal, or industry specifications. Caps are available in numerous styles and functions, and in the following colors: clear, white, red, green, amber, blue, yellow, orange, and lunar. The availability of indicator bases is summarized below.

Sub-Miniature (T-1 sub-midget flange base lamp)

Series	Rear Projection	Max. Panel Thickness	Gen. Pur-pose	Water-tight	E.M.I. Sup-pressed	Military Designation
99-33180	.66	.31	X			
98-36980	.56-.58*				X	LHC82/2, LHC83/2, LHC84/2

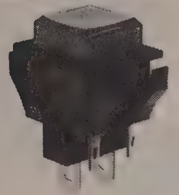
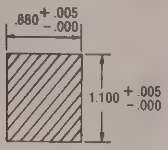
TYPE S Lighted & Non-lighted Pushbutton Switches



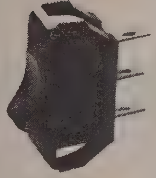
ALL DIMENSIONS IN INCHES



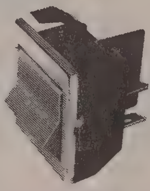
PANEL CUT OUT
PANEL THICKNESS 1/32" – 3/16"

FEATURES
- Snap-in panel mounting with options in:
- Lighted or non-lighted styles
- LED, incandescent or neon lamps
- Single pole and double pole circuit arrangements
- Momentary or alternating actions
- 10 amps 125/250VAC 1/4 HP, UL, CSA, VDE
- Mechanical life 100,000 operations

TYPE R and CR Lighted & Non-lighted Rocker Switches



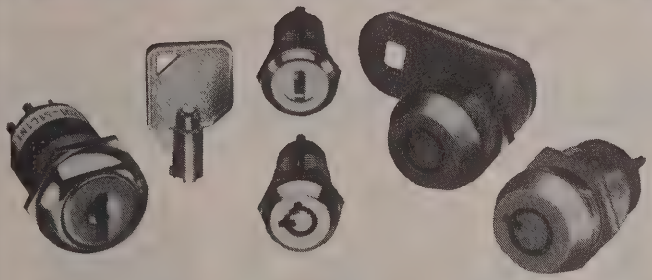
**TYPE CRS
SINGLE-POLE**



**TYPE RT
DOUBLE-POLE**

FEATURES
- Snap-in panel mounting with options in:
- Lighted or non-lighted styles
- LED, incandescent or neon lamps
- Single pole and double pole circuit arrangements
- Maintained or momentary actions, 2 or 3 position
- 20 amps 125/250VAC 3/4 HP, 125/250VAC UL, CSA
- High inrush capability
- Mechanical life: 100,000 operations

TYPE K and TYPE J Keylock Switches



FEATURES
- Flat keys or tubular keys
- Single pole and double pole
- Various key operate and removal positions
- PC mount, solder or quick connect terminals
- Maintained or momentary contacts
- 4 amp 125 VAC or 28 VDC UL, CSA
- Miniature to full size available (12mm diameter to 19mm diameter)

Q SERIES Lighted Pushbutton Switches

FEATURES
- Snap-in panel mounting
- Standard 3/4" cut-out
- Momentary or alternate action
- Led, incandescent or neon lamps
- 10 amp 125/250 VAC UL
- Custom marking available

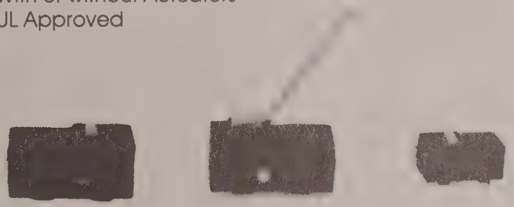
ELECTRICAL SPECIFICATIONS	
Contact Rating	3 amps with resistive load @ 120VAC or 28 VDC
Contact Resistance	20 milliohms max. initial @ 2-4VDC. 100 milliamps for both coin silver and gold plated contacts
Insulation Resistance	100 megohms minimum
Dielectric Strength	1,000 volts RMS @ sea level
DURABILITY SPECIFICATIONS	
Electrical Life	30,000 make-and-break cycles at full load
Operating Temperature	20°C to 65°C
MATERIALS	
Case	Diallyl Phthalate (DAP)
Toggle Handle	Brass, chrome palted
Bushing	Brass, nickel plated
Housing	Stainless Steel
Terminal/Switch Support	Brass electrotin plated
Contacts	Coin silver, silver plated
Center Contact & Terminal	Brass, silver plated

PUSH BUTTON SWITCH SPECIFICATIONS	
ELECTRICAL SPECIFICATIONS	
Rating Resistance	DC 30V, 0.3A Max.
Contact Resistance	20mΩ Max. under the DC 5V, 1A
Insulation Resistance	100MΩ Min. at DC 500V.
Withstanding Voltage	1 min. at AC 500V
Contact Timing	Non-shorting, Shorting.
MECHANICAL SPECIFICATIONS	
Terminal Strength	500g for 1 Min.
Operating Force	300 ± 200g
Control Strength	3 kg static force.
Function	Self-Lock, Inter-Lock, Non-Lock (Momentary)
DURABILITY SPECIFICATIONS	
Test Conditions	10,000 cycles at a rate of 15 ~ 20 cycles for 1 minute without load.
Operating Force	Within $^{+10}_{-40}$% of initial value.
Contact Resistance	40mΩ Min.

TACT SWITCH COMMON SPECIFICATION		
Specification Model	JTM-1101, 1102 Type	JTM-1105,1108 Type
ELECTRICAL SPECIFICATIONS		
Power Rating	DC 12V, 50 mA Max.	
Contact Resistance	100 mΩ Max. under DC 5V, 1A.	
Insulation Resistance	100 MΩ Min. at DC 100 V	
Withstanding Voltage	1 min. at AC 250 V	
Bounce	10 msec. Max.	
MECHANICAL SPECIFICATIONS		
Switch Action	S.P.S.T. momentary push on switch	
Operating Force	100±30 gf 200±50 gf	120±50 gf
Control Strength	1 Kgf static force	
DURABILITY SPECIFICATIONS		
Test Conditions	100,000 ~ 500,000 cycles at a rate of 15 ~ 20 cycles for 1 minute with a resistive load DC 12 V, 50 m A.	
Contact Resistance	200 mΩ Max.	
Bounce	20 msec. Max.	
Operating Force	Within $^{+10}_{-40}$% of initial value	

BASIC SUB-MINIATURE TYPE

- Solder, Faston or PC Terminals
- With or without Actuators
- UL Approved



PUSH BUTTON SWITCH SPECIFICATIONS	
ELECTRICAL SPECIFICATIONS	
Rating Resistance	DC 30V, 0.3A Max.
Contact Resistance	20mΩ Max. under the DC 5V, 1A
Insulation Resistance	100MΩ Min. at DC 500V.
Withstanding Voltage	1 min. at AC 500V
Contact Timing	Non-shorting, Shorting.
Service Life	Mechanically: 300,000 operations min. Electrically: 50,000 operations min. (full load)

APPLICATION DATA

Ross Engineering's high current switches have very low contact resistance. They are used for power, RF, capacitor discharge, pulse, transfer and tap selection. They are used on low and high voltage power loads or with multiple capacitor banks for isolated no load selection, transfer or grounding.

By using non-conductive air or hydraulic lines, no electrical or mechanical ties to contact mechanism are required. Also, when specially built, the units can be used for high currrent RF applications. Units are built with G-10 epoxy glass laminate insulation for standard applications, and G-7 silicone glass insulation for RF applications. Heavy duty contacts, specially designed to minimize corona, are built of highly conductive but weld resistant alloys. Units are able to withstand high shock/vibration and severe environmental conditions. Simple mechanical design and conservative stress levels result in long life, trouble-free performance. Additionally, units are built of lightweight material and are of the smallest dimensions possible for full performance within power ranges. They are easily installed and used in the most compact compartments.

OPERATE VOLTAGE

The peak test rating of high current switches should be 1.2 to 5 times the normal circuit operating voltage, depending upon the application. For lower power systems where transients are unlikely or intermittent flashover is of no consequence, a safety factor of 1.2 to 1.5 may be suitable. For medium power systems or where moderate transients are likely, a safety factor of 1.5 to 3 is desirable, and 2 to 3 recommended. For higher power systems or where transient overvoltages are expected, a safety factor of 2.5 to 5 should be considered and the factor should be based on the maximum probable transient. The rated peak test voltage to ground should be selected in the same way as was the contact to contact value. If a value other than the published rating is required, it can normally be supplied as an extra cost option.

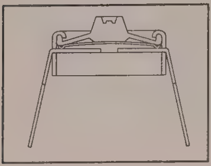
PCB mount switch modules

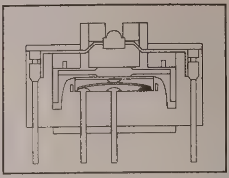


MICRO-COSMOS

"Tactile effect" switch
4 versions available:

- Thru-hole
- Right Angle
- SMT
- Manual Insertion

Micro COSMOS switch modules are packaged in ready to mount IC type standard tubes.



COSMOS

"Tactile effect" switch: The 12,3 x 12,3 mm square "COSMOS" series attractive button is fitted with a removable cover: various possible colors and symbols are available.

Illumination: total front area illumination of the Cosmos series button by means of a L.E.D. embedded in the centre of the module.

Sealed: Contact component fully sealed against dust, splashes, wave soldering flux and solvent cleaning pollution. Terminal pins are interference fitted to ensure a fully sealed base.

Modular: The Cosmos series buttons are building blocks on 2,54 mm matrix to provide a flexible layout solution using single or multiple modules.

SPECIFICATIONS

- CECC Standard
  - Micro COSMOS CECC 96401 - 004
  - COSMOS CECC 96401 - 003
- NATO listed (COSMOS)
- ISO 9002

ROTARY SWITCHES

LOW CURRENT & POWER

Shallco offers a broad selection of standard and custom rotary switches in detented and snap-action styles. Many designs have up to 40 years of reliable experience in commercial, industrial and military applications. Let us assist you in the selection and specification for new or replacement rotary switch components.

SHOGYO SWITCHES

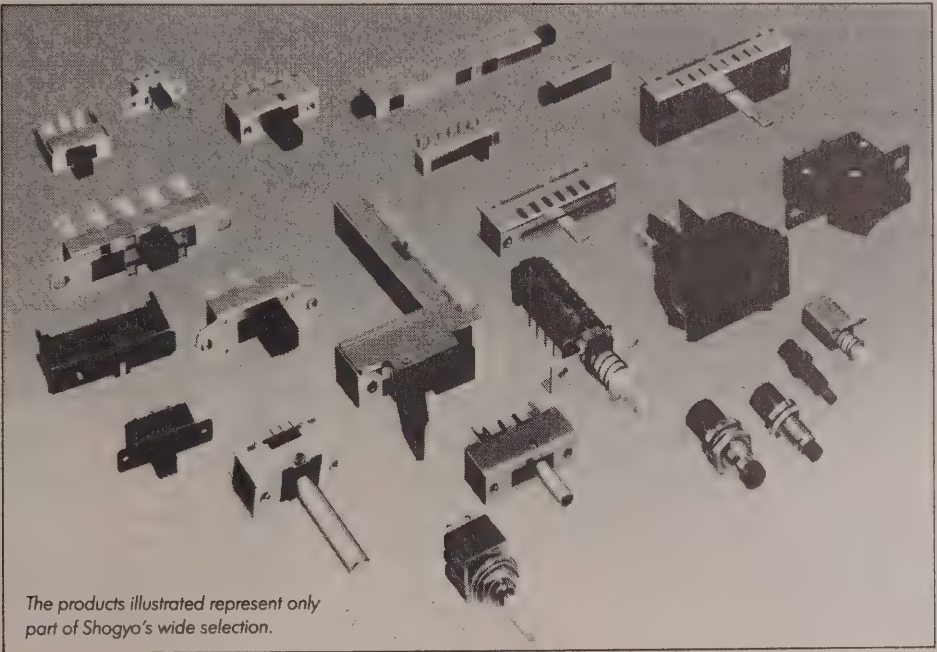
Your design deserves Shogyo quality and reliability.
You deserve . . .
Shogyo Service . . . comprehensive, responsive and fast
Shogyo Professionalism . . . the helpful experience you need
Shogyo Prices . . . always competitive, usually better
and . . .
Shogyo Selection . . . with complete custom design capabilities

Including a diverse offering of:

- Slide switches
- Toggle switches
- Power switches
- Push button switches
- Lever action switches
- Push-slide switches
- Leaf switches
- Rotary-slide switches

And featuring:

- PC or solder mount
- An extensive variety of sizes, pin types, pole and position quantities, ratings, contact and insulation resistances, and withstand voltages
- Electrical/mechanical endurances up to 30,000 cycles
- Silver plated contacts



The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance:
Telephone 516-466-0911 or FAX 516-466-0922

For complete product listings and specifications, request our free catalog.

SPECIFY SHOGYO ELECTRONIC COMPONENTS AS GOOD AS YOUR DESIGN.

SHOGYO

STANDEX REED SWITCHES

- Tested to 1 billion operations
- Totally automated production
- Highest quality, based on computerized SPC, yielding unmatched uniformity
- Custom cutting and forming for difficult applications
- Several standard contact materials for a broad range of applications and loads from dry circuit to power switching

Notes: (1) The specification for VA Rating may be exceeded for less sensitive (high AT) switches, and should be decreased for very sensitive (low AT) switches. Specific life testing for a particular load will be run be Standex Electronics upon request.

(2) Breakdown voltage is measured in the presence of a radioactive ionizing source with switch leakage current limited to 100 microamperes.

(3) Contact resistance measurements are made at 10ma from a 1 volt source with 5 AT overdrive using a 4 wire (Kelvin) measuring system with contact probes located on 1.7" centers.

Standex Electronics

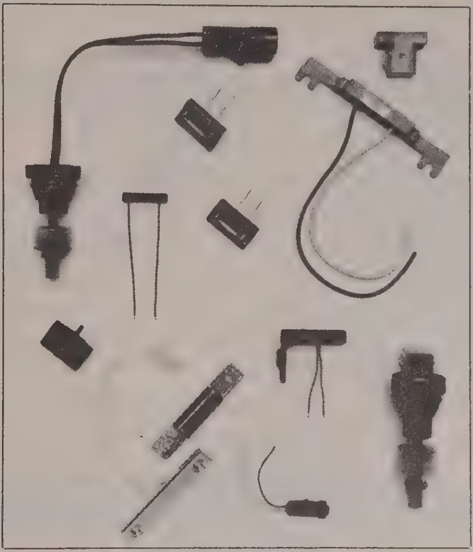
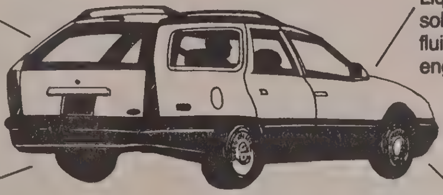
Custom Magnetic and Liquid Level Sensors



Standex Electronics designs and builds magnetic proximity sensors for a wide range of markets and applications. The basic sensing element for most applications is the hermetically sealed reed switch. Other technologies are used as the application dictates.

- ☐ Hi-Rel Switching — hermetically sealed contacts — billions of operations switching low level loads
- ☐ No External Power Required
- ☐ Power Switching — direct switching of power loads with up to 2.5 amp DC inrush
- ☐ Wide Actuation Distance — reliable actuation at up to one inch for certain applications
- ☐ Low Cost — very competitive with other technologies



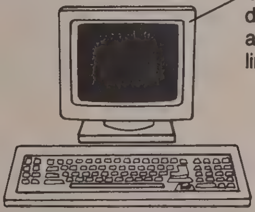
RPM Sensing — cruise control, odometer, speedometer and engine control

Anti-skid Braking System

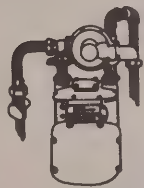
Liquid Level — washer solvent, coolant, brake fluid, transmission fluid, engine oil and fuel.

Lamp Outage

Door ajar sensing, liquid level sensing, lamp switching, dishwasher spray arm rotational sensing, and device enable applications.



Off hook sensing, device disable, interlock applications, and telephone line switching.



Rotational counting applications for gas, electric and water metering and tamper applications.

a Standex company

The world's best known companies are turning to Standex Electronics for magnetic proximity sensors.

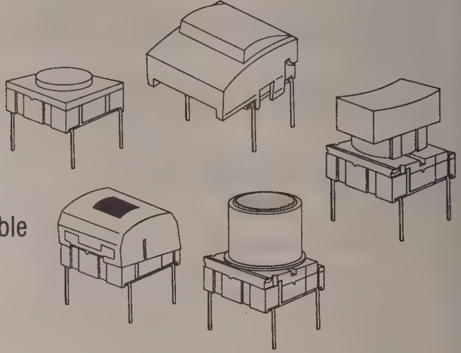
Standex magnetic proximity sensors are used by companies such as General Electric, Ford, Digital Equipment Corp., IBM, and Northern Telecom. Call us and find out why.

SoLiCo/mec

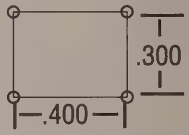
Sorenson Lighted Controls, Inc.

The Sealed Multimec Switch

- Environmentally sealed to IP-67
- Available with either thru-hole or surface mount terminals
- Withstands wave soldering procedures
- High temperature (+160°C) & Low temperature versions (+65°C) available
- Various cap and bezel options with ten standard colors
- Can be used with an overlay to simulate a membrane switch
- 250g key pressure actuation force, 1mm key travel
- Rated for 50mA @ 24VDC
- High reliability — 10 million cycles minimum!
- 100% inspected on the assembly line



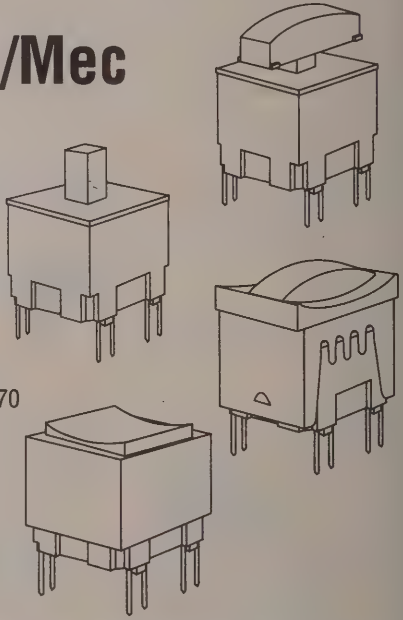
Actual size without cap or bezel - .400 x .400
Mounting pattern for Multimec switch



Call today for a free catalog!

The Unimec Switch from SoLiCo/Mec

- Momentary or Alternate action
- PC Mountable
- 8 contact functions per switch
- Hundreds of standard keycap legends
- Can be used alone or with a variety of cap, bezel, and LED options
- Vario-support mounting is available for custom keypad configurations
- Square cap available in 6 colors provides switch with a splashproof feature
- Momentary lifetime - 1,500,000 cycles
- Alternate lifetime - 500,000 cycles
- Rated for 250mA @ 120V
- Operating temperature range -25°C to +75°C
- High temperature -25°C to +160°C
- 100% inspected on the assembly line



Actual size without cap or bezel - .470 x .470
Mounting pattern 15.000 Series Unimec

Switchcraft
A **Raytheon** Company

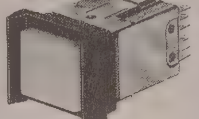
PUSHBUTTON SWITCHES, MULTI-SWITCH SWITCHES AND SLIDE SWITCHES

PUSHBUTTON SWITCHES

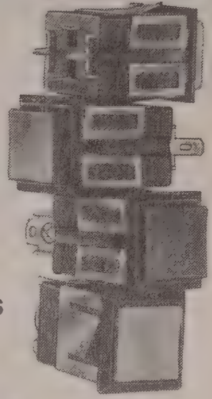
Standard and miniature non-illuminated switches offer broad switching capabilities in minimal space. All switches are easy to mount and are available with a variety of actuator colors, circuitry, terminal styles and mechanical functions. Current ranges from 250mA to 8A.

Series PL "Push-Lite" illuminated switch, momentary and Push-Lock/Push-Release

Series US and LUS "Uniswitch" illuminated and non-illuminated switches, momentary



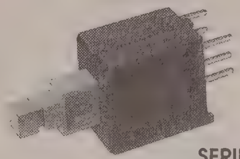
SERIES PL



SERIES US & LUS

IBS MINIATURE PUSHBUTTON SWITCHES

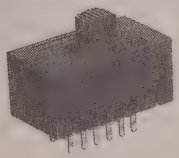
Series 98000R IBS miniature pushbutton switches can be gang mounted on common frames, up to 12 stations long with center-to-center spacing from 10mm, 15mm or 20mm. Available with interlock, non-lock, momentary or push-lock/push-release mechanical functions. .130 inch (3.30mm) x .130 inch (3.30) square plungers accept a full line of industry standard pushbuttons. Switches are stocked without pushbuttons due to wide variety that can be used. Order pushbuttons separately. Switches have .157 inch (4mm) long PC terminals for mounting single- or double-sided PC boards up to .094 inches (2.39mm) thick. Close stacking (centers) permit high density within minimum front panel space. Plunger travel: .144 inch (3.66)



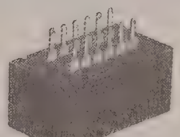
SERIES 98000R

DW MULTI-SWITCH SWITCHES

Up to 18 stations in a single row and ganged assemblies with interaction between rows. Maximum switching per station is 4-C (4PDT). Each station utilizes specially designed switching modules with U-shaped, high reliable bifurcated contractors rated at 3A, AC; 0.5A, DC; 125V, non-inductive load. All provide four standard functions: Interlock - Lock-Out, Non-Lock, All-Lock, Push-Lock/Push-Release - pushbuttons lock when depressed and release when again depressed. All Series - pushbuttons on 3/8" centers.

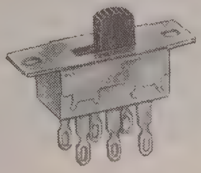


C63212L

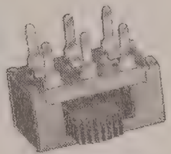


LITTEL MULTI-SWITCH SWITCHES

Series 35000 Non-illuminated. Compact, rugged multiple-station switches feature up to 6PDT per station in .6 square inch space. Excellent selection of contacts for low or high current switching. Plungers accept nine different Switchcraft pushbuttons. Mechanical functions are: Interlock, All-Lock and Push-Lock/Push-Release. One to 18 stations; many legends are possible.



56206L1



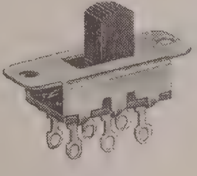
C62206L

"TINI-SLIDE" SWITCHES

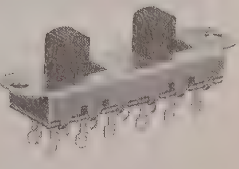
Miniature "TINI-Slide" switches are precision locking switches with unique lift/wipe/slide action and silver contacts. Ratings: 0.5A, 125V AC or DC, non-inductive 2- and 3-position types. UL listed solder lugs or PC terminals. Crowned knobs.

SLIDE SWITCHES

Instrument quality Switchcraft slide switches have low cost, precision "double-wipe" contacts with "U"-shaped bifurcated contacts rated at 0.5A DC, 3A AC, 125V, non-inductive. Solder lugs have 5/64" diameter center holes and wrap-around notch. Various knob styles: crowned, rocker, flush. UL and CSA listed types and heights. Up to 4 poles of switching with locking or momentary action. Also available in miniature size.



46206LR



47206LR

EUROPEAN POWER SELECTOR SWITCHES (EPS SERIES)

Durable slide switches provide quick and easy programming/selection of 115V or 230V primary power in electrical/electronic equipment for the international marketplace with ratings up to 10A, 125V AC. UL, CSA and VDE (Verband Deuscher Elecktrotechniker) approved. Mountings are flange or PC (straight or right-angle). DPDT, locking. Switches also designed to comply with CEE and IEC requirements. Legends: 115V-230V. Ratings: UL and CSA: 10.1A, 125V AC; 5A, 250V AC; VDE: 10A, 250V AC.

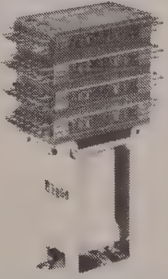
T-bar THE EXPERIENCED COMPANY FOR QUALITY MULTI-CIRCUIT RELAYS AND SWITCHES

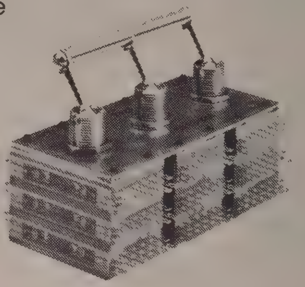
RELAYS

General purpose 800-series, with contact ratings to 5A, and 900-series with low-level to 1A ratings. Both available with 12, 24, 36, 48, and 52 poles in form C (D.T.) and 60 poles, form A. Operation from continuous ac or dc power, pulsed power (latching), or solid-state logic. Environmentally sealed and hermetically sealed relays for aerospace, shipboard and ground support hostile environments are available.



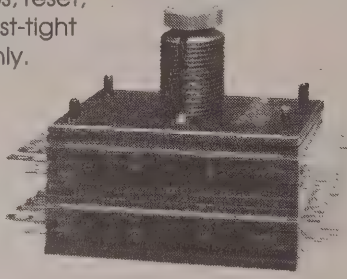
TOGGLE SWITCHES

Same 800-series and 900 series as relays. Available with 12 to 144 poles in form C, maintained action. Typical life in excess of 50,000 operations. Normally dust-tight, T-Bar toggle switches are also available in an environmentally sealed version.



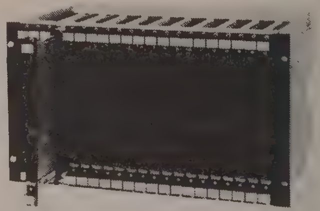
PUSHBUTTON SWITCHES

Momentary pushbutton switches, 800-series only are available with 12 to 36 poles, form C. Typical applications include press-to-test for control panel lamps, reset, and all-call. Dust-tight construction only.



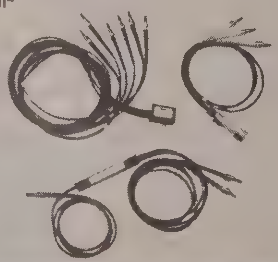
MULTIPOLE SWITCHES

Multipole Switch Modules provide efficient switching for up to 48 poles. Each switch module contains four 48 Pin Din connetors that can be configured as four 12-wire, two 24-wire or one 48-wire circuit. Up to 21 modules can be supported in a T-Bar supplied 19-inch rack mountable cage.



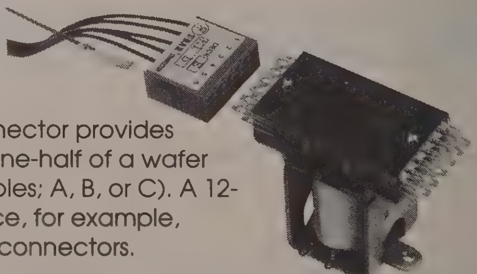
FIBER OPTIC COMPONENTS

Passive single/multi-mode fiber optic components include Switches, Couplers, Wavelength Division Multiplexers, Attenuators, etc. . . Dichroic Wavelength Division Multiplexers contain a patented architecture providing one of the best crosstalk characteristics in the industry. Single sided cable runs on many components simplifies board layout.



CONNECTORS

T-Bar plug-on connectors are available for all dust tight and environmentally sealed relays and switches.



Each connector provides wiring to one-half of a wafer deck (6 poles; A, B, or C). A 12-pole device, for example, requires 2 connectors.

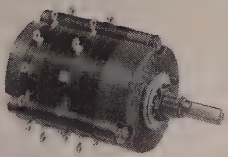
SWITCHES & ATTENUATORS

FEATURES OF TECH LABS SWITCHES
- Precious Alloy Contacts
- 10,000 M-Ohms Min. Insulation Res.
- Hi-Pot 1500 V RMS Min.
- Contact Resistance less than .01 Ohm
- Low Thermal EMF
- Low Capacitance between Contacts
- Low Electrical Losses at HF
- Fixed or External Adj. Stops
- Exceptionally Long Life
- Adaptability for Remote Drives and Controls
- Custom Design
- Pre-Wired Availability

TEL: (201) 944-2221
FAX: (201) 944-1653
500 Tenth Street,
Palisades Park,
New Jersey 07650

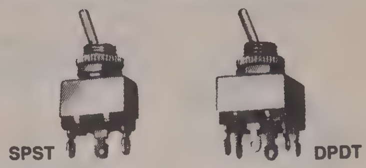
ROTARY SWITCHES



TYPE 2000
- Low Contact Resistance <1 Mili-Ohm
- Insulation Resistance >1 Million Meg-Ohms
- Sizes: 2⅗₂" Dia. x ¹¹⁄₁₆" Depth/Deck
- SP or DP/Deck
- 6 or 12 Pos./Pole MBB
- Indexing: 30° or 60°
- Current Capacity: 5 Amps Continuous

TYPE 3 UL LISTED
- Enclosed Molded Construction
- Size: 1¼" Dia. x ½" Depth/Deck
- SP or DP/Deck
- Up to 12 Pos./Pole BBM or MBB
- Indexing: 30°, 60° or 90°
- UL Listed: 3 Amp Resistive 120 VAC
  3 Amp Resistive 28 VDC

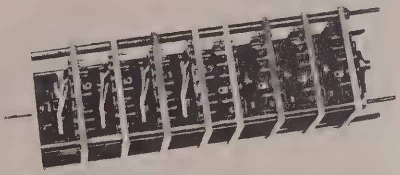
TOGGLE SWITCHES



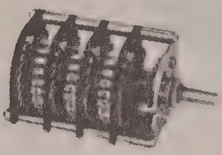
- Meet or Exceed MIL-S3950, MS75028 & 029
- Size: ¼" × ½" × ⁵⁄₁₆" for SP.ST
- Size: ½" × ½" × ⁵⁄₁₆" for DP.ST
- Contact Resistance: 10 Milli-Ohms
- ¼ – 40 Mtg. Bushing, ¼ or ⅜ lg.
- Various Combinations of Bushings, Terminals, Handles and Housings Available.
- Contact Rating: 5 Amps @ 28 VDC
  5 Amps @ 125 VAC Inductive Load

OPEN FRAME ROTARY SWITCHES

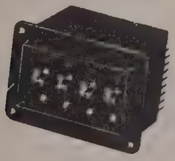
REMOTELY CONTROLLED
- Available as: Stepping Switch
  Motor Driven Solenoid Drives
  Motor and Geneva Drives
  Enercon AC Incremental Motor Drive
- Interrupters or Homing Decks Available.
- May be Remotely Controlled by MasterSlave Arrangement: Computer, External Pulse or Other AC or DC Operation.



SQUARE TYPE
- 13 Styles Available
- Sizes: 1⅗₁₆" x 1⅗₁₆" up to 8" x 8" sq; 15 Decks max.
- 1 to 12 Poles/Deck
- Up to 150 Positions/Pole
- Current Capacity 15 Amps Continuous



TYPE 2
- Single Hole Bushing Mtg.
- Size: 1¾" x 2¼"; ¾" Depth/Deck
- 1 to 4 Poles/Deck
- Up to 24 Positions/Pole MBB
- Up to 12 Positions/Pole BBM
- Indexing: 15°, 30°, 45°, or 60°
- Current Capacity: 5 Amps Continuous



THUMBWHEEL SWITCHES
- Compact Modular Construction
- Size: ½" Wide Modules
- Positive Detent 10, 11, 12 Positions
- Wide Range of Codes
- Various Terminations
- Kelvin Varly Voltage Divider
- Decade Transfer Drive Between Digits
- Capacitance Decades
- Precision Resistance Decades
- Current Capacity: 1 Amp. Continuous

Tech Labs will undertake special prototype design and manufacturing of your switch and attenuator requirements. We can also customize and supply completely pre-wired units.

Contact our factory for competitive quotations.

ATTENUATORS

PRECISION ATTENUATORS

TYPE 11T AND 11H PRECISION ATTENUATORS — DC to 10 MHz*
- Circuit: "T" or Balanced "H"
- Impedance: 50 to 600 ohms, as specified
- Resistor Accuracy: ±0.1% or better
- Accuracy: ±0.1 db to 200 KHz (overall) ±0.6 db to 2 MHz. Lower values of loss, essentially flat to 10 MHz

Type No.	Circuit	db Range	db/ Step	Dimensions
11-T	"T"	111	0.1	5¼"x19"5"
11-H	Bal. "H"	111	0.1	5¼"x19"x10"

* On Low Impedance Units, Lower Losses Usable to 100 MHz.

TYPE 850T AND 850H FOR THE AUDIO RANGE
- Circuit: "T" or Balanced "H"
- Impedance: 600/600 ohms unless specified —Other values to order
- Range: 2 dial unit gives 93 db in 0.1 db steps: 3 dial unit gives 111 db in 0.1 db steps
- Terminals: Telephone type jacks for input and output — Solder terminals provided on rear for permanent connections: Insertion of plugs into jacks lifts rear connections
- Accuracy: Resistors adjusted to ±0.1% excepting low values of loss are ±.25%

FIXED ATTENUATORS
- Two basic models
- Standard circuits "T" and Bridged "H" — others available
- Octal plug-in base available
- Up to 80 db loss
- Many impedance available

ROTARY/VARIABLE ATTENTUATORS
- Five basic models — 1⁷⁄₁₆" to 3" dia.
- All circuit configurations
- Wide range of impedance
- Available with detents, tapers and cueing
- Aluminum anodized can
- Precious metal contacts
- Up to 45 steps
- Audio, video and RF

CONDUCTIVE RUBBER KEYPADS

MAIN PRODUCT FEATURES

- Versatility • Long Life • Competitive Price
- Tactile/Nontactile Feel • High/Low Profile Keytops
- Multiple Color Keytops • Translucent Keytops
- Multiple Color Legends • Positive/Negative Image Graphics

POLYDOME ASSEMBLY KEYPADS

Low profile keypad utilizing polydome technology for excellent tactile feel.

TECHNICAL FEATURES:

- Stroke: 0.25-5.0mm
- Actuation Force: 20-350g
- Life: 250,000-5,000,000 actuations
- Operating Temp: −30 + 180°C
- Contact Resistance: <200 ohms
- Contact Rating: 30mA @ 12VDC .5 sec.
- UL Flammability Rating: 94HB

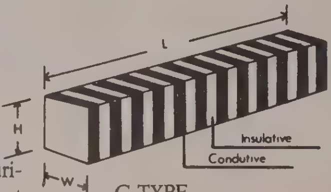
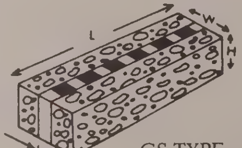
GL TYPE



G TYPE

The trend toward sub-miniaturization and hand-held instruments has created a need for reliable, low profile interconnection devices. Our Elastomeric Connectors provide such a connection and are easy to install. Fine pitch connectors allow for highly reliable interconnection even in most exacting applications.



GS TYPE

ELASTOMERIC CONNECTORS

MAIN PRODUCT FEATURES

- Versatility • Reliability • Long Life
- Competitive Price • Solder Free Installation
- Corrosion Resistance • Fine Pitch Interconnection
- Low Profile Interconnection

QUOTATION REQUIREMENTS

Budgetary pricing available within 24-48 hours of receipt of minimum information listed below:

1. Estimated Annual Usage ______
2. TechnicalSpecs:
   A Length ______ C. Width ______
   B Height ______ D. Pitch ______

See drawing to the left for illustration of dimensions to be supplied.

TECHNICAL FEATURES:

- Length: 1.0-280mm
- Height: 0.5-25mm
- Width: 0.4-5.0mm
- Pitch: 0.03-0.40mm
- Volume Resistivity: ≤5 ohm-cm
- Hardness: (conductor 65±5
  (insulator) 20-40±5
- Insulative Resistance: 10^{14} ohms
- Temp. Range: −20° = 180°C
- Conductive Width (typ.): 0.4mm

Layer #1 bottom circuit with adhesive backing

OEMs Take Note. Increased efficiency and reduced cost is a performance fact when membrane switches, decorative overlays and flex circuits are put to work.

Reliably Simple Membrane Switches

Membrane Switches meet tight schedules by shortening development times. One piece construction controls costs. The Lexan™ finish offers many texture options. Colors appear more saturated and vibrant. Sealed surfaces prevent blunders from botching systems. Second-surface printing stands up to scratches and wear.

Decorative Overlays a Marketable Presence

Decorative Overlays ensure enduring quality. Richness and luster remain intact under heavy use. Affix to practically any surface: glass, metal, plastic, wood, etc. Updates achieved without system redesign.

Flex Circuits Reduce Space Problems

Flex Circuits fold or flex to a product's available space. Reduced tooling accelerates production and puts a halt to cost overruns. Virtually no moving parts to wear out. Smooth, flat surfaces clean easily. Works in tangent with Membrane Switches or stands alone.

LEXAN™ IS A TRADEMARK OF GENERAL ELECTRIC CORPORATION

Contact us today and receive this 10 page Membrane Switch Technical Guide filled with all the information needed to design your project.

FROM BASIC MEMBRANE SWITCH...

BASIC MEMBRANE

The layer description below is the standard thickness and material designation for the basic membrane switch. All of the switch configurations shown here can be HEATSEALED or use pressure sensitive adhesive construction. Optional features are available on the basic membrane switch. These are listed below.

BASIC MEMBRANE WITH IMBEDDED LEDs

Imbedded LEDs are surface mounted in the bottom circuit layer using a flexible, conductive adhesive, or may be mounted on a separate layer with a separate tail (add approximately .015 to the total switch package thickness).

* Spacer layer thickness will vary depending on actuation force requirements.

MATERIAL

Polyester (standard thickness .007 in.) The preferred choice for long life and chemical resistance. Polyester is available in a variety of hardcoat textures and finishes.

Polycarbonate (standard thickness .007 and .010 inches) available with mechanical velvet texture.

HARDCOATS

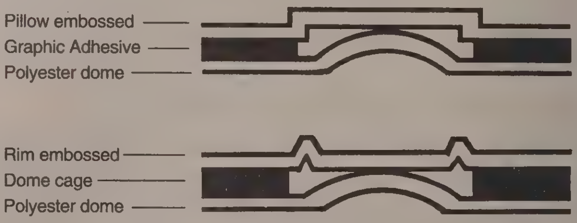
Gloss, semi-gloss and matte finishes are available on polyester and polycarbonate to help reduce scratching and increase chemical resistance. Some of the finishes can be selectively applied to create display windows and decorative finishes.

COLORS

Colors for your membrane switch are selected from the Standard Pantone Matching System or we will match your custom color chip. Transparent and translucent colors are available for backlighting and window areas. Deadfront is also available in certain applications where legends or LED windows remain hidden until a light shines from behind it.

EMBOSSING

Standard graphic embossing styles are pillow embossing, generally used over polyester domes and rim embossing for locating pads by feel.



Pillow embossed
Graphic Adhesive
Polyester dome
Rim embossed
Dome cage
Polyester dome

SWITCH TYPE

The most economical switch type is the screened silver circuit, for switching loads under 1 watt. A printed circuit board construction with copper circuitry can be used when switching loads are 1 watt or more and when temperatures are too high for polyester domes or if other components such as LEDs and displays are included in the assembly.

...TO SMART SWITCH

PC BOARD

A PC board is often used in a membrane switch when stainless steel domes are desired for tactile feel. Through holes allow LEDs to be soldered to the rear of the PC board.

SMART SWITCH™

The Smart Switch includes all the features of the PC board. In addition, the Smart Switch includes power and logic components mounted to the back side of the PC board. This eliminates some interconnections and the need for a secondary PC board in many cases.

LEDs (Optional)
Surface mount or feed through components on back side of PCB

CIRCUIT

Various circuit types are available depending on the design. Matrix and short to ground are the most common. Please contact us early in the design so we can work with you to ensure the design meets manufacturing capabilities.

SHIELDS

For ESD protection a screened silver grid is applied to the top side of the silver circuit. Aluminum and gold vapor deposition can also be used for ESD, EMI and RFI protection.

SPACERS

When the environment is not a problem pressure sensitive adhesives are commonly used. Bergquist HEAT-SEAL is recommended when moisture, spills, vapor and other extreme conditions are expected.

TACTILE FEEL

Polyester domes are available on silver circuits and as shunts on the PC board. They provide tactile feel and long life. Stainless steel snap domes are used on nickel plated copper PC boards when tactile feel is needed and when temperatures are higher than 150°F.

CONNECTOR

Many types and styles of connectors can be designed into your membrane switch. Screened silver switches are available with female and male connectors or with solder pins. PC board connectors are available with a wide variety of connectors including single and double row headers, shrouded headers and flat cable connectors.

OPTIONAL FEATURES

Graphic Layer Silicone rubber in place of graphic

Polyester Domes The basic membrane switch can include polyester domes with a 23-30 mil dome height (typical). Domes are embossed into the top switch circuit layer.

Backlighting Electroluminescent Lamp, 15-35 mil or fiber optics.

Backers or enclosures Metal, G10 or polycarbonate or plastic enclosure.

PC board components Soldered LEDs, Stainless steel domes, surface mount or feed through components

Pocket Switch Spacer Pocket for interchangeable graphic inserts. 15 mil - for use with a 10 mil insert (includes graphic adhesive).

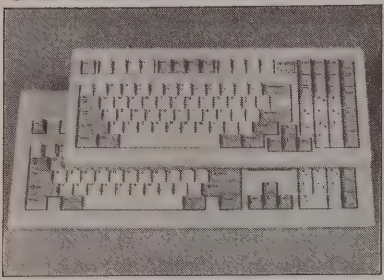
G81-1600 & G81-1800



G81-1600

IBM Compatible Keyboard with Built-In Bar Code Reader. For PC, XT, AT, and PS/2 Systems.

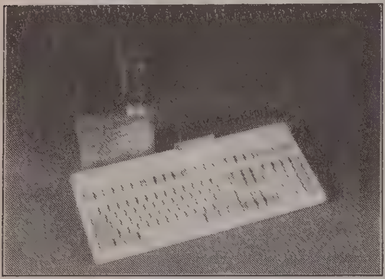
- Input port for bar code stylus, laser scanning gun, or slot reader.
- Bar codes are automatically identified and differentiated (all resolutions).
- 101 key conforming to ASCII international key layout per DIN 66003/66303.
- High reliable membrane switch technology with sealed contacts.

G81-1800

Compact, 101 Key, IBM Compatible Keyboard with Separate Numeric Keypad. For PC, XT, AT and PS/2 Systems.

- Fits into 19 inch rack (less than 16 inches wide).
- 101 keys for PC*, XT*, AT*, and PS/2* systems as well as IBM* terminals.
- Switch selection of PC*, XT*, AT*, and PS/2* modes. LED's indicate the mode selected.
- High reliability full travel membrane switch technology

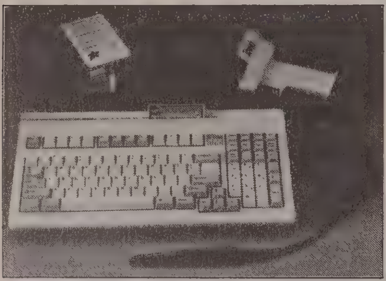
G81-3100



NEW! IBM* Compatible Keyboard with Integrated Magnetic Stripe Reader and Built-In Bar Code Wedge Option for PC, XT, AT and PS/2 Systems

- Cost efficient compared to expensive auto identification hardware
- Auto ID information extend to system as keystrokes via the keyboard line. No software required to operate.
- Saves workspace.
- Magnetic stripe reader accepts all major credit cards.
- Bar code wedge accepts all major bar codes.
- Capable of programming headers and terminators for magnetic card and bar code readers.
- Works with 5V laser guns (adaptor may be required).

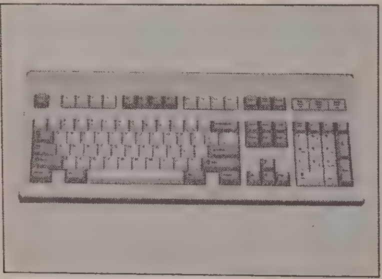
G81-1900



New Small Size IBM* Compatible Keyboard with Integrated Magnetic Stripe Reader and Built-In Bar Code Decoder Option for PC, XT, AT and PS/2 Systems!

- Cost efficient when compared to expensive auto identification hardware
- Auto ID information sent to system as keystrokes via the keyboard line. No software required to operate.
- Saves workspace.
- Magnetic stripe reader accepts all major credit cards.
- Bar code wedge accepts all major bar codes.
- Capable of programming headers and terminators for magnetic card and bar code readers.
- Works with 5V laser guns.
- Reliability: MCBF = 1×10^9 operations
  MTBF = 80,000 hours.
- Safety: DIN VDE 0805/05.90
  EN 60 950: 1988
  IEC 950: 1986
  UL 478
  CSA C 22.2 No. 220
- Card reader complies with ISO regulation no. 3554.
- LED indicators show selected mode.
- Materials conforming to UL 94.
- Linear feel.

G83-3000

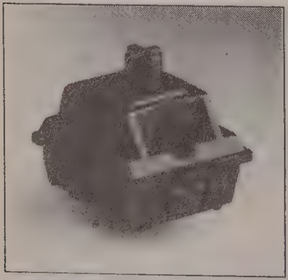


NEW! Low Cost Full Travel Rubber Sheet 101-Key IBM Keyboard

- 101 keys for PC*, XT*, AT*, and PS/2* systems as well as IBM* terminals.
- Switch selection of PC*, XT*, AT*, and PS/2* modes.
- Ergonomic, low profile design. Height of third keyrow is 1.18″ (30mm) (flat keyboard position). Angle of inclination is 6.2°.
- Includes housing and cable.
- Rugged construction.
- Full-travel (4mm) key switches.
- Materials conform to UL 94.
- IBM* overlays fit housing.

*IBM, PC, XT, AT and PS/2 are trademarks of International Business Machines Corporation.

MX Keyswitch

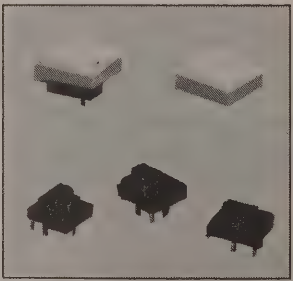


- "Gold Crosspoint" contacts ensure the highest standards of reliability — even during high speed or repeated actuation.
- Full travel (4mm) operation yet fits into modern low profile keyboard designs.
- Meets all current ergonomic standards for word processing and data entry applications.
- Range of actuation choices.

Momentary.	Linear feel.
Alternate.	Tactile feel.

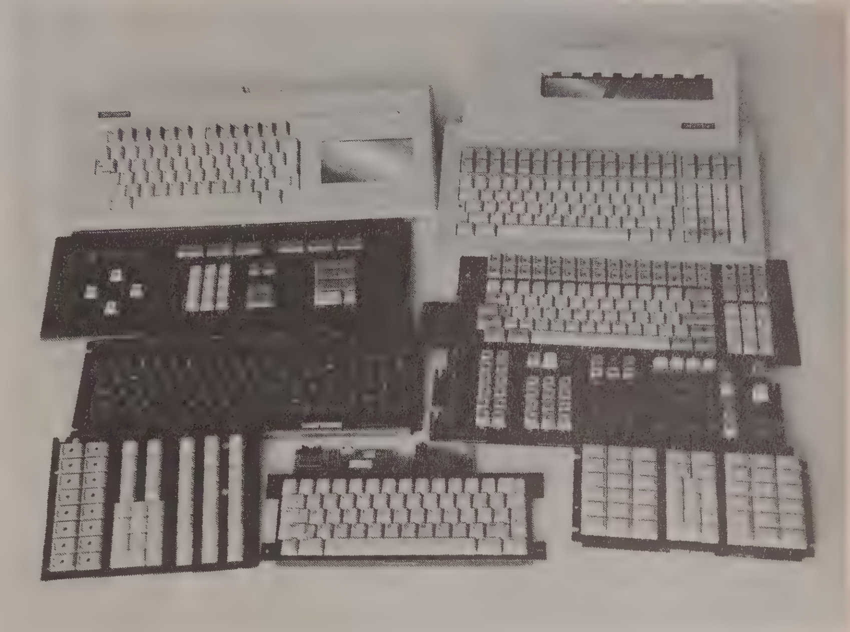
- Keyswitches can be snapped into a frame or mounted directly onto the printed circuit board.
- Low contact resistance.

ML Keyswitch



- ML keyswitch is directly printed circuit board mountable. The standard fixation pins ensure precise positioning.
- "Low profile ≤ 12mm (including keycaps).
- Full 3mm mechanical travel operation fits into modern low profile keyboard design.
- "Gold Crosspoint" contacts ensure the highest standards of reliability.

CUSTOM KEYBOARDS FOR UNIQUE OR DEMANDING APPLICATIONS



For the past 15 years, Digitran has successfully offered custom keyboards for the most demanding applications. Our keyboard customers buy from us because our keyboards are reliable, rugged and can withstand the solvents, solutions, liquids, dust and temperature ranges to which their equipment is exposed. We specialize in rigorous applications such as:

- Point of Sale Terminals
- Industrial Controllers
- Medical Instrumentation
- Telecommunications Systems
- Military Systems
- Intelligent Terminals
- Graphics CAD/CAM Terminals
- Test Instrumentation

Our microprocessor based, intelligent keyboard and application specific firmware allows us to integrate a multitude of Electrical Interface Protocols and Data Input Peripherals, including:

INPUT PERIPHERALS:

- Mouse, Trackball
- Bar Code Magnetic Stripe Readers
- LCD Displays

PROTOCOLS:

- PS-2, PC-AT & PC-XT
- ASCII & TTL
- RS-232
- RS-422
- RS-423

RELIABLE, EXTENDED LIFE: Our full-travel keyboards use our patented capacitance keyswitches which have a rated life of 100 million cycles. We use double-shot legended keycaps and rigid FR4 printed circuit boards to provide the component reliability required to remain compatible with our 100 million lifecycle capacitance switches.

ENVIRONMENTALLY QUALIFIED: We provide keyboards for the widest of temperature ranges. All of our full travel, capacitance keyboards include our PF-SHIELD: a thermo-plastic film that provides environmental protection against dust, liquid spills, water spray, industrial solvents and most laboratory solutions. To maintain the professional image of your equipment, PF-SHIELD is "hidden" underneath your enclosure or front panel, eliminating unsightly plastic, rubber or membrane keyboard overlays.

CUSTOM LAYOUTS: Call us for your custom requirements.

SUBSYSTEM ENGINEERING & MANUFACTURING

In addition to keyboards, XCEL Corporation offers the design, manufacturing and integration of electronic data input and display devices into complete subsystems. We design and manufacture data input devices using our patented capacitance switch technology, as well as membrane, conductive rubber, and snap dome switch technologies. We design and manufacture our own CRT monitors, and have considerable expertise integrating flat panel displays including LCD, plasma, electroluminescent (EL) and vacuum fluorescent. We can design and integrate specialty lighting including LED, EL, ANVIS Night Vision, fiber optic and Infra-Red.

XCEL Corporation combines 35 years experience designing and developing data input and display devices with our extensive, vertically integrated manufacturing capability to offer a complete solution: From concept through design to zero-defect manufacturing. Our goal is to become an extension of your engineering and manufacturing team by reducing your data input and display design and manufacturing costs, your vendor coordination, and your capital equipment investment. XCEL Corporation specializes in:

- Custom Control Panels, Front Panels & Display Panels
- Custom Keyboards & Keypads
- Very Broad Range of Digital Switches Including Thumbwheel, Lever, Push-button & Push Wheel
- High Resolution Color and Monochrome CRT Monitors and Power Supplies
- Custom Applications of Flat Panel Displays Including LCD, Electroluminescent, Plasma and Vacuum Fluorescent
- Specialty Lighting Including LED, EL, Fiber Optic, ANVIS Night Vision, Infra-Red

For conceptual design assistance, technical and budgetary proposals, or ordering information, contact our Marketing Director.

Let Digitran integrate your keyboard/keypad into your subassembly. Contact Digitran's Subsystems Engineering and Manufacturing Services Center at (714) 391-4321. Also see our monitors (2450) and switches (5100).

— SPECIFICATIONS —

ELECTRICAL

Operating Voltage: 0-30 VDC

Operating Current:100 MA Max.

Operating Contact Resistance: Less than 100 OHMS typical (as measured at connector.)

Contact Bounce: Less than 10 Milliseconds typical.

Conductors: Printed silver conductive inks or carbon blend. (PC board assemblies available.)

RFI and Static Shielding: Available in most configurations.

MECHANICAL

Life Expectancy: DOUGLAS guarantees 1,000,000 actuations per switch position or 12 months.

Actuation Force: 2-12 oz. range available-depending on customer specification. (4-8 oz. is considered medium actuation force for non-tactile configuration.)

Switch Travel: .005" to .030" typical.

Overall Thickness: .020" to .050" typical.

ENVIRONMENTAL

Storage Temperature: -40°C(-40°F) to +70°C(158°F).

Storage Altitude: Sea level to 40,000 feet.

Operating Temperature & Altitude: Variable depending on customer requirements. (Can be designed to operate in most environments.)

Humidity: No delamination after 24 hours at 85°C and 85%RH.

MOUNTING

Adhesive Mount: 3M 467 typical.

Bezels: Injection molded plastic or die cast zinc.

The specifications above are general. For information on more specific applications, contact one of DOUGLAS CORPORATION's design engineers.

— DESIGN CONSIDERATIONS —

MATERIALS: Depending on the application and environmental requirements, Polyester and Polycarbonates are commonly used. Thickness ranges are .007" to .010". Blended materials and UV hardcoated surfaces are additional options.

SELECTIVE TEXTURING: For hardcoats as well as aesthetic enhancement of graphic overlay.

EMBOSSING: Embossing of the key pads for key location can be achieved by full key pad embossment or rim embossment.

WINDOWS: Transparent and deadfront display windows for viewing LCD and LED displays.

TERMINATION: Tail termination is accomplished by snap fit connectors, solder tabs or exposed silver tabs. .100" centers standard.

TACTILE FEEDBACK: Stainless steel domes range from 8mm to 12mm. Poly domes are embossed onto polyester layer.

SHIELDING: Shielding from EMI/RFI can be accomplished by layer of metallized polyester or screening a layer of graphite.

BACKLIGHTING: Douglas offers several options from Electroluminescent, fiber optics, or translucent copy to allow light penetration of customer supplied light source.

PANEL CUTOUTS: Die cut holes and access for mechanical switches incorporated into membrane switches.

BACK-PLATES AND PRINTED CIRCUIT BOARDS: Available as finished assembly with Douglas membrane switches.

ENVIRONMENTAL DESIGN: Applications subject to various degrees of moisture or high humidity are engineered and constructed accordingly.

GRAPHIC DESIGN AND ENGINEERING ASSISTANCE: Full service art and engineering departments are ready to provide complete or partial assistance in the aesthetic design of graphic overlays and engineering the correct switch construction for your application.

— QUOTATION REQUEST —

- Switch application.
- Quantities required for proto types and production.
- Graphic overlay material, polycarbonate or polyester.
- Finish required, velvet or glossy.
- Number of colors to be printed on graphic overlay.
- Overall dimensions or prints.
- Embossing full keypad, raised key outline.
- Type of termination required and tail length.
- Dome type, if tactile feel is needed.
- Other special requirements.

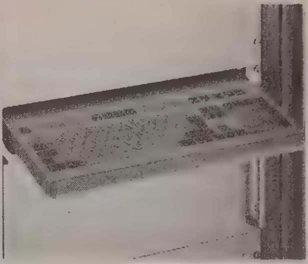
All ELMA products are available off-the-shelf and REASONABLY PRICED

19″ Rackmount Keyboards, Drawers, Panels and Modules

Elma, the leader in PC computer products, now introduces the largest family of 19" rackmount keyboards, keyboard drawers, panels and modules compatible with IBM, XT, AT and PS2 (MCA).

There are two keyboards; one, a full travel and the other, a completely sealed membrane. These keyboards are designed with ruggedness in mind. The keyboards have a rugged aluminum case and conform to DIN 41494 and protection per IP-65. Suitable for harsh industrial environments. Some of the main features of the keyboards are:

70-030-10



70-080-10

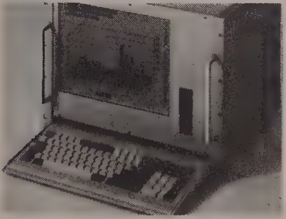
- **19″ rackmount**
- **IBM PC, XT/AT, PS2 compatible**
- **Dust proof protection per IP-65 (membrane)**
- **Switch selectable AT, PC/XT**
- **101 keys**
- **LED's for status display**
- **Only IU (1.75″) vertical space required**
- **US and International versions (6 countries) For list of countries contact factory.**
- **Contact making by Gold/Gold contact (membrane)**
- **12 function keys**
- **Automatic repeat**
- **Optional slides**
- **Powder coated, light grey finish**

FULL TRAVEL

19″ Keyboard module 1U

FEATURES
- This general-purpose 19″ keyboard module to DIN 41494.
- Easy to mount in a cabinet.
- 4 screws for fixing the frontplate.
- Takes up only 1U of space and is 300mm deep.
- Two supports provided for firmer mounting of the 19″ module.
- The keyboard is locked and slightly angled in the working position.
- A spring lock ensures easy opening and closing of the hinged frontplate.

Ordering Information
70-060-10 ....19″ keyboard module



84HP keyboard module 1U

FEATURES
- Can be mounted in an enclosure.
- Easy to mount.
- Module takes up only 1U of space and is 292mm deep.
- The keyboard is locked and slightly angled in the working position.
- A spring lock ensures easy opening and closing of the hinged frontplate.

Ordering Information
70-040-10 ....HP keyboard module 1U

FEATURES
- PUR integral foam-protected side pieces prevent damage.

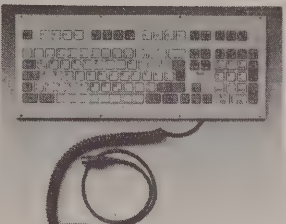
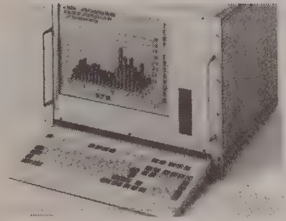
MEMBRANE



19" Keyboard panel 4U/84 HP

FEATURES
- Protection to IP65.
- Jumper for changeover from AT to XT mode.
- Positive tactile switching via metal snap discs.
- Contact-making ensured by gold/gold contacts.
- Service life: 1 million activations per key.

Ordering Information
70-095-10 ....19″ keyboard module



84HP keyboard panel module 1U

FEATURES
- Designed for mounting in an enclosure.
- Strengthened version with protective caps.
- Hinged frontplate with springlock.
- The panel is locked and slightly angled in the working position.
- A spring lock ensures easy opening and closing of the frontplate.
- Can be easily mounted.
- It takes up only 1U of space, 292mm deep.

Ordering Information

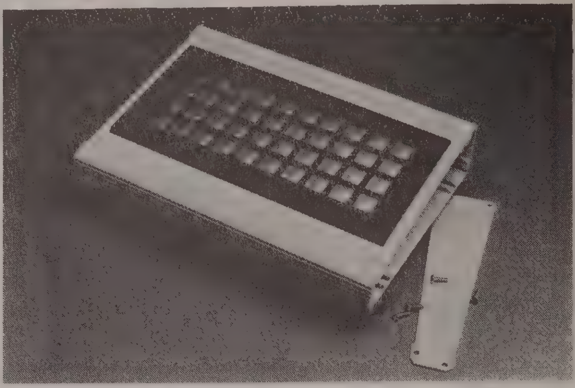
EXTRUDED ALUMINUM "KEY-BOX" MODULAR ENCLOSURES

KEYBOARDS

KEYPADS

CONTROL DEVICES

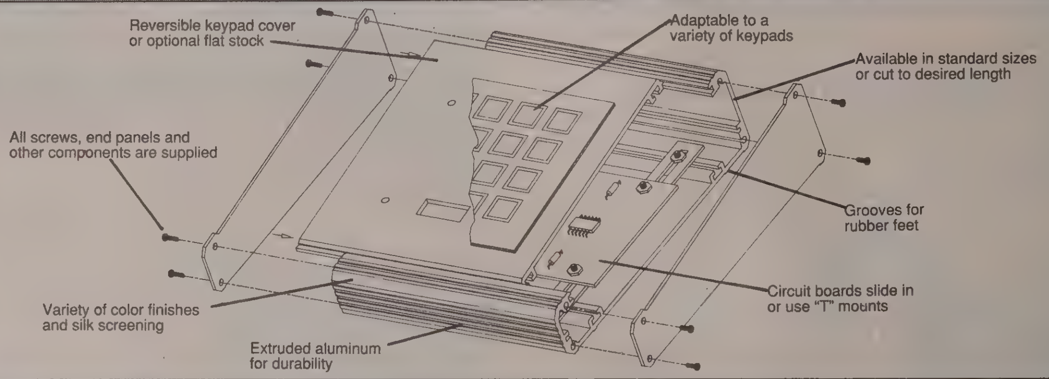


TRACKBALLS

JOY STICKS

TELECOMMUNICATIONS

COMPLETELY FABRICATED MODULAR SYSTEM



Reversible keypad cover or optional flat stock
Adaptable to a variety of keypads
Available in standard sizes or cut to desired length
All screws, end panels and other components are supplied
Grooves for rubber feet
Circuit boards slide in or use "T" mounts
Variety of color finishes and silk screening
Extruded aluminum for durability

"KEY-BOX" – SPECIFICATIONS

MODEL	HEIGHT FRONT	HEIGHT REAR	BOX WIDTH	AREA Y–AXIS	AREA X	HEAD SPACE	END PANELS	SCREW HOLES
KB-6500	0.980"	1.730"	5.00"	4.00"	4.75"	0.65"	2	4
KB-6850	0.980"	1.730"	8.50"	4.00"	8.25"	0.65"	2	4
KB-6XXX	0.980"	1.730"	ANY	4.00"	ANY	0.65"	2	4

ADVANTAGES OF "KEY-BOX" MODULAR ENCLOSURE SYSTEM

- Adapts to a variety of keypads:
  - Flat matrix, cut panel, surface mount
  - Full depression recessed mount
- Cut to desired length or stock 5" & 8.5"
- Keypad cover reversible or optional flat stock
- Circuit boards slide in or use "T" mounts
- End panels can be customized
- Variety of color finishes & silk screening
- No extrusion tooling/die charges
- Rugged, durable and tough
- Easy to assemble & fabricate
- Customized to your application
- Integral RFI/EMI shielding
- Low cost and economical
- Grooves for rubber feet
- Edge detents for label or logo
- Ship from stock or custom
- Complete hardware "kits"

"A UNIVERSAL ENCLOSURE TO SOLVE YOUR APPLICATION PROBLEMS!!"

Silicone Keyboards

Silicone rubber keyboards

The rapid growth of integrated circuit technology and its introduction to diverse product applications has spurred the demand for mechanical keyboards. For a long time, keyboards were manufactured using either metal switches or plastic films with a gold deposit.

Fujipoly, with years of experience in the manufacture of silicone rubber, has permitted the development of economical and high reliability keyboards.

Design features of silicone rubber keyboards

Silicone rubber keyboards, unlike metal keyboards,exhibit excellent resistance to corrosive agents. They do not oxidize or corrode as a result of sulphorous acid, ozone, salt water, high temperature or moisture contact. Abrasion of the printed surface of the printed circuit board is minimal.

In addition, the entire surface of the printed circuit board may be covered, protecting it from dust and contamination. Custom shapes are available to meet specific design applications. The silicone rubber provides a comfortable touch and click sensation to the finger.

Specifications for Light Keyboard

Material	Silicone elastomer Federal standard ZZR765CL2B
Storage temperature	-50°C ~ + 220°C -40°C ~ + 150°C
Approval specs	Auto-extinguishable 94 VO / Flame retardant 94 VO / Standard 94 HB
Durometer	40 to 80

General Silicone Keyboard Specifications

Force	35 ~ 250 grams
Life cycle	50 x 10^4 - 1500 x 10^4 cycles
Tactile feedback	Optional
Key size	Variable
Key travel	0.2 mm - 5 mm
Waterproofing	Optional
***Contact resistance**	< 150 ohm - P.C.B. + Aµ
Contact characteristics	5mA at 12 VDC / 0.5 sec.
***Contact bounce**	< 10 m seconds
Insulation resistance	> 10^{22} ohms at/a 500 VDC
***Breakdown voltage**	25 - 30 KV/mm
Double Zymark® printing	Yes (25 microns built-in)
Surface printing	Yes
Multiple colors	Yes (Legends and molded silicone)
Printing tolerance	±10% of line (Zymark® printing) ±15% of line with (surface printing) ±0.25 mm centered

General

Tolerance	±0.1 (min.) 0.4% (Max.)
Stroke	Optional (Optimum 0.8 mm)
Backlighting	Optional

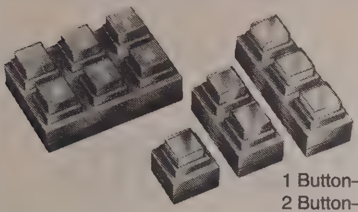
Keyboards and Keypads

Measurement Shown in Inches (Millimeters)

CREATE YOUR OWN KEYBOARD CONFIGURATION AND MAINTAIN BUTTON DISTANCES



1 Button–0.683" (17,35) Square
2 Button–0.683" (17,35) x 1.37" (34,80)
3 Button–0.683" (17,35) x 2.057" (52,25)
6 Button–1.390" (34,80) x 2.057" (52,25)

SERIES 82

Insertable legend keyboard modules plug into PC boards from 0.063"(1,57) to 0.125"(3,18) thick and mount in any configuration while maintaining 0.687" (17.45) button centers. Button height above board is 0.75" (19.05). Long-stroke, wiping contact is ideal for applications with low voltage or which require constant data entry. Housing gray, base black. Rating at 5VDC: 100mA for one million operations. *Legend insertable assortment which includes symbols, terms, alphabet, and numerals is ordered separately from table below.*

4 Button–0.490" (12,45) x 1.990" (50,55)
5 Button–0.490" (12,45) x 2.490" (63,25)
6 Button–0.490" (12,45) x 2.990" (75,95)

SERIES 87

Modules allow low profile, custom keyboards in any configuration and maintain 0.5" (12.7) button centers. Modules available 1-button single pole/ single throw, and 2-, 3-, 4-, 5-, and 6- button strips single pole/common bus; Contact is audible snap-dome; resistance is MOS, CMOS, TTL, and DTL compatible. Rated for 10mA at 24 VDC, resistive for 3 million operations. Switches stand 0.350" (8.89) above PC board. Mount 0.031" (0.787) to 0.125" (3.18) thick PC boards. Housing black; buttons white. Operating temperature: -40°C to +80°C. *Legend insert assortment which includes symbols, terms, alphabet, and numerals is ordered separately.*

SERIES 88

Keypads have the contact system sealed by a graphic overlay. The polyester overlay is printed on the back side eliminating legend wear. The keypad is flange mounted and can be sealed to the panel by a gasket. Gaskets are available for mounting the keypad to the top of the panel or from the back side of the panel. Standard legends are available as shown above. The -172 and -072 versions have white legends with blue accents. The -292 has black legends with silver accents. Keypads are 0.36" (9,14) overall height. Rated for 3 million operations at 10mA 24VDC. Logic compatible with 4mS bounce at make and 10mS at break. Operating temperature -40°C to +80°C.

SERIES 84S

12 or 16 button keypads have a one-piece black silicone rubber boot which completely seals the switch contacts and the panel cutout. Audible snap-dome contact is gold-plated; resistance is MOS, TTL, and DTL compatible. Life is million operations per button. RFI/EMI shielding is standard. White buttons, on 0.75" (19.05) centers, are removable and interchangeable. Keypads are mounted by four studs #6-32; nuts are included. C in type number indicates single pole/ common bus circuitry; others have matrix (XY) circuitry. Part number suffix indicates legend.

Rugged and Reliable Keypads and Keyboards

Sealedswitch

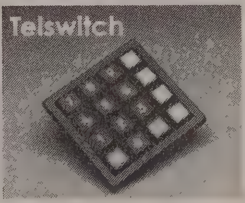
The SEALEDSWITCH™ features our gold-plated snap domes with permanent legends printed on the elastomer keypad providing excellent tactile response and environmental sealing. Standard 4×4 and 4×5 configurations are available with illumination.

Panelswitch

The PANELSWITCH™ features a positive tactile feedback provided by our sealed, gold-plated snap domes with pushbutton keys secured in a low profile bezel. Standard 3×4, 4×4 and 4×5 configurations are available with illumination and EMI/RFI shielding.

Thinswitch

The THINSWITCH™ is a high reliability membrane keypad with gold-plated copper foil contacts sealed within polyester substrates. Standard 3×4, 4×4 and 4×5 configurations can be backlit and are available with tactile feedback and EMI/RFI shielding.



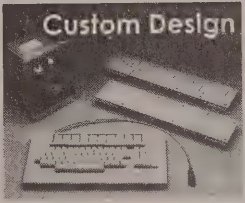
The TELSWITCH™ features an elastomer keypad with individual, replaceable legend inserts and our gold-plated snap domes. It provides outstanding tactile feedback and outstanding environmental protection. Standard 4×4 and 4×7 configurations are available with EMI/RFI shielding.

Thriftswitch

THRIFTSWITCH™ low cost keypads are offered in a variety of styles in 3×4 and 4×4 formats. Both conductive silicone rubber and metal contact types are available with double-shot molded keys and electrostatic shielding.

The custom THINPANEL™ is a unique membrane type keypad which has a tough matte-finish polyester legend over our gold-plated snap domes to provide exceptional feel in a low profile, environmentally sealed construction. Optional features include embossed legends, EL illumination (including NVIS) and EMI/RFI shielding.

The Full Travel Modular Keyboard (FTMK) utilizes a unique modular keyswitch which provides full-travel data entry keyboard characteristics capable of meeting severe military operational specifications such as TEMPEST, nuclear hardening, immersion and extreme temperatures.



Our custom engineering capabilities include the design and manufacture of keypads and keyboards to meet any set of performance specifications. These custom assemblies include such features as front relegending and relamping, NVIS illumination, EMI/RFI shielding and custom interface electronics.

See our complete product line in the *Displays, Readouts & CRTs* section.

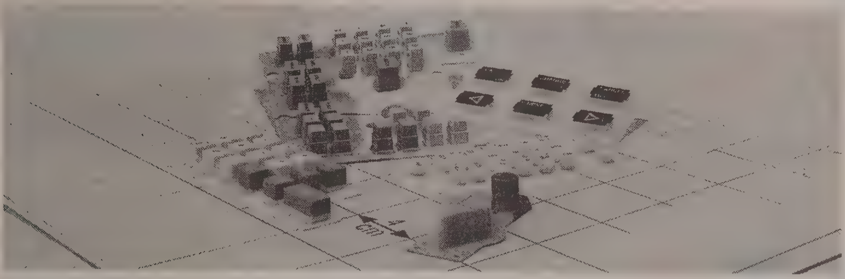
ITT Schadow

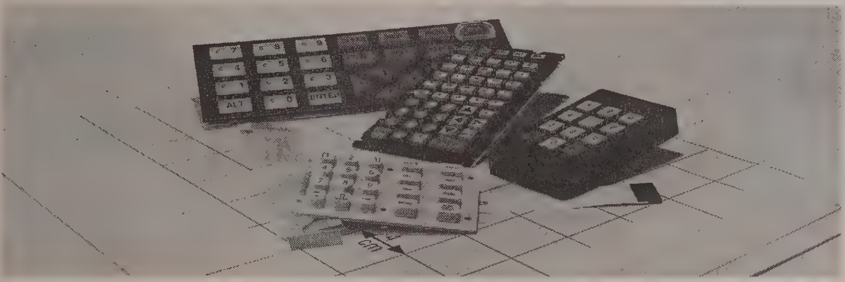
Conductive Rubber SwitchPads



Conductive Rubber SwitchPads

Conductive Rubber SwitchPads (CRS) were developed to meet demanding environmental conditions where cost and reliability are an absolute necessity. These custom switchpads are designed with durable nontoxic silicone rubber materials. CRS switchpads are compression molded. A wide variety of options are available to meet the designer's requirements.

- ☐ Carbon contacts or metal plated varieties
- ☐ Multiple keytop colors on the same switchpad
- ☐ Translucent rubber for back lighted/illuminated switchpads
- ☐ Multiple hardness / durometers
- ☐ Silk screen legends / characters
- ☐ Specially molded compounds for fluid resistance, EMI protection or flammability rating



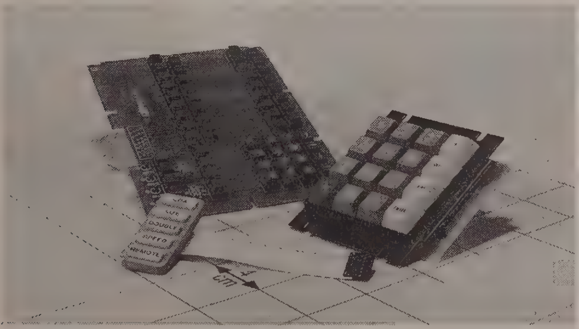
CRS Rubber Assemblies

Conductive Rubber SwitchPad users are discovering the benefits of procuring an entire value added assembly.

ITT Schadow provides a complete switch panel assembly service. We will provide drop-in PCB panel assemblies. These custom assemblies include uniquely designed and engineered conductive rubber switchpads on a PCB. The key panel assembly can also contain a connector, bezel (housing), LEDs, resistors, display (LCD in LED), IC's or any other electrical component.

Benefits

- ☐ Management of a single vendor/supplier
- ☐ Single source component purchasing
- ☐ QC on entire sub-assembly
- ☐ Utilize ITT Schadow's complete technical design capabilities
- ☐ Improved turnaround on prototypes and production



CVA Panel Assembly

ITT Schadow has set-up the CVA panel assembly product line as an outsourcing service providing PCB assemblies to customers who require: Turnkey assemblies, quality, reliability , and on time delivery.

Support Capability

ITT Schadow provides a complete, professional Value Added Printed Circuit Board assembly capability. Schadow CVA services include: Design, tooling, component procurement, turnkey assembly, quality assurance and just-in-time delivery.

Assembly Capability

- ☐ Qualified assembly labor force
- ☐ Wave solder operations (PCB)
- ☐ Molding operation (ie., plastic components, silicone rubber, etc.)
- ☐ Stamping operation (ie., metal components, domes etc.)
- ☐ Tampo printing
- ☐ Hot stamping
- ☐ Custom switch assembly
- ☐ Prototype buiding
- ☐ Automated switch manufacturing

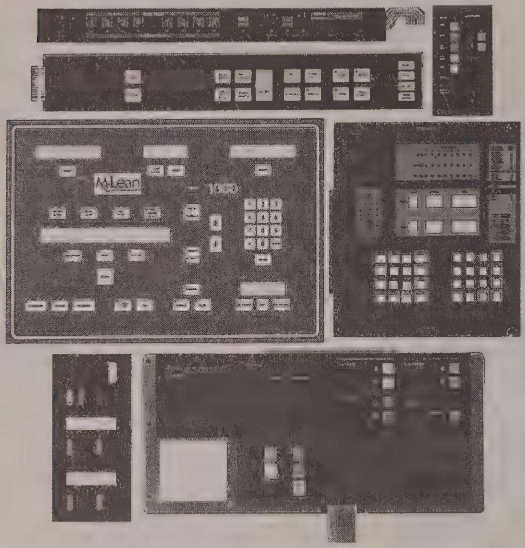
JAYCO

MEMBRANE SWITCHES
HYBRID SWITCH ASSEMBLIES
LEADERS IN FRONT



Jayco specializes in front panel switches & sub-assemblies. Our products are consistently chosen by hardware designers for their performance, superior standards, and visual appeal.

MEETING YOUR NEEDS

Customer satisfaction is our primary business concern. Our unique approach to customer satisfaction guarantees product reliability. At Jayco, quality begins with a complete analysis and planning of your machine interface requirements, before any material selection, design or construction methods are determined.

Our pre-engineering design reviews, testing and inspection to MIL-I-45208A insures that all processes and procedures are in place to anticipate and prevent any and all manufacturing problems. To further maximize customer benefits, Jayco maintains a policy of open communication throughout the design, engineering and manufacturing cycle, as a priority and a critical link in our system. Jayco breaks through the traditional customer–vendor relationships and enters into customer–supplier partnerships where together, we become committed to perfecting your project.

MEMBRANE SWITCHES

Our reliable membranes are thin, light weight, space saving and have a low assembly cost making them ideal for medical devices, process control, test and measurement, diagnostic, telecommunications, security, hand held equipment, and other applications. Membrane Switches are simple to use, offer design flexibility, and they are rugged and durable. They facilitate easy design integration to include displays, bargraphs, CRT windows, and speaker grilles. Many options are also available. (see design options).

HYBRID SWITCH ASSEMBLIES

Hybrid's are a combination of membranes and PCB technology built onto circuit boards. HSA's have the design advantages of membranes and are versatile enough for most applications. In addition, hybrid switch assemblies are a rigid assembly allowing component integration and conventional mounting without separate backplates. HSA's often eliminate another PCB from your product because display components and related circuitry are mounted to the same board used for the switch circuitry. Complete, fully tested sub-assemblies save you money. You have fewer components to order and track, lower assembly costs, and Jayco completes all of the testing for you.

SILICONE RUBBER KEYPADS AND ASSEMBLIES

The ideal choice for applications when a sensitive tactile feedback is required. Silicone keypads can be conductive or non-conductive, with integral or separate keytops, supplied as components or built into membrane or hybrid switch assemblies to produce a totally integrated front panel. Our sub-assemblies include keypads, PCB's, bezels, overlays, displays and other electronic components. This is an excellent money and labor saving alternative to building your own assembly with different components from multiple vendors.

Tailored to your requirements, Jayco's SRK's are molded in a wide variety of operating forces and switch travels. Select SRK's for any design application where positive feedback, low user fatigue, low cost and high reliability are prime requirements. SRK benefits also include: Long life (durability); excellent thermal stability and chemical resistance, light weight, low assembly cost, design flexibility, ESD protection and multi color arrays.

KEYBOARDS AND KEYPADS

Jayco manufactures custom keyboards and pads to your precise design requirements. These switches have few limitations regarding size, layout, number of switches, circuitry or graphic design. Custom keypads eliminate the compromise of off the shelf components which more than offsets the tooling costs in many applications.

DESIGN OPTIONS

EMBOSSING

Jayco embosses all overlays in-house. Proprietary techniques provide exceptional results, lower tooling costs, and a perfect match between printing and embossing. Any part of the front panel can be embossed to add a third dimension.

Embossing is usually pad or rim type. With pad embossing, the entire switch area is raised like a top hat. Rim embossing raises the outline of the switch like a crater. Rim and padding can be combined for special effects.

Pad embossing gives a more conventional keyboard appearance and is generally used with tactile switches. Rim

SILICONE RUBBER KEYPADS KEYBOARDS AND KEYPADS

PANEL TECHNOLOGY

JAYCO

embossing assures better switch location, vital in non-tactile applications.

TACTILE FEEDBACK

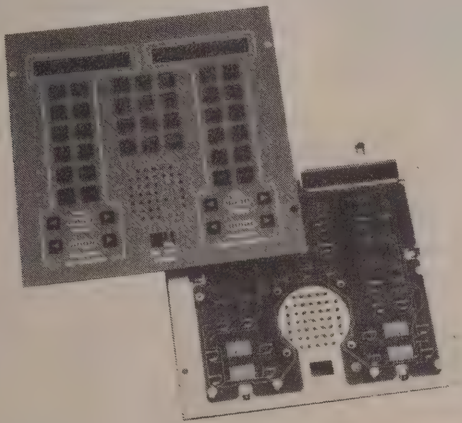
Tactile feedback is the snap action felt at switch closure and is achieved by the oil can effect of a stainless steel or polyester dome. Positive feedback of closure is important in applications utilizing unskilled operators or where other forms of feedback are impractical.

Jayco's tease-resistant tactile feedback mechanisms guarantee simultaneous contact and snap with both metal and plastic dome systems.

Metal (stainless steel) domes offer greater consistency of operation and reliability. Plastic (polyester) domes are more economical and make tactile feedback a practical feature for low cost applications.

SHIELDING

Jayco gives you the option to specify panels with EMI/RFI or ESD shielding. For maximum protection, the shielding is applied between the overlay and the switch layer. Shielding materials include metalized polyester, transparent ITO for windows and printed thick film.



SELECTIVE TEXTURES

Textures are used to optimize display visibility and legend clarity, selective (multi) textures allow the use of optically clear, anti-glare and matt texture coatings on Jayco panels. This technique is also used for aesthetic reasons. An added benefit is that Jayco's hard-coated textures typically have significantly better chemical and scratch resistance than the base materials.

INSERTABLE LEGENDS

Jayco responds to your visual needs with easy to change legends and graphics. An ideal feature for user definable keys, different model options, foreign language versions or prototyping.

INTEGRATED DISPLAYS

Through proprietary processes, Jayco offers one piece or laminated display windows for almost any kind of display device. With windows that are transparent or filtered. Standard filters are available in red, green or gray, with other colors available upon request.

In addition, fully interactive front panels can be made combining thin film LCD's and membrane switches in an assembly less than 0.060" thick. Call Jayco for more details.

DEADFRONT PANELS

Jayco's deadfront panel makes a complex instrument easier to use and the displays more effective.

Deadfront or secret-til-lit panels are invisible or blank until their displays are lit from behind. This effect is typically used for warning displays, or where strong impact of the hidden message is required.

TECHNICAL SPECIFICATIONS

Typical Values

Current Rating	50mA at 30VDC
Circuit Resistance	Less than 100 Ohms
Contact Bounce	Less than 5 Milliseconds (non-tactile) Less than 20 Milliseconds (tactile)
Insulation Resistance	1 Gohm Min at 100VDC
Dielectric Strength	250VRMS Min
Capacitance	27 pf Max Between Any Two Traces
Actuation Force	Variable from 3oz and up
Operating Temperature	40°C to +80°C
Operational Life	Greater than 5 Million Operation (non-tactile) Greater than 1 Million Operations (tactile)
Termination	Dupont "Clincher" Offered as Standard
Tolerances	+ or -0.010" as Standard
Emboss Height	0.010-0.015"

low key

THERE IS NO GREATER PRIORITY AT LOW KEY THAN THE COMMITMENT TO QUALITY & DESIGN EXCELLENCE

A FULL SERVICE MEMBRANE SWITCH MANUFACTURER FEATURING COMPLETE DESIGN, PROTOTYPING AND PRODUCTION OF CUSTOM SWITCHES/KEYBOARDS, PC ENCODERS AND ASSEMBLY SERVICES

INTRODUCING 1st KEY SERVICE FROM "LOW KEY CORP."

A comprehensive package that translates your prototype design into production ready systems in 15 working days or less.

1st KEY SERVICE is more than just the proven reliability of membrane keyboard technology. 1st KEY SERVICE is the state-of-the-art in producing prototype, brass board, or pre-production keyboards, in as little as 2 weeks! With over 25 years of combined hands-on design knowledge and CAD/CAE support, your prototype is an investment in quality.

Think what the advantages of 1st KEY SERVICE can do to eliminate the work/time loss and bottlenecks created through confusion and the world of parading would-be keyboard suppliers flooding your lobbies today.

CAD/CAE ANALYSIS AND CORRECTION

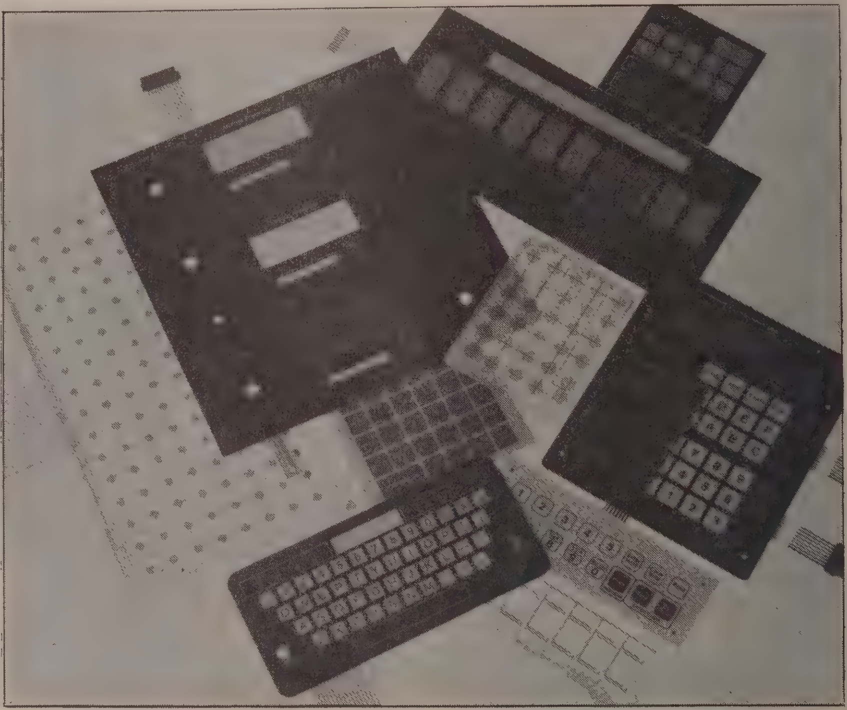
With 1st KEY SERVICE your design documentation must stand the "test." It will undergo CAD/CAE Analysis as the 1st step in validating your design. If conflicts exist, you will be notified immediately by phone and provided with options and solutions.

Most importantly 1st KEY SERVICE ensure conformance to the most rigid of mechanical and electrical standards. We can't afford to give you anything less than outstanding quality.

If you've got a hot project that needs 1st key treatment call us.

BACKLIGHTING

Low Key offers a wide variety of options and configurations. Utilizing both electroluminescent panels, liquid crystal reflective displays and surface mount L.E.D.'s.



CUSTOM SWITCHES/ KEYBOARDS

Low Key membrane products represent the ultimate in state of the art materials, design options and operational stability over a wide range of User environments. Low Key design options, include both polyester film and printed circuit board substrates, offering a wider range of current, temperature and mounting geometries.

GRAPHICALLY APPEALING

Low Key graphics are more than, just so much decorative "window dressing." Utilizing its years of experience, Low Keys graphic arts department has met the most enduring standards of excellence developed over the widest possible range of photographic imaging requirements; And end User environments. The graphic standards today, are what sells "your products" tomorrow.

UNIVERSAL MEMBRANE SWITCH/KEYBOARD ENCODERS

Low Key introduces the USE-144 universal encoder series, providing a pure PC encoding interface for Low Keys custom membrane switch/keyboard designs. The USE-144 is software configurable which can be used with any contact type keyboard with a switching matrix up to 12×12=144 keys.

ASSEMBLY SERVICES

Low Key provides turn-key assembly and testing of display, driver and controller boards, in conjunction with specific switch/keyboard related applications. One stop shopping lessens the USER exposure to costly delays and confusion with multiple sources.

LOW KEY CORP. 105 MAPLEWOOD AVE. / GLOUCESTER, MA 01930-1195 / (508) 281-0448 FAX (508) 281-6321

low key

THERE IS NO GREATER PRIORITY AT LOW KEY THAN THE COMMITMENT TO QUALITY & DESIGN EXCELLENCE

MEMBRANE SWITCHES

A Low Key membrane switch consists of a decorative, silk screened graphic overlay combined with conductive inks on a polyester carrier which, when assembled, forms a low voltage switching device.

Low Key membrane keyboards are sealed from the environment. This protects them from gross chemical and atmospheric contamination. Having no moving mechanical parts to fail, the membrane keyboard is highly reliable, cost effective, and environmentally efficient.

OPERATING CHARACTERISTICS

• Operating Voltage	30Vdc
• Operating Current	20ma Typical
• Contact Resistance	2-50 Milliohms
• Circuit Resistance	20-30 Ohms*
• Life Cycles (MTBF)	5,000,000
• Activation Forces Ounces	3-12 oz
• Travel Inches	0.006 Typical
• Bounce, Milliseconds	20 Typical
• Operating Temperature	0 to 150°F** −18 to 65°C**

Normal range forces can be varied to meet your specifications.

* Depending on size and configuration of circuit.

** Selected lamination materials are available for high temperature applications.

DESIGN OPTIONS TO CONSIDER

A. Transparent lens for LCD display (UV-hardcoated—clear glossy)
B. Frosted windows for LEDs
C. Membrane switch contact with embossed locating ring
D. Die-cut keyways for pushbuttons
E. Electroluminescent lighting
F. Printed gas discharge display window (UV-hardcoated—transparent green)
G. UV-textured velvet finish
H. Membrane switch contact flat keypad surface
I. Printed deadfront legend for seven segment display, visible only when illuminated. A variety of colors available
J. Membrane switch contact with embossed keypad and stainless steel domes
K. Aluminum molded on machined subplates
L. Threaded studs and fasteners
M. Polycarbonate Face with UV-printed hardcoat finish
N. Embossed surface for decorative effect

Note: See Design Data Sheets for specific details on A through N.

CONSTRUCTION & FINISHING

DIE CUTTING

Low Key utilizes laser cut steel rule dies. Steel rule die cutting is carried out on all components of the keyboard. Typical tolerance levels of a steel rule die is generally ±0.010 for overall dimensions, and less for die cut holes, key ways, cut outs, and rounded corners.

EMBOSSING

Embossing of the keypad areas on membrane switch overlays is offered by Low Key, to accent key switch areas and to enhance tactile response. Embossed areas can raise circular, square, or rectangular keys more than 0.030 inches above the overlay surface.

TERMINATIONS

Low Key membrane keyboards are most commonly terminated with Dupont/Berg insulation displacement connectors. Common to all flat and flexible circuit connectors, the clincher assembly mates to 0.025 inch pins or headers on a 0.100 center to form a complete interconnection system. Low Key offers other types of interconnect systems in varying configurations and geometry.

SNAPDOMES

Low Key metal snap action domes provide positive feedback over a wide spectrum of operational conditions. Dome sizes range from 0.50 inches in diameter and smaller. Domes are fabricated from a passivated stainless steel spring material. Electrical contact is made when a snap dome is given sufficient finger pressure, causing the dome to snap over into a flattened shape. This forces the dimple to bring the top and bottom circuits into contact with each other. Snap domes are not in intimate contact with the circuit.

Typical specifications on Low Key tactile domes are:

Operational M.T.B.F.	1.0 million
Total Travel	0.015 max.
Pretravel	0.008
Overtravel Nominal	0.007
Trip Travel at Make Point gm	250 gm ±4
Tactile Range	medium

L.E.D.'S

If densities are shrinking, combine size efficient surface mounted L.E.D.'s within your next membrane switch design. Low Key's construction techniques provide unlimited SMD arrays at no increase in assembly thickness, typically 0.035″ to 0.042″.

ELECTROLUMNESCENT PANELS

The durable thin film of the EL panel offers long life, uniform lighting. They are individually addressable, and add as little as 0.011″ to your assembly.

Capacitance	.0035 ufd/in²
Phase Angle	Up to 75 degrees leading
Frequency	60-400 Hz
Voltage	115 AC

UNIVERSAL MEMBRANE SWITCH/KEYPAD ....ENCODER...........

Low Key offers the USE-144 micro-processor based encoder with its custom membrane switch and keyboard products. The USE-144 is software configurable, detecting and encoding up to 144 keys in matrices up to 12 × 12. Selectable output data provides either, PCXT/AT format or in RS232/432 formats. The USE-144 is powered from a single +5v power supply. No +/− 12v supply is required even for true RS-232 signals. The encoder is uniquely size efficient 1.500″ × 3.500″ × 0.500″ and is easily mounted to the back of your custom membrane switch/keyboard. Complete technical data is available upon request.

SPECIFICATIONS:

1) LZR ELECTRONICS offers a wide range of standard telephone keyboards utilizing silicone rubber as the elastic actuator and conductive silicone rubber pad as the contact element.
2) GENERAL SPECIFICATIONS:
   - Contact rating: 20mA, 24VDC
   - Contact resistance: 200 ohm max.
   - Life: 1,000,000 cycles per key
   - Operating Temperature: −20°C to +60°C
   - Storage Temperature: −40°C to +65°C
3) MATERIALS
   - Bezel: Material is ABS, or Polycarbonate: black, white or grey.
   - Double-shot keytops: Material is ABS, black or white.
   - PCB: Matrix type circuit, Grade HB or FR2 board with wire jumpers or double-layer jumpers with gold plated contacts
   - Terminal: Pin wafer.
   - Aluminum shield for ESD to be customer specified.
4) Custom designs are welcome. Minimum quantity 5K pcs.

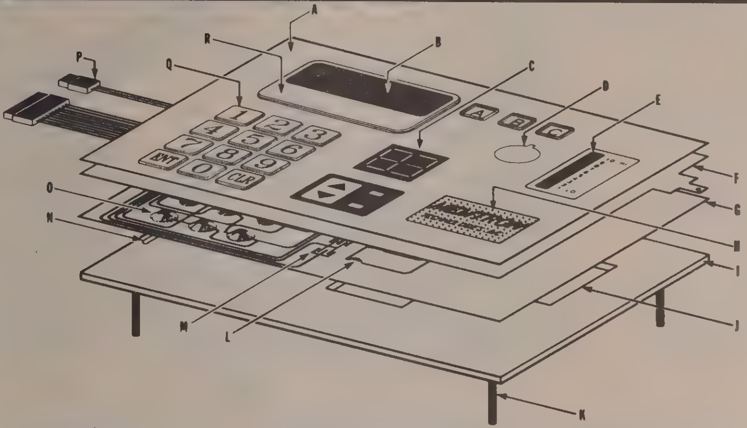
MEMTRON®
MEMBRANE SWITCHES

WHEN YOU NEED ASSURANCE, WE'LL BE IN TOUCH.

Over the years, many membrane switch manufacturers have come and gone, but at MEMTRON, we're stubborn, we've stuck to our guns. And now, when it comes to **quality, research and development, product warranties,** and **service,** we're

"IN TOUCH WITH YOUR TECHNOLOGY®."



A MEMTRON membrane switch consists of a decorative and functional graphic overlay combined with conductive inks on a polyester carrier which, when assembled, form a low-voltage switching device.

MEMTRON membrane switches are completely sealed from the environment, making them extremely impervious to chemical and solvent attack. With no mechanical parts to fail, the panel is highly reliable and efficient.

SPECIFICATIONS OF SNAP DOMES

Life Expectancy, cycles	2,000,000
Total Travel, nominal inches	0.015
Pretravel, nominal inches	0.012
Overtravel, nominal inches	0.003
Trip Force at Operating Point, grams	300
Tactile Feel	high

STANDARD OPERATING CHARACTERISTICS:

Operating Voltage, volts dc	.30
Operating Current, milliamps	.30
Operating Power, watt***	.0.250
Contact Resistance, ohms	.2 to 100
Circuit Resistance, ohms*	.20 to 100
Life Expectancy, cycles	.5,000,000
Activation Force, ounces +	.5 to 8
Travel, inches	.0.006
Bounce, milliseconds	.1 to 10
Operating Temperature, °F (°C)**	.0 to 150 (-18 to 65)

***Operating voltage and operating current in conjunction not to exceed the operation power characteristic

*Depending on size and configuration of circuit

†Normal range Any force can be obtained to meet your specifications.

**Special laminations and materials are available for high-temperature applications

Note: Contact Memtron engineering for special operating requirements

DESIGN OPTIONS

A. **The Membrane Switch Overlay:** To meet special environmental and design conditions. May consist of polycarbonates, polyesters, or special-composition plastics.

B. **Transparent Display Windows:** Used primarily for viewing LCD displays. May consist of the clear, glossy overlay material, with or without U.V. hardcoating. Inserted lenses are also available.

C. **Tinted or Deadfront Display Windows:** Used primarily with LED or gas-discharged displays. May be printed or inserted lenses.

D. **Die-Cut Holes With Keyways:** For application of mechanical switches, in conjunction with the membrane switch, in higher voltage applications.

E. **Gloss UV Hardcoat on Textured Overlay:** Used to create an inexpensive transparency when using a pre-textured overlay material such as velvet polycarbonate.

F. **Shielding Layer:** May consist of solid foil or plastic layer printed with conductive inks. May be designed to guard against EMI, ESD, and RFI conditions.

G.-1 **Membrane Switch Composite:** Consists of layers of heat-stabilized plastics with printed circuitry and spacer layer. Assembled with special adhesives.

G.-2 **Printed Circuit Board Construction:** Consists of Non-oxidizing coated copper-etched circuits on glass epoxy or other PCB substrate.

H. **Selective Texturing:** UV hardcoat textures may be applied in selected areas on gloss overlay materials to impart abrasion, chemical attack, or glare resistance.

I. **Sub-Plates:** A rigid plate used for mounting membrane switches to an enclosure. May consist of aluminum, glass epoxy, or other materials.

J. **Sub-Plate Cut-Outs:** To allow the viewing of displays mounted on a PC board behind the sub-plate.

K. **Studs and Stand-Offs:** For fastening sub-plates to enclosures or for fastening PC boards and displays to sub-plates.

L. **Surface-Mounted Embedments:** May consist of surface-mounted LEDs within the membrane switch composite and powered through the switch circuits.

M. **Standard or Micromotion Switch Design:** Consists of upper and lower circuit layers separated by a spacer. May also consist of a single circuit layer with shorting pad separated by a spacer.

N. **Tail Cut-Out:** An opening in the sub-plate to allow connection of switch with logic board.

O. **Domed (Tactile) Switch Design:** Consists of metal or plastic snap domes for touch response when depressing a membrane switch keypad.

P. **Connector:** May consist of prong or receptacle types with or without housing. May also consist of solder tabs or exposed traces for friction-fit connection.

Q. **Embossing (Functional):** Raised or embossed keypad areas to allow room for tactile domes. Also serves as key referencing device when keypad is ring embossed.

R. **Embossing (Decorative):** Embossed areas to enhance design or draw attention to special features. May also allow space for special legend inserts behind overlay.

Soft Tool Option Program . . .

Metro-Mark, Inc. has been providing prototype and short run orders without the use of costly dies since 1992.

Here's how our Soft Tool Option Program can benefit you:

- *Eliminates die costs*
- *Allows design changes without tool rebuilding*
- *Soft tool parts manufactured with the same care and quality as hard tooled parts*
- *Once the design is finalized, and larger volumes are required, the same CAD program will be used to manufacture the necessary dies.*

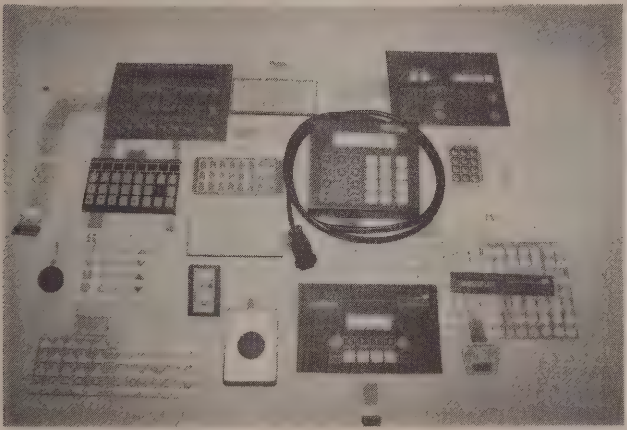
- Linear or Tactile Feedback
- Low Profile Din Compliance
- 50,000,000 Key Life
- Customer Defined Electronics
- Military Keyboards
- Choice of Enclosure Styles
- ASCII, IBM™, Apple™, Electronics
- Many Hardware Options
- Backlighted Key Modules
- Choice of Key Colors, Legends
- Relegendable Keycaps

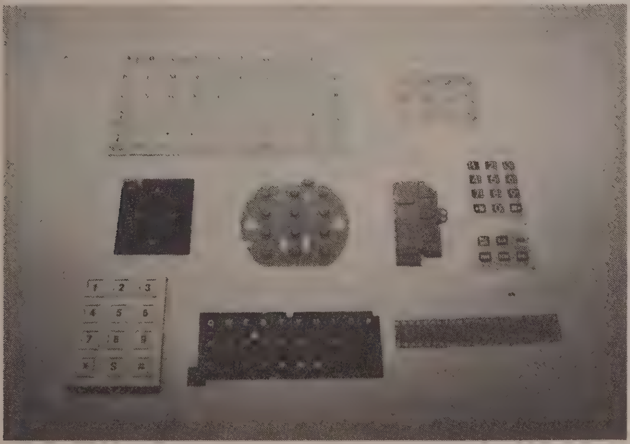
MEMBRANE SWITCHES



Flat panel membrane manufactured to your exact specification. Special solvent resistant textured overlays stand up to the harshest environments. NEK membranes are currently on the job in the Military, in-the-vehicle and the commercial kitchen.

- Unlimited Color Choices
- Tactile Feedback Option
- Clear and Tinted Windows
- LEDs Available
- Embossing
- Alone or with Electronics
- Choice of Connectors
- Dead Front Panels
- Integrated Displays

RUBBER KEYPADS



These rugged short stroke keypads offer substantial design flexibility. Key size, color, shape, height, legends and layout can be designed to exactly meet your requirements.

- Corrosion Resistance
- Plastic Bezels Available
- Glow in the Dark Rubber
- Sealed Contacts
- -40°C to 85°C Temp Range
- Tactile Feedback
- Choice of Key Force

MINIGLOSSARY
FIBER OPTICS

Acceptance Angle
The maximum angle within which light will be accepted by an element such as a detector or waveguide. In the latter, it is quantified as half the vertex angle of the cone within which optical power may be coupled into bound modes of a fiber.

Aligned Bundle
An assembly of fibers in which the coordinates of each fiber are the same at the two ends of the bundle, also called *Coherent Bundle*.

Bend Radius
The radius of curvature that an optical fiber can bend without breaking.

Bundle
Multiple optical fibers in a single housing used to transmit light or images.

Cladding
The low refractive index material that surrounds the core of the fiber to contain core light while protecting against surface contaminant scattering. In all-glass fibers, the cladding is glass.

Effective Numerical Aperture
The real numerical aperture of a fiber when the computed NA is not valid due to a change in the glass indices during the drawing and fusion process.

Fiber Bundle
A rigid, or flexible, concentrated assembly of glass or plastic fibers used to transmit optical images or light.

Fiber Optic Light Guide
A bundle of optical fibers arranged randomly for the purpose of transmitting energy, not images.

Fiber Optic Probe
A flexible optical probe having a bundle of glass fiber arranged to transmit an image

Gap Loss
The optical power loss caused by space between axially aligned fibers.

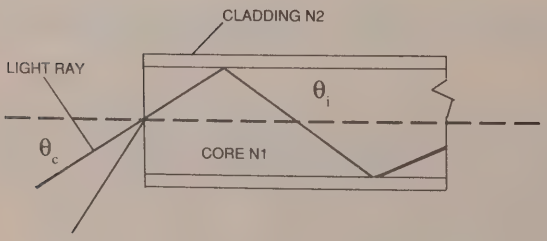
Image Transducer
Any arrangement of a bundle of optical fibers that alters the shape of the image. For example, by a systematic regulation of the spacing of the fibers from the entrance end to the exit end, a distortion of the image can occur that may be used to neutralize or compensate for the distortion introduced by the lens, prism or mirror components in an optical system.

Large-Core Fiber
Optical fiber with a large core, often a step-index fiber. “Large” is sometimes defined as greater than 85 µm.

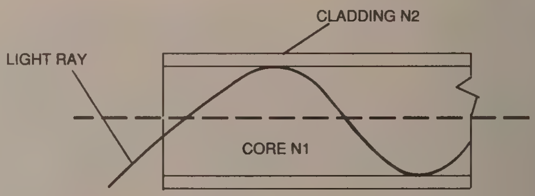
Multifibers
An array of optically distinct fibers that are fused into one strand. They are used to keep the resolution efficiency of the smaller single fibers and eliminate difficulty in handling. Their specific usage is determined by their flexibility or rigidity.

Packing Fraction
The ratio of the active core area of the fiber bundle to the total area at its light emitting or receiving end.

Plastic Fiber
Fiber in which both the core and cladding are made of plastic.



(a) Light propagation in a step index fiber.



(b) Path of light rays in a graded index fiber.

A.V.L. /A.V.L.E. - P.R.L. - T.E.L. series

- **Buttons & marking:** The A.V.L. Series keypad metallic buttons are made of black Au4G, mechanically engraved.
  The T.E.L. & P.R.L. series keypad buttons are made of opaque polycarbonate coloured or translucent (illuminated).
  Marking is done by hot stamping.
- **A.V.L. Keypad:** Mounted behind a metal panel, it offers protection from burning cigarettes, tools, knives, nail files, etc.
- **A.V.L.E. Keypad:** Mounted behind a metal panel, the A.V.L.E. keypad guarantees absolute protection against the wrenching of keys: the specially formed shoulder-keys prevent dismantling from the front of the keypad.
- **T.E.L. Keypad:** For frequent use in an aggressive environment, SECME recommend a negative marking with uniform color under the transparent cover. Any marking wear or erasure will be prevented by this process.
- **Graphics:** Helvetica medium is used for the graphic characters; standard layouts are shown hereby. Other symbols or characters may be used for button marking (consult SECME).
- **Illuminated series:** Each button is lit individually by a circuit independent of the contact circuit, except for the 8 button keypads which are lit simultaneously. Matrix wiring or common point identical with the electrical circuit. Foolproof and polarised connector.

T.F.L. - E.T.F.L. series

- **Design, graphics:** design, custom graphics and identification are silk screened on the reverse side of a polycarbonate film which is thermoformed in the actuation zones. Helvetica medium is used for the graphic characters. The silk screen polycarbonate film is replaceable.
- **Illumination:** For the illuminated T.F.L. series, each actuation zone is lit individually by a circuit independent of the contact circuit. Matrix wiring or common point is identical with the electrical circuit. Foolproof and polarised connector. For the illuminated E.T.F.L. series, the LED simultaneous lighting is provided by a circuit independent of the contact circuit. Matrix wiring or common point is identical with the electrical circuit. A foolproof and polarised connector is used to connect both these circuits.

CT 83 series

These keypads have been designed to be simple and rugged (tear resistant buttons) in order to market a low-cost and reliable product meeting the wide industrial requirement range. The KIT mounting provides a great versatility of application. Colored or marked snap-on covers are available for the user to give a personal touch to the keypad according to the desired configuration. When they are used in an aggressive environment, keypads fitted with transparent covers are recommended. This protection eliminates printing wear or erasure.

E.CO. series

E.CO. series keypads are specially suited for encoding, remote control, telephone, etc. Their polycarbonate buttons are of the tactile actuation type. Typical application of E.CO. keypads is for volume production systems.

Vandal-Proof Keypads Series

A.V.H.S. series
The Vandal-Proof High Security keypads are 16 button keypads having possible 4 button modular extensions. Resistance against wear and vandalism is the main characteristic of the A.V.H.S. keypad. The buttons can withstand a 100 N tension or actuation force. These front sealed keypads may be fitted with individually illuminated buttons.

A.V.H.P.
The origin of A.V.H.P. is an order from the French Postage and Telecommunication Administration to implement magnetic card pay phones. These keypads have been designed to withstand all climatic and social environmental stresses of consumer electronics. The anti-pull off resistant buttons can withstand a 200 N tension and a 200 N actuation force.
Highly resistant markings are designed to withstand user vandalism (coins, nail file, keys or other usual tools). Available in 12, 16 and 17 key versions.

A.V.H.S.	A.V.H.P.
	1) Mechanical medium: reinforced polyester	1) Anti-wrenching key: zamac, resists a wrenching force of 200 N
2) Key: metal Au 4G	2) Frame: stainless steel
3) Actuator	3) O-ring sealing
4) Sealing membrane	4) Compensating spring
5) Moving contact: amorphous carbon	5) Buffer plate: stainless steel, resists a static bearing strength of 200 N Mounting strength: 400 N
6) Mechanical stop, resists a static bearing strength of 100 N	6) Moving contact: amorphous carbon

8) LED T5/8" (option): yellow	

Industrial Keypads Storm Series

- STORM keypads are suitable for use in the most severe environments. They are designed to withstand the ingress of liquids and other contaminants; being fully sealed (IP67), they can be used in the most demanding environments: military, medical, industrial applications, etc.
- The exceptional reliability of STORM keypads (more than 2 million operations) is the result of highly developed construction techniques. A moulded silicone rubber mat is secured around a rigid circuit chassis providing its own environmental seal.

All keypads have keytops that move with an "over centre" action when pressed, providing the operator with positive tactile confirmation of contact. This ensures fast and accurate data entry even when the keytops are not struck accurately.

Storm Tec

The 4/12/16 & 36 key STORM keypads modular design enables combinations of keypads to be used to produce specific keyboard layouts.

Storm Tes	**Storm Tes Modules**

MNR offers a wide range of standard telephone keyboards utilizing silicone rubber as the elastic actuator and conductive silicone rubber pad as the contact element.

General Specification:

- Contact rating: 20mA, 24VDC
- Contact resistance: 200 ohm max
- Life: 1,000,000 cycles per key
- Operating Temperature: -20°C to +60°C
- Storage Temperature: -40°C to +65°C

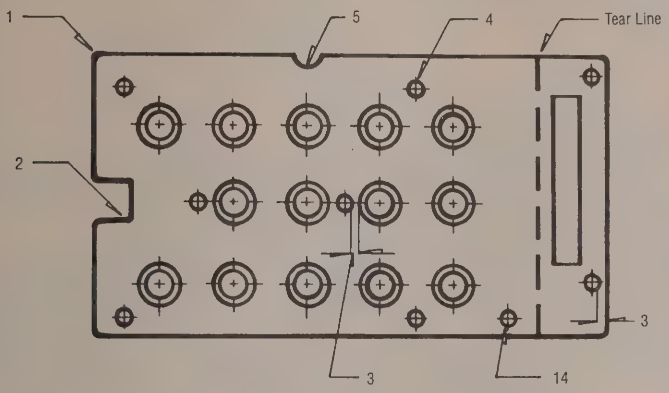
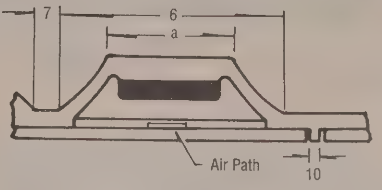
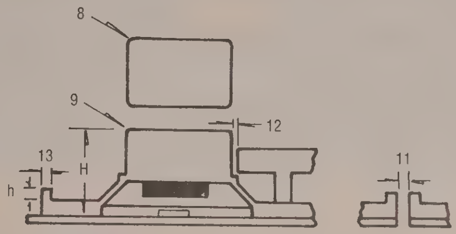
Keypad Design Guide







Design Notes

1. Minimum curvature 1.0 mm in diameter
2. Minimum curvature 0.5 mm in diameter
3. 1.5 mm or more (typical)
4. 1.5 mm or more (typical)
5. According to Notes 1,2 and 4
6. a + 2.5 (or 2.0) mm (approximately)
7. 1.5 mm (typical)
8. H<7 mm minimum R 0.4
   7<H<10 mm minimum R 0.9
9. 0.2 mm minimum
10. 1.5 mm or more (typical)
11. 1.5 mm or more (typical)
12. 0.3 mm (typical, depending on key structure, pad size, guide hole position, bezel design, etc.)
13. ≥ 1/2 h
14. Guide holes should be symetrically located and placed no further than 5mm apart.

Rubber Key Specifications

Actuation force	20 to 500 grams
Contact resistance	less than 150 ohms
Cycle life	0.5 to 30 million
Operating temperature range	-20°C to 180°C
Storage temperature range	-30°C to 250°C
Contact rating	5 milliamperes at 12V DC
	for 0.5 seconds and 20 million cycles
Contact bounce	less than 12 milliseconds
Insulation resistance	greater than 10^{12} ohms at 500 VDC
Dielectric strength	25-30 KV / mm

Dimension Tolerances

0 to 10 mm ± 0.10 mm
10 to 20 mm ± 0.15 mm
20 to 30 mm ± 0.20 mm
30 to 40 mm ± 0.25 mm
40 to 50 mm ± 0.3 mm
50 mm or greater ± 0.6%

Actuation Force Tolerances

50 grams ± 15 grams
75 grams ± 20 grams
100 grams ± 25 grams
125 grams ± 30 grams
150 grams ± 35 grams
175 grams ± 40 grams
200 grams or greater ± 50 grams

Force- Stroke Curve of Rubber Keypad

FORCE	F1	Actuation Force ($F_{MAX.}$)
	F2	Snap Force
	F3	Min Return Force (F_{MIN})
	F4	Max. Return Force
	FD	Drop Force ($F_0 = F_1 - F_2$)
STROKE	S_1	Peak Stroke
	S_2	Contact Stroke

VETRA
SYSTEMS CORPORATION

Your Authoritative Source for PC Keyboard, Mouse & Video Products

Eliminators

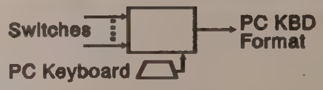
VIP-321 - "Phantom Keyboard"™. Allows error-free boot up of PC's without a keyboard.

VIP-325 - "Phantom Keyboard Plus"™. Same as the VIP-321, but also allows keyboard plug-in/out at any time. Remembers and restores keyboard indicator status.

Power: Both models are powered from the PC.

Size: Module with one or two pig-tail cables, 2.125 in by 3.25 in by 1.125 in

Keyboard Encoders

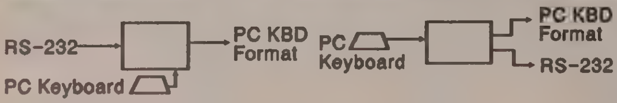


VIP-311 - Encodes switch closures into standard PC keyboard scan codes. Allows custom panels or keypads to be used in place of a PC keyboard.

VIP-312 - The "SmartWye"™ model encoder. Accepts a standard PC keyboard in addition to switches.

VIP-411 - "SmartAe"™ Encoder with RS-232 output.
Capacity: Accept up to 24, 48, 64 or 128 switches. Larger capacities on custom order.
Size: 2.6 in by 4.6 in printed circuit board, VIP-411 either housed in 1.5 in by 5.08 in by 5.25 in enclosure, or a 4.1 in by 4.8 in PCB.
Power: Powered from the PC, VIP-411 uses external power supply.

Protocol Converters

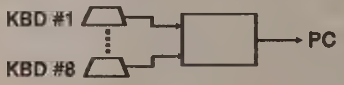


VIP-335 - "Smart Pipe"™ Converts RS-232 to PC keyboard scan code format. Also allows simultaneous use of a PC keyboard.

VIP-345 - "Reverse Pipe"™ Converts the output of a standard PC keyboard to RS-232. At the same time, allows the keyboard to be connected to the PC.

Size: Enclosure 1.5 in by 5.08 in by 5.25 in. OEM models are a printed circuit board 4.1 in by 4.8 in.
Power: VIP-335 is powered from the PC. If the VIP-345 is not connected to a PC, an external power supply is required.

Multiplexers



VIP-357 - "SmartSplice"™ Connects two PC keyboards to one PC. The **VIP-357PM** "MiceSplice"™ connects two PS/2 mice to one PC. The **VIP-343** "TeleMux"™ connects many distributed keyboards to one PC.

VIP-8231 - "MegaMux"™ Connects up to 64 keyboards to one PC, in groups of eight.

Power: VIP-357 and 357PM are powered from the PC. Other models require external power supply.
Size: Enclosure for VIP-343, 357, and 357PM is 1.5 in by 5.08 in by 5.25 in; for VIP-8231 it is 3.4 in by 12 in by 9 in.

Keypads

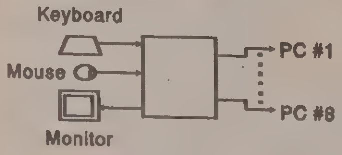
VIP-312-FS - Adapter merges Footswitch with PC keyboard. User selectable code for footswitch.

9001-48 - Programmable Auxiliary 48-key Keypad extends PC keyboard functionality.

Custom Services

CUSTOM SERVICES - We will customize all our products to match your exact needs, including mechanical, packaging, and performance modifications, from simple to complex switching and routing systems.

Keyboard/ Mouse/ Monitor Switches



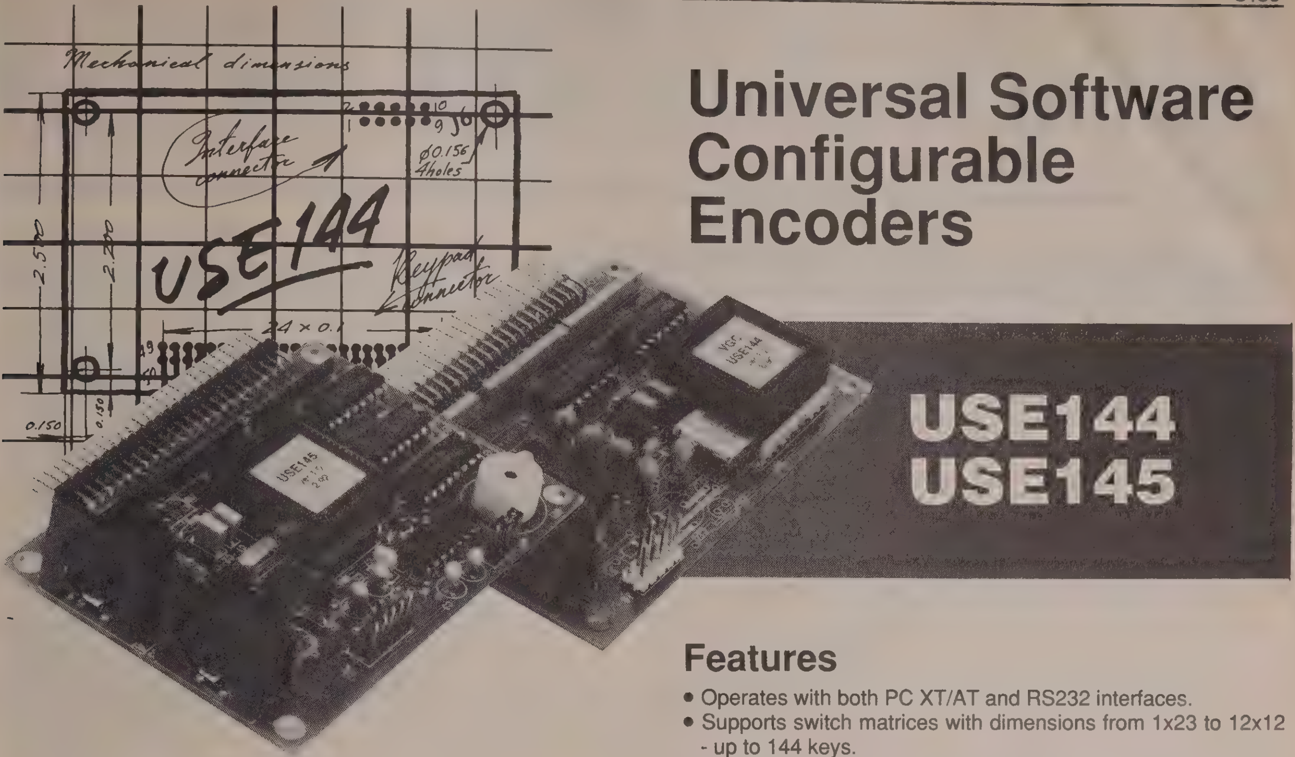
VIP-1328 - "MegaSwitch"™ Allows one keyboard/mouse/monitor set to control up to eight PC's, more with stacking. PC's will boot error free even if they are powered in any order. Keyboard indicators and parameters are set correctly after switching.

Options: Remote Control Unit; remote keyboard and peripherals; broadcast capability; channel selection from keyboard.

Power: Powered from an external 9 V DC power supply. **Size:** 12 in by 9 in by 3.4 in.

27 Newtown Road Plainview, New York 11803 USA Tel:516-454-6469 Fax:516-454-1648

Universal Software Configurable Encoders



Features

- Operates with both PC XT/AT and RS232 interfaces.
- Supports switch matrices with dimensions from 1x23 to 12x12 - up to 144 keys.
  Out of 24 input lines 20 can be configured as either "rows", "columns" or "not used". The remaining four lines must be defined as "rows" or "unused". This pinout feature allows the USE145 to work with practically any keypad pinout. This translates into size and cost savings for the keypad itself.
- Key Codes, Interface type (PC/XT, PC/AT or RS232), keypad pinout, Baud rate, typematic period and typematic delay are all user-programmable parameters.
- Key codes can be entered as Hex, ASCII or character values.
- Produces all appropriate "Make" and "Break" codes for PC/XT and PC/AT interfaces and "Make" codes for a RS232 interface
- Parameters that have been defined for a particular application can be stored in a file, retrieved and programmed into another encoder.
- Key codes and typematic operation can be tested without leaving the design utility USECON.
- Allows to operate in parallel with standard keyboard (USE145 only).
- Provides audio feedback through the optional buzzer (USE145 only).
- Keypads with any combinations of row/column and any pinout can be used without hardware modification.
- More than one keypad can be connected to one encoder.
- Keypad layout and all key codes can be modified in-house without increasing cost or affecting development time.
- Zero lead time for any custom configuration.
- Supports keyboard "macros", i.e. multiple keycodes for one keystroke. NEW

Specifications

- Power supply voltage: 5 V DC @ 25 mA(typ), 7 to 12 V (opt., USE144 only)
- RS 232 parameters: 300 to 9600 Baud, 8 bit, no parity
- Keypad connector: 2x25 right-angle header
- Interface connectors: 2 x 5 straight header and two 5-pin DIN connectors (std. for USE145), DB9 (opt., USE145 only), telephone connectors (opt. USE144 only)
- Operating temperature 0° to 60°C
- Size 2.5"x3.6"

Why Software Configurable?

IBM PC/XT and PC/AT compatible computers have become a popular choice for embedded systems such as electronic instruments, industrial controls and point of sale terminals.

Though such computers come with a keyboard interface port and can use a standard IBM compatible keyboard, a custom keyboard/keypad is often required. This is due to: environmental constraints, size and weight limitations, user interface requirements, company identity, esthetics, or any combination of the above.

Neither PC/XT's nor PC/AT's can directly interface with a membrane keypad. You need an encoder to provide PC/XT or PC/AT compatible signals. Normally you would buy such an encoder to avoid tying up programming resources.

But there are a few additional problems. Normally keyboard controllers can work with one or, at most, a few fixed keypad matrices with fixed pinout. Key codes are standard and though you can have them programmed for your application, it is a costly and time-consuming process.

If you need to change any of the keypad parameters you will probably have to order a new version of the encoder. And if you manufacture a few different products, you will have to stock encoders for each of them.

The USE144/USE145 Universal Software-configurable Encoders provide a solution: let the encoder itself to be programmable, so that it can be easily reconfigured to meet changing customer requirements.

The USE144/USE145 are intelligent, microprocessor-based systems. All parameters can be programmed with the accompanying utility, USECON. Parameters are stored in non-volatile memory, and can be changed at any time.

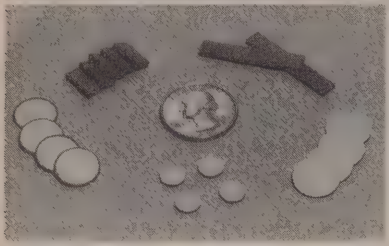
ADVANCED THERMAL PRODUCTS, INC.

PTC Thermistors For Self-Regulating Heaters



Features:

- No thermostat needed
- Virtually unlimited life
- No moving parts to wear
- Very low cost
- No electrical noise
- Efficient

Typical Applications:

- Curling iron • Hair dryer
- Hot melt glue gun • Food warmer
- Liquid Crystal display
- Automotive chokes
- Plug-in aroma heater • Wax motor
- Plug-in insecticide • TCXO heater
- Heat tracing tape • Diesel fuel heater

Positive Temperature Coefficient thermistors are truly remarkable for their ability to function as self-regulating heating elements. They can operate at a nearly constant temperature over a broad range of voltage and dissipation conditions. PTC heaters can be manufactured in many different configurations. These include discs, rectangles, squares, cylinders, and various shapes with holes to increase surface area. Multiple PTCs can be used in parallel to provide constant heating over a larger area.

Standard Disc PTC Heaters

PTC Thermistors For Over-Current Protection

Features:

- Fast switching
- No electrical noise
- Virtually unlimited life
- Self resetting
- No contacts
- Automatic operation
- Efficient

Typical Applications:

- Telephone line fault protection
- Transformer protection
- FHP motor protection
- Transistor protection
- Speaker protection

Notes: 1. Maximum Voltage listed as DC or 60Hz. AC. **2.** Maximum No Switch Current (I_{ns}) is the maximum current that the PTC can pass without switching into its high resistance state. **3.** Minimum Must Switch Current (I_{ms}) is the minimum current that is necessary to switch the PTC into its high resistance state. **4.** I_{ns} is calculated at the maximum ambient temperature, while I_{ms} is determined at the minimum ambient temperature. For ATP standard products, Ta_{min} is 0°C and Ta_{max} is 50°C.

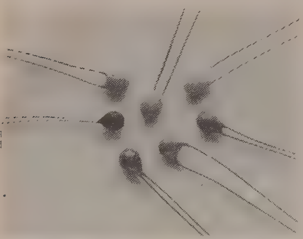
ADVANCED THERMISTOR DIV.

U.S. SENSOR Corp.

Precision Interchangeable Thermistors



U.S. Sensor's precision interchangeable thermistors are low cost, highly accurate, stable devices designed specifically for temperature sensing, control and compensation applications. They are particularly suited for uses where their precision interchangeability eliminates the necessity for costly individual circuit calibration.

Features

- Low cost • Highly accurate
- Encapsulated • High stability
- Long life • Curve-matched
- Fast thermal time response

Options

- Special lead materials and lengths
- Special encapsulants or probe housings
- Non-standard resistance values and tolerances

Specifications

- Thermal time constant: 1 second max for a device suspended by its leads in a well stirred oil bath, 10 seconds max in still air.
- Dissipation constant: 1 MW per degree centigrade.
- Maximum power rating: 30 MW at 25 degrees C derated to 1 MW at 125 degrees C.
- Interchangeability tolerance: ±0.2 degrees C from 0 to 70 degrees C.

PART NUMBER	RESISTANCE @ 25°C	INTERCHANGEABILITY TOLERANCE 0-70°C	R-T CURVE	BETA (K) 0-50°C	RESIS-RATIO 25-125°C	MAX. OPERATING TEMP. °C

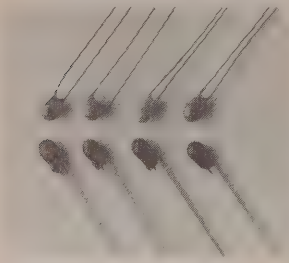
Standard Leaded Chip Thermistors



U.S. Sensor's leaded chip thermistors are manufactured using the same state of the art manufacturing techniques as those used to produce precision interchangeable devices. This results in devices with superior long term reliability characteristics especially suitable for temperature measurement, temperature control and temperature compensation applications.

Features

- Low cost • High stability
- Small size • Fast thermal response

Options

- Special lead materials and lengths
- Special encapsulants or probe housings
- Non-standard resistance values and tolerances
- Point matched at specified temperatures

Specifications

- Thermal time constant: 1 second max for a device suspended by its leads in a well stirred oil bath, 10 seconds max in still air.
- Dissipation constant: 1 MW per degree centigrade

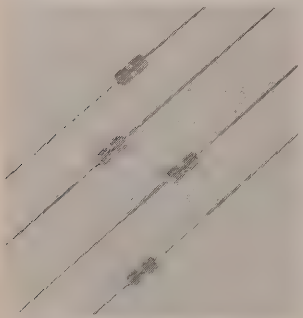
Glass Encapsulated Thermistors



U.S. Sensor's glass encapsulated thermistors are manufactured using super stable NTC chips which are hermetically sealed in a glass (D035 diode style) package. The result is a device which exhibits excellent long term reliability and stability even when subjected to severe environmental or thermal conditions. Their uniform dimensions and axial lead configuration makes them especially suitable for use with automatic insertion equipment.

Features

- High temperature capability (-55 to +220 degrees C)
- Hermetically sealed glass package
- Low cost • High stability

Options

- Non-standard resistance values and tolerances
- Point matched at specified temperatures
- Tape and Reel packaging

Specifications

- Thermal time constant: 8 seconds max
- Dissipation constant: 2 MW per degree C

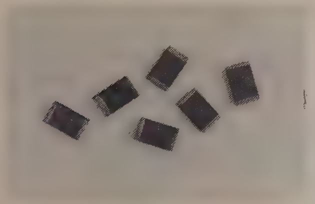
ADVANCED THERMISTOR DIV.
U.S. SENSOR Corp.

Surface Mount Wrap Around Chip Thermistors

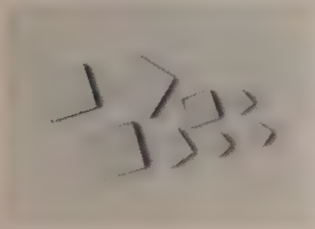


U.S. Sensor's surface mount wrap-around thermistor elements are designed for use on hybrid substrates, integrated circuits or printed circuit boards. They have palladium silver metalization which is suitable for various contact techniques including wire bond, epoxy or solder. Since they are manufactured using the most advanced equipment and technology available, their dimensional parameters are extremely uniform making the devices especially suitable for use with automatic handling and placement equipment.

Features
- Surface mountable
- Small size • Low cost
- Fast thermal response

Options
- Non-standard resistance values and tolerances
- Special electrode materials
- Special dimensions

Leadless Chip Thermistors



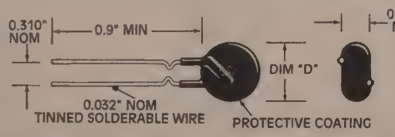
U.S. Sensor's leadless thermistor elements are designed for use on hybrid substrates, integrated circuits or printed circuit boards. They have silver metalization on their top and bottom surfaces which is suitable for various contact techniques including wire bond, epoxy or solder. Since they are manufactured using the most advanced equipment and technology available, their dimensional parameters are extremely uniform making the devices especially suitable for use with automatic handling and placement equipment.

Features
- Surface mountable
- Small size • Low cost
- Fast thermal response

Options
- Non-standard resistance values and tolerances
- Special electrode materials
- Special dimensions

Inrush Current Limiting Power Thermistors

U.S. Sensor's inrush current limiting power thermistors are specially formulated and processed NTC thermistors suitable for suppressing high inrush currents in switching power supplies and other applications where the high initial starting currents are undesirable. Their unique design enables them to handle extremely high current and voltage levels. In a typical power supply application, the device is used in series with the filter capacitors. Upon application of the initial voltage, the device, due to it's relatively high resistance, limits the current flow to an acceptable level until the capacitors are charged. Thereafter, the device decreases in resistance substantially to a level where the voltage drop across it is negligible.



Specifications
- Thermal time constant: 10 seconds max
- Dissipation constant: 1 MW per degree C min.

ADVANCED THERMISTOR DIV.

U.S. SENSOR Corp.

U.S. Sensor Micro-Medical Probes

U.S. Sensor has developed a line of extremely small thermistor probes specifically designed for medical applications. Due to their very small size, super fast thermal response and extremely high stability, these devices are useful in many other applications as well.

Please contact U.S. Sensor's application engineering department for specific electrical and physical characteristics of these devices.

Custom Probes and Assemblies

U.S. Sensor manufactures a complete line of probes and assemblies suitable for temperature measurement and control in a variety of commercial, industrial and military applications. Most probe assemblies can include one or more of the thermistors listed in this catalog. U.S. Sensor's highly skilled applications engineering personnel are available to aid in the design of the most advantageous housing and sensor for your application.

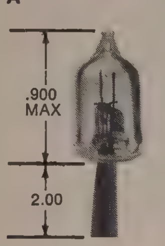
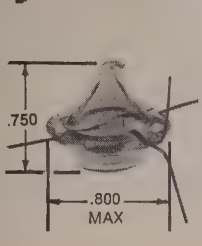
VACUUM THERMAL CONVERTERS

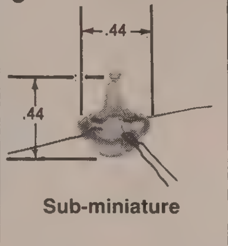
A



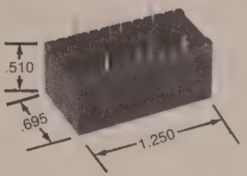
B



C



D **DIP PACKAGE**
24 PIN STD.



TRUE RMS MEASUREMENT

—where the signal is periodic with distorted wave shapes

—or where random wave shapes are present, even with high crest factors

D package will house one or two sub-miniature units. Ideal for T.C. Control, Spare or Matched Pairs.

Vacuum Thermal Converters (VTC) are true RMS current measuring devices. A VTC consists of a thermocouple mounted on an electrically heated wire and encased in an evacuated glass bulb. The measured temperature of the heater wire is independent of wave shape or frequency over very wide ranges. The VTC is calibrated at D.C. and used to measure A.C. to as high as 1 GHz. Extremely high crest factors can be accomodated. Operating range is from 0-65 MHz for the standard pattern models, up to 300 MHz for UHF pattern and up to 1 GHz for sub-miniature UHF pattern models. BEST VTC's are used throughout the world as basic AC-DC transfer standards as well as for true RMS Voltmeters and Power Meters. They can be made as Vacuum gages by exposing the heater and thermocouple to the Vacuum to be measured instead of being mounted inside an evacuated bulb. BEST supplies Vacuum gages to custom order.

APPLICATIONS CHART

VTCs are used as basic AC-DC transfer standards as well as other instrumentation applications including vacuum measurement.

VTC Type	Current mA **	Freq MHz	R/E %*	Applications
UHF	2.5-1000	0-300	.04	General purpose
UHF Matched Pairs	2.5-1000	0-300	.005	Voltmeters
Sub-Min. UHF	2.5-1000	0-1GHz	.08	Artificial squibs
Sub-Min. UHF Matched Pairs	5	0-1GHz	.005	Voltmeters
Std. Pattern	1-1000	0-65	.005	Low current models available
Std. Pattern Matched Pairs	1-1000	0-65	.005	Voltmeters
Low AC-DC Transfer error	5 10	1.0 1.0	NA NA	SS288 SS283 } AC-DC Transfer error 1 ppm to 100KHz, 10ppm to 1MHz
Vacuum Gages	1-1000	NA	NA	Vacuum measurement
Open Heaters	1k-50k	0-300	.20	High current RF

** Range of full scale current values.

* Best reversal error, standard is 0.2%

BetaTHERM NTC Thermistor Devices

INTERCHANGEABLE *BetaCURVE* THERMISTOR DEVICES

FEATURES

- Available in all Chip & Probe styles, insulated & non-insulated leads
- Superior Temp. Accuracy & Interchangeability
- Rugged—Reliable—Cost Efficient
- Proven Stability and Life Capability
- Rapid Time Response
- Rated from −55 to 150°C.
- 1.0 mW/°C Dissipation Constant
- 10 sec. Maximum Time Constant

BetaCURVE THERMISTOR DEVICES (±0.2°C 0 to 70°C.)

Nominal R @ 25°C. (ohms)	Part Number	R-T Curve #	0-50°C Beta Value (K.)	α @ 25°C. (%/°C)
100	0.1K1A1	1	3108	−3.5
300	0.3K1A1	1	3108	−3.5
1,000	1K2A1	2	3263	−3.7
1,000	1K7A1	7	3422	−3.9

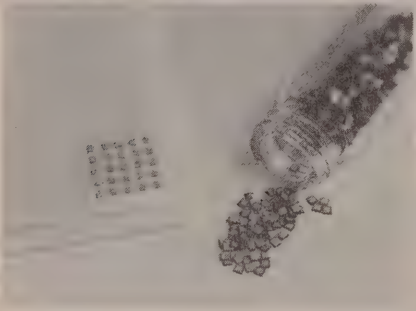
30,000	30K5A1	5	3811	−4.3
50,000	50K6A1	6	4143	−4.7
100,000	100K6A1	6	4143	−4.7
1,000,000	1M9A1	9	4582	−5.1

+*BetaCURVE* devices have ±0.2%C. curve track tolerance capability over the recommended use temperature span. Products with tighter deviation or extended temperature range can be factory ordered.
+ +Interchangeable *BetaCURVE* products with ±0.2 to 1.0 deg. C curve-track tolerance capability over 0–70°C are available. Products with tighter dT deviation or extended temperature can be factory ordered.

GOLD TERMINATION *BetaCHIP* THERMISTOR



FEATURES

- Top and Bottom Metallization
- Rapid Time Response
- Rated from −55 to 150°C.
- Surface Mount Capability
- Uniformly Sized for Pick & Place Assembly
- 1.0 mW/°C. Dissipation Constant
- 10 sec. Maximum Time Constant

LEADLESS *BetaCHIP* THERMISTOR (±10% Tolerance @ 25°C.)

Nominal R @ 25°C. (ohms)	"Chip" Part Number	R-T Curve #	0-50°C Beta Value (K.)	α @ 25°C. (%/°C)

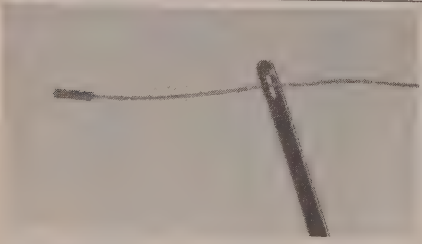
Standard *BetaCHIP* Leadless Thermistor Elements available in other R_{25} tolerance limits.
BetaCHIP Products with tighter R_{25} tolerance or sorted at T other than 25°C can be factory ordered.

microCHIP THERMISTOR PROBES



FEATURES

- High Stability Probe (Industrial & Medical Applications Typically)
- Temperature Accuracy +0.1 C.
- Extremely small profile diameter
- Rapid Time Response Design
- Time Constant — <1.0 sec.*

Other Styles, Resistance Values and Tolerances Available. Contact Beta THERM Application Engineering for details.

BetaTHERM

NTC Thermistor Devices

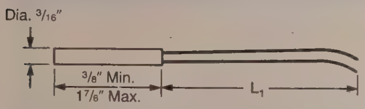
CUSTOMIZED PROBE ASSEMBLY CONSTRUCTIONS (TYPICAL)

FEATURES

- Customized for Each Application
- Cost-Effective Designs to Performance Specs
- Prompt Betatherm Design/Build Execution
- Rugged—Reliable—Stable—Constructions
- Surface, Immersion and Gas Sensing Designs
- Customized Sense Element for Each Application

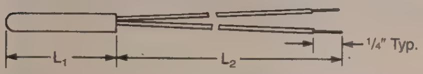
CONFIGURATIONS

PH005 ROUND ALUMINUM PROBE (Flat End)



Available with Individual (Teflon or PVC) Insulated Wire or (Teflon or PVC) Insulated Cables.

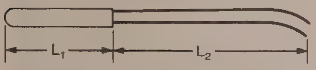
PH006 ROUND GLASS PROBE (Spherical End)



Standard Glass Dia.
.107" ± .005" O.D.
.090" ± .005" O.D.
.057" ± .002" O.D.

Available with Individual (Teflon, PVC or Varnish) Insulated Wire.

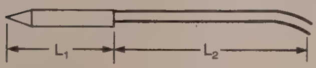
PH008 ROUND T304 T316 STAINLESS STEEL PROBE (Spherical End)



Available with Individual Lead Wires or Cable. Teflon or PVC Insulation.

(Probe Diameters Available in Hypodermic Gage Sizes 6.5 to 22.5 and Fractional Sizes 1/16" to 3/8".)

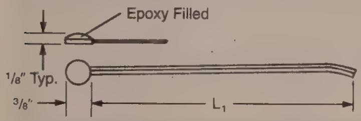
PH009 ROUND T304 T316 STAINLESS STEEL PROBE (Pointed End)



Available with Individual Lead Wires or Cable. Teflon or PVC Insulation.

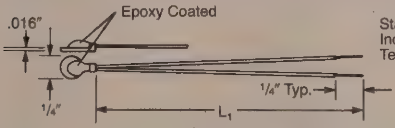
(Probe Diameters Available in Hypodermic Gage Sizes 6.5 to 22.5 and Fractional Sizes 1/16" to 3/8".)

PH010 FLAT STAINLESS STEEL CUP (Surface Sensing)



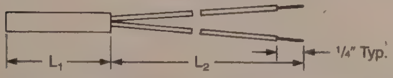
Available with Dual Cond Zip Cable, Individual Leads and or Cable. Teflon or PVC Insulation.

PH014 FLAT ALUMINUM (Anodized) DISC WITH CRIMP (Surface Sensing)



Standard with 30 AWG Stranded Individual Leads with Teflon Insulation.

PH019 PLASTIC (Nonshrink Mylar) TUBE EPOXY FILLED



Standard Outside Dia.
.070" O.D.
.078" O.D.
.095" O.D.

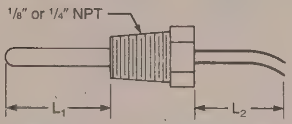
Standard with 28 AWG to 34 AWG Individual Leads. Teflon PVC or Uninsulated Leads.

PH020 PLASTIC (Polyimide) MICROTUBE EPOXY FILLED

Standard Outside Dia.
.017" Max O.D.
.018" Max O.D.
.040" ± .002" O.D.

Standard with 40 AWG Bifilar Nickel Leads with Isomid Insulation.

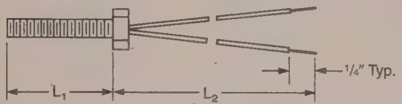
PH025 STAINLESS STEEL PIPE THREAD PROBE



Standard Probe Dia.
1/8" S.S.
3/16" S.S.
1/4" S.S.

Available with Individual Leads or Jacketed Cable Teflon or PVC.

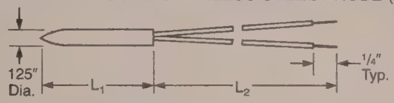
PH032 BRASS OR STAINLESS STEEL HEX HEAD SCREW



Standard Thread Size
10–32
1/4–20
3/8–16

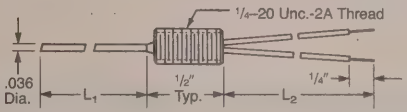
Standard with Individual Leads, Teflon or PVC Insulation.

PH043 ROUND STAINLESS STEEL PROBE (Conical End)



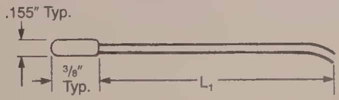
Standard with Individual Leads, Teflon or PVC Insulation

PH051 ROUND STAINLESS STEEL MICROPROBE (Round End)



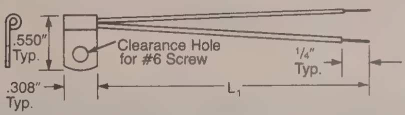
Standard with Individual Leads, 28 to 34 AWG, Teflon or PVC Insulation

PH064 ROUND VINYL MEDICAL PROBE (Round End)



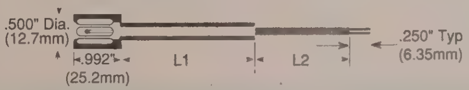
Standard with White or Gray PVC Jacketed Cable Only.

PH066 TINNED COPPER "FLAG TERMINAL" (Surface Mounting)

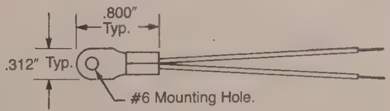


Available with Individual Leads, 24 to 30 AWG, Teflon or PVC Insulation.

PH069 STAINLESS STEEL AIR (GAS) SENSING PROBE



PH080 TINNED COPPER "RING TONGUE TERMINAL" (Surface Mounting)



Standard with Individual Leads 22 AWG to 24 AWG, Teflon or PVC Insulation.

Interchangeable BetaCURVE and BetaCHIP devices are available in most probe assembly configurations. For more information please contact BetaTHERM Application Engineering Department.

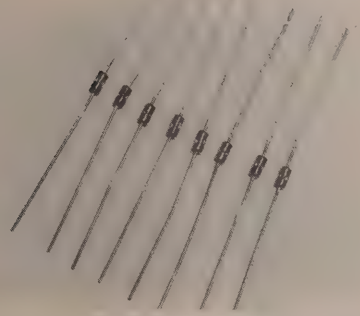
BetaTHERM NTC Thermistor Devices

DO35 PACKAGE **BetaCHIP & BetaCURVE** THERMISTOR



DO-35 packaged Thermistor are made from the same high quality and high stability **BetaCHIP** and **BetaCURVE** Thermistor Chip Elements that are manufactured for all of **BetaTHERM's** product family.

The rugged construction of the DO-35 package is ideally suited for applications which cover the temp. range of −60°C to 300°C with leads that are solderable or weldable.

FEATURES

- High Temperature Device (300°C)
- Glass to Metal Hermetic Seal
- Low Cost, High Reliability
- T.C. 8 Sec. in Air
- D.C. 2 mW/°C in Air
- Values from 1K Ω to 5 Meg Ω
- Dumet Leads Tin Plated for 200°C Max Operation or Gold Plated Leads for 300°C Max Operation
- Axial Leads

STANDARD (±10% @ 25°C) THERMISTOR DEVICES

BetaTHERM NTC Thermistor Devices

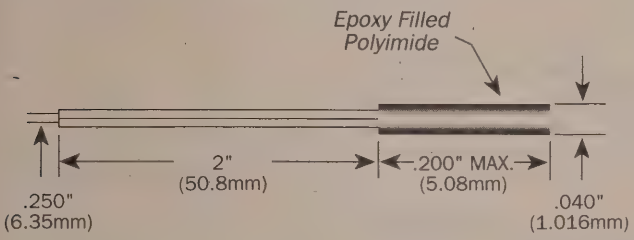
*INTERCHANGEABLE mini **BetaCURVE** PROBE*

TEMPERATURE SENSORS PRECISION INTERCHANGEABLE NTC THERMISTORS

BetaTHERM Corporation introduces it's NEW "mini-BetaCURVE" Thermistor Series.

This new addition to the ***BetaTHERM*** product family has taken the Thermistor Interchangeable market to new heights. All of the outstanding electrical features of the Standard Interchangeable ***BetaCURVE*** devices plus smaller controlled size result in faster Time response.



FEATURES:

- Controlled Package Size (.040" Nom. Diameter)
- Fast Time Response (TC=.5 Sec. Typ. in oil bath)
- * Standard Temperature Tol. ±.2°C 0°C to 70°C
- Standard Ro @ 25°C Values 100Ω to 100KΩ

Ro@25°C Nominal	Part Number	Material	0–50°C Beta	α@25°C %/°C
100Ω	.1K1MBD1	1	3108	–3.5

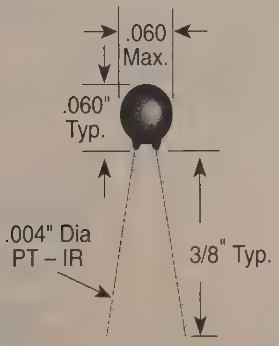
Standard Lead Wire–32 A.W.G. Copper Bifilar with Himol

*STANDARD GLASS COATED **BetaCHIP***

Betatherms Glass Coated ***BetaCHIP*** Thermistors are made from the same high quality and high stability chip element as Betatherms other product family members. High Temperature Storage tests (2000 hrs @150°C) have been documented showing superior stability (Avg ΔR= 0.016%). The recommended operating range for the glass coated ***BetaCHIP*** Thermistor is –60°C to 300°C. The glass coated ***BetaCHIP*** Thermistors will meet or exceed the testing requirements of Mil-T-23648A.



STANDARD GLASS COATED ***BetaCHIP*** CONFIGURATION

FEATURES:

- Resistance values from 200 Ohms to 1 meg. Ohms
- High reliability
- Hermetically sealed in glass coating
- Excellent long-term stability at elevated temperatures
- Platinum-Iridium leads are solderable and weldable

MODEL W, NTHS, J NTC Thermistors

Surface Mount Chip

A COMPANY OF VISHAY DALE

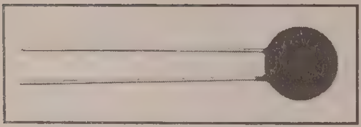
MODEL W 	• Top and bottom surface terminations • High-density monolithic ceramic construction • Allows design flexibility for use with hybrid circuitry • Model W is a thermistor die with silver conductors fired on the top and bottom surfaces. The bottom surface can be reflow soldered or conductive epoxied directly to a substrate bonding pad and the top surface wire bonded to complete the circuit connection.
MODEL NTHS 	• Wraparound terminations • Allows design flexibility for use with hybrid circuitry • High-density monolithic ceramic construction • Available in 8mm tape and reel
MODEL J 	• Wraparound terminations • Allows for design flexibility for use with hybrid circuitry • High-density monolithic ceramic construction • Available in 8mm tape and reel • Model J chips are thermistor dies with wraparound terminations of fired-on platinum/palladium/silver for mounting directly to the bonding pads of a hybrid substrate. The use of low temperature 2% to 5% silver bearing solder paste or a suitable conductive epoxy is suggested for mounting.

MODEL SSN "SOFT-START" NTC Thermistors

For Inrush Current Suppressing Devices

1.5 A to 25 A at 65°C

A COMPANY OF VISHAY DALE



ELECTRICAL SPECIFICATIONS

Standard Tolerance: ± 20% at + 25°C.

Dielectric Strength: 500 V, 2 minutes.

Insulation Resistance: Not < 500 Meg.

MECHANICAL SPECIFICATIONS

Resistive Element: Various metal oxides.

Encapsulation: Silicone coating.

Terminals: Tinned copper-clad steel.

FEATURES

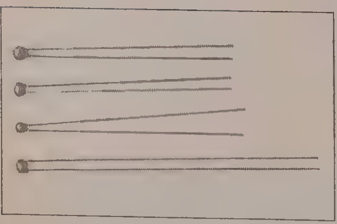
- Switching power supply applications
- Special marking is available upon request
- Protective silicone coating is standard and has a nominal thickness of .040" [1.0]. Other coatings are available upon request.
- "Soft-Start" devices display relatively high resistance to starting currents in a variety of electronic circuits. Having a negative temperature coefficient of resistance, these devices exhibit a large decrease in resistance when AC or DC current begins to flow at Iop.

  Unlike circuit breakers and fuses, "Soft-Starts" prevent dangerous, short-duration, peak inrush currents present at turn-on. Especially useful in power supplies where charging capacitors initially present extremely low impedance. "Soft-Starts" actually limit inrush currents thereby extending the life of other critical components.

MODELS X, M, C, F, T, B NTC Thermistors

Coated

A COMPANY OF VISHAY DALE



FEATURES

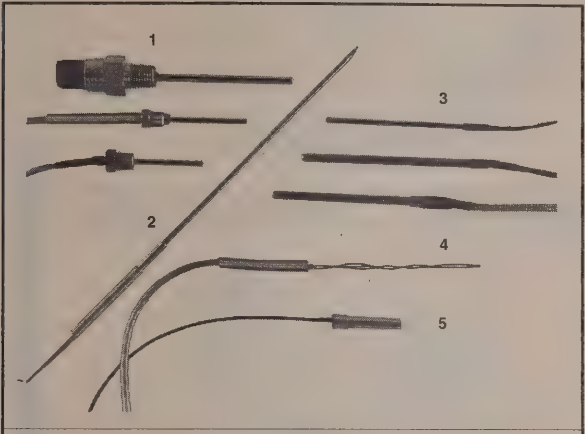
- Small size, wide resistance range, available in 11 different R-T curves, configured for standard P.C. board mounting or assembly in probes. Models are conformally coated, leaded thermistors for standard P.C. board mounting or assembly in probes. The coating is baked-on phenolic for durability and long-term stability. Leads are solid tinned copper, except T models have solid nickel wires with Teflon® insulation to provide isolation when assembled in metal probes or housings.

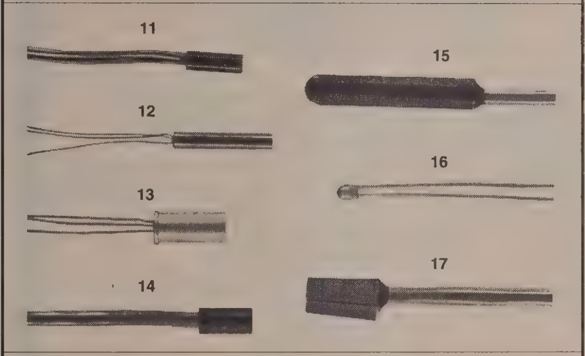
MODEL X: ± 10%, ± 5% R70 tolerance.

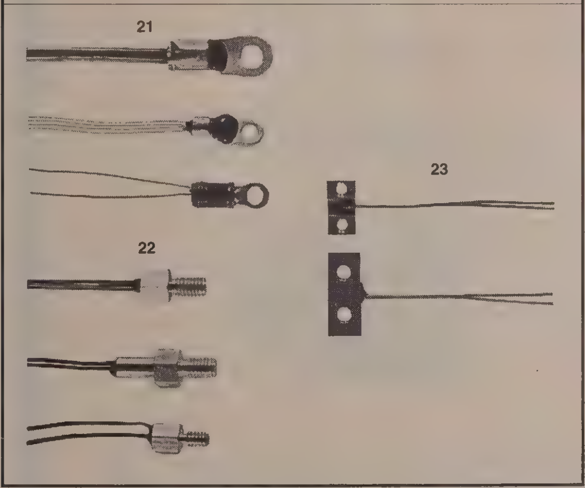
MODEL M, C, F, T, B: ± 10%, ± 5%, ± 3%, ± 2%, ± 1% R25 tolerance. Leads solid tinned copper. M, C, F and B are 1.8 ± .2 [45.7 ± 5.1] long. T is 3 ± .25 [76.2 ± 6.4] long.

NTC Thermistor Assemblies

A COMPANY OF
VISHAY
DALE®







NOTE: A variety of wire styles is available from stock. Depending on the probe and application, the wire will vary. Consult the factory for this and other information.

HOW TO ORDER

1. Choose Style: Immersion probe.
2. Select Style Type: "1" = thread mount.
3. Select Thermistor: 1M1002-C3.
4. Indicate style, type and thermistor to factory for part numbers.

Standard and custom assemblies are available in a variety of configurations. The choice of assembly style is dependent on the application. The primary factors which determine the optimum configuration of a thermistor assembly are the operating environment, mounting, time response and minimum dissipation constant.

The two factors which do vary considerably with assembly design are time constant and dissipation constant. The time constant will typically be of greater duration in encapsulated thermistors. This is, of course, due to additional mass surrounding the thermistor element; therefore, extending the thermal transfer time. Dissipation constant will also be greater in assemblies. The additional housing mass serves well as a heat sink. Greater power is therefore required to induce self-heating.

Both time constant and dissipation constant will vary with the selected thermistor and housing. Heat transfer properties of the housing, thermistor location, mass and wire type determine these constants. It is recommended to evaluate or consult the factory in applications where T.C. and D.C. are critical.

ASSEMBLY STYLES

■ Immersion Probes

1. **Thread Mounted:** Features a stainless steel tube with a hermetically sealed threaded hex fitting. Available in 1/8", 3/16" and 1/4" outer diameter tubes with 1/8" or 1/4" NPT hex fittings. Ideal for pressured, closed systems.

2. **Penetration Probe:** 7" long x 1/8" outer diameter stainless steel tube. Pointed tip easily penetrates soft and semi-frozen materials. Also ideal for soil and ground measurements.

3. **Tubular Stainless Steel:** 1/8", 3/16" and 1/4" outer diameter tubes in variable lengths. Good for universal immersion applications. Adaptable to use with compression thread mounts to give designer variable immersion depths.

4. **Tubular Pyrex®:** 6" long x 3/16" outer diameter glass tube. Excellent for lab use where a chemically inert probe is required.

5. **Flexible Immersion:** 1.5" long x .280" outer diameter aluminum housing. Flexible 105°C PVC tubing to protect wire and thermistor element from the liquid medium. Ideal assembly for intermittent immersion in hard to reach areas.

■ General Purpose Sensors

11. **Delrin® Housing:** 1/2" long x .170" outer diameter thermoplastic. Excellent for environmental controls and applications below 100°C.

12. **Stainless Steel Rod:** .875" x .156" outer diameter. Good for environmental chamber measurement where corrosive gasses exist.

13. **Gold Anodized Flanged Sensor:** .630" long x .275" outer diameter with a .298" flange diameter. An easy to mount press fitting.

14. **ABS Housing:** .476" long x .230" outer diameter. Black thermoplastic and configuration suits it well in air flow temperature measurements.

15. **Polyester Housing:** 1.50" long x .280" outer diameter. Heavy thermoplastic case makes it ideal for applications requiring delayed time responses. Ideal for process controls in refrigeration and heating.

16. **Epoxy Tip Probe:** Durable epoxy encapsulation, small size, fast time response, versatility and low cost make this sensor universally accepted. Assembly size will vary with wire and thermistor choice.

17. **Pipe Sensor:** .625" long with a cut-out radius of .250" suits this nylon thermoplastic as an ideal pipe sensor. Extensive use is seen in environmental and water heating/cooling systems.

■ Surface Sensors

21. **Ring Tongue Lugs:** Surface mount with a #4, #6, #8 or #10 screw. Excellent for measurement and control of surfaces where fast time responses are necessary.

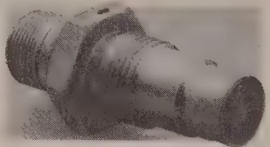
22. **Heat Sink Sensors:** Available in brass, aluminum or stainless steel with various threads. A durable and practical surface sensor, especially where shock and vibration are present.

23. **Rectangular Block Sensors:** Aluminum blocks for measurement and control of large surface areas. Easily mountable with #6 screws.

ELMWOOD SENSORS

WHERE RELIABILITY IS BUILT IN.

PRECISION THERMOSTATS

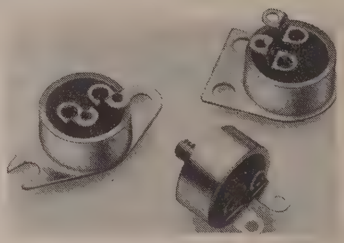


When applications call for precise specifications, Elmwood has a full line of Precision Thermostats with a variety of mounting and package configurations available. For narrow or wide differentials. When accuracy and reliability is serious business, you can count on these high quality thermostats.

APPLICATIONS:
- Aerospace & Avionics
- Medical Equipment
- Power Supplies
- Data Processing Equipment

FEATURES:
- ½" and ¾" Sizes
- Internal and External Design Options
- Variable Probe Lengths and Connecting Methods Available

AEROSPACE/ MILITARY THERMOSTATS



Designed to meet the requirements of the aerospace industry and exceed the criteria of MIL-S-24236. Elmwood's Aerospace/Military Thermostats are capable of optimum performance in rigid environmental conditions such as extreme temperature, shock and vibration.

APPLICATIONS:
- Satellites
- Aircraft
- Missiles
- Instrumentation

FEATURES:
- QPL Listed
- Small Size and Weight
- Variety of Mounting & Package Configurations Available

½" THERMOSTATS

Designed to open or close on temperature rise, ½" Thermostats operate in an ambient temperature range up to 550°F (287°C). Devices are thermally and mechanically inspected at the factory. Cost-efficient for commerical applications.

APPLICATIONS:
- Small Appliances
- Fire and Smoke Alarms
- Data Processing Equipment

FEATURES:
- Cost Efficient
- Set to Specifications
- UL Recognized, CSA Certified & European Approved

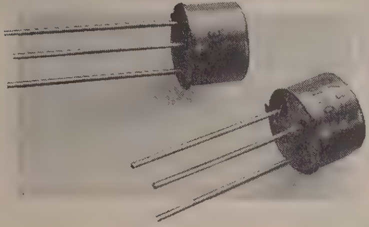
¾" THERMOSTATS

Designed to open and close on temperature rise, ¾" Thermostats are specifically designed to meet the demanding temperature control requirements of a wide range of major appliances and equipment. Thermostats are rated up to 25 Amps-240 Volts and meet UL Standard 353.

APPLICATIONS:
- Major Appliances
- Commerial Appliances
- Data Processing Equipment
- Spa and Hot Tub Equipment

FEATURES:
- 25 Amp Capacity
- Narrow Temp Differential
- Tight Temp Tolerances
- Rugged Construction
- Recognized by UL, CSA and European Approval Agencies

THE WORLD'S FIRST TO-5 THERMAL SWITCH

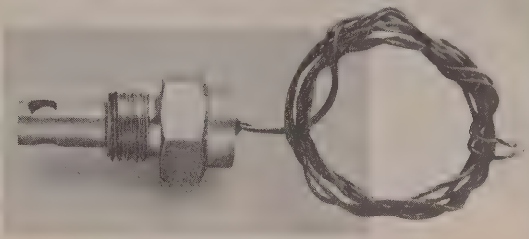


Elmwood's 3600 Series TO-5 Thermostat provides reliable protetion against damage caused by hazardous temperatures on your printed circuit board. Customized configurations are available.

APPLICATIONS:
- Power Supplies
- Logic Boards
- Medical Electronics
- Telecommunications
- Personal Computers

FEATURES:
- Hermetically Sealed/ Wave Solderable
- Switches Up To 1 Amp
- 100% Temperature Tested
- Heat Sink Mounting Brackets Available

THERMISTOR ASSEMBLIES

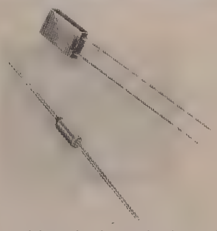


Elmwood's Accumistor Series of thermistor assemblies are available with PTC's and NTC's to meet your needs. Thermistors can be combined for reliable multi-purpose sensing capabilities and as self-regulating heaters in electronics, process control and automative applications.

APPLICATIONS:
- Temperature Setting
- Level & Flow Sensing
- Precision Heating
- Over-Current Protection

FEATURES:
- Packaged Assemblies
- Range: −40°C to 200°C
- Solid State Technology
- Customized Assemblies

THERMAL FUSES AND MOTOR & TRANSFORMER PROTECTORS



Miniature, heat-sensitive devices designed for over temperature protection of electrical appliances and equipment or transformers and fractional horsepower motors. Thermal Fuses are rated to 15 Amps and can be configured to your specifications. Motor and Transformer Protectors have a patented, non-eutectic design, feature an isolated and sealed cap and are rated to 5 Amps. Both are UL Recognized, CSA Certified and meet major international approvals. Immediate off-the-shelf availability in a variety of standard temperatures and leads.

APPLICATIONS:
- Small Appliances
- HVAC
- Major Applicance
- Motor & Transformer

FEATURES:
- Popular Temp Range
- Insulated Case (MTP)
- Customized Assemblies Available

CUSTOMER SERVICE PROGRAMS

At Elmwood, our commitment to customer service goes beyond product quality. Our customer service programs are designed to fit your specific needs:

- Redi-Temp—An off-the-shelf program with a one week delivery schedule.
- Elmwood Express—A priority delivery service that puts your rush order on the fast track.
- Design Assistance—Pre-packaged assemblies made to fit your requirements complete with custom brackets, terminals, wiring, connectors, overmolds, etc.
- Lead Time Programs—Production and sample lead times that others try to beat.

And our customers service representatives are trained professionals assigned to you from order entry to order shipment.

No one puts more into thermal sensing than Elmwood. Don't accept anything less.

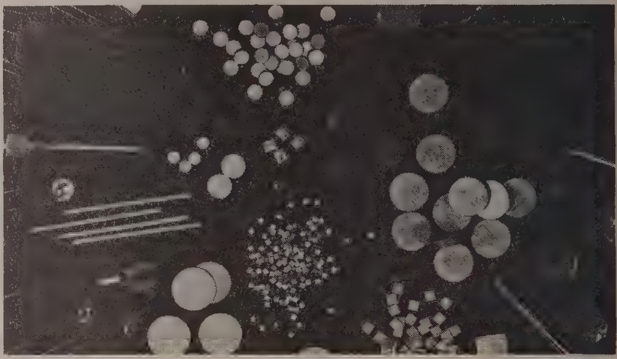
INTRODUCTION

Thermistors are temperature sensitive passive semiconductors which exhibit a large change in electrical resistance when subjected to a relatively minute change in body temperature. Negative temperature coefficient (NTC) thermistors decrease in resistance when subjected to an increase in body temperature. Conversely positive temperature coefficient thermistors (PTC) increase in resistance when subjected to an increase in body temperature. Ketema-Rodan Division manufactures NTC thermistors as well as two basic types of PTC thermistors. The silicon PTC offers a nearly linear positive temperature coefficient of approximately +.7%°/C and the switching PTC thermistor which exhibits a very large increase in resistance (several powers of 10) over a designated temperature range. Their extreme sensitivity to minute temperature changes enables them to perform many unique functions heretofore impossible with standard electronic components.

NEGATIVE TEMPERATURE COEFFICIENT THERMISTORS

The NTC devices are available in resistance values from less than 1 ohm to 1 megohm, and in sizes ranging from 0.010 inch cubes to 1 inch diameter discs. Available configurations include: discs, chips, rods, bars, probes, and resistor/thermistor networks. Units can be molded, dip coated, or encapsulated to your specifications, using packaging materials such as epoxy, glass, or high temperature silicon resin.



SURGE-GARD™ INRUSH CURRENT LIMITING DEVICES

Rodan® SURGE-GARD devices are manufactured of a specially-formulated metal oxide ceramic material which is capable of suppressing high inrush current surges. They are especially useful in power supplies (See Fig A) where, due to the extremely low impedance of the capacitor being charged, the bridge is subjected to an exceedingly high current surge at turn-on. The SURGE-GARD, being of relatively high resistance, limits the current for 1 to 2 seconds during which time the device decreases in resistance substantially to a point where its voltage drop is negligible.

For applications requiring ratings not shown, contact Ketema Rodan applications engineering.

1 Other resistance values available upon request.

2 I_{max} = The maximum steady state DC or RMS AC current.

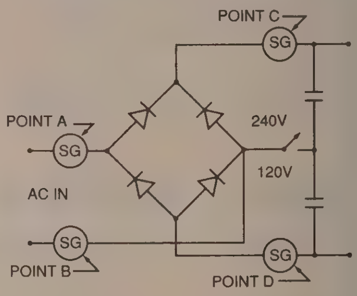
3 * RI_{max} = The approximate resistance under maximum steady state current conditions.

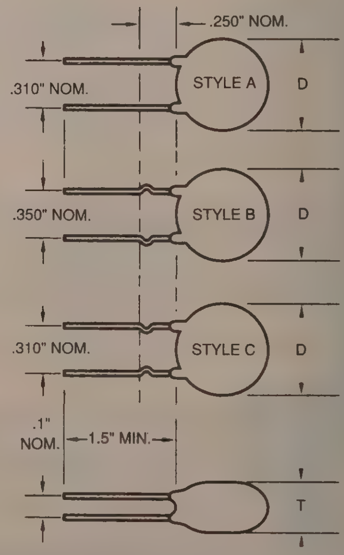
4 **Max Operating Temp** = All Rodan Surge-Gard devices are rated for operation to a maximum ambient temperature of 65°C. If your application requires operation above 65°C ambient, please consult Rodan's applications engineering department.

5 **Recovery Time** = Since Rodan Surge-Gards self-heat due to current flow, which in turn causes a reduction in their resistance, the devices require cool-down time after power is removed. The cool-down time allows the resistance to increase sufficiently to provide the required inrush current limiting. This time varies with the particular device, mounting method and ambient temperature. Usually, a one minute cool-down period is adequate. Selection of capacitor bleeder resistors which will provide a one minute or so bleed down time can eliminate the cool down time requirement.

APPLICATIONS

If the resistance of one Surge-Gard does not provide sufficient inrush current limiting for your application, two or more may be used in series or in separate legs of the supply circuit. Surge-Gards cannot be used in parallel since one unit will tend to conduct nearly all the current available. Surge-Gards may be used in the AC (Point A or B) or the DC (Point C or D) locations in the circuit.





KETEMA RODAN DIVISION 2900 Blue Star Street, Anaheim, CA 92806 • (714) 630-0081 • FAX: 714-630-4131

SILICON PTC THERMISTORS

DESCRIPTION

The positive temperature coefficient of resistance is very large: approximately 0.7%/°C, making these units ideal for use in temperature-compensating and sensing applications. Just a few such applications include amplifiers, power supplies, transducers, telemetry, computers, magnetic amplifiers, thermometry, meteorology, temperature regulation and overtemperature protection. Lead material other than standard, such as weldable nickel or gold plated, is available on request.

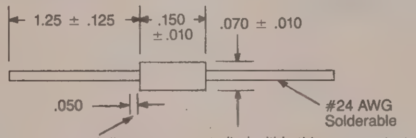
MINI-SENSOR™ HERMETICALLY SEALED NTC THERMISTORS



1.25 ± .125
.150 ± .010
.070 ± .010
.050
#24 AWG Solderable

NOTE: Lead diameter uncontrolled within this area, typical.

DESCRIPTION:

Rodan® Mini Sensor thermistors are small, rugged, hermetically sealed, glass encapsulated (DO-35) devices which are especially useful in applications where extreme temperatures and severe environmental conditions are encountered.

Their high sensitivity makes them especially useful in applications such as temperature measurement, temperature control, liquid level indication, flow measurement and temperature compensation.

These low cost devices exhibit excellent long term stability and repeatability.

Please contact the factory for additional information.

ACCU-CURVE™ INTERCHANGEABLE THERMISTORS R-T CURVE MATCHED

DESCRIPTION

Rodan's Accu-Curve thermistors are small, high quality, low cost, epoxy encapsulated, precision curve matched devices which are available in a variety of electrical parameters. They offer true interchangeability over wide temperature ranges and eliminate the need for individual circuit adjustments or padding. These thermistors provide highly accurate and stable temperature sensing capability for applications such as temperature measurement or compensation.

- Dissipation Constant 1 mW/°C Minimum*
- Time Constant 10 Seconds**

The above device can be supplied to a wider range of specifications. Please contact the factory for requirements not listed.

***DISSIPATION CONSTANT** represents the amount of power required to raise the temperature of a thermistor 1°C above its ambient, expressed in milliwatts.

****TIME CONSTANT**, expressed in seconds, is the time required for a thermistor dissipating zero power to change 63% of the difference between its initial temperature value and that of a new impressed temperature environment.

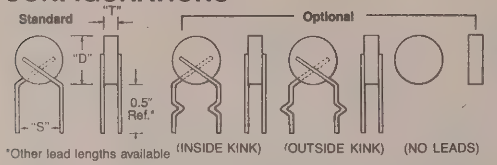
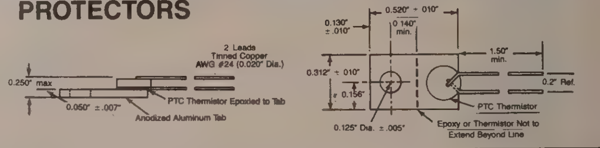
CONFIGURATIONS



*Other lead lengths available

The values for dissipation constant and time constant are for reference only. Mounting method and environmental conditions can affect these parameters.

PTC SURFACE MOUNT OVERTEMPERATURE PROTECTORS



OVER CURRENT PROTECTORS

The PTC over current protector is connected in series with the load which is to be protected. During normal operating conditions, the PTC remains in its low resistance state resulting in negligible attenuation to current flow. When a short circuit or over-current condition occurs, the PTC will switch into its high resistance state thereby limiting the current flow in the circuit to a point well below the normal operating level. When the fault condition is removed, the PTC will return to its low resistance state allowing the current flow to recover to its normal level. Ketema-Rodan Division produces over-current protectors for a whole range of load protection applications.

TYPICAL APPLICATIONS

- Telephone Line Fault Protection • Transformer Protection • FHP Motor Protection • Transistor Protection • Speaker Protection

FEATURES

- Fast Switching
- No Electrical Noise
- Virtually Unlimited Life
- Self Resetting
- No Contacts
- Automatic Operation
- Efficient

*Maximum Continuous Current (I_{cc})—The maximum amount of current, expressed in AMPS, the PTC must be capable of passing without switching into its high resistance state.

**Minimum Switching Current (I_s)—The minimum amount of current, expressed in AMPS, required to switch the PTC into its high resistance state.

The values for minimum switching current and maximum continuous current are for reference only. Mounting method and environmental conditions can affect these parameters.

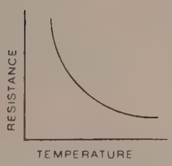
DISC TYPE THERMISTORS WITH CROSSED LEADS



NTC (Negative Temperature Coefficient) thermistors decrease in resistance as temperature increases. Their maximum operating temperature is 150°C. Zero-power resistance values at 25°C range from 10 Ω to 250K Ω; other values upon request. Disc thermistors are available with various coatings, lead styles, and resistance tolerances. Contact Keystone Thermistor Engineering or write for catalog.

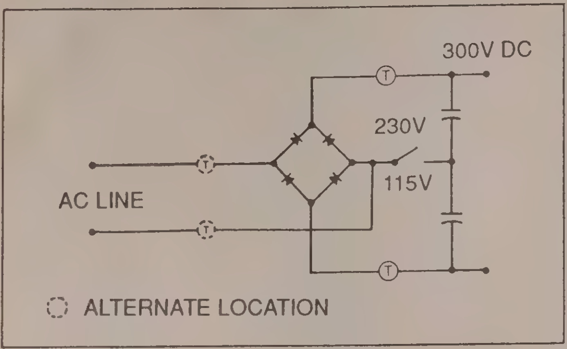
Keystone INRUSH CURRENT LIMITERS



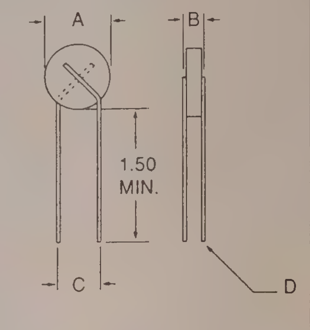


FIG. 1

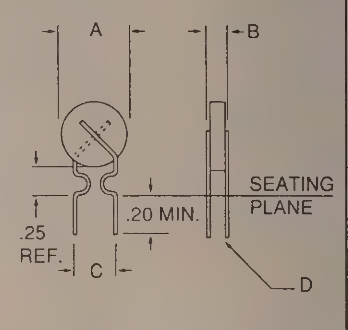

FIG. 2 (SUFFIX A)

The circuit diagram above displays a typical way to limit inrush current.

Protection against extremely high peak inrush current, especially in AC/DC switching power supplies, is now available with Keystone Inrush Current Limiters. These special NTC thermistors effectively control surge currents because the thermal time constant of the current limiter is longer than the electrical time constant (RC) of the thermistor and the capacitor.

All inrush current limiters are insulated with a protective coating. Optional lead designs available upon request.

Note: For Figure 2 design add "A" suffix to type. (Example: CL-10A.)

* These values are suggested maximums based on the thermistor in 25°C ambient without air flow.

Current ratings can be increased depending on the magnitude of air flow.

** These ratings are suggested maximums. Contact Keystone Engineering Department for assistance in applications exceeding these ratings.

*** To determine the resistance value under load, use $R = XI^Y$ where X and Y are constants in the table above and I is the current (amps).

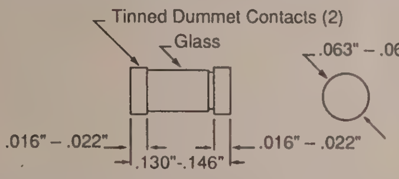
Keystone GLASS ENCAPSULATED THERMISTORS

Keystone glass encapsulated NTC thermistors are tiny pellets of thermistor material hermetically sealed in glass bodies with a controlled amount of selected atmosphere. The hermetic seal makes these parts extremely stable in applications up to 204°C (400°F).

Temperature Range: –50°C to 204°C
Dissipation Constant: 2.0 mW/°C
Time Constant: 3 seconds

Packaging Options Available Upon Request:
Style I — Axial reel tape to EIA RS-296
Style II — Pocket tape to EIA RS-481

STYLE II (SURFACE MOUNT) "MELF"



NOTE: FOR KCC TYPE FOR STYLE II DELETE AL PREFIX AND ADD G100 SUFFIX.

Keystone STANDARD PTC THERMISTORS

The values for Dissipation Constant and Time Constant listed in the table below are reference values. Actual values are a function of mounting, air flow and other factors which affect the PTC's ability to dissipate heat.

Standard PTCs are supplied uninsulated, but can be supplied with an insulation upon request.

[1] Minimum Switch Current: The minimum current required to switch the PTC at the ambient indicated.

[2] Maximum No-Switch Current: The maximum current that the PTC can pass without switching at the ambient indicated.

NOTE: The current values and dissipation constant listed are for reference only. Actual values are a function of mounting, air flow, and other factors which affect the PTC's ability to dissipate heat.
All PTCs from higher voltage rating groups can be used for lower voltage applications.

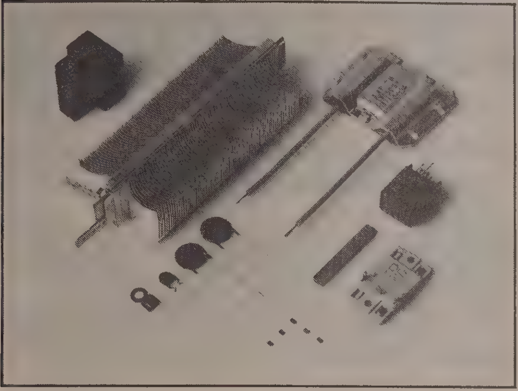
posistor® positive temperature coefficient thermistors

muRata ERiE®
MURATA ERIE NORTH AMERICA

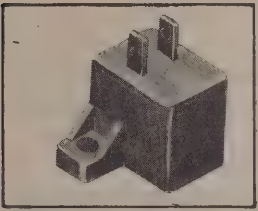


Murata Erie Posistors are positive temperature coefficient thermistors with a very well defined resistance-temperature "knee" and the unique ability to "switch" relatively large amounts of power. They may also be used as self-regulating heating devices at useful power levels and as control devices for high power heaters. Applications include temperature sensing, over temperature and over current protection and motor starting to name a few.

Products utilizing Posistors are extremely safe and reliable and offer all of the design, manufacturing, repair and sales advantages of solid state technology.

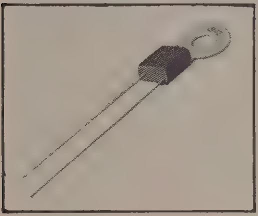
- Compact
- Reduced component count
- Extremely reliable
- "Stepless" temperature control
- Simple repair or replacement
- Long term reliability
- Shock and vibration immunity
- Nonflammable case and insulation available
- No electrical or acoustical noise
- No electrical contacts

FOR MOTOR STARTING



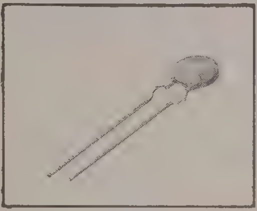
The PTH490/491 Series provides a smooth, solid state electronic starting device for single phase motors utilizing a split-phase starting winding or for PSC motors as a direct replacement for starting capacitors and relays.

FOR SEMICONDUCTOR OVERLOAD PROTECTION



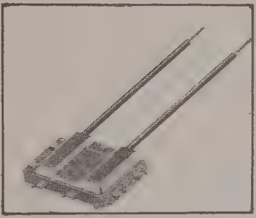
The PTH9M Series senses the case temperature of high power semiconductors and appropriately reduces the power dissipation when dangerous power or current levels are reached by switching to a high resistance state and reducing base bias current. Surface mount Posistors are also available for overheat sensing.

FOR CIRCUIT PROTECTION



The PTH60-63 Series provides overcurrent protection in a variety of applications. When connected in series with the protected device, Posistors limit the circuit current to a predetermined value — above that value they switch to a high resistnace state and limit the current to a safe level.

FOR HIGH POWER HEATING



PTH497 Posistors for heating are self-regulating with fast thermal response and power ratings to 170 watts.

NTC thermistors for temperature sensing

The NTH5D Series offers a wide range of resistance value and B-contants. This makes applications where temperature compensation is required, appropriate for this device.

FEATURES

- Thermally stable with consistent performance
- Highly reliable
- Appropriate for many applications.

Part Number	Resistance 25°C (Ω)	B Constant 25/50°C (°K)	Resistance Temp. Coeff. 25°C (%/°C)

DIMENSIONS: (mm)
Dia. Max: 6.0
Thick. Max.: 5.0
Lead Space: 5±1.5
Lead Dia.: 0.5
Lead Length: 25 min.

- B-constant deviation: ±10%
- Max. allowable power: 0.56W(25°C)
- Typical dissipation constant: 5.6mW/°C (25°C)
- Thermal time constant: 20sec.
- Operating temp. range: −30 to +125°C

miniature thermistor for temperature sensor

NTH4G series is the world's smallest thermistor that is automatically processed into it's radial-leaded form with our advanced production method. Also available in surface mount NTH5G Series.

FEATURES

- Small deviations in resistance value and B constant make it possible to keep stable electric characteristics.
- Quick responses to temeprature changes enable it to make highly accurate measurements of temperatures.
- Easy to handle and suitable for various applications.
- Fully developed as a temperature sensing device to be fixed to PCB.

Part Number*1	Resistance 25°C(kΩ)	B-Constant*2 25/50°C(k)	Thermal Dissipation Constant	Thermal Time Constant	Operating Temperature Range
NTH4G35A202☐02	2.0	3500	2.1 (mW/°C)	1 Sec. Max. (In Liquid)	−40°C ~125°C

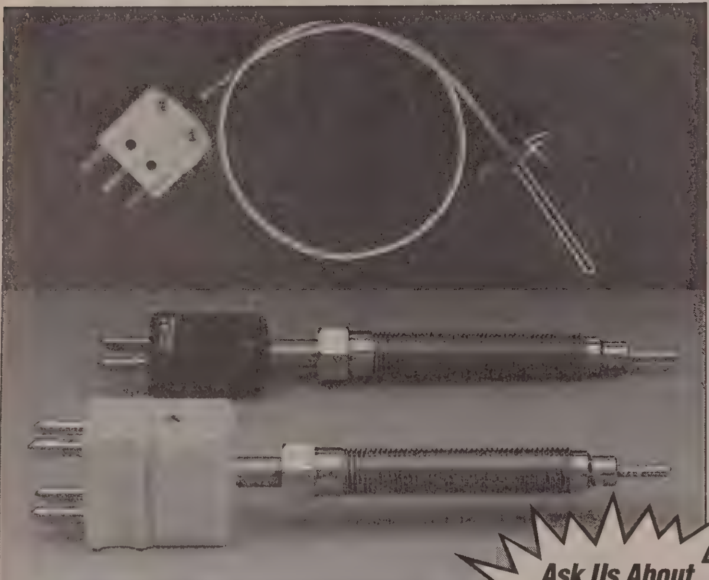
OMEGA...
FOR THERMOCOUPLES, RTDs, THERMSITORS



- ✓ Finest Quality Temperature Probes
- ✓ Hundreds of Styles Available
- ✓ Custom Probes Designed To Any Specification
- ✓ Huge Selection of Styles from 0.010" to Subminiature to ¼" Heavy Duty Quick Disconnect
- ✓ Available with Stainless Steel or Inconel Sheaths
- ✓ Unique Low-Noise Sensors and Connectors

OMEGA Offers Hundreds of Instruments for Electronic Testing and for Measuring Temperature, Humidity, Pressure, Flow, pH, Conductivity and Much More!

THERMOSTATS

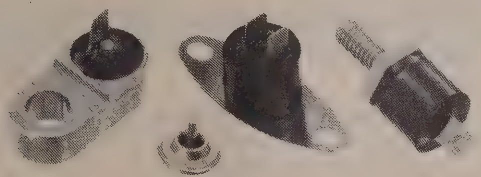
Accurate. Reliable. In standard and custom design. Contact Philips Technologies, Airpax Protector Group, Husky Park, Frederick MD 21701. (301) 663-5141. Fax (301) 698-0624.

Series 5003—Low-Profile Thermostat

Extremely thin, lightweight, wafer-type thermal switch that provides fast, positive response, excellent repeat reliability, good shock and vibration resistance over a wide operating range.

Features:

- Overall depth is only .250".
- Operating temperature range from 15°F to 350°F.
- OPR or CLR contacts are available.
- 120 VAC 5 amp, 240 VAC 3 amp.
- Weight 2.3 grams.
- Variety of mountings and terminations available.
- Environmental sealing available.
- Approval: Ⓒ ЯU



Series 5011—Low-Cost, Grounded Case Thermostat

A very low-cost thermostat that will meet a number of exacting requirements for shock and vibration resistance. It is hermetically sealed and offers fast response. Plug, wire-lead, isolated base and ¼ -20 studmountings are available.

Features:

- Low-cost, grounded unit or optional isolated case.
- Operating temperature range from 140°F to 525°F.
- Many mounting packages available: 120 VAC isolated case only, 32 VDC grounded case, 3 amp resistive.

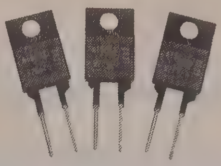
Series 6600—PC Board-Mountable Thermostat

A miniature bimetallic snap-acting thermostat in an 8-pin N8A Dual In-Line Package. Single pole/single throw switch assembly available in either normally closed, open on rising temperature or normally open, close on rising temperature configurations. Compatible with auto-insertion equipment, the Series 6600 will withstand wave soldering and board washing operations. Typical uses include turning on an indicator light, changing the speed of a fan or switching on a control circuit.

Features:

- Operating temperature range 40°C to 120°C.
- 1 amp 48 VDC switching capability.
- Standard 8-pin N8A Dual In-Line Package for auto-insertion compatibility.
- OPR or CLR contacts available.
- Sealed to withstand wave solder and board washing.
- Approval: Ⓒ ЯU VDE

A Philips Electronics North America Company

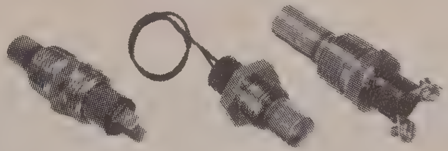


Series 6700—Surface Sensing Thermostat

This miniature, bimetallic, snap-acting thermostat conforms to the International product package standard Y220/T0220. Included are gold plated silver cross bar contacts rated for 100,000 cycles at 5 VDC, 1mA resistive and 30,000 cycles at 48 VDC/120 VAC, 1 amp resistive. Ideally suited for power supply heat sink applications.

Features:

- Operating temperature range. 40°C to 130°C.
- T0-220 packaging—compatible with high-speed automated assembly equipment.
- Epoxy sealed for wave soldering and cleaning.
- Approval: VDE pending, Ⓒ ЯU

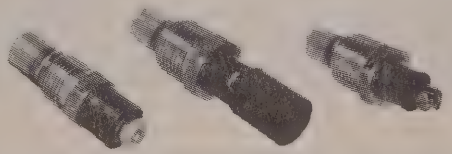


Series 5100—Isolated Case Thermostat

This two-terminal, immersion-type hermetically sealed thermostat can be used on water-cooled engines, hydraulic systems, degreasers, industrial air compressors and tanks where liquids are heated. Its isolated contact is designed to switch 110 VAC within your control circuitry. It offers rapid response to liquid or air temperature.

Features:

- Hermetically sealed.
- All stainless T.I.G. construction.
- Operating temperature range from 35°F to 500°F.
- 120 VAC 3 amp/240 VAC 1.5 amp resistive models available.
- Approval: Ⓒ ЯU



Series 5020—Hermetically Sealed Thermostat

This snap-action hermetically sealed temperature control is designed for use wherever a sealed unit and high vibration resistance are required. Protects engines from damage from overheating by sensing high water or oil temperatures. Snap-action disc located in the very tip of the probe assures rapid and true response to liquid temperature. The all-welded construction (and grounded case) of this sealed thermostat ensures meeting Thermal Shock Specifications of MIL-STD-202, Method 107, Test Condition B. The tube will withstand a Pressure Exposure Limit of 1500 PSI. Insulation Resistance of 50 megohms minimum at 500 VDC.

Features:

- Hermetically sealed.
- Grounded case.
- Operating temperature range from 35°F to 500°F.
- 32 VDC, 3 amp.
- 5020 13 Conforms to MIL-12285/1.

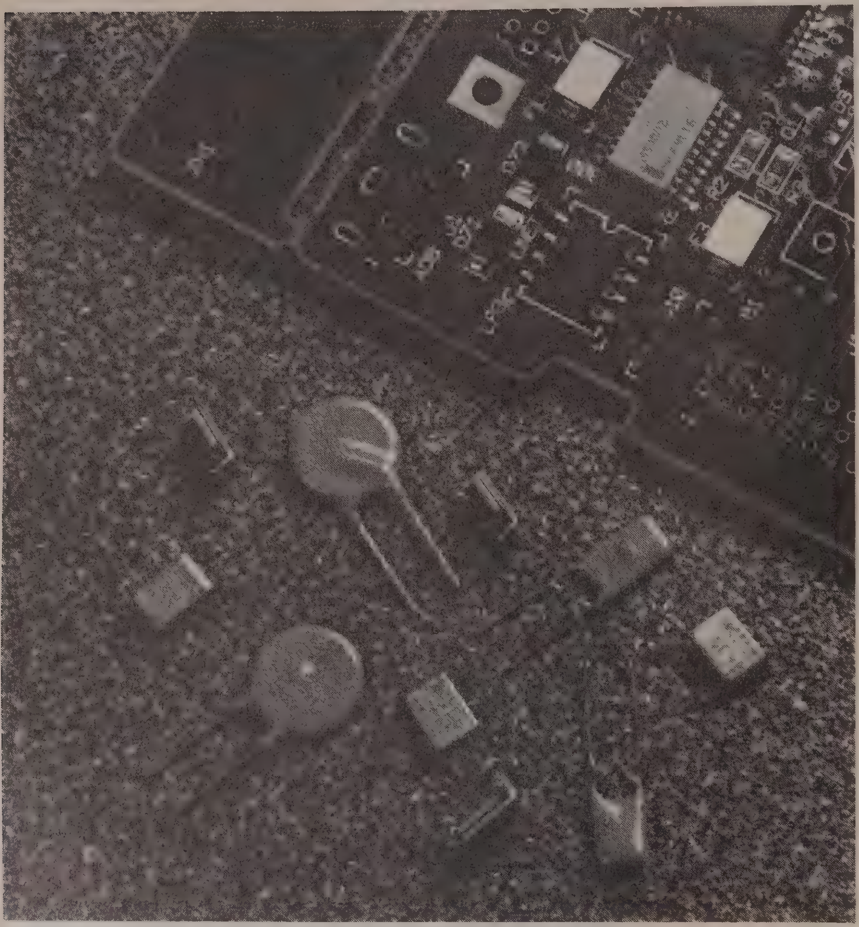
PolySwitch® **Resettable** Fuse Devices



PolySwitch® "Resettable fuses" protect the DC Power Circuit and provide fail safe protection against short circuit of the motherboard.

PolySwitch devices are used in a variety of applications:

- Instrumentation and control
- Security systems
- Medical equipment
- Batteries
- Computers and peripherals
- Audio visual equipment
- Toys
- Telecommunications networks
- Modems
- Transformers

PolySwitch devices have distinct advantages over other methods of circuit protection:

- Remotely resettable, they can automatically reset themselves thousands of times, thus eliminating unnecessary product downtime.
- Low resistance means low voltage drops in power circuits.
- UL, TUV, and CSA recognized components.
- Radial-leaded and surface-mount packaging make installation easy.

PolySwitch circuit protection devices protect electrical and electronic circuits against excessive current, voltage, and temperature. Like fuses and circuit breakers, PolySwitch devices interrupt the flow of dangerously high currents, whether due to excessive voltage or to a fault condition within the circuit. But unlike fuses and circuit breakers, PolySwitch circuit protectors automatically reset themselves after the fault that caused them to trip is corrected.

PolySwitch devices are positive temperature coefficient (PTC) resistors that rapidly increase resistance in response to excessive currents or temperature. When the current flowing through a PolySwitch circuit protector is within its maximum rating, its "base" resistance is very low. If the current rises above its rated current, the PolySwitch device's resistance abruptly rises. Then, as circuit resistance is increased, the current decreases until thermal equilibrium is achieved.

Depending upon the PolySwitch model and the amount of current, the trip time required to reduce the current can be as short as one-tenth of a second. Once power to the protected circuit is removed, the PolySwitch device's resistance begins to drop towards its normal value, in essence resetting the device so that normal operation can resume when the fault is corrected and the power reapplied.

Sensor Scientific has developed a low cost interchangeable wafer thermistor product line. These highly reliable units provide a resistance temperature curve that can be matched over a range of 0° to 70° C. This means that a matched replacement thermistor can be purchased several years from now with the identical R/T curve as the original thermistor.

NTC THERMISTORS

TEMPERATURE ASSEMBLIES

Sensor Scientific manufactures many different types of thermistor assemblies. The housing drawings in this section are offered as a guide to assist the engineer in designing a complete thermistor assembly that meets his project needs best.

The housing material specified in most of the drawings is stainless steel. If the requirements are such that other material would be preferable, brass and aluminium are also available.

The basic element in these assemblies is the thermistor. **Sensor Scientific** manufactures a complete line of thermistors. The glass probe thermistor and the wafer thermistor are units that are typically used in these assemblies.

Sensor Scientific has trained application engineers who will assist you in the design and selection of the thermistor assembly that best meets your needs. Our probes have been designed to maximize sensitivity and stability. They are also constructed to minimize the risk of damage due to operation and handling.

All assembly work is performed by carefully trained and supervised individuals. All units are extensively tested throughout the manufacturing process to insure that customers receive the highest quality thermistor assemblies.

These designs represent a small fraction of the hundreds of custom designs available from **Sensor Scientific.** *If you have something different in mind, give us a call!*

NTC THERMISTORS

SMALL BEAD & GLASS PROBE NTC THERMISTORS

Sensor Scientific, inc. Small Bead NTC Thermistors offer the advantages of small size and mass, fast response time, extreme sensitivity to current and voltage changes, and high stability. Typical applications include: biomedical assemblies, fluid flow and fluid level measurement, thermal conductivity measurement, and gas analysis.

Resistance @ 25 Deg. C.	Part Number	Figure	Resistance Ratio 25 / 125 Deg. C.	Temperature Coefficient @ 25 Deg. C.

100,000	S14B10425	B	29.4	-4.4%/Deg. C.

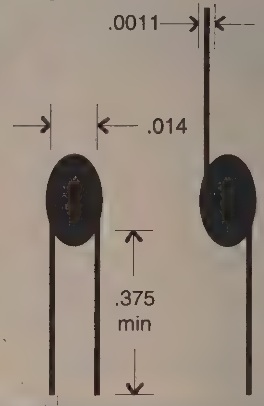

Fig. A Fig. B

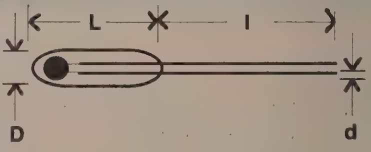
- Standard resistance tolerance is +/- 25% @ 25 Deg. C. Other tolerances include +/- 1, 2, 5, 10, and 20%.
- Other resistance values are available.
- Maximum operating temperature for optimal stability is 300 Deg. C. Intermittent operation to 550 Deg. C. is possible.
- Lead Material is Platinum Alloy.
- Time constant (in still air): 1.0 sec. Dissipation Constant (in still air): 0.10mW/Deg. C.
- Custom Assemblies are available.

Sensor Scientific, inc. Glass Probe NTC Thermistors are extremely useful in applications where high stability and ruggedness is required. The availability of 4 standard outer diameters offers the designer the flexibility to fit the thermistor to the design, rather than compromising the design to accomodate the thermistor. The .043" diameter part offers the ruggedness of a glass probe thermistor and the small size advantages of a bead thermistor, without the handling problems.

Resistance @ 25 Deg. C.	Part Number	Resistance Ratio 25 / 125 Deg. C.	Temperature Coefficient @ 25 Deg. C.
2,000	SP___A202201/2	19.9	-3.9%/Deg. C.
5,000	SP___A502201/2	19.9	-3.9%/Deg. C.
10,000	SP___A103201/2	29.4	-4.4%/Deg. C.
50,000	SP___A503201/2	31.7	-4.5%/Deg. C.
100,000	SP___A104201/2	38.1	-4.7%/Deg. C.
250,000	SP___A254201/2	38.1	-4.7%/Deg. C.



- To specify max. diameter in mils, replace "___" with 43, 60, 80, or 100.
- Standard resistance tolerance is +/- 20% @ 25 Deg. C. Other tolerances available include +/- 1, 2, 5, 10, and 15%.
- Other resistance values are available.
- Standard glass length for the 60, 80, & 100 probes is 0.5". Other lengths available include 0.25, 1.0, 1.5, and 2.0 inches.
- Maximum operating temperature for optimal stability is 300 Deg. C. Intermittent operation to 550 Deg. C. is possible.
- Standard Lead Material is Tinned Dumet.
- Custom Assemblies are available.

NTC THERMISTORS

"400 SERIES" THERMISTOR PROBES

Sensor Scientific's "400 SERIES" *standard* was developed to satisfy the critical needs of the biomedical industry. These precision assemblies offer + / - 0.1 Deg. C. interchangeability over the critical biomedical temperature range of 31 to 45 Deg. C. (0 to 70 Deg. C. range available as an option). The most widely used configurations are depicted below. If a standard configuration is not appropriate, custom designs are available.

MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

THERMODISC®

TEMPERATURE CONTROLS

Product Overview

Therm-O-Disc bimetal disc temperature controls are widely used in the appliance, HVAC and many other industries. They are powered by bimetal discs which open or close a set of electrical contacts when a predetermined temperature is reached.

Therm-O-Disc temperature controls combine reliability and performance with high volume production methods for maximum value at a low cost. Many terminals and mounting arrangements are available for application flexibility. These products are approved by most major testing agencies around the world.

In addition to the products shown, Therm-O-Disc offers a variety of other products designed to meet unique applications. We have the expertise and experience to custom design products to meet your application for temperature sensing and control, electric power control, water flow control and pressure control.

This chart contains an overview of some of the most widely used Therm-O-Disc products. Products with similar attributes are grouped so you may compare their features.

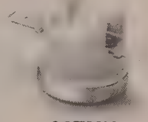
36T Series ½" Bimetal Disc

36T
Manual Reset

36T



36TMH

36T—The 36T is the industry standard ½" bimetal disc thermostat for controlling or limiting temperature in appliances, HVAC and office equipment. It is available with automatic or manual reset switching action. A single operation version may be specified for applications requiring "one shot" protection. Board mount, surface, air stream and stud mount configurations are available.

36TMH—Typically used in coffee makers and tea kettles, the 36TMH is a ceramic version of our 36T. It is also available with a variety of mounting brackets and terminal configurations.

EMERSON®

NTC THERMISTORS

H-Series and leadless SMS™ Hermetically Sealed Thermistors are small, rugged and good for use up to 300°C. Their fast response, interchangeability and longterm stability makes both series ideal for temperature sensing and compensation. The leadless SMS™ Thermistor is designed for applications where surface mounting is required. Both sensors are available on tape and reel for automatic mounting

TUFF·SENSORS™

TEMPERATURE SENSORS ENCAPSULATED IN THERMOPLASTIC

TUFF·SENSORS™, a family of thermoplastic molded probes, provide reliable protection against environmental extremes for our line of temperature sensors and switches. Use of high performance plastics creates a temperature probe that resists temperature variations, humidity, chemicals and rough handling.

Many standard sizes and shapes are available, with selection of type based on conditions of use.

Custom designs available to your specifications.

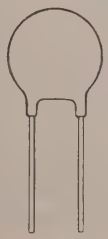
TAB MOUNTED PROTECTORS

Over Temperature Protectors provide shutoff or regulation of expensive Power Transistors and protect against over-heating that occurs from component failure or short conditions. The sensor is an NTC (Negative Temperature Coefficient) device. Unlike fuses or bi-metal elements its action is recyclable and has no hysteresis effect. Available in resistance packages from 100Ω to 100K in tolerances of .8% to 40%.

INRUSH CURRENT SUPPRESSORS FOR SWITCHING POWER SUPPLIES.



Switching power supplies present high initial currents due to filter capacitor impedance upon turn-on. The use of NTC (Negative Temperature Coefficient) devices limits this current to a low value. After current flow their resistance becomes negligible and offers little voltage drop.

• TEMPERATURE COMPENSATION AND SENSING

Disc Series Thermistors are small rugged Thermistors with close electrical tolerances. Their small mass gives short thermal time constants, yet they are not so small that it is difficult to handle them. The tinned copper leads are easily soldered into electrical circuits.

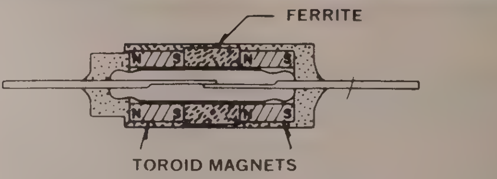
TEMPERATURE SENSING SWITCHES

CONVENIENT AND RELIABLE TEMPERATURE CONTROL

Miniature temperature switches use an electro-ceramic element instead of a bimetallic switch. The Reed Switch Temperature Sensor works on these two principles: a reed switch actuation occurs because of changes in strength of a magnetic field in the vicinity of the contact gap; and certain materials exhibit great changes in magnetic reluctance when the temperature is varied in the vicinity of the material's curie temperature.

The unit has good response time, and is operable in a variety of atmospheres and solutions. Variations in configurations suitable for installation in automotive engine crankcases and automatic transmissions, or mountings for use in computer cabinets are possible. Other applications include oven over-heat alarms; corrosive liquid temperature control, food freezer thaw warning and cooling fan stop indication. This switch replaces many thermally actuated devices now used where increased life is required or protection of the switching contacts from adverse environments is deemed desirable.



MOLDED SWITCHES

Switches feature small size for fast response. epoxy package resists most chemicals and is good for use up to 115°C. Standard units from 0° to 115°C are available in five degree nominal increments.

REED SWITCHES—PMS SERIES

Midwest Components Product Group has now packaged the reliable temperature sensing reed switch in a convenient and easy to use housing. The molded plastic body offers the additional advantages of complete moisture and dust protection at an economical price.

This rugged switch can be quickly mounted with a screwdriver. An indentation on the housing also facilitates attachment by ordinary hose clamps or clip hardware supplied by the user. Type A (normally open) or Type B (normally closed) switches may be used in this new package.

SNAP-ACTION BI-METAL SWITCHES

The electrical switch of the SAS is operated by a thermally-responsive ½inch diameter bimetal disc. The switch is used as a temperature limiting or regulating thermostat. Because of its relatively small size and inexpensive design, it is suitable for a vast array of applications.

Features

Impact Action: The bimetal disc of the SAS is factory calibrated at both its top and bottom temperatures. When the disc, which is dished like a saucer, reaches its calibrated temperature it suddenly snaps through and imparts its kinetic energy to the bumper, then to the contacts. The resulting high speed of contact separation insures long life at high electrical loads, and a minimum of radio and TV interference.

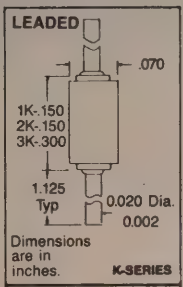
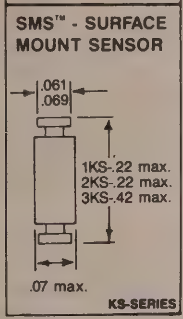
TEMPSISTOR

TEMPSISTOR®
TEMPERATURE
COMPENSATOR®





The Tempsistor® is a temperature compensator designed to offset the temperature drift of metallic and semi-conductors. Applications include pressure transducers, opto amplifiers, inductive motor controllers, and automatic gain controls. Small size can replace ⅛ watt or resistors.

The Tempsistor® is available in resistances from 10 to 12K ohms at 25°C.

Both devices are available on tape and reel for automated assembly.

SPECIALTY CERAMICS

SELF REGULATING DISPLAY HEATER

The unique self-regulating heating effects of specially doped ceramics are utilized to create a new type heater for liquid crystal or other temperature sensitive displays. These devices produce heat at cold temperatures and curtail heating at normal or high temperatures. This feature allows its use in battery operated instruments due to low normal current drain Use of this heater allows a broader application of displays by removing the adverse effects of temperature

Heater is attached to reverse side of display with thermally conductive epoxies or silicone adhesives depending upon display's thermal coefficient of expansion or temperature to which it may be subjected Actual performance of the display will depend upon manufacturers specifications

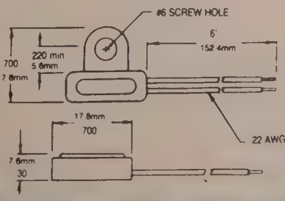
POSITIVE OVER TEMPERATURE PROTECTORS

Therm-O-Discs' Over Temperature Protector provides shutoff or regulation of expensive RF or AF Power Transistors. Protects against over heating that occurs from output stage component failure, antenna breakage, or short conditions.

Unlike fuses or bi-metal elements its action is recyclable and has no hysteresis effect.



PTC SWITCHING THERMISTORS

THE POSITIVE WAY TO SENSE, MEASURE, CONTROL, REGULATE AND PROTECT.

PTC switching thermistors are thermally sensitive resistors which exhibit large positive increases in resistance with temperature. At customer specified temperatures the resistance rises abruptly from a low value to a high value. This resistance shift is infinitely repeatable and has no hysteresis associated with its action.

T-03 Outline

The advanced SAF Series Airflow Switch provides early detection and protection from overheating in mainframe computers and peripherals, large power supplies; HVAC applications, medical diagnostic equipment, and other complex electronic systems requiring forced air cooling.

This highly innovative, low profile airflow sensor is also easily mountable directly on the most densely populated circuit boards, on equipment racks with as little as .625 inch spacing between boards, on sockets or bracket mount plenums. All SAF models are complete, self contained sensor/alarm devices – no additional circuitry or signal conditioning as required.

Specifications

Input voltage: +5 VDC (±5%)
Power Dissipation: ½ w max
Output: open collector, solid state, able to sink up to 100 MA to ground, from DC Sources up to 30V
Sensing Range: 50 to 1500 F.P.M.
Sensing Tolerance: ±25 F.P.M. or ±10%, whichever is greater
Ambient Range: +10°C to +60°C ambient temperature compensation curves available
Sensitivity: ±25 F.P.M. from actual setting
Hysteresis: Series SAF1005 (standard Model) is typically 10% of the setting

Mounting Accessories

- Military Socket Assembly with leads, no mounting bracket–PN 4-1-261 (Switch not included)
- Bracket only with leads attached to SAF Sensor–PN 4-1-270
- Socket Assembly with mounting bracket and leads–PN 4-1-260

Outline Dimensions

- Available for varied voltage sources
- Built in time delay interval ignores transient airflow interruptions
- Ambient compensated design provides stable performance under wide ambient
- Rugged design meets MIL shock/vibration/ambient requirements
- No additional circuitry required

Specifications

Heater Voltage:	5V., 12 V., 28 V., or 115 V. AC/DC Other voltages available
Input Power:	4 Watts, nominal
Contact Rating:	2 A. resistive up to 115V. AC 1 A. resistive up to 32V. DC
Usable Voltage Range:	± 10% of nominal, voltage variation chart available
Setting:	75 to 1000 F.P.M.
Response Time:	1 to 20 seconds (depending on setting and air velocity prior to stoppage)
Temperature Range:	-55°C-85°C, energized
Vibration:	10g to 500 Hz.
Shock:	50g for 11 msec.

TEMPERATURE SENSORS *Electrical Thermostats*

VE SERIES SURFACE TEMPERATURE SENSOR

VE Surface Temperature Sensors have a unique dual bimetal design which produces larger forces and contact motion than ordinarily found in devices of this size. Intimate coupling between the mounting base and actuating elements produce an exceptionally fast response time. Contact chatter is eliminated and the unit has no resonant points below 2000 Hz.

Specifications

Setting Tolerance:	±5°F (±3°C)
Contact:	SPST open on rise or SPST close on rise 3 A. @ 115 V AC Resistive 1 A. @ 32 V DC Resistive
Vibration:	25 g to 1000 Hz
Shock:	50 g, 11 ms
Temperature Range:	0°C to +150°C

Direct replacement for fenwal Series 32410/32411–The Fenwal Company discontinued this popular surface sensing series in 1987–The Warren GV Series VE Thermostat mounts on the same 1.00" centerline as a direct replacement meeting all electrical and thermal requirements of the former unit.

C-8 SERIES AMBIENT TEMPERATURE SENSORS

C8 Sensors are based on a differential expansion principle, comparing the expansion or contraction of the outer shell in relation to an internal member that is not affected by temperature. The differential in expansion of these two members is then multiplied by the internal mechanism and transferred as a motion to the contacts. The contacts are built in a separate fused glass header with a minimum current path to reduce self-heating effects.

Specifications

Setting Tolerance:	±5°F (±3°C)
Contact:	SPST open on rise or close on rise Rating: 5A @115 VAC Resistive 1A @ 32 VDC Resistive
Vibration:	10 g to 2000 Hz

YSI Precision Thermistors

Call us to discuss your application at 800 765-4974. Fax 513 767-9353.

YSI precision thermistors provide accurate, stable temperature measurement, control, indication and compensation. We offer 13 resistance curves in 5 styles for applications ranging from incubators to satellites. Three tolerances are available: ±0.05, ±0.1 and ±0.2°C. Not all resistances and accuracies are available in all styles–please call YSI Customer Service for more information at **800 765-4974.**

YSI Thermilinears Provide Linear Outputs

If you need linear resistance or linear voltage output, specify YSI Thermilinear Components. The linear range and deviation from linearity for each network are listed below. If you don't find what you need, we can design a network for your application.

Network	Range	Deviation	Thermistor Composite
YSI 44201	0 to +100°C	±0.216°C	 .150" Max 6" Nom

*Qualified by NASA for extended space flight applications. Goddard Space Flight Center specification GSFC S-311-P-18.

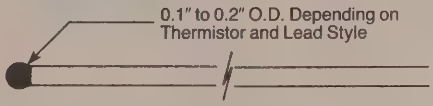
YSI Configure-to-Order Probes

Call us to discuss your application at 800 765-4974. Fax 513 767-9353.

YSI Configure-to-Order thermistor probes provide custom designs for the price of stock items. The probes below are just some of the styles we offer. We'll help you choose a probe style, thermistor resistance and accuracy, lead style and length appropriate for your application. Call us at **800 765-4974.**

General Purpose

Flat, round or individual leads



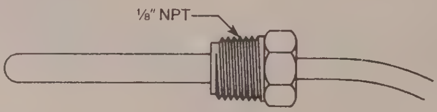
0.1" to 0.2" O.D. Depending on Thermistor and Lead Style

Tubular

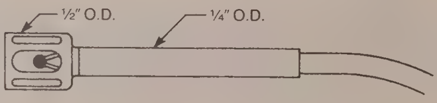
1/8", 3/16", 1/4" diameters in stainless steel
3/16" diameter in Pyrex
3/8" diameter in Teflon

Tubular with Fitting

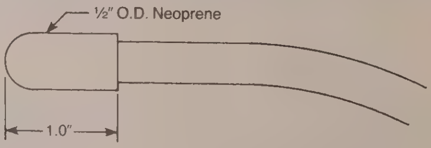
1/8", 3/16", 1/4" diameters



Air Temperature

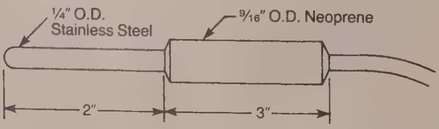


Burial



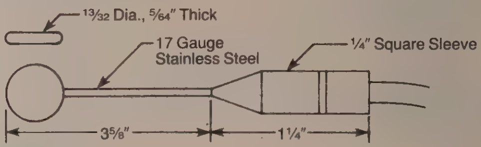
1/2" O.D. Neoprene
1.0"

Deep-Water



1/4" O.D. Stainless Steel
9/16" O.D. Neoprene
2"
3"

Banjo Surface Temperature



13/32 Dia., 5/64" Thick
17 Gauge Stainless Steel
1/4" Square Sleeve
3 5/8"

The 7700 and 7800 series feature various single and double-pole contacts rating from 1 mV to 240 volts AC or DC and up to 50 amps. Suitable for all types of liquids, the systems have operating temps up to 300°F. These systems may combine up to 3 level switches plus 3 temp switches in a single 2" x 2" x 4-1/2" housing. Also for signals to digital I/O inputs.

Hundreds of Combinations From Stock—Up To Six Sensors In A Single Housing

Manufacturers & Designers of:

- Combination Temperature and Level Switches and Controls
- Liquid Level Switches
- Temperature Sensors & Thermocouple Assembly
- Single, Double and Triple Assy's
- Standard or Custom and Military Options
- Used in Medical, Industrial, Marine, Mobile, Chemical & Food Processing, etc.
- Used to Monitor Electronic Sensors at Hi-Lo Points, Switch Repeatability ±.005

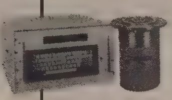
PRECISION SERVOS, AEROSPACE AND DEFENSE

High resolution (to 2^{25} or 33,554,432 bits-per-turn) and high accuracy optical rotary encoders, motor-encoders, and rate/position control servo systems for space, military and high accuracy industrial applications.



Custom engineering capability devoted to unique design solutions for precision servo systems.

Quality system to meet MIL-Q-9858A and NHB-5300.4 (1B), electronic workmanship standards to MIL-STD-2000 and NHB-5300.4 (3A-1) and reliability system to meet MIL-STD-785B and NHB-5300.4 (1A-1).

Typical applications: Aerospace and military programs, precision servo systems, pointing/tracking gimbal systems and precision indexing.

HIGH-PERFORMANCE ENCODERS, AEROSPACE AND DEFENSE

Ultra small MicroSeries® absolute encoders in solid shaft and pancake thru-hole configurations with resolutions from 13 to 21 bits for fire control, communications terminals and surveillance radars.

Digisec® absolute and incremental encoders with thru-holes to 8″ and resolutions to 24 bits for radars, optical trackers, and telescopes.

Absolute and incremental encoders in housed and un-housed configurations to meet highest reliability and performance requirements for space flight use.

Production complies with quality requirements of MIL-Q-9858A and NHB-5300.4 (1B).

Typical applications: Tactical weapons, space programs, range instrumentation and telescopes.

ENCODERS, DEFENSE AND INDUSTRIAL

Higher resolution incremental encoders for defense and industrial requirements. Single and multi-turn absolute encoders in the range of 512 to 65,536 counts-per-turn.

Production and quality systems comply with MIL-I-45208 and when required, Soldering Specification MIL-STD-2000.

Products also include instrument grade trackballs, rotating polygon scanners and fiber optic encoders. Fiber optic versions of most encoders can be produced to satisfy high temperature and high noise immunity requirements.

Typical applications: Antennas, fire control, FLIR scanning systems, robotics, process control, machine tool, medical systems and factory automation.

OPTICAL ENCODERS, INDUSTRIAL

Industrial encoders designed for the abusive machine tool environment. Rugged cast housing, heavy-duty shaft and bearings. Available in models that are sealed against liquid entry and for shaft loads up to 200 lbs. and 200G shocks.

Guaranteed 30-day delivery or sooner on standard model encoders; 2-day delivery on express series encoders. Over 160 resolutions in stock – up to 50,000 CPT incremental. Many mechanical and electrical options are available. 2 year limited warranty.

Typical applications: Process control, factory automation, robotics, machine tool, instrumentation, lumber and oil field machinery.

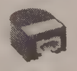
OPTICAL ENCODERS, HIGH VOLUME OEMs

Small and low-cost modular, kit and light duty enclosed encoders. Perfect for the high volume OEM in computer peripheral, office and factory automation, medical instrument and related markets.

Self-contained 1.2″, 1.5″ and 2.1″ modular encoders with resolutions up to 1024 PPR. Kit encoders up to 2.1″ and 1024 PPR. Products easy to install and forgiving of dynamic axial shaft movement. Motor commutation signals available.

1.1″, 1.5″ and 2.0″ enclosed encoders combine low cost and high performance for light duty service. Resolutions up to 2540 PPR available in 2.0″ package.



Typical applications: Servo motors, tape drivers, printers, plotters, medical equipment and instrumentation.

BRUSHLESS MOTORS, ACTUATORS, SPECIALTY ELECTROMAGNETICS

Linear and rotary actuators, brushless DC motors, and specialty electromagnetic devices. Reliable, long-life brushless DC motors offer improved performance characteristics and advantages over comparably sized PM DC brush motors.

Voice coil actuators pack power, speed and precise control into limited stroke motion. Specialty electromagnetic devices including AC motors and clutches are also available.

Typical applications: Motors for medical devices including centrifuges, surgical equipment, and scanners; actuators for optical systems and vibration dampers.

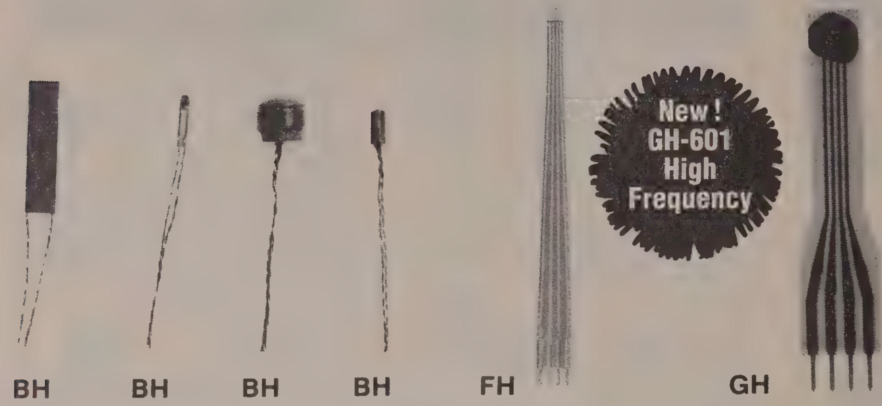
Hall Generators



- **Cryogenic/High Field**
- **Magnetic Field Measurements**
- **Electrical Power Measurements**
- **Guidance Systems**
- **Brushless dc Motors**
- **Proximity Sensors**
- **Watt-hour Meters**

DESCRIPTION

The F.W. Bell series of Hall effect magnetic field sensors consists of 30 standard models designed to meet the requirements of most magnetic field measurement applications. The sensors are small, solid-state devices. They produce a voltage which is proportional to the product of the control current and the magnetic field component normal to the Hall active area. Each unit has four electrical connections. Two carry the control current (I_C) and the other two supply the Hall voltage (V_H).

These models are built in various configurations to measure axial, transverse, and tangential magnetic field components. Their operating characteristics permit virtually any application: frequency, dc to MHz; magnetic flux density, milligauss to kilogauss; linearity to 0.1%; temperature, –269°C to +100°C.

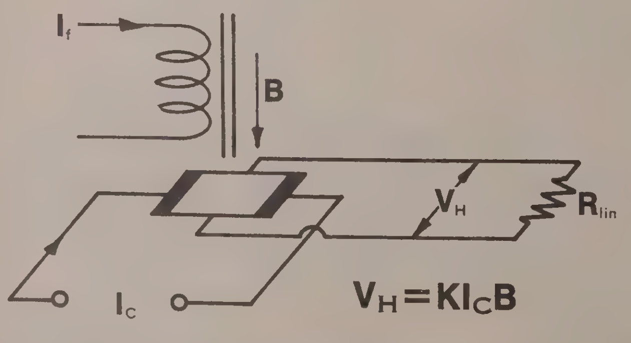
SPECIFICATIONS

	BH	FH	GH
Control Current, I_C	100-200 mA	15-30 mA	10 mA dc
Input Resistance, R_{in}	1-6 ohms	20-80 ohms	450-900 ohms
Output Resistance, R_{out}	1-6 ohms	50-200 ohms	1,000 ohms
Magnetic Sensitivity, λB	5-70 mV/kG	10-200 mV/kG	50-120 mV/kG



This schmetic representation illustrates both the measuring and multiplying capabilities of a Hall generator. By holding I_C constant, V_H becomes a direct function of B, the magnetic flux density. If both I_C and B are variable, V_H is proportional to the product of the two functions. Holding B and I_C constant, V_H becomes a function of the angle between B and the plane of the Hall Generator active area.

Special units are available to fit your application.

CURRENT SENSORS CURRENT TRANSFORMERS

BICRON™

"Excellence Through Teamwork"

BICRON'S Current Sensors are designed to provide a programmable voltage output proportional to the input current.

The current sensor is readily interfaced to computer I/O hardware, or other control and monitoring configurations.

Functions such as: UNDER CURRENT, OVER CURRENT, PEAK CURRENT, monitoring, indicating, or controlling are easily accomplished with few additional components.

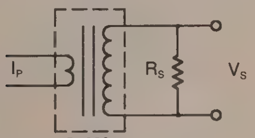
Uses range from simple LED current indicators to vector sumation of primary currents providing applications for current controller, warning devices, trip-out systems, phase balance and more.

STANDARD PRODUCT

Specifications:

CATALOG NUMBER **B5303**

- Frequency Range 50/60 Hz
- Dielectric Strength 1500 VRMS (winding to surface)
- Class A Temperature Rated
- Leads #24 AWG – 12″ Long



B5303

- Electrical Performance
  Vs = 2 • Ip • Rs • 10^{-4}
  Vs = Output Voltage (up to 10 Volts RMS)
  Ip = Input Current (Specify up to 200A)
  Rs = Programmable Burden Resistor (User Supplied)
- Mechanical Dimensions
  O.D. = 2.0″
  I.D. = .7″
  H.T. = .8″

Data subject to change without notice.

BICRON, established in 1964, is a manufacturer of "Standard" and "Modified Standard" current transformers and toroidal power transformers. The Total Quality Management process at BICRON has allowed us to be certified suppliers to numerous customers.

IMPORTANT ADVANTAGES FOR YOUR PRODUCT

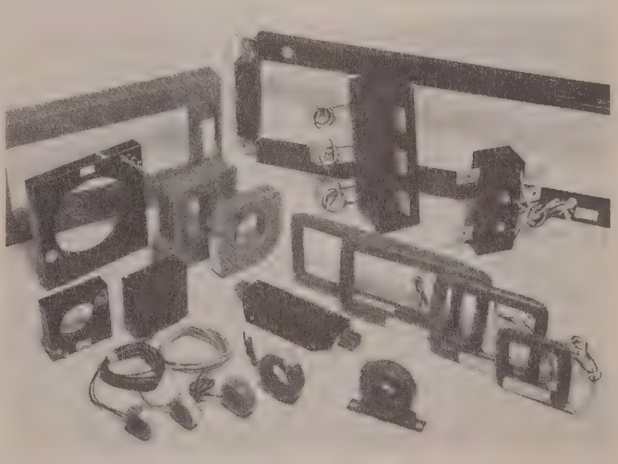
- Non-Contact Measurement of Current
- Current Range up to 200 AMPS (Ip)
- Programmable Voltage Output (Vs)
- Programmable Burden Resistor (Rs)
- Accuracies to .1%
- Overload Capacity > 300 AMPS

FOR YOUR DESIGN

- Customized Transformers
- Current or Voltage Outputs
- Dimensional Flexibility
- Mounting Variety
- Personal Indepth Commitment

EASY TO SPECIFY CUSTOM CURRENT TRANSFORMERS

Ask Us About Our "MODIFIED STANDARD", Part Of BICRON'S Commitment to You.



Current Transformers:

A selection of products produced for many of our OEM customers.

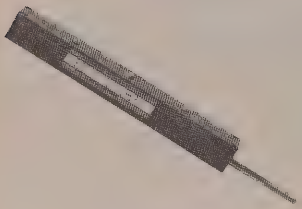
LINEAR POSITION TRANSDUCER



Model 108

Bourns® Linear Position Transducers

- Rugged design
- Self-lubricating bushings
- High temperature operation
- Stainless steel shaft
- Precious metal contacts
- Free shaft rotation
- AC or DC

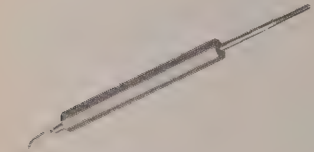
Specifications
Standard Ranges..1.25, 2.25, 4.00, 6.00 inches
Standard Resistances..1K, 2K, 5K, 10K ohms (±10%)
Independent Linearity
...±0.5% of range
End Sets
...±2.5%, 2.5% to 97.5% of range
Resolution...0.0013 to 0.0047 inches
Power Rating
@ 70°F...2.5 watts/inch
@ 350°F...0.1 watts/inch
Operating Temperature Range
...-65°F to +350°F
Insulation Resistance...50 megohms @ 50 VDC, room ambient
Backlash...Negligible
Shaft Actuating Force
At ambient...6 oz.
At temperature extremes...16 oz.
Life...1 million full range cycles
Shock...50G for 6.5 msecs.
Vibration...15G, 20-20,000 Hz

Model 141

Bourns® Linear Position Transducers

- Compact, lightweight, long life
- Infinite resolution (optional)
- Low noise
- Meets Mil spec environments
- Free shaft rotation
- AC or DC
- No backlash

Specifications
Standard Ranges...3/16, 1/4, 5/16, 3/8, 7/16 inches
Standard Resistances..1K, 2K, 5K, 10K ohms (±10%)
Independent Linearity...±1% of range
End Sets
...±2.5%, 2.5% to 97.5% of range
Resolution...0.001 inch (typical)
Power Rating
...0.8 watts/inch @ 70°F
Operating Temperature Range
...-67°F to +250°F
Insulation Resistance...50 megohms @ 500 VDC
Backlash...Negligible
Shaft Actuating Force...4 oz. max @ 70°F
Life...500,000 cycles
Shock...50G for 6.5 msecs.
Vibration...20G, 20-20,000 Hz
Acceleration...100G



Model 175

Bourns® Linear Position Transducers

- Very high temperature operation
- Free shaft rotation
- Negligible backlash
- Voltage ratio output
- Low temperature coefficient
- Meets Mil spec requirements
- Oil submersible (option)
- Long Life

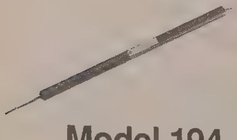
Specifications
Standard Ranges...1.0, 2.0, 4.0 6.0 inches
Standard Resistances..1K, 2K, 5K, 10K ohms (±10%)
Independent Linearity...±0.5% of range
End Sets
...±2.5%, 2.5% to 97.5% of range
Resolution...0.0013 to 0.0047 inches
Power Rating
@ 70°F...1.0 watts/inch
@ 500°F...0.1 watts/inch
Operating Temperature Range
...-65°F to +500°F
Insulation Resistance...50 megohms @ 50 VDC, room ambient
Backlash...Negligible
Shaft Actuating Force
At ambient...8 oz.
At temperature extremes...16 oz.
Life...1 million full range cycles
Shock...50G for 11 msecs.
Vibration...15G, 20-20,000 Hz

Model 184

Bourns® Linear Position Transducers

- Compact, lightweight
- O-ring seal
- Infinite resolution
- Low noise
- Free shaft rotation
- Self-lubricating bushings

Specifications
Standard Ranges...1, 2, 3, 4, 6 inches
Standard Resistances
...500 to 2,000 ohms/inch, (±10%)
Independent Linearity...±1% of range
End Sets
...±2.5%, 2.5% to 97.5% of range
Resolution...Continuous
Power Rating
@ 70°F...0.5 watts/inch
@ 225°F...0.1 watts/inch
Operating Temperature Range
...-65°F to +225°F
Insulation Resistance...50 megohms @ 500 VDC
Backlash...Negligible
Shaft Actuating Force...20 oz. max
Life...1 million full range cycles, 40 million dither cycles 10% max. resistance change
Shock...15G for 11 ±1 msec with no discontinuities
Vibration...25G, 20-20,000 Hz ±0.05% VR change max.
Acceleration...100G



Model 194

Bourns® Linear Position Transducers

- Continuous resolution
- Long life
- Threaded shaft
- Sand, dust, and fungus protection
- Negligible backlash
- Dual output available

Specifications
Standard Ranges
...8, 12, 16, 20 and 24 inches
Standard Resistances
...500 ohms/inch, (±10%)
Independent Linearity...±1.0% of range
End Sets
...±1.5%, 1.5% to 98.5% of range
Resolution...Continuous
Power Rating
@ 70°F...0.5 watts/inch
@ 225°F...0.1 watts/inch
Operating Temperature Range
...-65°F to +225°F
Insulation Resistance..100 megohms @ 50 VDC, room temperature
Backlash...Negligible
Shaft Actuating Force...16 oz. over temperature range
Life...100,000 full range cycles,
Shock...50G for 11 ±1 msec
Vibration....20G, 20-20,000 Hz, ±5% VR

Specifications are typical. Contact factory for special requirements.

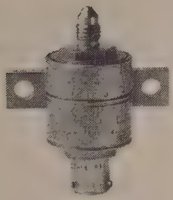
POTENTIOMETRIC PRESSURE TRANSDUCER



Model 441

Bourns® Pressure Transducers

- Small size
- Rugged
- Fast response
- Low price
- Hermetically sealed
- Reliable

Specifications are typical. Contact factory for special requirements.
*Registered trademark of International Nickel Co.
Specifications are subject to change without notice.

Specifications

Standard Ranges ....5-500 PSIA
Overpressure Limits...150% of range
Standard Resistances
.................2K, 5K, 7.5K, 10K ohms
Linearity
To 10 PSIA ....±1.5%
To 500 PSIA ....±1.2%
Operating Temperature Range
..............................-65°F to +165°F
Thermal Sensitivity ±0.01% per 100°F
Resolution ....0.3% nominal
Power Rating
@ 165°F ....0.25 watts
Output..........................Voltage ratio
Shock ....50 G for 11 ±1 ms
Vibration .....0.25" single amplitude, 5-2000 Hz with no discontinuities
Acceleration..............±0.03% per G up to 40 Gs, steady state
Media ...Compatible with Ni-Span C*
Electrical Connection PT1H-8-4P
End Sets
.........±2%, 2.5% to 97.5% of range

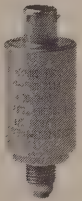
Model 443

Bourns® Pressure Transducers

- Small size
- Fast response
- Low price
- Hermetically sealed
- Meets Mil spec environments
- Voltage ratio output proportional to pressure

Specifications

Standard Ranges ....15-500 PSIA
Overpressure Limits...150% of range
Standard Resistances
.......2K, 5K, 7.5K, 10K ohms (±10%)
Linearity ....±1.5% of range
To 500 PSIA ....±1.2%
Operating Temperature Range
..............................-65°F to +165°F
Thermal Sensitivity ±0.01% per 100°F
Insulation Resistance ..50 Megohms @ 200 VDC
Resolution ....0.3% nominal
Power Rating
@ 165°F ....0.25 watts
Output.........................Voltage ratio proportional to pressure
Shock ....35G for 11 ±1 msec
Vibration .....0.25" single amplitude, 5-2000 Hz with no discontinuities
Acceleration..............±0.03% per G up to 40G, steady state
Media....Compatible with Ni-Span C*
Electrical Connection PT1H-8-4P
End Sets
.........±2%, 2.5% to 97.5% of range



Model 745

Bourns® Pressure Transducers

- High shock rating
- Small size
- Rugged
- Simplicity of design
- Hermetically sealed
- Potentiometric data element

Specifications

Standard Ranges
.........0-500 through 0-10,000 PSIA
Overpressure Limits
.......150% of range, 10,000 PSI max.
Burst Pressure...........200% of range 10,000 PSI max.
Linearity
To 5,000 PSI...........................±1%
To 10,000 PSI.......................±1.3%
Operating Temperature Range
.............................-65°F to +250°F
Thermal Sensitivity ....±0.01% /°F
Insulation Resistance
...............50 megohms @ 500 VDC
Resolution ....0.4% typical
Life ....25,000 full scale cycles
Input Impedance.....2,000 ohms ±10%
Power Rating
@ 165°F ....1.5 watts
Output.........................Voltage ratio
Shock ....100G for 11 ±1 msec with no discontinuities
Vibration
..........55-2000 Hz @ 35G, ±1% VR
Media ...Compatible with silver braze and Ni-Span C*
End Sets
.........±2%, 2.5% to 97.5% of range

Model 5316

Bourns® Pressure Transducers

- Rugged
- Simplicity of design
- Reliable
- Potentiometric data element
- Low cost
- AC or DC

Specifications

Standard Ranges
...........0-100 through 0-5,000 PSIG
Overpressure Limits ....150% of range

Canon
Laser Linear Encoders

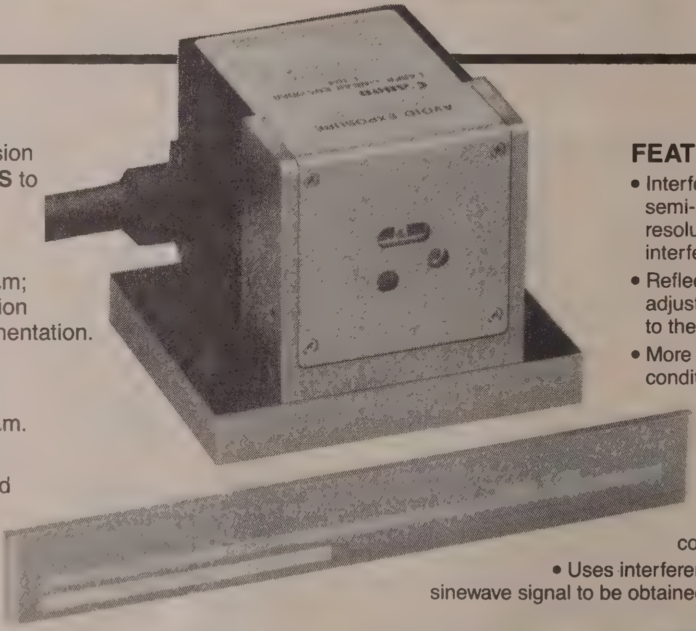
0.01μm RESOLUTION. EVEN IN THE REAL WORLD.

Canon has added high-precision **LASER LINEAR ENCODERS** to its full line of laser rotary encoders. The Canon laser linear encoder provides for maximum resolution of 0.01μm; thereby allowing high resolution closed loop control of instrumentation.

L-104 has a scale slit pitch of 1.6μm and sinewave period output from main unit of 0.4μm.

L-108 has a scale slit pitch of 3.2μm and a sinewave period output from main unit of 0.8μm.

A 16 signal interpolator CI16-2 and 40 signal interpolator, CI40-2 are available, enabling optimum combinations to achieve various resolution and responsiveness.



FEATURES:

- Interference by fine grating with a semi-conductor laser achieves resolution equal to that of laser interferometers.
- Reflection-type, allowing easier adjustment of alignment as compared to the transmission type.
- More stable under variable ambient conditions compared to conventional laser interferometers due to the use of a scale method instead of the laser wavelength standard method.
- Zero-phase index signals are output, allowing simple control of positioning.
- Uses interference, thus providing a full sinewave signal to be obtained from the photodetector.

Please contact CANON directly for special applications in O.E.M. quantities

CLAROSTAT

ENCODERS

SERIES 600
OPTICAL ROTARY ENCODER

DESCRIPTION:
The series 600 controls are manually operated, rotary, optical encoders that output two square waves in quadrature at a rate of 128 pulses per channel per revolution as a standard with other resolutions down to 24 pulses available. The outputs are TTL compatible. The variation by construction is the terminal configuration, with the one model having (4) cable leads, and the other model having (4) pin leads and internal resistors.

Electrical Specifications
INPUT POWER: 5 volts DC ±5% @ 30 MA max. plus external requirements.
OUTPUT RATE: 128 pulses/revolution per channel—standard
Other pulses/revolution between 10 and 128 are available.
CHANNELS: Two separate output channels in quadrature, 90° ± 45°
OUTPUT VOLTAGE: High level voltage—2.4 volts min. with 10K load to ground. Low level voltage—.4 volt max.

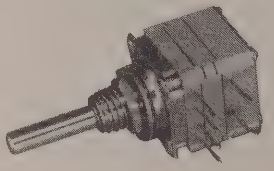
SERIES 688
1/2 INCH SQUARE OPTICAL ENCODER



DESCRIPTION:
The Series 688 controls are manually operated, rotary, optical encoders that output two square waves in quadrature at a rate of 64 pulses per channel per revolution as a standard with other resolutions down to 20 pulses available. The outputs are TTL compatible.

Electrical Specifications
INPUT POWER: 5 Volts DC ±5% @ MA max. plus external requirements.
OUTPUT RATE: 64 pulses/revolutions per channel-standard. Other pulses/revolution between 20 and 64 are available.
CHANNELS: Two separate output channels in quadrature, 90° ± 45°.
OUTPUT VOLTAGE: High level voltage—2. 4 volts min. with 10KΩ load to ground. Low level voltage—.4 volt max.

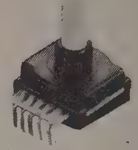
SERIES 500
MECHANICAL ROTARY ENCODER



DESCRIPTION:
The Series 500 Controls are manually-operated, rotary, mechanical encoders that provide a 2-bit grey code for relative reference applications and a 4-bit grey code for absolute reference applications. It has a rotational life of more than 100,000 shaft revolutions, a positive detent feel and can be combined with a second modular section in a concentric-shafts construction.

The Series 500 is small-sized (.830 in. sq. × .343 thick) and commonly used in limited-space, panel-mounted applications where the need for costly, front-panel displays can be completely eliminated.

Electrical Specifications
OUTPUT: 2-bit grey code, channel L leads channel R by 90° electrically in the CW direction. 4-bit grey code, absolute electrical position output. (Hexidecimal, B.C.D. and counting codes available upon request see Output Code Table section next page.)
CLOSED CIRCUIT RESISTANCE: 5Ω maximum
OPEN CIRCUIT RESISTANCE: 100kΩ maximum
CONTACT RATING: Resistance load 250 ma @ Vdc maximum
SWITCHING LOADS: 1.5 ma @ 115 Vac; 150 ma @ 14 Vdc
BOUNCE (Jitter): 5 ms/cycle @ 15 RPM
DIELECTRIC WITHSTANDING VOLTAGE: 1000 Vac @ ATM
ELECTRICAL TRAVEL: Continuous (rotational position stops are available upon request)
OPERATING SPEED: 50 RPM maximum

TWO BIT GRAY CODE MECHANICAL ENCODER

DESCRIPTION:
Only one half inch square, the Series 388E is a direct digital, contacting, mechanical encoder for low resolution limits in such applications as sensing, cursing scanning or robotics. Meets those requirements for a digital output component for limited space applications.

Electrical Specifications
OUTPUT: 2 Bit gray code, channel L leads channel R by 90° electrically in CW direction.
CONTACT RESISTANCE: 2.5K Max.
OPERATIONAL RESISTANCE: 10 Megohm Min.
CONTACT RATING: 5 VDC at 5 ma
INSULATION RESISTANCE: 100 Megohm at 50 VDC
JITTER: 5 Milliseconds/cycle at 15 RPM

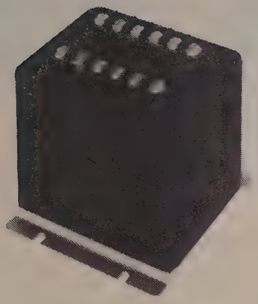
WATT, WATT-HOUR, VAR & CURRENT TRANSDUCERS

WATT, WATT-HOUR, VAR TRANSDUCERS



UL RECOGNIZED

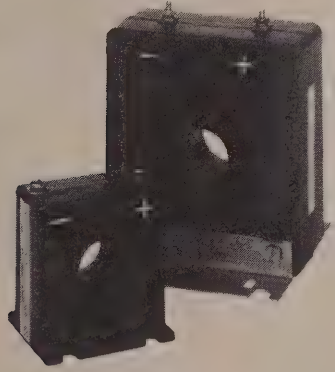
Basic Accuracy: ±0.5
Frequency: 60 HZ
Elements: 1, 2 or 3
Physical Size:
4.19 X 4.38 X 3.75 high

Applications:
1 Phase-2 Wire, 1 Phase-3 Wire,
3 Phase-3 Wire, 3 Phase-4 Wire
Aux. Power: 120/240 VAC

WATT-HOUR
CR-4146-X-OX-X
Pulse Rate: 1 Watt Hour/Pulse (Standard)
Output: T=Triac, N=Transistor
Number of Elements: 1, 2 or 3

WATT & VAR.
CR-4149-X-X
Output: A = 0-1 mA DC, B = 4-20 mA DC
Number of Elements: 1, 2 or 3

2-WIRE, 4-20 ma CURRENT TRANSDUCER



Accuracy: ±0.5% FS
Max. Signal Out: 30 mA
Supply Voltage: 24 VDC
Frequency: 60 HZ
Insulation Class: 600V

PRESSURE TRANSDUCERS

Features

- **Pressure ranges:** 0-5 to 20,000
- **Types:** general purpose, gage,absolute, sealed, self-amplified, two-wire transmitters, depth sensors, and flush mount
- **Output:** voltage, current or frequency,
- A unique design that puts only stainless steel* in contact with your pressure media, for most models.
- 2x rated pressure without damage, 5x to 20x rated pressure without bursting.
- Proven long-term zero and span stability.
- Full calibration and temperature compensation.
- Unit-to-unit interchangeability assured through factory calibration to ±1%.
- Full pressure cycles greater than 100 million.
- FM approval on BL and Datamate.

Applications

- Medical instruments
- Air conditioning and refrigeration
- Hydraulic controls
- Oil exploration and extraction
- Aircraft hydraulics
- Agricultural sprayers and dusters
- Geophysical
- Oceanography
- Robotics
- Water management
- Transmissions
- Process control equipment
- Exercise machines
- Physiological monitors
- Environmental control systems
- Engine controls, monitors
- Automotive test stands

ACCESSORIES AND OPTIONS PRESSURE TRANSDUCERS

Adapters For Pressure Transducers

These adapters are simple two-piece fittings which house the AB, BF or BL transducers. They not only interface with the working system, but also shield the transducer from the mechanical environment.

Options

Options that improve operation or add features for specific applications can be incorporated into Data Instruments transfucers at additional cost.
The options listed below are those referred to by numerical code in the information to the right.
1. Absolute pressure version available in 0-15, 25, and 50 PSIA. (Models AB, AB/HP, BL, BF only)
2. Improved accuracy to less than ±0.5% span; improved thermal effect on zero to less than ±1% span within compensated range. (Models BL, BF only)
3. Barbed fitting for attaching protective hose around cable. (Models AB, AB/HP only)
4. Splice longer cable onto standard 3' (9.1 m) cable. (Model AB only)
5. Install longer continuous cable. (Model AB, AB/HP only)
7. Extended operating range to 300°F (140°C), Not applicable for 6 and 15 PSI. Includes Bendix PTIH-10-6P electrical connector with extended case. Mating connector not included. (Models AB, AB/HP only)
TEF–Teflon® coating on all wetted surfaces. Available on ranges 0-25 thru 0-500 PSI.

Special Features Available With Some Transducers Models

- Bi-directional Model AB, EA or SA for vacuum measurement
- Metric Calibrated Model BL, PL-1, and IMC
- High impedance bridge for low power applications
- Special case materials for high corrosion resistance
- Welded pressure ports
- Special calibration or temperature performance
- Strain links for measuring tensile and compressive forces

Model	Description
Hirschmann	Quick-disconnect connector for SA and MEDIAMATE (factory-installed)
ZB-BF	External Zero Balance Circuit for Model BF
ZB-BL	External Zero Balance Circuit for Model BL
Mating Connector	Matches Bendix PTIH-10-6P (For Models BF, BL and AB with option 7)

How To Order

Always order by name of product, and full description. State in detail any special features required. All orders are subject to final acceptance by Data Instruments Inc.

Terms

Net 30 days upon credit approval; otherwise payment must be received in advance of shipment, or COD shipment.

DISPLACEMENT TRANSDUCERS

Introduction

Fastar is a precision inductive displacement and position transducer. Available in two mechanical configurations, Fastar and HydraStar, it offers shorter body lengths and faster response compared to LVDT's and magnetostrictive devices.

The two mechanical configurations and five models of signal processors allow Fastar to readily be used in applications ranging from laboratory research to volume OEM. When used with the patented signal processors shown in this brochure, the Fastar family provides the following key features.

Features

- Displacements of 0.76 to 24"
- Fastar body length approximately 1.3" longer than linear range; HydraStar body length approximately 1.8" longer
- Excellent stroke to stroke repeatability
- 0.15% or 0.1% linearity
- Unequaled response time of <30µsec between core motion and change in output
- Adjustable output; 0-5, 0-10, ±5, ±10Vdc. Also 4-20mA on SP150
- A unique dynamic compensation technique to reduce temperature errors at the transducer
- HydraStar designed specifically to fit cylinders machined to mount a Temposonics® type transducer
- Wide operating temperature range
- Fastar versions resistant to EMI
- Maximum Operating Pressure: 5000 PSI (350b)

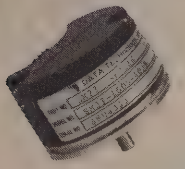
Data Technology...a leader in the encoder field, offers a wide range of encoder products that are ideally suited for today's demanding applications.



SM23

Low Cost Multipurpose Encoder

☐ Precision surface mount technology ☐ Metal housing & bearings ☐ Single LED and monolithic array assembly ☐ High noise immunity ☐ Full 1 year warranty ☐ Up to 100 kHz standard frequency inclusive of A, B and Z outputs

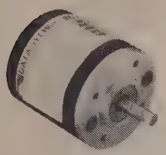
MECHANICAL SPECIFICATIONS

☐ **Front End:** All metal shaft and bearings housing • Face & servo mount standard ☐ **Cover:** Injection molded flame retardant 94V-O VYDYNE Nylon ☐ **Operating Shaft:** Lower of 3000 RPM or ((6 x 10^6) ÷ (CPR)) RPM ☐ **Shaft Rotation:** Bi-directional & continuous ☐ **Shaft Loading Max:** Axial: 5 lbs. (2.27Kg) Radial: 5 lbs. (2.27Kg) ☐ **Bearings:** Shielded, Instrument Quality ☐ **Starting Torque:** 0.05 oz-in (3.6 gm-cm) ☐ **Moment of Inertia:** 4.0 x 10^{-5} oz-in-sec^2 (3.0 gm cm^2) ☐ **Weight:** 5 ounces ☐ **Case Diameter:** 2.30 inches (58.4 mm) ☐ **Case Length:** 1.40 inches ☐ **Shaft Diameter:** 0.25 inches (6.4 mm) ☐ **Shaft Length:** 0.62 inches (15.7 mm)

ELECTRICAL SPECIFICATIONS

☐ **Encoder Type:** Optical Solid State ☐ **Code:** Incremental ☐ **Resolution:** 1-2000 CPR (cycles per revolution) ☐ **Power Input:** +5VDC ±10%, 130 ma • +12VDC ±10%, 130ma • +15VDC ±10%, 130 ma ☐ **Output Channels:** Dual (A quad B) squarewaves with zero marker pulse (ungated) ☐ **Phase Relationship:** A leads B by 90 degrees electrical (±30 degrees nominal ± 1/8 cycle worst case) for clockwise rotation ☐ **Frequency Response** 100 kHz A, B & Z Channels ☐ **Drive Capability:** Power mosfet buffered outputs TTL and CMOS compatible • Source impedance: 1K ohm to VCC or specify open drain (collector) • Sink current: 48 ma at 0.3V maximum ☐ **Rise and Fall Time:** Less than 1.0 microsec. into 1000 pf load ☐ **Accuracy:** Pulse to Adjacent Pulse: ±6 arc seconds, Pulse to Any Other Pulse: ±3 arc minutes ☐ **Illumination Source:** Single Infrared Emitting Diode • (IR LED) Gallium Aluminum Arsenide • (GaAlAs) hermetically sealed

---



SM15

Advanced Small Industrial Encoder

☐ Available in line counts up to 1024 PPR ☐ Fast operating speeds (200 kHz) ☐ Miniature sealed ball bearing ☐ Wide operating temperature range (-10°C to +70°C)

MECHANICAL SPECIFICATIONS

☐ **Starting Torque:** 10g - cm or less ☐ **Shaft Loading:** Radial 2kg Axial 1kg ☐ **Angular Acceleration:** 1 x 10^5 rad/sec^2 ☐ **Inertia:** 10g - cm^2 ☐ **Slew Speed:** 6000 RPM maximum ☐ **Bearing Life:** 1 x 10^8/RPM hours ☐ **Net Weight:** 150g maximum

ELECTRICAL SPECIFICATIONS

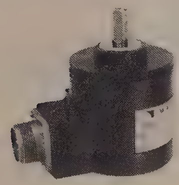
☐ **Power Source:** +5 VDC ☐ **Signal Mode:** Dual channel 90° phased with optional index pulse. 5V unit available with differential outputs ☐ **Output Mode:** Line Driver (5V model only) ☐ **Light Source:** Infrared Diode ☐ **Rise & Fall Time:** 1 micro second or less

ENVIRONMENTAL SPECIFICATIONS

☐ **Vibration:** 50 Hz - 10G - 1 Hr ☐ **Shock:** 30 G 11ms ☐ **Operating Temperature:** -10°C to +70°C ☐ **Storage Temperature:** -30°C to +80°C ☐ **Humidity:** 35-85% RH No condensation

AVAILABLE LINE COUNTS

☐ 100 ☐ 200 ☐ 250 ☐ 256 ☐ 300 ☐ 360 ☐ 400 ☐ 500 ☐ 512 ☐ 600 ☐ 800 ☐ 900 ☐ 1000 ☐ 1024



DT25

Encoder: Industrial Sealed Heavy Duty

☐ Up to 5400 lines on the disc (up to 86,400 PPR with multiplier logic) ☐ Fast operating speeds (100 kHz operating frequency) ☐ Low quadrature deviation (90 degrees ±22.5 degrees) ☐ Wide operating temperature range (-18°C to +71°C) ☐ Two year warranty on entire encoder (5 Years for the IR LED light source)

MECHANICAL SPECIFICATIONS

☐ **Construction:** Anodized aluminum totally sealed ☐ **Shaft Speed:** 3000 RPM maximum recommended. See bearing life chart ☐ **Shaft Acceleration/Deceleration:** 100,000 radians/seconds^2 ☐ **Rotation:** Bi-directional ☐ **End Play:** .001 inches (0.025 mm) ☐ **Radial Play:** .001 inches (0.025 mm) ☐ **Shaft run out (maximum):** .001 TIR (with reference to 1.2500 pilot at 1 inch from mounting face) ☐ **Bearing Thrust (maximum):** 35 lbs. (156 N) ☐ **Radial Force (maximum):** 35 lbs. (156 N) ☐ **Start Torque (maximum):** 1.25 ounce-inch (8.8 x 10^{-3} newton centimeters) ☐ **Moment of Inertia:** 0.4 x 10^{-3} oz -in-sec^2 (0.28 gm-cm-sec^2) ☐ **Weight (including connector):** 10 oz. (270 gr) ☐ **Connector:** Models 00 and 01 MS3102E-16S-1P or equivalent • Models 02 and 03 MS3102E-18S-1P or equivalent ☐ **Bearing:** Instrument quality ☐ **Bearing Lubrication:** Andok "C" Lube

ELECTRICAL SPECIFICATIONS

☐ **Resolution:** 1 to 5400 CPR (86,400 PPR with interpolation and multiplier logic) ☐ **Frequency:** A, B(A,B) includes zero index response at stated A,B frequency Lowest of: 100 kHz or ((3000 RPM) ÷ (60 sec ÷ min)) x resolution ☐ **Light Source:** Single high power (IR LED) Gallium aluminum arsenide (GaAlAs) hermetically sealed 80ma power ☐ **Light Warranty:** 5 years (see warranty statement) ☐ **Phase Relationship:** 90 ±22.5 electrical degrees (1/8 cycle worst case) ☐ **Input Power (Square Wave Output):** 5 Volt Model +5VDC ±10% 150mA • 12 Volt Model +12VDC ±10% 150mA ☐ **Output Characteristics:** 5 Volt Model TTL Output Source - 400µa @ +2.4VDC min Sink 16mA @ +0.4VDC max. • 12 Volt Model Output source impedance 1K ohm to 12VDC. Sink 10mA @ +0.3VDC max. • 15 Volt Model Output source impedance 1K ohm to 15VDC Sink 10mA @ +0.3VDC max. ☐ **Rise and Fall Time:** 5 Volt Model 0.1 µsec max. • 12 Volt Model 1.5 µsec max. • 15 Volt Model 1.5 µsec max. ☐ **Zero Index (optional):** 1/4 cycle gated pulse (standard)

The above encoders are only 3 of the more than 15 series offered. Call or write for a complete catalog.

MINIGLOSSARY
ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

TIME

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.

OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Fig. 2. Typical time vs. current (non-inductive load)

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

Entran® Direct "Off-The-Shelf"

Dear Customer:

We are excited to send you this copy of the Entran Direct "Off-The-Shelf" catalog. As you look through these pages you will find an excellent selection of accelerometers, pressure transducers, load cells, strain gages and electronic instrumentation designed to solve your delivery needs.

You can be sure that every product you find in this catalog is of the highest professional quality, the same high quality that is found in products listed in our full product catalogs. Every product we sell is covered by our one-year warranty.

Easy to order

Have questions or need more information? Call us toll free and our experienced sales engineers and customer service staff will be happy to help. It's easy to order, too. A quick phone call to our knowledgeable staff gets your order on its way. Or, If you prefer, use your company purchase order and we will begin processing your order when it arrives.

Best Assistance in the Industry

Lastly, everything you order from Entran is covered by our guarantee that you'll get the best technical assistance in the industry. Please try us today. We know that you will be pleased.

Sincerely,
ENTRAN DEVICES, INC.

Daniel M. Slavik

— Extended Warranty — Program

- 1 YR OR 2 YR WARRANTY ADDITIONS
- PARTS AND LABOR
- TRADE-IN DISCOUNT ON NEW UNIT PURCHASE

Entran's Customer Service Department now offers a warranty extension program for select Entran products. This program allow you to purchase extended warranty periods of up to two additional years to Entran's standard one year product warranty, for a total of three years protection. You will receive a coded warranty number to give you easy access to Entran's repair service and to simplify the return process. In addition to the extended warranty protection, you will receive a special "Trade-in" Discount should you have to purchase a replacement unit for any reason.

The warranty provides for both labor and replacement parts, per the Terms and Conditions of Entran's Warranty Certificate, to maintain the covered product in operating condition throughout the warranty period, if needed due to the failure of the product as a result of normal use. A copy of the Terms and Conditions of the Warranty Extension is available either directly from Entran or through your local representative.

Upon certification for coverage by Entran, you will receive a validated Warranty Certificate referencing the product covered, its Serial Number and the Warranty Terms and Conditions as well as a coded Warranty Tag to attach to the product case or lead wires. This will ensure you our best possible service.

PRODUCTS COVERED:

All Standard Products (products not fitted with or modified by options) in this catalog. Products with "W" weld or "Z" temperature options are eligible for Extended Warranty.

HOW TO ORDER:

Either when placing your product order, or within 30 days of product delivery, order the appropriate warranty Number below:

For Sensors:

WS-1	1 Year Warranty Extension (2 yr. total)
WS-2	2 Year Warranty Extension (3 yr. total)

For Instrumentation:

WI-1	1 Year Warranty Extension (2 yr. total)
WI-2	2 Year Warranty Extension (3 yr. total)

Entran® Direct "Off-The-Shelf"

— Accelerometers —

Other models and ranges available from our full product brochure.

EGA-125-D & EGAX Miniature Accelerometers — High Overrange

Entran's EGA accelerometers are a state of the art achievement in miniature design. The EGA offers an optimum combination of characteristics which permit acceleration, vibration and shock measurements where small size and mass are of prime importance. 0.7 cr. nom. damping increases useful range to as high as 50% of resonance. For 10000 g overrange protection, order the EGAX version. Functions both steady state and dynamic. Two mounting styles in stock as well as triaxial mounting block.

EGA –

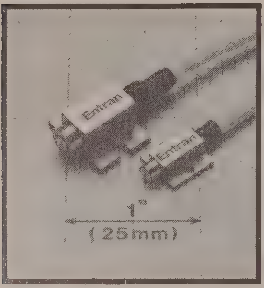
OVERRANGE[3]	10,000 g				

EGE-72 Test Instrumentation & Automotive Accelerometers



The EGE-72, with its industry standard "footprint" for system testing of shock, vibration and linear accelerations is used for crash, sled, dummy and performance testing of all types. It has a built-in "1/2 - bridge" of fixed resistors suitable for shunt calibration and is compatible with many standard test systems.

EGE –			
MODEL	72BM-200F	72B-2000F	72B3N*-2000F

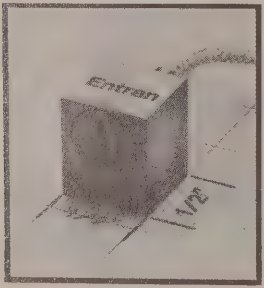
OVERRANGE[4] (SHOCK)	±2000 g	±5000 g	±5000 g

* Undamped

EGC-500DS Heavy Duty Accelerometers



The EGC-500DS is a heavy duty accelerometer. Created for on-site testing where rugged construction and overload protection is of paramount importance. Damped and fitted with mechanical stops to impede overload response. The EGC-500DS is ideal for static and dynamic acceleration, vibration and shock measurements, the workhorse of test engineers.

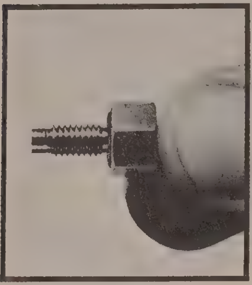
Entran®Direct "Off-The-Shelf"

— Pressure Sensors —

Other models and ranges available from our full product brochure.

EPX Miniature Threaded Pressure Sensors



Entran's EPX pressure sensor has a unique design based on mounting ease and flexibility. The EPX offers an optimum combination of characteristics which permit static and dynamic pressure measurements when small size is of prime importance. Its beam welded stainless steel diaphragm, 10-32 UNF or M5 Metric thread and built-in O-ring seal allow simple mounting to test objects and use in corrosive media compatible with 304SS and APX4 with appropriate O-ring material.

EPX-10IW –								
MODEL	-10	-50	-100	-250	-500	-1000	-2500	-5000

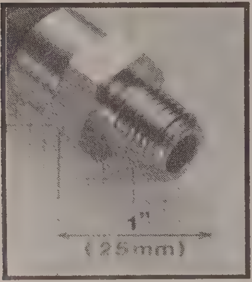
OVERRANGE bar	5X Range	2X Range					1.6X Range	1.2X Range

EPO Industrial Pressure Sensors



Entran's EPO Industrial pressure sensors, although designed to be economical in cost, have a corrosion resistant stainless steel diaphragm and many of the features of its higher cost relatives. The standard unit is complete with a built-in pipe thread for sealing, internal electrical circuitry and fitted with an electrical connector.

EPO-W01 –						
MODEL	-15P	-50P	-100P	-250P	-500P	-1000P

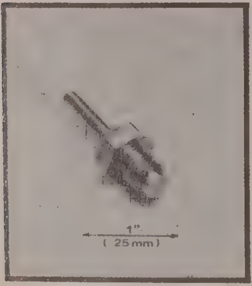
OVERRANGE bar	3X Range	2X Range				1.5X Range

EPNM High Stability Pressure Sensors



The EPNM pressure sensors have been designed for applications requiring high stability of the zero offset over a long period of use. Their beam weld diaphragm can be used in fluids compatible with APX-4 stainless steel with an appropriate ring seal. The EPNM is also available with a built-in amplifier providing a 5V Full Scale output.

EPNM-38 –

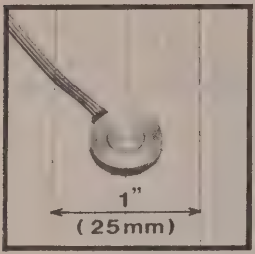
— Load Cells —

Other models and ranges available from our full product brochure.

ELF-500 & ELF-13 Miniature Disc Load Cells



Entran's ELF-500 and ELF-13 are the last word in miniaturized load measurement. An incredible 0.11" (2.8mm) in thickness up to 50 lb. (250 N) range with a 0.5" (12.7mm) diameter. The ELF-500 measures both steady state and dynamic compression loads. As they are designed for minimum profile, off-axis loading cannot be isolated due to the absence of flexures.

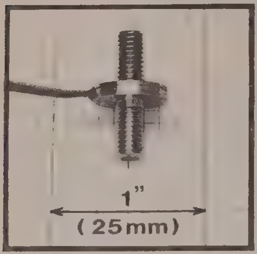
[2,4]OVERRANGE	10 N	50 N	75 N	150 N	375 N	625 N

ELF-TC500 & ELF-TC13 Miniature Load Cells with Threaded Studs



Entran's ELF-TC500 and ELF-TC13 are the tension/compression stud mounted versions of the ELF-500 and ELF-13, measuring both static and dynamic loads. The ELF-TC500 has 10-32 UNF threads and is calibrated in lbs., while the ELF-TC13 has M5 x 0.8 metric threads and is calibrated in Newtons. Designed for minimum profile, off-axis loading cannot be isolated due to the absence of flexures.

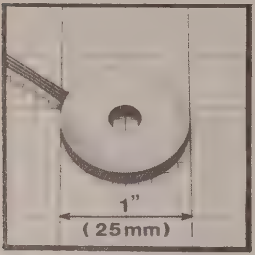
ELF-1000 & ELF-26 Flatline Load Cells



Entran's ELF-1000 and ELF-26 Flatline Load Cells provide the user with applications flexibility as a flat disc or washer shaped load cell. Its high level output of 250mV measures steady state and dynamic compression loads with very low definition, and is available calibrated in either lbs. or Newtons. Off-axis loading cannot be isolated due to the absence of flexures.

ES Series Semiconductor Strain Gages

Entran semiconductor strain gages are the primary sensing element in thousands of transducers around the world and are constantly employed by engineers and scientists for model studies and field test experimentation. Processed from P-type silicon in orientations which provide maximum sensitivity to applied strain, they are available in both "bar" and "U" shaped configurations. All Entran semiconductor strain gages are fabricated with high quality, first-grade materials and pure gold leads for maximum reliability. Areas as small as ⅛" in diameter can be gaged with a fully active four arm bridge. Apply them yourself or take advantage of our Gageing Service in the USA or Europe.

MATCHING (R)	R within ±2% of each other	R within ±10% of each other
R nom. (70°F)	Resistance in ohms, ±10%	Resistance in ohms, ±20%
GF nom. (70°F)	Gage Factor, $\frac{\Delta R/R}{\Delta L/L}$ ±5%	
[4]TCR nom.	Thermal Coefficient of Resistance, $\frac{(\Delta R/R)\%\pm3\%}{100°F}$ 70°F to 170°F (21°C to 77°C)	
[4]TCGF nom.	Thermal Coefficient of Gage Factor, $\frac{\Delta GF\%\pm3\%}{100°F}$ 70°F to 170°F (21°C to 77°C)	
GAGE TYPE	P-Type Silicon	
[1]STRAIN LEVEL	0-1000 µε recommended 0-3000 µε maximum	
[2]WATTAGE RATING (per gage)	0-25 mw recommended 50 mw maximum	
TEMP. RANGE	-100°F to +600°F (-73°C to 315°C)	
LEAD WIRES	Gold, 0.0015" diameter x 0.25" length min. (0.038mm dia. x 6.35 mm)	
YOUNG'S MODULUS	E=27 x 10^6 psi (1.9 x 10^6 kg/cm^2)	
WATTAGE	Watts=(Voltage on Gage)^2/(Gage Resistance)	
[3]SENSITIVITY(Vo)	Voltage Out= ¼ (No. Active Arms)(Gage Factor)(Strain Level)(Excitation Voltage) example: Fully active 4 Arm Bridge. GF=130. 500µε. 5V Exc. Vo= ¼ (4) (130) (500 x 10^6) (5V)=325mV	
BONDING	Apply thin Epoxy precoat for electrical isolation. Then apply bonding coat to substrate, place gage (handling by its leads only) on wet epoxy and align. Gage is held in position by surface tension only. DO NOT apply weights or force as this may damage the gage. Micro Measurements M-Bond 610 or equivalents are recommended.	

[1]µε=microstrain=strain in in/in x 10^6. [2]mw=milliwatt. [3]Equations assume bridge with adjacent tension and compression arms for additive outputs. [4]The actual values of TCR and TCGF greatly depend upon excitation voltage, heat sinking, temperature of use, mounting and prestrain and catalog values should not be used as absolute numbers for calculation of data for experimental or design use. TCR and TCGF, where important, must be calibrated after gage mounting.

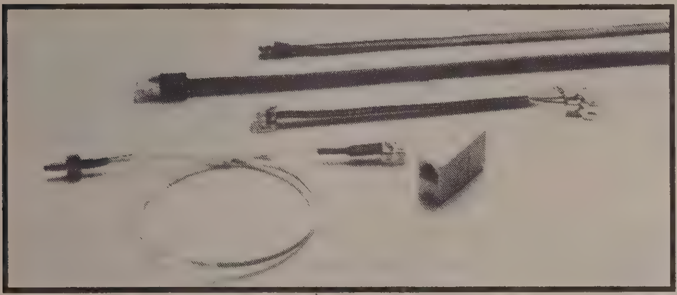
"Easy Connect" Cable & Connector System



- PREWIRED CABLES AND CONNECTORS
- FAST AND EASY TO USE
- INEXPENSIVE

Interconnects made easy with Entran's new "Easy Connect" system. A complete line of prewired cables and connectors for use with most of Entran's product lines enable quick and easy installation. This broad range of cables will interconnect most Entran sensors with power supplies, amplifiers, meters and Hi/Lo setpoint modules as well as other types of instrumentation that you may already own.

ECS-6RR10 10 ft. (3m) Shielded
EC-6RR20 20 ft. (6m) Unshielded
ECS-6RR20 20 ft. (6m) Shielded
EC-AR ADAPTER TO EC-AR ADAPTER

The Easy Connect's basic component is a 10 ft. (3m) or 20 ft. (6m) extension cable with a reliable telephone type RJ connector prewired to each end. These extension cables are 6 conductor and are available in both shielded and unshielded versions. Shielded versions have the shield carried to the sixth pin of the connector. The EC-AR adapter with an RJ input on both sides, facilitates extensions or interconnect variation while maintaining color coded (pin number) sequencing from one cable to the next. Just order an Entran sensor prewired to an RJ connector and you can easily interface through the EC-AR adapter.

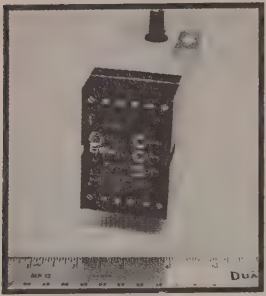
PS Series Power Supplies with Amplifier Option



Entran's new PS Series Power Supplies are a general purpose excitation source for strain gage bridge transducers and companion amplifiers. The PS Series is an ideal accessory for Entran accelerometers, pressure transducers, and load cells, as well as most standard bridge transducers on the market. Available in single and dual adjustable excitations or with a built-in adjustable gain amplifier, accepting 4-wire closed bridge or 5-wire open bridge configurations. The PS-15 is a single polar supply, the PS-30 is bipolar supply for use with external amplifiers requiring plus/minus excitation and the PS-30A features a built-in instrumentation amplifier. Any PS Series supply or amp can be used with the MM45 meter but use with the MM35 requires factory matching.

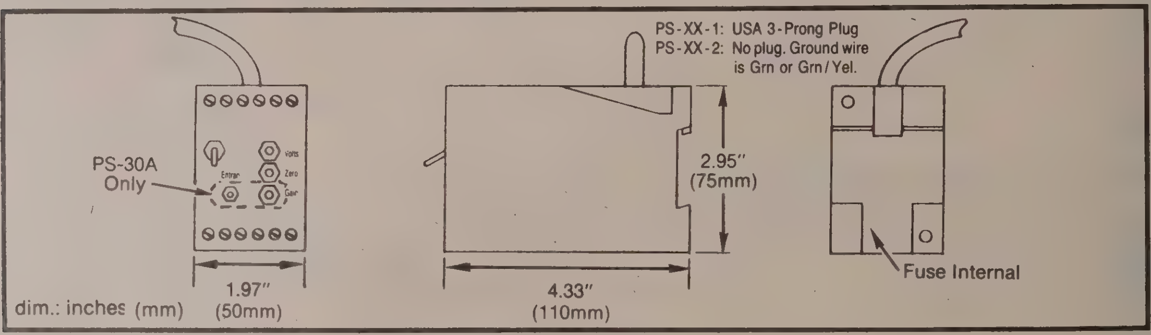
SENSOR ZERO	Adjustable for 5-wire open bridge transducer (50 Ω to either leg)				Adjustable for 4-wire closed and 5-wire open bridge sensor	



OPERATING PROCEDURE

1.) If desired, link the "E-Ground" to "C-Common" terminal on PS-30 or to "Output–" on PS-30A and to "Supply–" on PS-15 for non-isolated operation. Power unit through wall plug, turn on front panel switch, red light should activate.

2.) For PS-15: Connect DVM to Transducer "Supply+" and Transducer "Supply–" terminals and adjust "Volts" potentiometer for desired transducer excitation voltage. For PS-30: Connect DVM to Transducer "Supply+" and "C-Common" (use "Output–" on PS-30A instead of "C-Common" terminal) and adjust "Volts" potentiometer for desired transducer excitation voltage (both + and –voltages will be adjusted by this action). Move DVM to "Supply–" from "Supply+" to confirm correct voltage on "–" side.

3.) Connect transducer excitation leads to appropriate "Supply" terminals. Confirm that loaded power supply is providing desired voltage with DVM and fine adjust the "Volts" potentiometer if necessary.

4.) WITH STANDARD 4 WIRE BRIDGE TRANSDUCERS: Connect the transducer signal leads to "Signal+" and "Signal–" terminals.

5.) FOR 5 WIRE OPTION BRIDGE TRANSDUCERS (available from Entran): Connect the "Green+" output lead to the "Signal+" terminal and the "Blue+" output lead to the "5 Wire Zero" terminal. This will activate the "Zero" control potentiometer providing 50 Ω zero offset adjustability. Connect the "White–" lead to the "Signal–" terminal. The PS-30A uses active zero control without the 50 Ω potentiometer.

6.) Connect the "Output" terminals from the front panel to your monitoring or recording equipment.

7.) Adjust the "Zero" potentiometer for "5 Wire" connected transducers to trim the output offset or for "4 Wire" units also on the PS-30A.

8.) FOR USE WITH SEPARATE EXTERNAL AMPLIFIER ON PS-30 ONLY (such as Entran IMV): Connect the amplifier to the "Supply+", "Supply–" and "C-Common" terminals. Power the transducer from IMV or amplifier. Connect "+" output lead from the IMV or amplifier to the "Signal+" terminal and connect the "C-Common" lead to the "Signal–" terminal.

9.) TO SET GAIN OF PS-30A AMPLIFIER: With the transducer supply leads connected to the PS-30A, but before connecting the transducer signal leads, set the gain by utilizing the "SET" button and "GAIN" potentiometer. Determine the Amplifier Output offset by temporarily linking the "Output–", "Signal+" to "Signal–" terminals and recording the "Output+" to "Output–" voltage. Remove "Signal+" from "Signal–" and connect "Signal+" to "Output–", press/hold the "SET" button. Monitor the test signal (approximately+50mV) which has been internally injected to the "Signal+" and "Signal–" terminals. Then monitoring the amplified test signal at the "Output+" and "Output–" terminals, and subtracting the amplifier output offset to provide the net amplified output, adjust the gain to the desired value with the "GAIN" potentiometer, comparing the net Amplified Output signal to the unamplified test signal on the "Signal" terminals. To confirm and fine adjust the desired gain, re-connect the signal input link and repeat the above procedure until the desired accuracy is achieved and confirmed. After gain is adjusted, release the "SET" button, remove signal link and connect the signal leads of the transducer to the PSA-30A.

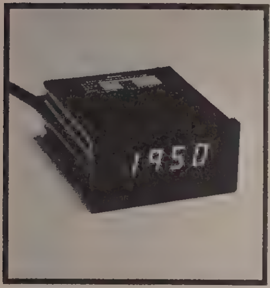
Low Cost Digital Sensor Meters

WITH BUILT-IN SENSOR POWER SUPPLY & HI/LO SETPOINT RELAY OPTION

MM35 Series



The MM35 and MM45 Digital Sensor Meters have been manufactured for Entran to complement our line of pressure sensors and load cells, as well as most other sensors on the marketplace. They are both easy and simple to use and in addition to their digital display, provide various levels of excitation so that a sensor can be powered directly from the meter, without use of an external power supply. This is a powerful combination not usually found in digital meters. The MM35 has a 3-1/2 digit display. Its 1999 count can be fully utilized with any input between 1mV/V and 20mV/V and it has two standard transducer excitation voltages. The MM45's 4-1/2 digit display with 19999 counts, can be fully utilized with either a ±200mV or ±2V input signal, and is totally pushbutton programmable from the front panel. It has five standard excitation voltages, selectable by internal connector pins, peak hold, and a pushbutton Tare Zero.

CHECK EXCITATION VOLTAGE REQUIREMENT FOR SENSOR TO BE USED.

MINIGLOSSARY
CAPACITORS

Anode: One of two plates or conductors. In polarized capacitors, the anode should be connected to the positive conductor in the circuit.

Capacitive Reactance: The opposition (in ohms) of capacitance to the flow of alternating current, equal to the reciprocal of the product of the angular frequency (2π times frequency in Hertz) of the current times the capacitance in farads.

Cathode: One of two plates or conductors. In electrostatic capacitors the cathode is metallic. In electrolytic capacitors the cathode is a liquid, gel or other conductive material which is in intimate contact with a metallic cathodic connection.

Dielectric Constant: The ratio of the capacitance of a capacitor with some material other than air between the capacitor plates to the capacitance of the same capacitor with air between the plates. For example, the dielectric constants of air, Teflon®, polystyrene and ruby mica are 1, 2.1, 2.6 and 5.4, respectively.

Electrolytic: A capacitor with one metallic conductor (generally the anode) and with a liquid or semiconductor cathode. Nonpolarized electrolytic capacitors generally have two equal anodes as well as the liquid cathode. These anodes operate alternately as anode and cathodic connection as alternating current is applied.

Electrostatic: One of two general classes of capacitors in which two or more discrete metallic conductors are present and separated by an insulating dielectric material. Examples include: mica, ceramic, film, and paper types.

Farad: The basic unit of measure in capacitors. A capacitor charged to one volt with a charge of one coulomb (one ampere flowing for one second) has a capacitance of one farad. Capacitors are generally rated at portions of a farad (microfarads or picofarads).

1 farad (F) = 1,000,000 microfarads (µF) 1 microfarad (µF) = 1,000,000 picofarads (pF)

Impedance: All capacitors exhibit impedance. It is a function of capacitor type and internal construction. This can be particularly important in certain applications such as filters for switching power supplies. Capacitors used in these applications often have special multiple tab construction to shorten current paths and to reduce internal resistance.

Leakage Current: Expressed as dcl for electrolytic capacitors, a measure of the intrinsic losses in a charged capacitor. Generally speaking, the lower the dcl, the higher quality the capacitor.

Power Factor: A measure of the overall efficiency of a capacitor. Power factor ratings take all internal losses into consideration in a complex formula. This parameter of certain capacitors is often very important in AC applications such as motor-start and/or motor-run capacitors

Rated Voltage: The rated working voltage of a capacitor. Generally expressed in DC Volts (Vdcw). This is the voltage at which a capacitor may be safely operated at 25°C continuously within its overall parameters.

Ripple Current: The total amount of alternating and direct current that may be applied to an electrolytic capacitor under stated conditions. In general, the higher the ripple current applied, the shorter the operating life of the capacitor will be. Application of significantly higher than rated ripple currents can shorten the capacitor life dramatically and may even cause catastrophic failure (explosion).

Surge Voltage: The momentary surge voltage which may be applied for a stated length of time without doing permanent damage to the unit.

Temperature: Capacitors are generally rated at 25°C at sea level under specific humidity conditions. Operating temperature ranges are also given, along with derating (reliability) curves for operation at temperatures other than 25°C.

Temperature Coefficient: Expressed as TC in ppm (parts per million) or in percent (%) from the norm of 25°C. This is seldom a straight line and may vary widely for certain types. Most capacitors have positive TC in that the capacitance increases as temperature increases. Some types, however, have negative TC in that the capacitance decreases as temperature increases.

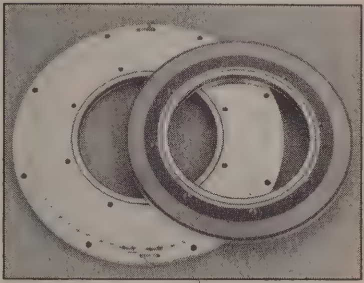
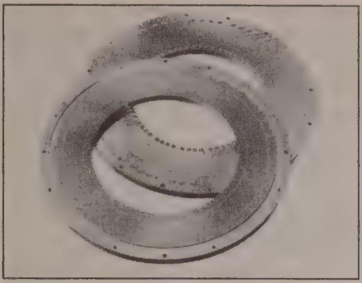
Inductosyn® Position Transducers

Inductosyn transducers provide absolute and incremental positioning information accurate to ±40 microinches, ±0.5 arc second, or better.

Rotary Inductosyn Transducers

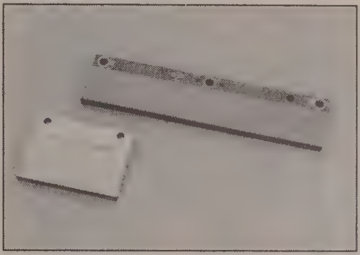


Incremental



Absolute

Linear Inductosyn Transducer



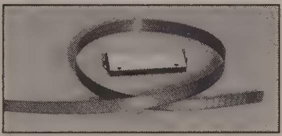
Scale and Slider

Inductosyn transducers consist of two noncontacting, inductively coupled elements which can be directly attached to the fixed and moveable sections of the user's equipment. They provide positioning information to digital readout displays, CNC or other controllers, or provide servo feedback signals.

Rugged and reliable, our position transducers operate anywhere, even under extreme conditions—vibration, temperature from 10°K to 160°C, shock, high pressure, vacuum, and dust or oil films. Choose off-the-shelf or custom designs to solve absolute and incremental positioning requirements.

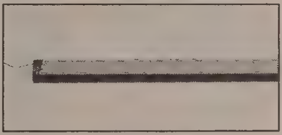
Additional Standard Linear Inductosyns

Tape Scales



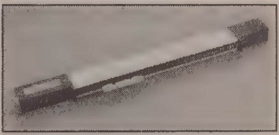
Tape scales provide economical, easily installed one piece scales. Lengths to 120 ft (36M) or more can be supplied. They can be mounted horizontally or vertically. Obtain information on hard to measure travel lengths in long bed metal cutting.

Adjustable Scales



Adjustable scales are one piece bars that can be adjusted after installation to virtually eliminate errors over their full length, limited only by the accuracy of the user's measurement equipment. Lengths to 72 inches (1828 mm) are supplied. Two lengths can be used to provide a total length of 144 inches (3656 mm).

Tape Spars



Tape Spars are completely enclosed scale assemblies installed directly as a component in the user's machine. Spar slider mounts extend through flexible sealing lips for direct attachment to moveable machine parts.

Cassettes

Fully enclosed cassette units are used in extreme environments such as hot rolling mills. Many options are available, including cyclic pitch, travel, and spring return. These units can be pressurized through a purge fitting to help prevent contamination from external sources.

DANFYSIK

ULTRASTAB CURRENT TRANSDUCERS

Very high accuracy, non-contacting measurements of electric current

Danfysik ULTRSTAB Current Transducers operate on the zero flux principle and enable precision current measurements to 2000A with flat frequency response from dc to over 300kHz. The compensation current can be measured directly or converted to a voltage in a "burden" resistor. Zero flux current transducers are extremely linear and have excellent temperature and long-term stability. They enable current measurement without ohmic connection to the measured circuit and without the resistive power loss of a shunt. Even at high currents the ULTRASTAB Current Transducers do not require water cooling.

864U and 300A Head

864U and 864I Eurocard ULTRASTAB Current Transducers

These are Eurocard board Transducers designed for use as the current sensing element in high-precision, current regulated power supplies. They offer very high stability combined with excellent frequency response.

EUROCARD BOARD	864I	864U

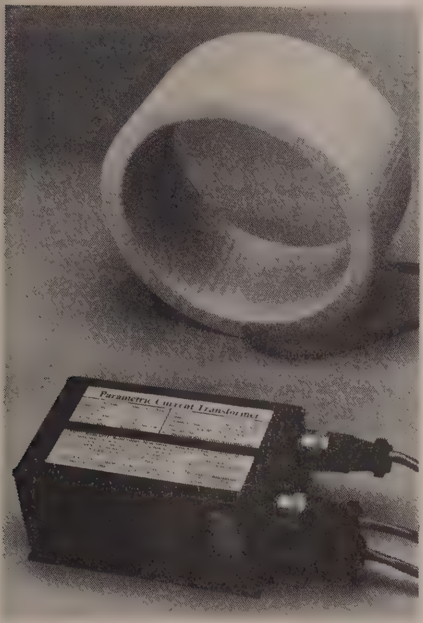
bergoz

CURRENT TRANSFORMERS

High Sensitivity, non-contacting measurement of electric current and charge



PCT with 178mm Head

Bergoz Current Transformers have been developed for the non-destructive measurement of dc and pulse currents in particle accelerators and electron beam devices. They may be applied to the measurement of any electric current where ohmic isolation is desired.

PCT, Parametric Current Transformer

The PCT is a stand-alone instrument using the zero flux principle with very high sensitivity magnetic cores. It can be used to measure dc currents with resolution to better than 10μA.

PCT CONTROL

Polarity		true bipolar
Output	(fs)	±10V
Calibration	(% of fs)	<0.1
Linearity	(% of fs)	<0.01
Stability	(μA/°C)	<±10
	(μA/month)	<±30
Output noise	(μA,rms)	<5(dc to 1Hz)
Operating temp	(°C)	10 to 40

TRANSDUCER HEAD

Head current	(fs)	10mA,100mA,1A or 10A
Frequency response	(kHz)	dc to 20 (-3dB)
Operating temp	(°C)	0 to 60
Axial length	(mm)	102
Hole diameter	(mm)	28,55,82,122 or 178

FCT, Fast Current Transformer

These are passive ac transformers designed for displaying fast current pulses.

Current ratio	(input/output)	20,10 or 5
Input rise time	(nsec)	<1
Droop	(%/μsec)	<2
Peak current	(A max)	100
Output signal into 50 ohm	(V/A)	1.25,2.5,5
Operating temp	(°C)	0 to 60
Axial length	(mm)	22
Hole diameter	(mm)	28,55,88,122 or 178

FCT, ICT

ICT, Integrating Current Transformer

The ICT is a capacitively shorted transformer and a fast current transformer with a common high-sensitivity core. Very fast current pulses are integrated on the secondary capacitance and read out as a current accurately proportional to the integral of the signal current, ie the pulse charge.

Current ratio	(input/output)	100, 20, 10
Input rise time	(psec)	<1
Input pulse length	(nsec)	<5
Linearity error	(%)	<0.1
Output signal into 50 ohm	(mV/nC)	10, 50, 100
Operating temp	(°C)	0 to 60
Axial length	(mm)	32
Hole diameter	(mm)	28, 55, 88, 122 or 178

POSITION SENSORS

HAMLIN

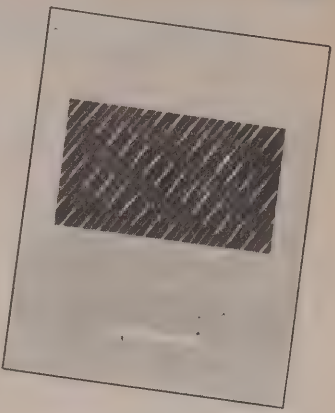
REED RELAYS • REED SWITCHES • POSITION SENSORS

QUALITY ELECTRONIC COMPONENTS SINCE 1949

HAMLIN INC.
612 East Lake Street
Lake Mills, WI 53551 USA
Phone 414/648-3000 FAX 414/648-3001

The heart of all Hamlin magnetic proximity sensors is a hermetically sealed reed switch, for environmental integrity and dependability. When a magnetic actuator is placed within a prescribed proximity of the sensor, the switch contact changes state. Their cost is far below inductive or capacitive proximity sensors. They require no power to operate and provide a switch closure output.

ALL SENSORS FILE #E61760(N)



For detailed product information request the Hamlin Magnetic Proximity Sensor Catalog. The 16 page brochure provides complete data about Hamlin's broad family of standard Magnetic Proximity Sensors plus application and design recommendations. Also included are dimensions, electrical specifications and operation characteristics.

SPECIFICATIONS

Initial Contact Resistance (Maz.) ....0.200 Ohms
Typical Operate Time............................1.0 ms
Shock w/o False Operation....................10 G's 11ms, 1/2 sine wave
Operate & Storage Temp.......................-40°C to +105°C
Operation Life (Typical).........................50,000,000 @ 5Vdc, 10ma
5,000,000 @ 120Vdc, 75ma.

HERMETIC SWITCH, INC.

Proximity Sensors

Hermetic Switch, Inc. manufactures a variety of two part magnetic proximity sensors (sensor and actuator). All sensors feature hermetically sealed reed switch contacts that can survive harsh environments. Specially selected epoxy potting materials and rugged plastic cases withstand the impacts and forces of the real world.

Many models are listed with Underwriters Laboratories, verifying that they have passed rigorous testing. Custom sensors not shown in our catalog may be required for your application. Consult factory for complete operate data, catalogs, and engineering assistance.

Humphrey:

a tradition of excellence in guidance and control instrumentation and components.

Aerospace

Humphrey is recognized by military and government agencies both in the U.S. and abroad as a leading supplier of components for aerospace and weapon system applications including guidance and control for RPV's, target and reconnaissance drones and autopilots. The company is fully qualified in accordance with MIL specifications and NASA requirements.

General Industry

Humphrey is an established supplier of products ranging from miniature precision components to sophisticated, highly accurate measuring and control instruments used on a wide variety of commercial products and robotic systems. Humphrey's dynamic testing systems provide data for evaluating automotive, seagoing and ground vehicles under actual operating conditions.

Oceanographic

Humphrey manufactures an extensive line of special purpose instruments used in hundreds of oceanographic applications between the surface and the seabed. The company has developed a reputation for fast response on special systems and components including such new developments as underwater attitude sensors, shipboard sonar stabilizing equipment, and towed underwater sonar vehicle autopilots.

Mining/Petroleum

Humphrey vertical and horizontal directional surveying systems provide continuous or selected downhole readings to 20,000' and more. Data includes slant angle, slant angle bearing, azimuth, time and cable depth. All information is displayed on the surface readout and a permanent record is provided by computer. Humphrey directional surveying systems reduce field surveying time and improve accuracy.

Model Variations

The standard models described herein are typical only. Numerous variations are available or modifications can be readily made. Custom designs and engineering offered.

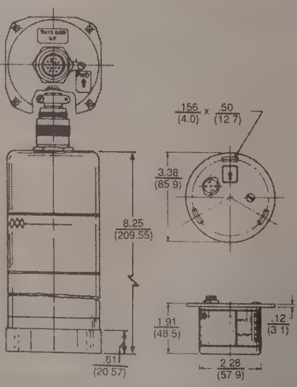
directional gyros

DG11-0105-1

Directional gyro with synchro output on outer gimbal and flux gate north seeking system. AC motor. Power 115V-400 Hz and 26V-400 Hz. Weight approx. 2.5 lbs. Size approx. 8.25" high x 3.77" dia. May be used with standard 3-inch GRO6 repeater or 5-inch GRO3 repeater.

SPECIFICATIONS

MECHANICAL FREEDOM	
Inner gimbal	±85° minimum
Outer gimbal	360° continuous
Accuracy (with flux detector)	±1.5°
Input motor	115V ±400Hz @ 65 MA
Erection system	26V ±400Hz @ 50 MA
AMPLIFIER (supplied from 26V input)	
Voltage	28 VDC
Power	4 watts approximately
OUTPUT SYNCHRO OUTER GIMBAL	
Input voltage	400 Hz, 26 volts
Output voltage	11.8 volts
Accuracy	±0.5°
Slaving rate	0.5°/minimum
Insulation resistance	50 megohms min. with 50 VDC applied
Service life	500 hours minimum
ENVIRONMENTAL CONDITIONS	
Altitude	–1000 feet to 40,000 feet
Temperature	–55°C to +70°C
Vibration	0.036 DA or 5G, whichever is limiting, 5 to 500 Hz
Shock	15G. 11 MS
Humidity	0 to 95% relative humidity
Weight	2.5 pounds



magnetic flux detectors

FD01-0101-1

Flux detector for use with directional gyro or servo compass to provide continuous north reference. Uses standard flux gate windings suspended in pendulus position. Freedom to ±45° pitch and roll. Operates on 14 mA with frequency of 400 Hz. Output is 140 mV P-P, 800 Hz when connected to standard synchro system. Size 2.28" dia. (excluding mounting flange) x 1.91" high, Weight 5.5 oz.

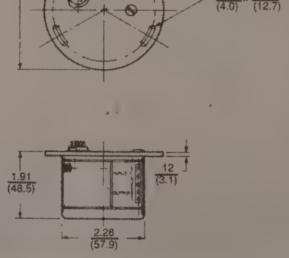
SPECIFICATIONS

INPUT	
Voltage	20V P-P 400-560 Hz
Current	15 MA RMS
OUTPUT	
Voltage	140 MV P-P
Frequency	800 Hz (400 Hz input)
OUTPUT SYSTEM	(Consisting of a synchro connected to flux gate in a standard configuration)
Voltage	Null 60 MV P-P Peak 350 MV P-P
Frequency	800 Hz (400 Hz input)

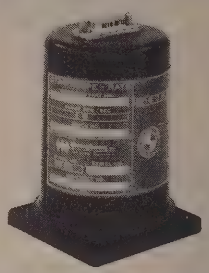
REMARKS

FD01-0101-1 is designed for use in conjunction with the DG11 series slaved directional gyro.

Instrument manufactured in accordance with TSO $C6_{c1}$ dated 1 April 1959.



rate gyros

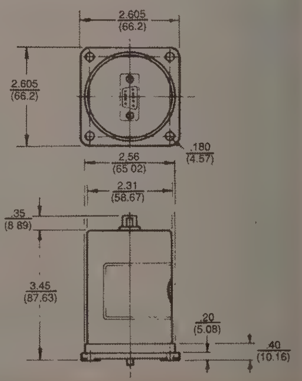


RG51-0106-1 (DC)

Precision DC rate gyroscope designed specifically for supersonic target drones, but also ideal for aircraft autopilot and instrumentation applications. A standard production unit with a proven history of reliability. Available in a wide selection of rate ranges, damping characteristics, and potentiometer configurations; also AC versions.

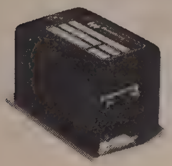
SPECIFICATIONS

Range	±40°/sec.
Natural frequency	10 Hz approx.
POTENTIOMETER	
Resistance	1,000 ohms ±10%
Power Dissipation	0.5 watts maximum
Accuracy	±1.0% of F.S. at zero rate increasing to ±2.5% at maximum rate
Equivalent contact resistance	200 ohms maximum
Damping factor	0.5 ±0.2
MOTOR	
Voltage	28 VDC, ±10%
Starting time	20 seconds nominal
Service life	500 hours
ENVIRONMENTAL CONDITIONS	
Temperature	–65°F to 165°F
Shock	50 G, 11 ±1 MS duration
Acceleration	20 G steady state
Vibration	0.06 D.A. or 10 G, whichever is limiting, 20 to 500 Hz
Weight	14 ounces approx.



Humphrey Inc.
ELECTRO-MECHANICAL INSTRUMENTS
9212 Balboa Ave., San Diego, CA 92123 / (619) 565-6631 / Fax: (619) 565-6873

rate gyros

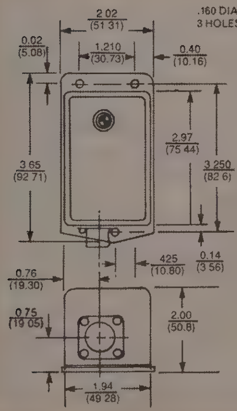


RG78-0300 Series

Precision DC-in DC-out sub-miniature rate gyroscope designed for the most demanding rate control requirements, such as fire control systems, aircraft control, antenna stabilization and missile systems. Fluid filled for precise damping and shock protection. Available in a wide range of rates; and AC-in DC-out versions.

SPECIFICATIONS

Rate range	40 to 1000°/sec
Natural frequency	20 to 140 Hz depending on rate range
Damping ratio	0.3 to 1.2
Output, full scale range	1.0 to 6.0 VDC
LINEARITY	
To half scale	0.5%
To full scale	2.0%
Hysteresis	0.2% of full scale
Threshold	0.03 deg/sec max
Zero offset	0.1% of full scale
Input voltage	24 to 30 VDC
ENVIRONMENTAL	
Temperature	–40°C to 70°C
Shock	100G, 1 MS
Acceleration	60G
Vibration	0.06 G²/Hz, 20-2000 Hz
Weight	12±2 Oz.



vertical gyros

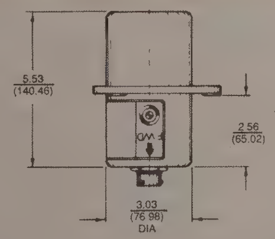
VG24-0636-1

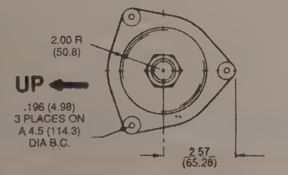
Compact, miniature, AC gyro with potentiometer pickoffs for pitch and roll outputs. Reinforced stainless steel journals for high vibration and shock environments. Low drift. Fully qualified to MIL specifications.

SPECIFICATIONS

Mechanical limits	±80° min. on roll axis. ±60° min. on pitch axis.
OUTPUT	
Pickoff	Center tapped conductive plastic potentiometer
Electrical displacement	±45°
Resistance	10,000 ±5% ohms
Linearity	±1% of full range
115VAC 400 Hz, single phase spin motor (Pin A) and 26VAC fast erection (Pin C)	
Current-starting	360 MA nom at Pin B (AC common)
Current-running	290 MA nom at Pin B (AC common)
115VAC 400 Hz, single phase spin motor (Pin A) and 26VAC normal erection (Pins D/E)	
Current-starting	220 MA max at Pin B common
Current-running	160 MA max at Pin B common
Vertical accuracy	±0.5° of true vertical
Drift	With erection system inoperative, free drift independent of Earth's rotation shall be ±7.5° maximum after 15 minutes of reversing SCORSBY action at 6 cycles per minute.
Temperature	–65°F to +160°F
Shock (non-operating)	40 G, 20 MS; all axes, 35G, 17 MS; vertical negative axis
Weight	2.3 pounds maximum

Note: Other electrical displacements available





vertical stabilized accelerometers

SA09-0601-1

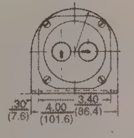
A small precision vertical gyroscope with three sensitive servo-type accelerometers mounted on its inner gimbal. Provides a new combination instrument with five outputs: pitch and roll angles in reference to vertical, and three accelerations vectors. Inner and outer gimbal pickoffs are precision wire-wound potentiometers that provide the pitch and roll outputs. System measures acceleration as small as .001 G. Design simplicity for maximum reliability.

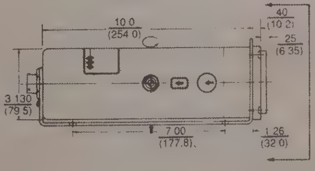
SPECIFICATIONS

See VG24 vertical gyro for typical platform gyro specifications.

Platform Power

ACCELEROMETERS	
LATERAL & FORE & AFT	
Range	±1.0G
Output	±5 VDC
VERTICAL	
Range	±2G
Output	±5 VDC





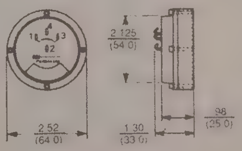
pendulums

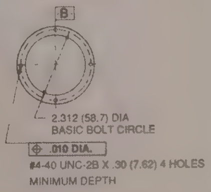
CP17-0601-1

An economical standard pendulum available from stock that provides unequaled precision and performance for its cost. Potentiometric output with resistances available from 500 to 20K ohms. Center or multiple taps. Viscous damping. 0.2° resolution. Ranges from ±5° to ±175°. Service life over 10^6 cycles.

SPECIFICATIONS

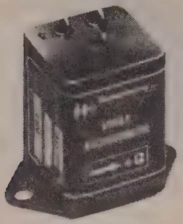
Range	±45°
Potentiometer resistance	2,000 ±5% ohms
Power dissipation	0.5 watt at +130°F
Center tap	±0.25% of total electrical travel from theoretical electrical center
Accuracy	±1.0% of full scale
Damping	.1 to .5 damping ratio from +20°F to +130°F
Natural frequency	3.2 Hz
Noise	100 ohms maximum
Insulation resistance 30 megohms at 500 VDC	
Vibration	.060 in D.A., 10 to 30Hz 3 G, 30 to 100 Hz
Shock	100 G, 10 MS
Temperature	
–Storage	–65°F to +160°F
–Operating	+20–°F to +130°F
Sealing	No leakage at 24 in. of HG vacuum
Weight	6 ounces maximum





Humphrey Inc.
ELECTRO-MECHANICAL INSTRUMENTS
9212 Balboa Ave., San Diego, CA 92123 / (619) 565-6631 / Fax: (619) 565-6873

linear accelerometers

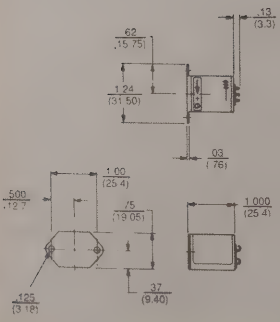


LA45-0101-1

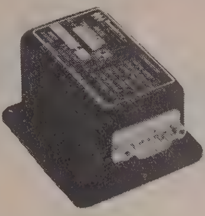
Smallest potentiometer pickoff accelerometer available anywhere, this sub-miniature production instrument is offered in full scale ranges of 2 G to 300 G. Reliability has been proven with production applications in a variety of missile systems. It has a hermetically sealed steel case and a precision 5,000 ohm potentiometer output. Normally oil damped for rugged simplicity. Dry gas damping available for wide temperature ranges.

SPECIFICATIONS

Range	±10 G
Undamped natural frequency	46 Hz
Damping factor	0.4 to 0.7 of critical (oil damped)
Output potentiometer	
Resistance	5,000 ohms ±5%
Resolution	150 turns approximately
Accuracy	±1.5% of full scale
Insulation resistance	50 megohms minimum between any terminal and case when measured with 100 VDC applied potential at standard atmospheric conditions
Threshold	0.8% of full excursion
Sealing	Hermetic
Weight	1 ounce approximately



angular rate sensors

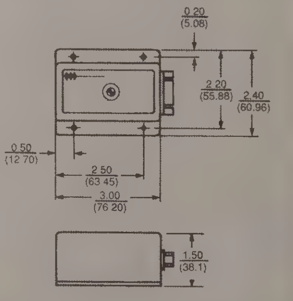


RT15-0102-1

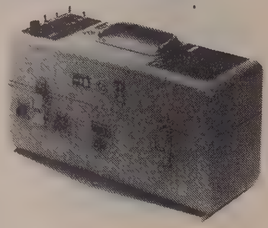
Single-axis transducer. The RT15 series is physically smaller and lighter than the RT03 series transducers. The RT15 series is functionally and operationally equivalent to the larger transducers. Note that a two-axis unit, model RT10-0500 series, is similar to, but slightly larger than, the RT15-series.

SPECIFICATIONS

Rate range	±100°/second
Natural frequency	25 Hz minimum
Damping	0.7 typical
Output	±2.5 VDC ±10% full scale
Linearity	1% of full scale
Resolution	infinite
Hysteresis	none
Null signals	±50 millivolts
Threshold	Virtually zero
Noise	10 millivolts RMS
Input power	±15 VDC at 100 milliamps
Time to full operation	40 milliseconds
Altitude	unlimited
Shock	100 G
Temperature	–55 to +85°C
Life	5 years
Weight	9 ounces



dynamic test systems



CF77-0101-1

Small, lightweight dynamic test system with a self contained power supply used by test facilities and manufacturers of automobiles, aircraft, land and sea vehicles for conducting dynamic measurements of vehicle performance. The system measures 3-axis acceleration, 3-axis position and 3-axis angular rate. A vertical gyro gives pitch and roll outputs and a cageable directional gyro measures yaw. Subminiature accelerometers provide a wide range of sensitivity, and are stabilized in the pitch and roll axes by the vertical gyro. Size is 6.18 (156.97)W x 15.50 (419.1)L x 8.38 (212.9)H plus mounting provisions. Available in 28 VDC or 12 VDC input models. Weight 29 pounds.

SPECIFICATIONS

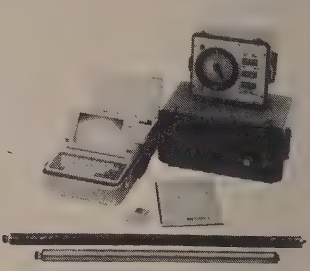
VERTICAL GYRO	
OUTPUT ANGLE	
Pitch	±45° ±2°
Roll	±178° ±2
OUTPUT VOLTAGE	
Pitch	±5 VDC
Roll	±5 VDC
ERECTION SYSTEM	
Time to erect (switch to erect position)	5 minutes to within 0.5° of true vertical from a 25° offset.
Erection accuracy	±0.5 of true vertical
DIRECTIONAL GYRO	
OUTPUT ANGLE Yaw	±178° ±2°
MECHANICAL ANGLE	
Yaw	360° continuous
Pitch	±47° maximum
OUTPUT VOLTAGE	
Yaw	±5 VDC
ACCELEROMETERS RANGE	
Fore-aft	±1.0G
Lateral	±1.0G
Vertical	±3.0G (+2G, –4G as mounted in the system)
OUTPUT	
Fore-aft	±4.90 to ±5.10 VDC/G
Lateral	±4.90 to ±5.10 VDC/G
Vertical	±1.57 to ±1.77 VDC/G
Resolution and threshold	0.005% of full range
Linearity hysteresis and repeat	0.020G
Output Impedance	1000 ohms
RATE GYROS	
Range all axes	±50°/sec
Resolution	Infinite
Threshold	0.010°/sec
Accuracy	±0.5% of full scale to half scale, ±1.0% half to full scale
OUTPUT	
All axes	±2.5 VDC ±0.10 VDC
Output impedance	1000 ohms
Sealing	Pressure sealed, water tight
Service life	1000 hrs minimum

special purpose instruments

Drilled Hole Surveying Equipment
For Oil Well, Mining and Civil Engineering Applications

UltimaxSURVEYOR™ (SRG)

UltimaxSURVEYOR™ (SRG) single wireline multiplexing system consisting of a gyro probe, control unit, and unified computer for use either as a gyro survey system or downhole orientation system. Real time computer capability provides immediate survey data for X-Y coordinates and profile of borehole.



DrillDIRECTOR™

This magnetic sensing instrument provides relative bearing and inclination angle information from a typical drill string in either a vertical or horizontal drilling mode. Probe measurements are sent to the surface on a continuous basis. The data along with cable length, is routed through a surface control unit and displayed on a separate computer console. The IBM compatible laptop computer is used to record the measurements and calculate the borehole trajectory. Slant angle, slant angle bearing, and tool face are displayed on a remote indicator console for use by the driller. A single conductor wireline provides power to the probe and is used for data transmission to the surface. The system includes a downhole probe, surface control unit, cable length measuring device, driller's remote display, computer/printer console, and optional photo verification package.

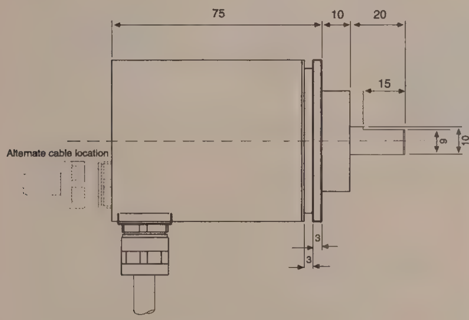
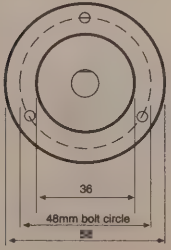
GM 400 face
GM 401 synchro

25 Bit Multi-turn (8192 increments x 4096 turns)

New patented technology!





Gray or Binary code
Supply: 5VDC,10-30VDC
Low power consumption
50mA at 24VDC
120mA at 5VDC
Temp. -10°C-+60°C
Frequency > 200kHz
Max rotational speed:
6000 rpm
1500 electronic
Protection meets IP 67
with 1 m cable

Also available GK400 serial to parrallel InterBus-S coupler.

No mechanical gearing!
Synchronous Serial Interface reduces wiring and allows for longer transmissions.
3 LED technology provides reliable data output.
Unique electronic zero point setting simplifies set-up.
Compact housing design.

Price is only $700.00

LEM DynAmp, Inc.

(formerly a division of Halmar Electronics, Inc.)

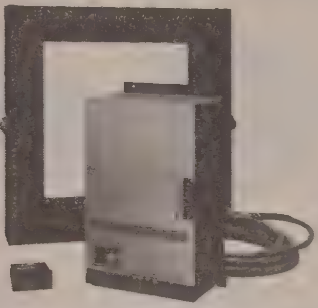
3735 Gantz Rd.
Grove City, OH 43123-0489

Current Metering Systems

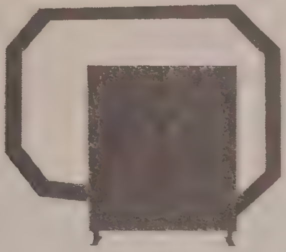
Highest Accuracy Available -0.1%, Proven Reliability, Many Standard Models to Select From...

You can specify current metering from any of 56 standard models from LEM DynAmp, Inc.:

- **Ranges from 4000 to 500,000 Amperes Full Scale**
- **Precision measurement of DC, AC and Bi-Directional currents**
- **Single models or large totalized systems (many individual sensors available)**



Model CM7017 accurately measures dc currents to 40,000 Amps Full Scale



Model CM7150 with 150" Measuring Head and Metering Unit measures up to 350,000 Amperes with 0.1% accuracy.

NEW Family of SIGNAL ISOLATORS features VERSATILITY

Model MVI

Model MVI-RD & MVI-RA

- Highest Isolation Voltage: ±2500 V dc or ac peak
- Highest Accuracy: ±0.1% max.
- Fast Response Time: DC to 4kHz
- Widest Input Scaling Ranges: Input Voltage 100 mV to 1500 V F.S. or Input Current 1 mA to 5 A F.S.
- Versatile Outputs: Voltage Output and Current Output (Customer Specified)
- Powered by AC or DC
- Panel Mount or DIN Rail Mount

Voltage and Current Isolation on a single point basis or full blown data acquisition systems.

Portable Clamp-On Ammeters

Digital, solid-state design works in corrosive atmospheres, wide temperature ranges, high magnetic fields. DC current measurements from 0-100kA @ ±2.5% accuracy. Battery-powered. Optional unit measures ac rms current. Many size sensors available.

Also, Free information about:

- **Integrators & Shunts**

Power Rectifier Analyzer

Safe:

- Install sensors on de-energized rectifier
- Measurements made remotely under load
- Non-contact measurement

Convenient...

- Fast, easy installation with split-apart sensors
- Portable or permanent installations
- Readout on PC or Laptop computers
- Buy or rent

Customer Benefits...

- Locate poor or open conduction paths
- 3% measure of parallel path current sharing
- Troubleshoot and failure prevention
- Certify new rectifier startup
- Improve Power Rectifier Efficiencies

LEM U.S.A., INC.
PIONEERING POWER ELECTRONICS

The Successful Solution for Power Current Measurement

A perfect feed-back system between power current and electronic control

Split Core Transducer
LEM U.S.A. INC
Series LTA

- Measures DC, AC and pulse currents, bandwidth from DC to 150kHz.
- High degree of accuracy: 0.2% to 1% typical
- Currents to 500,000 amperes
- Voltages to 6,400 volts
- Instantaneous or True RMS outputs
- Open and closed loop systems
- Excellent Linearity: less than 0.1% typical
- Accuracy, stability and linearity guaranteed for life
- Reliable in hostile environments
- Rapid Response time: better than 1µsecond
- Wide range of current measurement models

① Voltage Transducers are wired in parallel with the load. For a given primary system voltage (V_p), a resistor is wired in series on the primary side of the transducer, either externally or internally, to provide a proportional measuring current (I_p)

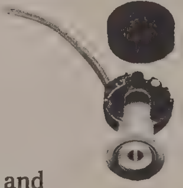
Ledex Encoders

Simplify Encoder Selection with Ledex In-stock Models

Incremental Encoders

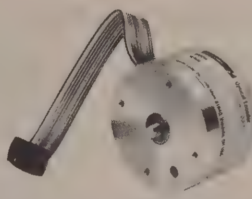
Modular



• Low cost • Install directly on DC servo and stepper motors • Resolution to 2,500 pulses per revolution

Ideal for closed-loop servo and stepper motor systems where low cost, small size, long-term dependability and performance are significant factors in encoder selection.

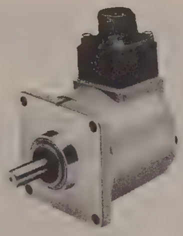
Instrument Grade



- Face or servo mount
- Compact, self-contained shaft encoder
- Resolutions up to 10,000 pulses per revolution

Four series of instrument grade encoders are available with an extensive selection of resolutions, voltage levels and output formats.

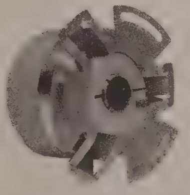
Heavy Duty



- Industrial grade
- Available with a NEMA 4 rating • Flange or servo mount • Integrally coupled model
- Resolutions up to 10,000 pulses/revolution

Rugged encoders designed for the harshest environments where high temperatures, electrical noise, vibration and fluid contaminants are commonly found.

Hollow Shaft

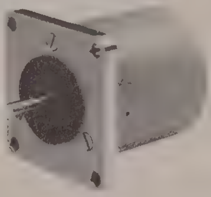


• Resolutions up to 2,500 pulses/revolution • Self-contained, ready-to-mount • 3/8" or 1/2" bore • 1.6" length including flex-mount, 2.0" O.D.

Hollow shaft encoders with unique flex-mount eliminates the special mounting flanges and flexible couplings required with shaft type encoders.

Absolute Encoders

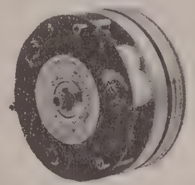
Single Turn

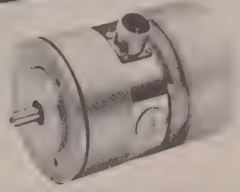


- Output codes: gray, binary, BCD
- Inch or metric mounts: face, servo, or square flange
- 360, 512, 1024, 2048, 4096, and 8192 increments per turn.

State-of-the-art technology with binary, BCD and Gray code formats. Glass code disc for reliability and precision. Three series of encoders.

Multi-Turn

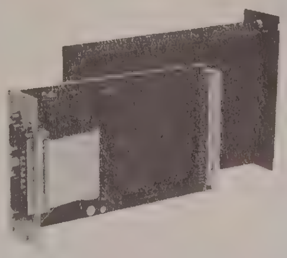




- Modular absolute encoder system
- Synchronous serial interface • Resolution 24 bit Gray code: 4,096 increments per turn, 4,096 turns • Complete self-contained unit or basic encoder

A modular encoder system designed to meet 98% of the multi-turn absolute encoder applications. Designed to stand alone or for direct motor mounting. High quality, clock-like precision.

Serial-to-Parallel Converter Module



- Provides parallel data in the programmable output code groups of Gray, binary or BCD
- Easily programmed
- Non-volatile storage

These modules convert serial information from the multi-turn absolute encoder to parallel data.

- **Use your Visa or Mastercard to save time**
- **Same day shipment on stock models available**
- **Two-week prototyping service for custom designs**

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

MICRO SWITCH

Solid State Hall Sensors

Hall effect sensors respond to a magnetic field, or—in the case of Hall vane sensors—to the interruption of a magnetic field. Hall sensors are not rate sensitive. They operate at extremely high speed and include signal conditioning. They offer high reliability, long life, and compatibility with microprocessors and other electronic circuitry.

Sensors are used in:

- Ignition systems
- Brushless DC motors
- Utility meters
- Water softeners
- Gasoline pumps
- Welding equipment
- Balance scales
- Interlocks
- Flowmeters
- Magnetic card readers
- Vending machines
- Home appliances
- Computer equipment
- Medical instruments
- Copy machines
- Laboratory equipment

PIEZORESISTIVE PRESSURE SENSORS

Piezoresistive pressure sensors convert air or liquid pressure to an analog signal. Overall, MICRO SWITCH pressure sensors are small, low cost and reliable. They feature excellent repeatability, high accuracy, and reliability under varying environmental conditions. In addition, they feature highly consistent operating characteristics from one sensor to the next and interchangeability without recalibration. Low cost to keep your systems costs down. Request Catalog 15.

Electronic components and piezo ceramics. Over 50 years of innovation.

Design Engineers can rely on us to produce a complete line of standard and custom piezo ceramic shapes for a variety of commercial, industrial and military applications.

We've been making innovations in electronic components and piezo ceramics since 1938. And we're still doing it. Take a look at some of our accomplishments in modern ceramic shapes. We've developed discs, blocks, rings, plates, cylinders, tubes and many custom shapes for sonar use, as ultrasonic, hydrophonic, and as torpedo transducers, and in accelerometers and high voltage generators.

Our PZT®-4 is recommended for use in high voltage generators and high power acoustic radiating transducers because of its ability to withstand high levels of electrical excitation and mechanical stress.

PZT-8 was developed to provide a material with the ultimate in power handling capability. This composition has reduced piezoelectric activity at low to moderate excitation levels.

PZT-5A is recommended for use in receiver or generator type transducers such as hydrophones, fuses, accelerometers, and vibration pickups in general, etc., because of its high sensitivity, permittivity and time stability

PZT-5H is better suited to low frequency applications because of increased permittivity, accompanied by a reduced Curie point.

The family of PZT-5 materials may also serve in very low power motor-type transducers because of high motion sensitivity.

We've also developed lead metaniobate materials, PMN-1 and PMN-2, for diverse applications that feature higher Curie points. And, we are the originators of Unimorphs and Bimorphs to serve as compact transducers for audio tones.

The above compositions are used in such applications as ultrasonic cleaners, kidney dialysis equipment, heart pacemakers, ink jets, ultrasound scanners, gyros, sonobuoys, automatic erasers and a variety of noisemakers. Also in laser positioning and as motion sensors.

Innovation is also our "hallmark" in bandpass filters, ladder filters, and ceramic resonators. We offer light weight, stable, fixed tuned, miniature ceramic filters and resonators with varieties for almost any kind of communications equipment: consumer—commercial—military.

And don't overlook what we've done in piezo igniters for gas fired equipment of all types. Our igniters are original equipment in many makes of barbeque grills, as well as in furnaces, water heaters and camping lanterns. Our igniters are the industry standard worldwide.

So if you're working with piezo ceramics, in alarms, speakers, lasers, sonar, ink jet printing data processing, communications, telephone development, gyros, or hydrophones, pacemakers or gas-fired equipment, give us a call and put our 50 plus years of innovation and experience to work.

ultrasonic ceramic microphones

MURATA ERIE NORTH AMERICA

MA40A5

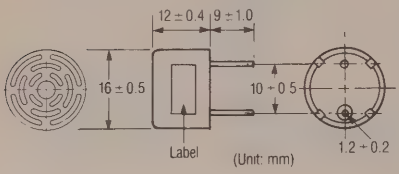
FEATURES

- High sensitivity, small sized and light weight
- Excellent in humidity resistance and fine temperature characteristics
- Excellent vibration and shock resistance
- Large operation range

APPLICATIONS

- Remote control of television, air conditioner or other electronic equipment
- Sensor of burglar alarm system, range finder, etc.
- Sensor for counter

DIMENSIONS



SPECIFICATIONS

		MA40A5R/S
Nominal Frequency	(KHz)	40
Sensitivity	(dB)	– 67 min.
Sound Pressure	(dB)	112 min.
Directivity	(deg)	50°
Capacitance	(pF)	2000
Allowable Input Voltage	(Vrms)	20
Operating Temp. Range	(°C)	– 20 to + 85
Detectable Range	(m)	0.2 to 6
Resolution	(mm)	9

*Sensitivity: 0 dB = 1 V/µ Bar, Sound Pressured at 30 cm, 0 dB = 2×10^{-4} µ Bar

MA40S2R/S

FEATURES

- Subminiature type
- High sensitivity and excellent temperature characteristics
- Excellent humidity resistance, vibration resistance and shock resistance

APPLICATIONS

- Range finder, adjacent switch or burglar alarm system
- Remote control of air conditioner or other electronic equipment
- Sensor for counter or human body

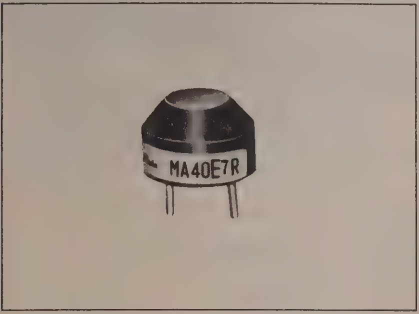
ultrasonic ceramic microphones



MA40E7R/S

FEATURES

- Can be used outdoors because of its waterproof structure
- Excellent ambient temperature
- High sensitivity and excellent temperature characteristics

APPLICATIONS

- Automobile back up sensors
- Rear obstructives detection for cars
- Distance measurement or object detection outdoors
- Water level or liquid level memter

DIMENSIONS

Optical Encoders

Incremental/Absolute

OAKGRIGSBY

Engineered, manufactured, and tested for superior performance OakGrigsby's Series OE1, 800, and 1000 optical encoders offer unmatched reliability and long life. Advanced optical switching technology eliminates metal contacts and related metal fatigue...the result is superior accuracy and extended life.

OE1 Series

Electrical Specifications

Operating Voltage	5 Vdc ±0.25 Vdc
Switching Current	30 mA max.
Power Consumption	@ 5 Vdc; 150 mW max.
Logic Low Minimum	0.5V
Logic High Minimum	3.8V
Life Rating	5 million cycles
Operating Temperature	-40°C to 125°C
Storage Temperature	-55°C to 150°C
Humidity	85% RH @ 40°C, 240 hrs.

Mechanical Specifications

Shaft Rotation	Continuous
Operating Speed	100 RPM max.
Axial Force	15 lb. min. push/pull force

Materials and Finishes

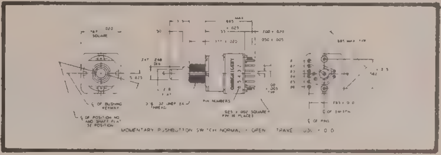
Housing	Thermoplastic
Bushing	Zinc casting, cadmium plate
Shaft	Stainless steel
PC Boards	NEMA Grade FR-4
Board Terminals	Brass tinned
Mounting Hardware	One cadmium plated nut and lockwasher supplied with each

Options

- 16, 24, 32, 64, 128 Electrical Positions
- Bushing Length/Shaft Diameter
- Panel Seal
- Binary/Gray Code
- Cable/PC Terminals

Pushbutton Switch Specifications

Rating @ 25 Vdc	10 mA resistive
Contact Resistance	End of Life-100 milliohms
Voltage Breakdown	250 Vac
Life Rating	3 million cycles
Contact Bounce	Less than: 4 milliseconds at make, 10 milliseconds at break
Operating Force	300 grams standard



800 Series

Electrical Specifications

Operating Voltage	5 Vdc ±0.5 Vdc
Switch Current	30 mA max.
Output	TTL and CMOS compatible
Life Rating	5 million-thermoplastic shaft 10 million-stainless steel shaft 100 million-ball bearing construction
Operating Temp.	-40°C to 105°C
Storage Temp.	-55°C to 150°C
Humidity	85% RH @ 40°C, 240 hrs.

Mechanical Specifications

Shaft Rotation	Continuous
Oper. Speed	200 RPM max.- Thermoplastic and stainless steel shaft 2000 RPM max.- Ball bearing construction
Axial Force	15 lb. min. push/pull force

Materials and Finishes

Housing	Thermoplastic
Bushing	Aluminum/brass, nickel plated options
Shaft	Thermoplastic/stainless steel options
PC Boards	NEMA Grade FR-4
Board Terminals	Brass tinned
Mounting Hardware	One cadmium plated nut and lockwasher supplied with each

Options

- 16, 24, 32, 64, 100, 120, and 128 Electrical Positions
- Bushing Lengths/Shaft Diameter and Lengths
- Panel Seal
- Dual Construction - Two sectioned, with concentric shafts
- Cable/PC Terminals

1000 Series

Electrical Specifications

Operating Voltage	5 Vdc ±0.5 Vdc
Switching Current	30 mA max.
Output	Open Collector TTL and CMOS compatible
Life Rating	1 million cycles (detented)
Operating Temp.	-40°C to 125°C
Storage Temp.	-55°C to 150°C
Humidity	85% RH @ 40°C, 240 hrs.

Mechanical Specifications

Shaft Rotation	Continuous (stops available)
Oper. Speed	100 RPM max. - standard 2000 RPM max. - ball bearing
Axial Force	15 lb. min. push/pull force

Materials and Finishes

Housing	Thermoplastic
Bushing	Brass/Nickel plate
Shaft	Stainless steel
PC Boards	NEMA Grade FR-4
Board Terminals	Brass tinned
Mounting Hardware	One cadmium plated nut and lockwasher supplied with each

Options

- Binary/Gray Code up to 5 Bit
- Multidecks (3 maximum)
- Bushing/Shaft Diameter and Lengths
- Concentric Shafts
- Custom Codes Available

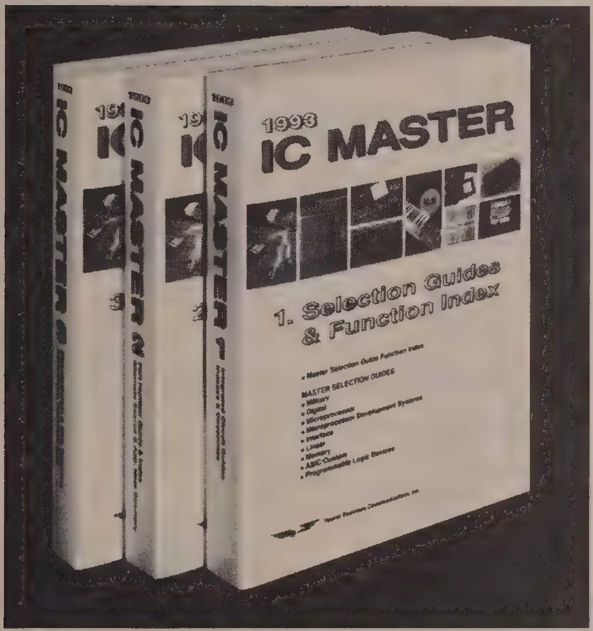
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take $10 off the subscription price!

IC MASTER

WATT/WATTHOUR TRANSDUCERS

AC WATT TRANSDUCER

MODEL **PC5**

SINGLE PHASE 50/60 HERTZ

FEATURES

- Accurate regardless of phase, voltage unbalance, current unbalance, or power factor.
- Output is proportional to true power delivered to a load; P=EI(COS θ). Provides bi-directional operation.
- **Calibrated with standards traceable to NIST.**

APPLICATIONS

- Equipment power consumption
- For use with SCR controls, chopped waveforms, or where harmonic components exist.
- Standard outputs provide signal for interface with meters, recorders, or data acquisition equipment.

MODEL PC5 SPECIFICATIONS

INPUT

VOLTAGE: See tables
CURRENT: See tables
FREQUENCY RANGE: 48 to 70 Hz.
RESPONSE (Transient 90%):
  With integral sensors: Less than 100 microSeconds
  With current transformers W,X, and Y: 1mS
BURDEN:
  Voltage: 1.25VA
  Current: 1.25VA
  Optional output amplifier: 2 Watts
CURRENT OVERLOAD:
  2 times full scale (cont.); 6 times full scale (10 Sec.)
DIELECTRIC TEST (Input/Output/Case): 1500VAC (RMS)
SURGE: Withstands IEEE SWC test

OUTPUT

OUTPUT RIPPLE: Less than 1%
OUTPUT LOADING (OHMS):
  Option: A-B: 0-10K
  C-D: Greater than 2K
  E-E2: 0-1.5K
  CX5-X5: Greater than 2K
RESPONSE TIME (90%): 250 mS
FIELD ADJUSTABLE CAL.: +/- 10%

ACCURACY +/- 0.5%

Includes combined effects of power factor, linearity, repeatability, and current sensor.

TEMPERATURE EFFECT (-10° to 60°C):
  +/- 1.0% of reading
  +/- 0.1% F.S. output

WATTHOUR TRANSDUCER

OSI WATTHOUR TRANSDUCER *MODEL* WL45R

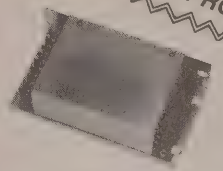
FEATURES

- Low cost.
- Small package.
- Three phase three wire or three phase four wire measurement.

APPLICATIONS

- Substation metering.
- Industrial power monitoring.
- Load profiling.
- Revenue metering.

NEW PRODUCT



DESCRIPTION

The WL series transducer is a low cost watthour transducer utilizing electronic multiplication of line current and phase voltage to produce true power. Time integration results in a contact closure for each 5 watthours of energy transferred to the load.

Low cost and small size are accomplished by eliminating expensive potential transformers. The input/output isolation normally provided by the potential transformers is achieved by the dry contact output relay. This technique requires the use of isolating current transformers for current sensing.

SPECIFICATIONS

INPUTS

VOLTAGE: 120/208 & 277/480VAC

PHASE: 3 Phase 3 Wire Or 3 Phase 4 Wire

RANGE: ±15%

*CURRENT: (Non-Isolated) 5 Amp

BURDEN: 2.5 VA

POWER FACTOR: 0.5 Lead To 0.5 Lag

OUTPUT

RELAY: Dry Contact, 120 V, 0.3 A, 10 VA MAX.

CLOSURE DURATION: 250 Milliseconds

ISOLATION: INPUT/OUTPUT/CASE 1500 VAC

ACCURACY ±0.5% F.S.

POWER REQUIREMENTS

INSTRUMENT POWER: 208/240/480V, 50/60Hz, 2.5 Watts

TEMPERATURE EFFECTS

(–20°C To +60°C) ±0.03%/°C

OUTPUT CONTACT CLOSURE RATE

The WL watthour transducer is calibrated to provide a contact closure for 5 watthours of energy. A current transformer ratio of unity is used in calibration. In practice, each contact closure will represent 5 watthours times the current transformer ratio. For example, the use of 100:5 ampere current transformers would cause each contact closure to represent 100 watthours. With 200:5 transformers each closure would represent 200 watthours.

*CAUTION

To prevent damage to power lines and the watthour transducer NEVER connect the current inputs directly, **always use current transformers** rated for 600VAC at 5 ampere secondary current.

WATT/POWER TRANSDUCER

AC WATT/POWER FACTOR/VOLT-AMPERE TRANSDUCER *MODEL* PC20

FEATURES

- 0.25% Accuracy for true power measurement on sinusoidal or distorted waveforms.
- 0.25% Accuracy for apparent power (volt-ampere). Separate rms values for voltage and current are computed and then the product is determined to insure high accuracy.
- 0.50% Accuracy for power factor is derived from the ratio of true power to apparent power. This provides accurate results for sinusoidal, distorted or SCR controlled wave forms.
- Three separate outputs are provided -- one each for true power (watts), apparent power (volt-amperes) and power factor. The minimum output, zero or 4mA, occurs at zero input for watts or VA and zero power factor. Maximum output listed occurs at full scale watts or VA and at unity power factor. The scale is linear between these end points.

APPLICATIONS

- Building monitoring to attain efficient use of electrical energy.
- Process monitoring to maintain consistent product quality.
- Equipment monitoring to determine and/or maintain operating efficiency.
- Where SCR controlled, chopped, or otherwise distorted waveforms causes sinusoidal-based instrumentation to provide erroneous information.
- Wide frequency range --- 50 to 400Hz.

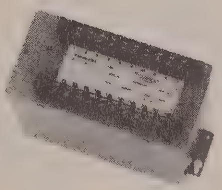
Highlighted 0 to 5.0A models can be used with customer's existing current transformers, or **OSI** current transformers shown on EEM page **B**•1991.

Voltage specification for three phase four wire are "Line To Neutral".

***Denotes Self-powered Model - Input Voltage ranges limited as follows:**

85V to 135V for 150V Models
200V to 280V for 300V Models
380V to 550V for 600V Models

All others require a separate 120VAC (85 to 135V) instrument power.



ORDERING INFORMATION

Example: Three-phase, three-wire, 240V 5A,
0 to 10V output, proportional to 0 to 2000W (VA),
with separate 120VAC instrument power.
PC20 - 005D

WATT TRANSDUCERS

OSI VARIABLE FREQUENCY WATT TRANSDUCER *MODEL* P

VARIABLE FREQUENCY (5 TO 500 HERTZ)

FEATURES
- Accurate from 5 to 500 Hz., **Factory calibrated.**
- Available in both single phase and three phase configurations.
- Available with split-core current sensors.

APPLICATIONS
- Accurate monitoring of power that contains dc and non-sinusoidal AC components.
- Ideal for use in phase angle firing circuits or frequency synthesizers.
- Bi-directional output..

Example: 120V, 100A input with split-core sensor and +/-5Vdc output.
PC8-003-01-X5-S

MODEL PC8 SPECIFICATIONS

INPUT

VOLTAGE: See tables
CURRENT: See tables
FREQUENCY RANGE: dc to 400 Hz.
POWER FACTOR: Any
RESPONSE (Transient 90%): Less than 50 microSeconds
BURDEN (OHMS):
  Voltage:
    Less than 50V: Greater than 100K.
    Greater than 50V: Greater than 1M.
OVERLOAD:
  Voltage: 2 times full scale.
  Current:
    Using integral sensor: 2 times full scale.
    Using sensors C, D, E: 50 times full scale.
DIELECTRIC TEST (Input/Output/Case): 1000Vdc
SURGE: Withstands IEEE SWC test

OUTPUT

OUTPUT RIPPLE: Less than 1.0% at 60 Hz.
OUTPUT LOADING (OHMS):
  Option: B: 0-10K
    D: Greater than 2K
    E-Em: 0-500
    X5: Greater than 2K
RESPONSE TIME (90%):
  Less than 250 mS.
FIELD ADJUSTABLE CAL.: +/- 10%
ACCURACY +/- 1.0% F.S.
  Includes combined effects of voltage, current, load and power factor.
TEMPERATURE EFFECT (0°C to 40°C):
  +/- 0.1% F.S.
  +/- 1.0% RDG.
INSTRUMENT POWER:
  85-135VAC, (50 to 400 Hz.)

WATT OR VAR TRANSDUCERS

OSI PRECISION AC WATT TRANSDUCER MODEL GW5

ACCURATE TO 0.2% OF READING

FEATURES

- Accurate regardless of variations in voltage,current, power factor, or load.
- Available with 1, 2, 2½, or 3 element configurations. Provides bi-directional operation.
- Accuracy maintained over wide temperature range, **factory calibration traceable to NIST.**

APPLICATIONS

- Equipment monitoring for process control.
- Integration into energy management systems, or a variety of sub-metering applications.
- Measurement using direct-connection, current tranformers, or potential transformers.

AC CURRENT TRANSDUCER MODEL CTD

DESCRIPTION

The CTD series of AC Current Transducers provide a dc output which is proportional to the AC current. The output is derived from the average absolute value of the input and calibrated as the RMS value of the sine wave.

Standard outputs of 0 to 1 mAdc or 4-20mAdc "loop power" are available, with full scale current ranges of 25 through 1000 amperes.

INSTALLATION

All transducers have a 1.56 inch window and are equipped with a mounting foot. Polarity of the current carrying cable is not required. Output terminals are #8-32 studs, with X1 the positive terminal.

Loop power 4-20mA models require an external power supply nominal 24 Vdc, although the unit will be operated over the range of 15V to 40Vdc.

STANDARD MODELS

AC INPUT AMPERES	0-1 mA	OUTPUT * 4-20 mA
25	CTD-025A	CTD-025E2
50	CTD-050A	CTD-050E2
100	CTD-100A	CTD-100E2
200	CTD-200A	CTD-200E2

CURRENT TRANSDUCER

OSI AC, DC, PULSE CURRENT TRANSDUCER *MODELS* CTF & CTFB

0.1% LINEARITY **100KHZ BANDWIDTH**

FEATURES

- High linearity.
- Module or circuit board mount.
- Bi-directional current output.
- 100KHz bandwidth
- Closed loop.

APPLICATIONS

- Variable frequency drives.
  ASD (adjustable speed drives)
- UPS
- Inverters (PWM)
- Feedback control.

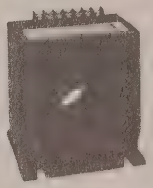
FOR –40°C TO +80°C TEMPERATURE RANGE, DELETE ONE "T"



DESCRIPTION

The CTF series transducer is a sensor for AC, DC and pulse currents. Input and output are physically isolated but magnetically coupled by a high permeability core. The sensor uses a hall effect generator to control the secondary winding current in a feedback configuration to exactly cancel the flux due to the primary current.

With the core flux controlled to zero, then $I_pN_p=I_sN_s$ where the subscripts P & S refer to primary and secondary ampere (I) turns (N). If a single turn is used in the primary $I_s=I_p/N_s$ so the secondary current is directly related to the primary window current.

In application a resistor can be inserted in the secondary current circuit to provide an output voltage proportional to primary window current. The resistance can be any value within the load range specified. The output voltage is an exact replica of the input current waveform.

This technique provides impressive performance specifications as indicated below for todays challenging applications such as PWM inverters for adjustable speed drives and electric vehicles.

SPECIFICATIONS

INPUT

CURRENT: See tables
RESPONSE TIME: 1µSec
di/dt 50A/µSec
BANDWIDTH: (Small Signal) 100KHz
ISOLATION: (Input to Output) 2500VAC

OUTPUT

SIGNAL: See table
LOAD RESISTANCE: See table
For current ranges above peak value listed, reduce the load resistance proportionally.

POWER REQUIREMENTS

VOLTAGE: ±14 To ±18VDC
CURRENT: Approx. 35mA + Output current

ACCURACY ±0.3% F.S.
(Includes effects of linearity, setpoint and offset at 25°C)
LINEARITY: ±0.1% F.S.
OFFSET: (0-70°C) ±0.25% F.S.
"T" Model (–40°C To +80°C) ±0.5% F.S.

DIMENSIONS Inches (mm)
CTFB SERIES: "Printed circuit board mount (FR4)"
2.60 (66) x 3.54 (90) x 1.340 (34) WLH
WINDOW: 1 (25) DIA.

CTF SERIES: "Plastic Enclosure"
3.94 (100) x 4.05 (103) x 3.31 (84) WLH
WINDOW: 1.62 (41, 25) DIA.

CURRENT TRANSDUCERS

OSI CURRENT TRANSDUCERS MODEL CTL

FREQUENCY RANGE DC TO 1000 HERTZ

FEATURES AND APPLICATIONS

- 5000 Volt line-to-output isolation.
- DC to 5000 Hertz response.
- Bi-directional operation.
- Available in split-core configurations.
- Response time less than 50 microSeconds.
- Output is proportional in **direction and magnitude** to the current flow through the window.
- Overload capability to **50 times rating** (at 60 Hz.).
- Stability maintained during severe vibration.
- Easy installation.
- Replaces shunts.
- No insertion loss.
- For use with **OSI** model CTA signal conditioners.
- Ideal for use on AC systems with dc components and/or chopped waveforms.

VOLTAGE TRANSDUCERS

AC VOLTAGE TRANSDUCER MODEL VT

LOW COST AC VOLTAGE TRANSDUCER

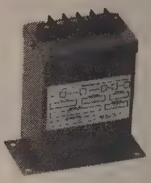
FEATURES

- Accuracy reliable voltage measurement over a wide frequency range.
- Input/output isolation.

APPLICATIONS

- Designed for use in OEM applications where inexpensive voltage measurement is required.
- Line voltage monitoring.

INPUT	MODEL NUMBER VT-		OPTIONAL OUTPUTS	
AC VOLTAGE	0-1mA	4-20mA	0-10Vdc	0-5Vdc
0 to 150	120A	120E	ORDER WITH OSI RESISTOR MODEL LRB-10000	ORDER WITH OSI RESISTOR MODEL LRB-5000
0 to 300	240A	240E		
0 to 600	3940A	3940E		



Units with 0-1mA output are self-powered from measured voltage line.
Units with 4-20mA output require 85-135VAC instrument power.
Models VT480A and VT480E include **OSI** 226-145 potential transformer.
NOTE: LOAD RESISTOR MUST BE ORDERED SEPARATELY.

ORDERING INFORMATION
Example: Single phase120VAC input
with 4-20mA output.
VT-120E

RMS VOLTAGE TRANSDUCER MODEL VTR

ACCURATE TO 0.25% FULL SCALE

FEATURES

- Accurate measurement of the true RMS value of input signals over a wide frequency range.

APPLICATIONS

- For use in applications where measurement of non-sinusoidal waveforms is required.

INPUT	MODEL NUMBER VTR-		OPTIONAL OUTPUTS	
AC VOLTAGE	0-1mA	4-20mA	0-10Vdc	0-5Vdc

VOLTAGE TRANSDUCERS

OSI AC/DC VOLTAGE TRANSDUCER AND SHUNT ISOLATOR MODEL VT7

DC TO 5000 HERTZ FREQUENCY RESPONSE

FEATURES

- Provides instantaneous output which is directly proportional to AC or dc input signal.
- Amplifies mV shunt output to standard analog signal level.
- Input/output isolation.

APPLICATIONS

- Designed for use in applications which require directly analogous voltage measurement..
- Shunt isolation.
- Bi-directional circuits.

INPUT	MODEL NUMBER VT7 AND VT8-STANDARD OUTPUTS

0 to 900	013B	013E	013D	013X5
0 to 1000	014B	014E	014D	014X5

Highlighted models will be supplied with an externally mounted resistance box.
All units require 85-135VAC instrument power, (50,70Hz.).
Optional 220VAC instrument power-Add suffix **"-22"**.

ORDERING INFORMATION

Example: 120VAC/dc input with 0-10Voutput
VT7-005D
Example: 0-50mV input with 4-20mA output
VT7-015E

RMS VOLTAGE TRANSDUCER MODEL VT8

DC TO 5000 HERTZ FREQUENCY RESPONSE

FEATURES

- Provides DC output which is directly proportional to RMS value of AC and/or dc input signal.
- Input/output isolation.

APPLICATIONS

- Accurate measurement of voltage that contains dc and non-sinusoidal AC components.
- Monitoring of RMS voltage.

ORDERING INFORMATION

Select input voltage range and output required from table shown above, (model VT7).
Example: 120VAC/dc input with
4-20mA output proportional to RMS value of input.
VT8-005E

VOLTAGE, CURRENT TRANSDUCERS

OSI AC VOLTAGE, AC CURRENT TRANSDUCERS MODELS MVT, MCT5

DIN RAIL MOUNTED AC VOLTAGE, AC CURRENT TRANSDUCERS

FEATURES

- Ruggedized Polyamide DIN mount case.
- Standard OSI five year warranty.
- Slim profile allows maximum use of available space.
- Field selectable analog outputs.
- Recessed terminals provide increased safety.

APPLICATIONS

- Ideal for use in enclosures wioth dimensional constraints.
- Designed for industrial environments.
- OEM measurement systems.
- Designed for use with potential transformers.
- Easily integrated into control systems.

INPUT	MODEL MVT-STANDARD OUTPUTS	
AC VOLTAGE	0 - 1mA*	4-20mA**
0 to 150	150A	150E2
0 to 300	300A	300E2
0 to 600	600A	600E2

INPUT	MODEL MCT5-STANDARD OUTPUTS	
AC CURRENT (AMPS)	0 - 1mA*	4-20mA**
0 to 0.1	001A	001E2
0 to 5.0	005A	005E2

*Models are self-powered from measured AC input line with DIP switch selectable 0-5Vdc, or 0-10 Vdc output.

**Denotes 4-20mA loop-powered unit, (15-35Vdc). Note: 600V models supplied with OSI potential transformer.

Note: 600V models supplied with **OSI** potential transformer.

Transducer output is derived from the average absolute value of the input and calibrated as the RMS value of a sine wave input.

UL LISTED TRANSDUCERS

WATT / WATTHOUR TRANSDUCER MODEL AGH

UL LISTED, ACCURATE TO 0.2% OF READING

FEATURES

- Accurate regardless of variations in voltage,current, power factor, or load.
- Dual outputs. 0-1mA proportional to instantaneous Watts, relay closure proportional to Watthours.

APPLICATIONS

- Designed for applications which require UL listed devices.
- Integration into energy management systems, or a variety of sub-metering applications.

5 YEAR WARRANTY

LISTED 87 X 9
Energy Management
Equipment Accessory
E134941

AC CURRENT TRANSDUCER MODEL ACT5

UL LISTED AC CURRENT TRANSDUCER

FEATURES

- Accurate, reliable current measurement over a wide frequency range.

APPLICATIONS

- Can be used with **OSI** line of **UL listed** current transformers.

5 YEAR WARRANTY

AC CURRENT INPUT (AMPERES)		MODEL ACT5-001A OUTPUT
RANGE	NOMINAL	
0 to 5	5	0 to 1mA dc

Unit is self-powered from measured AC input line.

*OUTPUT SPECIFIED WITH FIELD OF 10KG, AND CONTROL CURRENT AS LISTED IN TABLE.
OPERATING TEMPERATURE RANGE: –65 TO 85°C

PROCESS SIGNAL CONDITIONERS MODEL SG

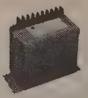
CUSTOM PROCESS SIGNAL CONDITIONERS

FEATURES

- Isolated linear output from a standard or non standard input process signal.
- Factory calibrated for selected input and output ranges.
- Easy-mount metal enclosure.
- Zero and Cal "Span" adjustments.

APPLICATIONS

- Process Control
- Signal Isolation
- Signal Conversion



ORDERING INFORMATION

Example: 4-20 mA input and a 0-1mA output, 115VAC instrument power, with 50% span adjustment. **SG-6-01-H1**

FREQUENCY TRANSDUCERS

OSI FREQUENCY TRANSDUCER MODEL FT

ACCURATE TO 0.2% OF FULL SCALE

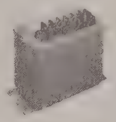
FEATURES

- Provides analog output which is proportional to the instantaneous frequency of the input signal.

APPLICATIONS

- For use on any application that requires indication or collection of frequency variations.

INPUT FREQUENCY (Hz)	MODEL NUMBER FT-STANDARD OUTPUTS 0 - 1mA	0-10Vdc	0-5Vdc
45 to 55	050B	050D	050X5
55 to 65	060B	060D	060X5
375 to 400	400B	400D	400X5



**ADDITIONAL FREQUENCY RANGES AVAILABLE-
CONSULT FACTORY**

ORDERING INFORMATION

Example: 55-65Hz. input, with 0-5Vdc output

FT-060X5

MODEL FT SPECIFICATIONS

INPUT

FREQUENCY RANGE: See table
VOLTAGE RANGE: 95-135V
BURDEN: 4.0VA
OVERLOAD: 150V
DIELECTRIC TEST (Input/Output/Case): 1500VAC

OUTPUT

OUTPUT LOADING (Ohms): 0-10K
RESPONSE TIME: 400MS
ACCURACY +/-0.2% F.S
Includes effects of linearityand repeatability.
TEMPERATURE EFFECT (-20°C TO 60°C): +/- 0.005%/°C

WIDE RANGE FREQUENCY TRANSDUCER MODEL FTA

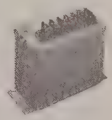
ACCURATE TO 0.5% OF SPAN

FEATURES

- Provides analog output which is proportional to the input frequency range.

APPLICATIONS

- For use on any application that requires measurement over a wide frequency range.



INPUT FREQUENCY RANGE (Hz)	DESIGNATION
0 to 10	001
0 to 55	005
0 to 65	004
0 to 100	002
0 to 425	006
0 to 1000	003

INPUT VOLTAGE RANGE (V)	DESIGNATION
1 to 10	01
5 to 55	02
10 to 65	03
80 to 100	04
150 to 425	05
300 to 1000	06

STANDARD OUTPUTS MODEL FTA 0-1mA	0-10Vdc	4-20mA	0-20mA	0-5Vdc
ADD SUFFIX "B" TO PART NUMBER	ADD SUFFIX "D" TO PART NUMBER	ADD SUFFIX "E" TO PART NUMBER	ADD SUFFIX "E1" TO PART NUMBER	ADD SUFFIX "X5" TO PART NUMBER

Alstandard models require 85-135VAC instrument power,
Optional 220VAC instrument power-Add suffix "**-22**".

**ADDITIONAL FREQUENCY RANGES AVAILABLE-
CONSULT FACTORY**

ORDERING INFORMATION

Example:0-100 Hz., 10-100V input, 0-5Vdc output proportional to 0-100 Hz.

FTA-002-04X5

MODEL FTA SPECIFICATIONS

INPUT

FREQUENCY RANGE: See table
VOLTAGE RANGE: See table
AC WAVEFORMS: Sine, square, or triangle
OVERLOAD: 2 times rated, or a max. of 700V
IMPEDANCE (OHMS): LESS THAN 500K
ISOLATION(Input/Output./Case): 700VAC/1000V PK
(Instrument power to Input/Ouput/Case): 1500VAC
ACCURACY +/-0.5% of span
Includes effects of linearityand repeatability.
TEMPERATURE EFFECT (-20°C TO 60°C): +/- 0.005%/°C
INSTRUMENT POWER (STD.): 85-135VAC, 50-400 HZ.

OUTPUT

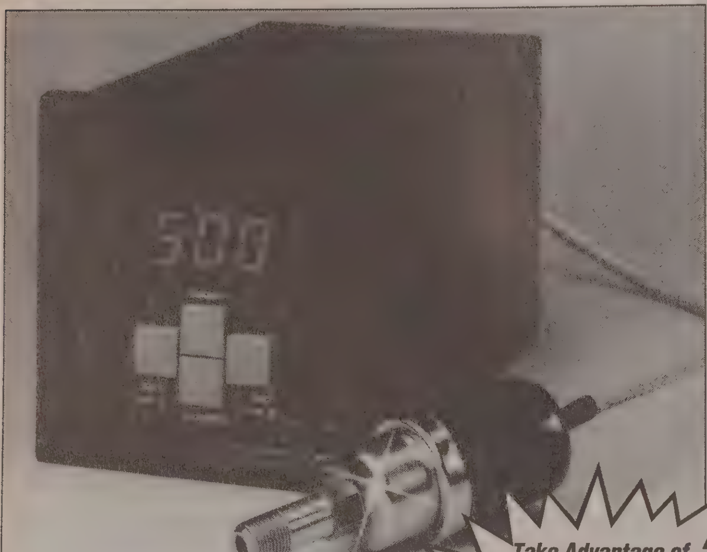
OMEGA...TRANSDUCERS AND SENSORS FOR TEMPERATURE, PRESSURE, STRAIN, FLOW, pH



- ✓ Thousands of Transducers and Sensors
- ✓ Industrial and Laboratory Styles
- ✓ Unique Transducers To Meet The Demands of Any Application
- ✓ Portable, Fixed and Benchtop Models
- ✓ UL and FM Certified
- ✓ NIST Calibrations Available

OMEGA offers Hundreds of Instruments for Electronic Testing and for Measuring Temperature, Humidity, Pressure, Flow, pH, Conductivity and Much More!

Take Advantage of Our Custom Design & Engineering Capabilities. Let Us be Your In-House Engineer. Call Us for Details.

Reed Switch Developments Co. Inc. offers a complete line of magnetic proximity reed sensors and actuators. All are sealed against contamination from foreign materials, extremes in temperature, shock and vibration for millions of exact operations. Simple, inexpensive sensors can help bring cost effectiveness to every level of your operation. We provide complete custom capability for applications which may not be covered by our standard product line. Skilled applications engineers are available to assist you.

- 18 to 26 gauge wire or cable capabilities.
- Series F, FL, V-6" leads standard.
- Series T, TL-18" leads standard.
- Various lead lengths available upon request.
- Cable available upon request.
- Lead connector capabilities.

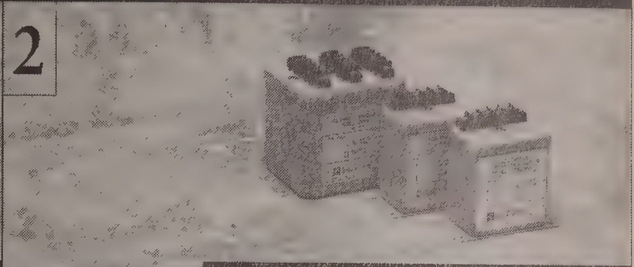
SCIENTIFIC COLUMBUS TRANSDUCERS

1

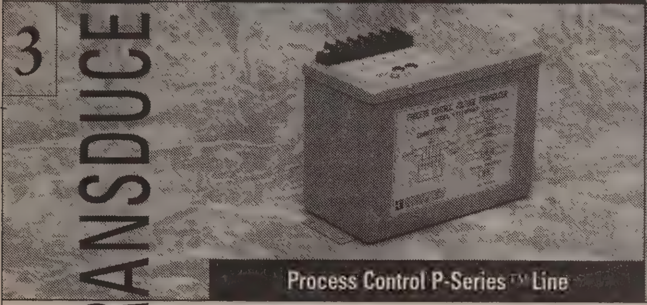
Digilogic™ Line

2



Exceltronic™ Line

3



Process Control P-Series™ Line

4

XLP™ Modular Plug-in Line

Only Scientific Columbus offers 4 separate lines of transducers—and the expertise to match the right transducer to *your* application.

You can spend hours trying to determine your precise transducer requirements, or simply call the world's leading supplier of transducers—Scientific Columbus.

No one offers more types of transducers.

Only Scientific Columbus offers four different lines of transducers, so you can match your specific application requirements for measurement, accuracy and budget—without compromise.

1. ***Digilogic Line** offers accuracy to ±0.1% of reading.*
2. ***Exceltronic Line** offers accuracy to ±0.2% of reading.*
3. ***Process Control P-Series Line** offers accuracy to ±0.25% of reading with a variety of process control outputs: 4-20/4-12-20 mAdc, 1-5/1-3-5 mAdc, 10-50/10-30-50 mAdc.*
4. ***XLP Modular Plug-in Line** offers rack-mount housing for limited space environments or applications requiring large numbers of transducers.*

Functions Available

- ***Watt***
- ***Var***
- ***Watt/Var***
- ***Watt/Watthour***
- ***Var/Varhour***
- ***Volt-Amp***
- ***Volt-Amp/ Volt-Amphour***
- ***Current***
- ***Voltage***
- ***Phase Angle (Power Factor)***
- ***Voltage Angle***
- ***Frequency***
- ***Temperature***
- ***DC Isolation***
- ***Signal Conditioning and Transmission***

There's no need to compromise with "the closest thing" when you deal with Scientific Columbus. Our broad line of transducers means you can get an exact match to your transducer needs—and always get the "most" transducer for your money.

You're working with the world's leading supplier of transducers.

Scientific Columbus introduced its first power measurement transducers in 1962. In the years since, Scientific Columbus transducers have earned a reputation for exceptional reliability and performance.

All Scientific Columbus transducers are produced with a painstaking concern for quality, using rugged steel cans for magnetic shielding and high-quality components throughout.

No one makes specifying the right transducer easier for you.

Scientific Columbus' streamlined ordering process makes specifying the right transducer fast and easy. It's as simple as completing the Easy Order Checklist on the fourth page of this section. Within minutes, you'll have all the information you need to order the exact transducer for your application—even if you've never specified a transducer before.

TRANSDUCER SPECIFICATION MATRIX

Scientific Columbus offers the broadest selection of electrical transducers—4 different lines to meet your exact application requirements.

This matrix provides an overview of Scientific Columbus' complete transducer line, including operating specifications, dimensions, power input, output options and input connections. Other specifications, as well as information on special options, are available in our complete Electrical Transducer Catalog.

A Scientific Columbus transducer specialist is available to discuss your applications and to help you select the right transducer for your requirements—even if you've never specified a transducer before.

Scientific Columbus Easy Order Checklist – Transducers

Scientific Columbus' Easy Order Checklist simplifies the painstaking process of ordering and specifying electrical transducers. This form systematically walks you through the specification process and helps to insure you receive the most appropriate transducer for your specific application.

We have included space on this form for special options or other special requirements. Refer to the specifications for specific models in this catalog or discuss availability with your Scientific Columbus Application Specialist.

1. Accuracy	☐ Normal Precision (0.2%) ☐ Very High Precision (0.1%)
2. Type	☐ Universal Mount (Metal Case) ☐ Rack Mount (XLP Modular Plug-In)
3. System	☐ AC ☐ DC
4. Function	☐ Watt ☐ Var ☐ Watt/Var ☐ Watt/Watthour ☐ Var/Varhour
	☐ Volt-Amp ☐ Volt-Amp/Volt-Amphour ☐ Frequency ☐ Temperature
	☐ Average Current* ☐ Average Triple Current* ☐ True RMS Current
	☐ Average Voltage* ☐ Average Triple Voltage* ☐ True RMS Voltage
	☐ Phase Angle (Power Factor) ☐ Voltage Angle ☐ DC Isolation
5. Input	Current: (Nominal) ☐ Standard 5A ☐ 1A ☐ 2.5A ☐ 7.5A ☐ 10A ☐ 15A ☐ 25A ☐ Special ____
	Voltage: (Nominal) ☐ Standard 120V ☐ 69V ☐ 240V ☐ 277V ☐ 480V ☐ Special ____
	Frequency: (Nominal) ☐ Standard 60 Hz ☐ 50 Hz ☐ 400 Hz ☐ 25 Hz ☐ Special ____
	Temperature – RTD: ☐ Nickel-Iron ☐ Platinum ☐ Copper
	– Thermocouple: ☐ J ☐ K ☐ T ☐ R ☐ S ☐ E
	Other ____
6. Input Connection	☐ 1 Element/1 Phase ☐ 1 1/2 Element/3 Phase/3 Wire ☐ 2 Element/3 Phase/3 Wire
	☐ 2 1/2 Element/3 Phase/4 Wire ☐ 3 Element/3 Phase/4 Wire
7. Aux. Power	☐ Internal Power External Power: ☐ Standard 120 Vac ☐ Special ____
8. Output	Unidirectional: ☐ 0-1 mAdc ☐ 1-5 mAdc ☐ 4-20 mAdc ☐ 10-50 mAdc
	Bidirectional: ☐ 0 to ±1 mAdc ☐ 1-3-5 mAdc ☐ 4-12-20 mAdc ☐ 10-30-50 mAdc
	Calibration: ☐ Standard ☐ Special ____

* Calibrated in RMS.

INSTRUMENTATION

PRODUCT		DESCRIPTION
XLP MODULAR PLUG-IN RACK-MOUNT		*XLP modular plug-in transducers are an economical solution where large quantities of transducers are required and space is limited. They are ideal for SCADA systems, generation plants, substations or limited-space industrial environments. Offered in a complete line of functions, XLP modules can contain up to 6 transducers and are available in housings containing 2, 4 or 8 modules.*
SIGNAL CONDITIONERS AND ALARMS		*Scientific Columbus offers a complete line of fully isolated, plug-in signal conditioners and alarms for all process control applications. Models include dc current, dc voltage, dc millivolt, thermocouple, resistance (RTD, slidewire), ac voltage, ac current and frequency, and are available as transmitters, combined transmitters/alarms and alarms.*
DC AMPLIFIERS (Isolated and Non-Isolated)		*Scientific Columbus' Model 6271A DC Voltage Isolation Amplifier amplifies dc shunted millivolt signals or dc voltages ranging from 50 mV to 1000 V, and provides complete isolation of the input signal. Safe for use with shunts operating at high voltage levels above ground. Load resistance variations from 0-10,000Ω have less than 0.1% effect on the output current, making the amplifier ideal for telemetering, scaling, recording applications or matching to tone transmitters or A/D converters. The Model 6181A DC Instrument Amplifier is a non-isolated unit with unmatched stability and provides a direct interface to low level signals.*
DC WATT TRANSDUCER		*The Model 6268 DC Watt Transducer adapts Scientific Columbus' Digilogic transducer design to accept direct currents. Current input can be direct from a 50 mVdc or 100 mVdc external (customer supplied) shunt. The line-to-line voltage connection can be made directly for voltages from 100 Vdc to 600 Vdc. For line-to-line voltages from 600 Vdc to 1800 Vdc, an external multiplier resistance box is supplied.*
DC WATTHOUR METERS		*The Model 6260 DC Watt/Watthour Meter combines the Model 6268 DC Watt Transducer's 0-1 mAdc analog output with an analog-to-pulse converter to provide pulses proportional to dc watthours. The current input can be either 50 mVdc or 100 mVdc from an external (customer supplied) current shunt. Line-to-line voltages may be from 400 Vdc to 1250 Vdc. The dc watthour output is displayed on a 7-digit nonresettable register. An optional Form C relay output is available for remote monitoring of dc watthours. The Model 6406 DC Watthour Meter is an economical, highly accurate meter which accepts 1- or 2-element inputs and has 120 Vdc or 240 Vdc auxiliary power as a standard feature. It provides a readout with nonvolatile memory, and the watthour output is field selectable*
ANALOG-TO-PULSE CONVERTER		*Scientific Columbus high accuracy analog-to-pulse converters are crystal-referenced devices for converting an analog signal into an integrated pulse output. Inputs may be from a watt, var, current, voltage, temperature or other type of transducer for which integrated output information is required. Choose from unidirectional, bidirectional or multichannel (1, 2 or 3) models. The outputs may be either mercury-wetted relay or solid-state, and can be fed to Scientific Columbus registers, pulse recorders or other 2- or 3-wire receiving devices.*
6152/6153 SERIES REGISTERS		*Scientific Columbus registers are designed for use with all Scientific Columbus transducers with pulse outputs, analog-to-pulse converters and can be used as remote registers for JEM® meters. Unidirectional and bidirectional models are available with a choice of 6-digit resettable or 7-digit nonresettable displays.*
TRANSDUCER CALIBRATOR		*Scientific Columbus' digitally programmable multifunction calibrator permits easy field checking and calibration of watt, var, voltage and current transducers. This rugged unit is completely self-contained and mounted in a portable carrying case. It needs no external loads or accessory equipment, and can be easily operated by one person.*
CATALOG/TECHNICAL DATA SHEETS		*Scientific Columbus' complete transducer and instrumentation catalog provides detailed descriptions, specifications, options, operating conditions and wiring diagrams for all four lines of electrical transducers. To receive your copy, call 1-800-274-5368. If you need information on a specific unit only, ask for the applicable technical data sheet.*

ELECTRONIC ENERGY METERS AND CALIBRATION STANDARDS

Solutions in energy measurement from the leader in technological innovations and field-proven reliability.

Scientific Columbus introduced the first multifunction, electronic energy meter in 1976 with its first JEM® Meter. Since that time, we have installed more electronic multifunction meters and introduced more technological innovations in metering than any other manufacturer. Today, Scientific Columbus offers the industry's broadest product selection with the JEM®1, JEM®2 and JEM®3 Meters.

This broad range of metering products enables Scientific Columbus to recommend an energy measurement solution based on specific customer needs — not the limited capabilities of one meter. Our applications specialists have been extremely successful at helping customers select and configure meters that match their specific energy measurement, communication and budget requirements—without compromise.

Scientific Columbus meters can be configured for revenue, cogeneration, substation or load survey metering. For more information, or technical assistance in determining the best energy measurement solution for your application, call Scientific Columbus at 1-800-274-5368.

PRODUCT		DESCRIPTION	
JEM1 ELECTRONIC ENERGY METER		• Economical solution for measurement of up to 4 different quantities • All solid-state meters • Accuracy to 0.1% of reading • Proven long-term stability • Provides analog outputs (0-1 mA) • Solid-state KYZ outputs	• Electronic registers available • Potential indication on each phase • KVA calculated and displayed • Used for revenue, interchange, power plant and transmission metering
JEM2 ELECTRONIC ENERGY METER		• Time of Use (measures consumptions and demands) • Accuracy to 0.1% of reading • 4-quadrant metering • All data is displayable and stored in nonvolatile memory • Mass memory — 8 data channels • Transformer/line loss compensation • EPROM configurable • Provides remote meter reading	• 10 active registers — with 10 corresponding storage registers • Demand (measures 12 different demand quantities) • Power Factor • Used for larger commercial and industrial sites, cogeneration applications, industrial plant load centers and others
JEM3 ELECTRONIC ENERGY METER		• Most capability of all JEM Meters • Accuracy to 0.1% of reading • Displays per-phase quantities • 100 registers • Measures polyphase, per-phase and demand quantities • 5 communication choices: Optical Port, RS232, 20 mA, Modem and JEMLINK™ • 128K mass memory option	• Fiber optic data communication option • Time of Use option • Programmable multifunction meter that is field-configurable to meet exact requirements for all types of large commercial and industrial metering including revenue, cogeneration, substation and load survey applications
LABORATORY STANDARDS		Scientific Columbus offers a complete line of high-precision electrical measurement laboratory standards for the calibration of electronic energy meters and other measurement devices. Also, peripheral equipment such as the MicroJoule®II digital pulse comparator with RS323 and GPIB interface.	
SC-30 PORTABLE FIELD STANDARD		• The SC-30™ and SC-30CT™ Portable Field Standards provide all the performance and convenience features required for field calibration. • Autoranging voltage, current and auxiliary power • Accuracy better than 0.05% of reading • Backlit, 8-digit display for easy reading in all lighting environments • Display diagnostics immediately indicate hookup errors

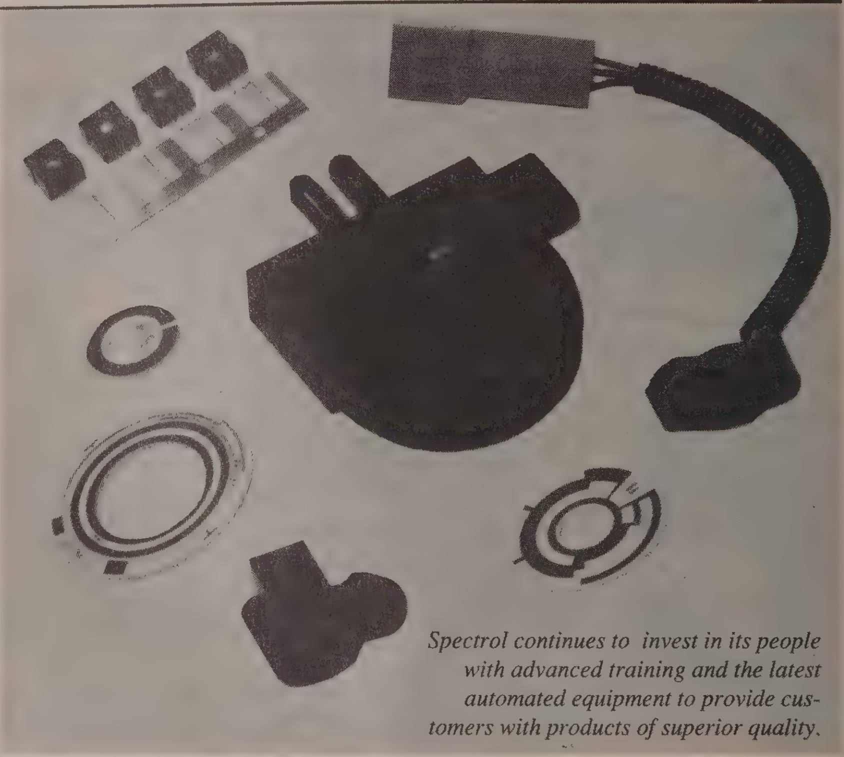
Sense of Commitment

World Class Manufacturing

Spectrol's modern automated facilities in North America and Europe employ the latest total quality management (TQM) techniques to produce millions of sensors annually.

Statistical Process Control, continuous improvement, just-in-time delivery and flexible manufacturing are all utilized by Spectrol. Among the many supplier and quality awards received by Spectrol is the prestigious Q1 Quality Award presented by Ford Motor Company. For tight process control and to ensure outstanding quality at low cost, Spectrol is a vertically integrated company within its core technologies. Spectrol, for example, produces its own resistive inks and lubricants.



Spectrol continues to invest in its people with advanced training and the latest automated equipment to provide customers with products of superior quality.

A unit of Kearney-National, Spectrol is headquartered in a 46,000 square-foot Ontario, CA, facility. This manufacturing site is supported by another plant in nearby Mexico. To serve Europe, a 60,000 square-foot facility is located in Swindon, England. Major equipment utilized in Spectrol plants includes:

- Thick film screen printers
- Laser trimmers
- Wire winding machines
- Machine vision inspection
- Numerical control precision metal lathes
- Pick and place assembly equipment
- Reflow solder ovens
- Injection mold machines

These automated processes have the capability to produce both leading edge one-of-a-kind high performance sensors and commercial grade sensors by the million. Let the manufacturing know-how at Spectrol make your next generation sensor a reality today.

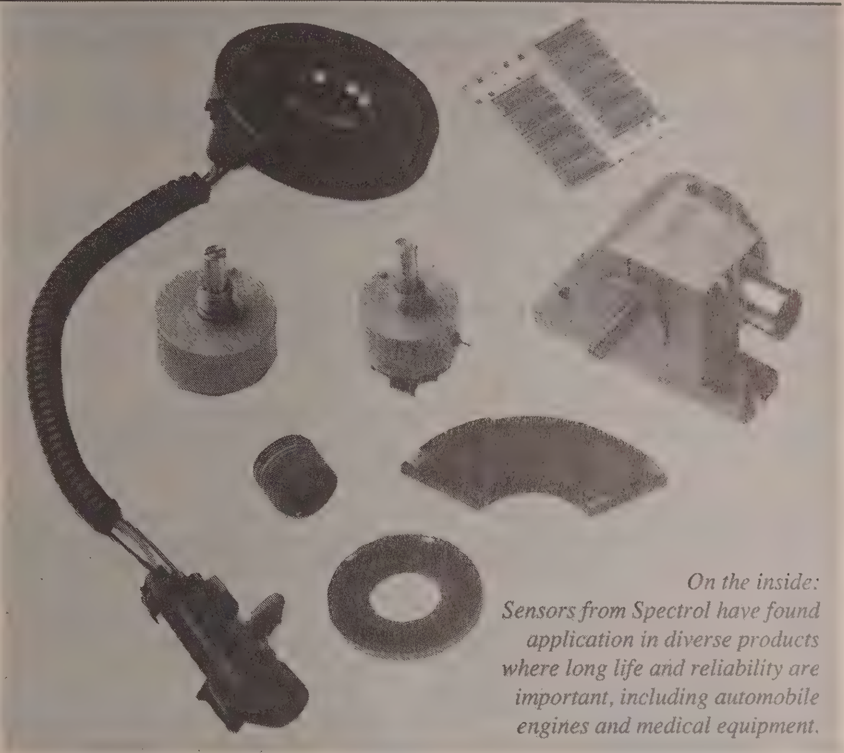
Sense of Purpose

Serving Our Customers

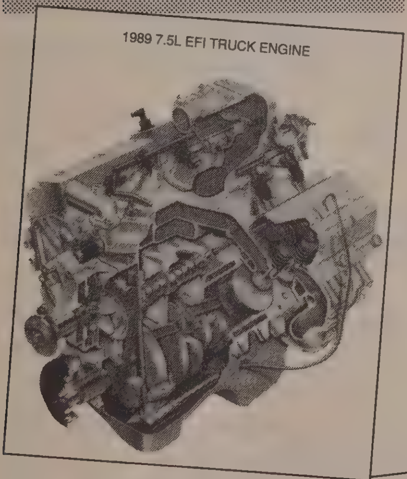
Sensors have become a critical design element in many of today's newest products featuring sophisticated electronics. They often play a key role in enhancing product performance, reliability and life.

At Spectrol, the importance of achieving a competitive advantage with electronic sensors is well understood. We've evolved as a leading edge sensor partner with diverse customers over the last four decades.

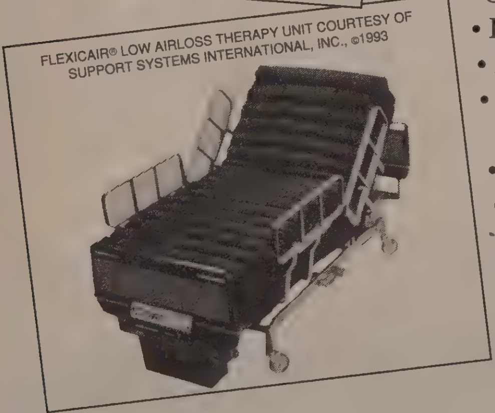
Accuracy, linearity, vibration, humidity, temperature, life and reliability are all essential design considerations in which Spectrol excels. Our objective is to help customers meet their design requirements with sensors of the highest value at the lowest installed cost.



On the inside:
Sensors from Spectrol have found application in diverse products where long life and reliability are important, including automobile engines and medical equipment.



1989 7.5L EFI TRUCK ENGINE



FLEXICAIR® LOW AIRLOSS THERAPY UNIT COURTESY OF SUPPORT SYSTEMS INTERNATIONAL, INC., ©1993

With design and manufacturing expertise in precision analog resistive and encoder position sensors, as well as custom packaging capabilities, Spectrol has made significant contributions to products such as:

- Automobiles
- Offroad vehicles
- Industrial Equipment
- Aircraft and spacecraft
- Automated assembly equipment
- Robotics
- Medical equipment
- Appliances

Spectrol is adept at assessing customer requirements and responding rapidly with its resistive sensor assemblies, potentiometers and encoders from concept to design to prototype to manufacture. Examples of sensors and controls now in production include applications for:

- Exhaust gas circulation
- Throttle position
- Transmission gear position
- Fuel level measurement
- Hydraulics
- Navigation and guidance
- X-Y positioning
- Temperature control
- Instrumentation

We're ready with both custom sensor design capabilities and standard design solutions to meet your needs. Whether you require one or a million sensors, let Spectrol put its creative talents to work for you.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

E2 Quick Assembly Optical Encoder

The E2 optical incremental shaft encoder is a noncontacting rotory to digital position feedback device designed to easily mount to an existing shaft. The internal monolithic module converts realtime shaft angle, speed and direction into TTL-compatible outputs. Simplicity and low cost make the E2 ideal for both high and low volume motion control applications.

Features

- Quick and simple assembly
- Rugged screw-together housing
- Low cost
- Small size
- 96 to 1024 cycles/rev.
- 384 to 4096 codes/rev.
- 0 to 35000 RPM
- Tracks from 0 to 100,000 cycles/sec
- 2-channel quadrature TTL squarewave outputs
- 3rd channel **index** option
- -40 to +100°C operating temperature
- Accepts ±.010" axial shaft play
- Compatible with HP HEDS-5500
- Fits .750", .823" or 1.812" bolt circles
- Fits 12 shaft diameters (2mm to 3/8")
- Single +5v supply @ 17ma typical, 40ma max.
- **RS-422** differential driver option available
- Flush back, through shaft hole, or extended back
- Flat or self-aligning base
- Custom mounting adapters available
- Special resolutions & diameters available

S1 & S2 Series Softpot Optical Shaft Encoder

The Softpot optical shaft encoder is a noncontacting rotory to digital converter. Useful for position feedback or manual interface, the Softpot converts realtime shaft angle, speed and direction into TTL-compatible outputs. It is a practical solution to the wear, contact bounce and digit bobble problems associated with pots and A/D converters.

The Softpot utilizes an unbreakable disk, metal shaft and bushing, LED light source, monolithic electronics and operates from a single +5 volt supply.

Available with ball bearings for motion control applications or torque-loaded to feel like a potentiometer for front-panel manual interface.

Features
- Small size
- Low cost
- 2-channel quadrature, TTL squarewave outputs
- 3rd channel **index** option
- Tracks from 0 to 100,000 cycles/sec
- Ball bearing option tracks to 10,000 RPM
- -40 to +100°C operating temperature
- Single +5v supply @ 17ma typical, 40ma max.

S1 Series
- 96 to 1024 cycles/rev.
- 384 to 4096 codes/rev.

S2 Series (2.2" diameter package)
- 1000 to 2048 cycles/rev., 4000 to 8192 codes/rev.

Absolute Encoder & Custom Disks

Smart Absolute Encoder

- True absolute encoder reports position even after power-off position change.
- $80 to $200 price range.
- Operates from -25 to +85°C.
- Programmable single turn resolution from 2 to 65536 CPR with 12-bit linearity.
- Programmable zero position.
- Multiple versions:
  - Sleeve bushing
  - Ball bearing
  - Quick assembly kit
  - Digital absolute inclinometer
- 12-bit analog output option.
- Parallel output option.
- Simple RJ11-6 cable adapter plugs into IBM PC compatible RS-232 port.
- RS-485 serial multi-drop cable connects 1 to 15 encoders.
- Cable length up to 1000 feet.
- Ready-to-go IBM PC software with source code in assembly and C languages.
- Operates from 5.5 to 20 volts at <15mA.
- Sleep mode for battery operation <.5mA.
- Accepts ±.025" radial or axial shaft misalignment.
- IBM PC daughter boards available.
- Special versions available

Custom Encoder Disks

U.S. Digital has been designing and manufacturing our own optical encoder disks in-house for years.

We can design and manufacture to your spec:
- Any pattern (incremental, absolute or other).
- Any number of tracks.
- Any inside hole diameter.
- Any outside diameter.
- Any resolution up to 400 line pairs per linear inch (up to 1200 CPR for a 1" diameter disk) proportionally higher for larger diameters.
- Any quantity, small or large.
- Typical lead time is 1 to 2 weeks.
- Typical NRE charge is $250.
- Typical unit cost is well under $1.00.

We can also manufacture and assemble the hub built to your spec.

Our disks are made from 7-mil mylar film which is unbreakable, can be is easily handled and cleaned without damage, is stable over temperature (-60°C to 110°C), is machinable and low cost.

We will help you with the details and quote price and lead time.

New Product Updates

Call or fax us to receive new product updates on absolute, variable resolution, multi-index, inclinometer, brushless motor feedback components, and heavy duty encoder products.

No lead time!

We can normally ship orders for our standard encoder products from stock, usually on the same day.

T2 Tilt sensor Incremental Inclinometer

The T2 inclinometer is a low cost digital tilt transducer used to report the angle of an object with respect to gravity.

Optical shaft encoder technology provides unlimited range and virtually eliminates linearity errors.

Internally, an optical encoder disk is suspended between two micro-ball bearings. A weight placed on one side of the wheel assembly causes it to follow the source of gravity.

A beam of collimated light generated by a lensed LED projects the codewheel image onto an array of photodiode detectors on a monolithic chip. As the housing moves relative to the codewheel, the moving image of radial lines is converted to realtime TTL outputs.

Features

- Low cost
- Fast response
- Rugged and simple
- 2-channel quadrature outputs
- 3rd channel index option
- TTL compatible
- -40 to +100°C operating temperature
- Single +5v supply
- 360 degree range
- 1440 codes/rev. = 0.25° resolution
- 3600 codes/rev. = 0.1° resolution
- 7200 codes/rev. = 0.05° resolution
- 2 year warranty

Damping:
Internal magnetic damping is a balance between response time and ringing. The standard damping will fit many applications. Typical settling time for standard damping appears to be less than 200 milli-seconds. Double damping slows the settling time by several hundred milli-seconds, not by ringing, but by more slowly approaching the final position. Some applications may not require any damping, such as motion detectors. Others may require double damping to average out cyclic motion such as found in moving vehicles. Damping options can be specified when ordering.

Index:
The optional index can serve as an absolute reference to reset an external counter. For standard orientation, the index will go high when the connector pins point toward gravity. Other orientations can be specified.

Digital displays:
Several digital counters with LCD displays are available which will connect directly to these inclinometers. Check with us about models, price and availability.

Absolute Inclinometer:
Ask about our true absolute digital inclinometer.

Price	Cost Modifiers
$41.00 / 100's	Add $4.00 for 7200 codes/rev. or index.
$44.00 / 50's	Deduct $4.00 for no damping (N-option).
$48.00 / 10's	Add $4.00 for double damping (D-option).
$55.00 / 1's	Add $2.00 for transfer adhesive (T-option).

Example Circuit

Description:
These devices allow incremental shaft encoders to drive standard up/down counters. Connect the encoder quadrature outputs to the A & B inputs. The LS7083 outputs can connect directly to the up and down clock inputs of counters such as 74193 or 40193. The LS7084 outputs can connect directly to the Clock and Up/Dn inputs of counters such as 4516 or 74169.

Now the 14-pin LS7082 is also available from stock which provides 1, 2 or 4 clocks per cycle and simultaneous UpClock, DnClock, Direction and Index outputs.

Encoder to Microprocessor Interface Chip: LS7166

Features:
- Preloadable 24-bit Up/Down Counter
- 20 pin DIP or Surface Mount Package
- 1, 2 or 4 counts per cycle
- Binary or BCD
- 24-Bit Comparitor Register
- 4 Control Registers
- Readable Status Register
- 8-Bit Tri-state I/O Bus
- DC to 10 MHz

Description
The LS7166 is an LSI monolithic CMOS building block useful in motion control applications. The 24-bit multi-mode counter, registers and logic enable a microprocessor to track the speed, direction and position of an optical incremental shaft encoder. In addition to an 8-bit data bus, programmable realtime inputs and outputs are provided for hardware based control functions and status indication.

- **Monitoring Level:** 0-1 ips RMS
- **Frequency Range:** 5-3,000 Hz (3db)
- **Colored LED's:** Alert—Amber, Danger—Flashing Red, Channel Status—Green to Red—Auto Guard Transducer malfunction
- **Trip Accuracy:** 5% of setting
- **Two Trip Levels:** Alert, Danger; adjustable front panel set pots
- **Internally Adjustable Trip Delays:** 1-10 seconds—Factory set 8 secs.
- **Trip Level Calibration/Check via Level Meter**
- **Reset Button** (remote contacts available)
- **Digital RMS Velocity Level Indicating Meter**
- **Channel Selector Switch** for Level meter, Calibration & Velocity AC Output
- **115VAC Input Power (220V option)**
- **Fail-Safe Power Loss Protection** (disables Shutdown Relay)
- **Optional Filters:** Low, High or Band Pass
- **Inputs for (1-6) Accelerometer Signals;** rear panel BNC jacks
- **Outputs:** A. AC Signal: 5VAC/ips (peak) BNC jacks (rear), (1) BNC jack (front) B. DC signal: 4VDC/ips RMS (1-6) BNC jacks (rear) C. Two DP/DT relays per channel—3 amps D. Remote Reset (option)

M8D DIGITAL VIBRATION METER
[Battery Operated]

Metric scale optional

Functions: Velocity, Acceleration and displacement.

Ranges [Decade]: Velocity-Full scale .02 to 200 in/sec (PK)
Acceleration .002 to 20 g
Displacement to 2000 mils (PP)

Output: 2 Volts (Full scale) AC/DC Recorder option

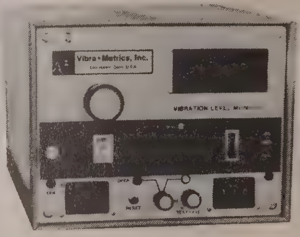
Frequency Range [3db]:
Accel. 2HZ - 15KHZ
Vel. 5HZ - 3KHZ
Disp. 5HZ - 1KHZ

Accelerometer Power: 2 ma, 15 Volts (DC) from input connector

Filters [Front Panel Selectable]: Plug in optional High pass, low pass or band pass

Accelerometer: 7 - 14 mv/g
70-140 mv/g

M9D VIBRATION METER/MONITOR



Specifications same as M-8D with the following additions

Accelerometer: 100 mv/g

Trip Alarms: One or two

Set Points: Digital 0-200% of Full scale selected.

Outputs: Relay contacts
NO/NC BCD (Option)
2 Volts (Full scale)
DC Recorder option

VM-350 PREDICTIVE MAINTENANCE VIBRATION METER

An accurate solid-state instrument for use in predictive maintenance and quality assurance

Velocity Ranges: 0.1 to 30 (I.P.S.)

Frequency Range: 3HZ-5 KHz

Input: Low impedance accelerometer included in vibration probe (VP 300) or individual sensor

Power: Battery

Size: 7" long x 2½" deep x 4" wide

SEISMIC VIBRATION METER SYSTEM

Consists of **M8DSP** Meter and 1030 Seismic Accelerometer

Most Sensitive Full Scale Range:
20 Micro g
200 Micro in/sec

PIEZOELECTRIC ACCELEROMETERS

Wilcoxon Research Accelerometers Offer You:

- High fidelity signals from internal Piezofet® amplifiers
- High output, low impedance circuits capable of driving long cables
- Rugged, hermetically sealed stainless steel housings available
- Base strain isolation and low thermal sensitivity
- Protection against mispowering, overloads & static discharge
- Wide dynamic ranges
- FMRC (Factory Mutual) & CSA approved for intrinsic safety
- Complete line of vibration sensors, instruments and accessories

- Wilcoxon Research manufactures vibration sensors, instruments and accessories for laboratories, industry and OEM's. Wilcoxon Research specializes in internally amplified piezoelectric accelerometers.
- For 30 years Wilcoxon Research has continued to make significant contributions to the field of vibration sensing with a commitment to innovative design, quality and customer service. Wilcoxon Research is the popular choice among predictive maintenance system suppliers.
- At Wilcoxon Research we respond to your needs with standard or custom designed products, to meet the requirements of your application. Calibration data traceable to NIST MIL-STD-45662 is supplied with each unit and Quality Control procedures are based on MIL-I-45208 requirements.
- Our product line includes a wide range of transducers, power supplies, signal conditioners, power amplifiers, vibration generators, cables and mounting hardware.

capacitance	C	farad	F	charge/p.d.
charge, electric	Q	coulomb	C	current × time
charge on electron	e	coulomb	C	$1{\cdot}6 \times 10^{-19}$ C
conductance	G	ohm^{-1}	Ω^{-1}	reciprocal of resistance
current, electric	I	ampere	A	fundamental unit
decay constant	λ	*a ratio*	—	—
density	ρ	kg m^{-3}	—	m/V
distance along path	s	metre	m	fundamental unit
efficiency	η	*a ratio*	—	work output/work input
electrochemical equiv.	z	g C^{-1}	—	mass/charge
electromotive force	E	volt	V	energy/charge
electron	e	—	—	—
energy	E	joule	J	N m
energy, kinetic	E_k	joule	J	N m. $E_k = 1/2mv^2$
energy, potential	E_p	joule	J	N m. $E_p = mgh$
Faraday constant	F	coulomb mol^{-1}	C mol^{-1}	96,500 C mol^{-1}
field strength, electric	E	V m^{-1}	—	potential gradient: p.d./dist.
field-strength magnetic	H	ampere-turns	—	current × no. of turns
flux, magnetic	Φ	weber	Wb	e.m.f/rate of change of flux
flux density	B	tesla	T	flux/area
focal length	f	metre	m	—
force	F	newton	N	kg m s^{-2}
free energy	ΔG	joule	J	—
frequency	f	hertz	Hz	oscillations/time
gas constant	r	joule	J	energy
half-life,radioactivity	$t_{1/2}$	second	s	fundamental unit
heat capacity	C	J K^{-1}	—	quantity of heat/temp. rise
heat of reaction	ΔH	joule	J	heat energy
heat capacity, specific	c	J K^{-1} kg^{-1}	—	heat capacity/mass
heat, quantity of	q	joule	J	energy

SI UNITS

Quantity	Symbol	SI Unit	Symbol	Derivation
height	h	metre	m	fundamental unit
image distance	υ	metre	m	fundamental unit
inductance, mutual	M	henry	H	induced e.m.f./rate of change of current
inductance, self	L	henry	H	—
intensity of radiation	I	*a number*	—	—
latent heat	L	joule	J	quantity of heat
latent heat, specific	l	J kg^{-1}	—	quantity of heat
latent heat, molar	L_m	joule mol $^{-1}$	J	quantity of heat
length	l	metre	m	fundamental unit
magnetizing force	H	ampere-turns	—	—
magnetic moment	m	Wb m	—	torque in unit magnetic field
magnification, linear	m	*a ratio*	—	—
mass	m	kilogramme	kg	fundamental unit
mass number	A	*a number*	—	number of neutrons + protons
molar volume	V_m	(dm^3)	—	volume of 1 mole
molar solution	M	*a ratio*	—	moles/dm^3
moment of force	—	N m	—	force × perp. distance
neutron number	N	*a number*	—	number of neutrons
number	n	—	—	—
number of molecules	N	—	—	—
number turns on coil	n	*a number*	—	—
number order spectrum	p	*a number*	—	—
object distance	u	metre	m	fundamental unit
peak current	I_o	ampere	A	see current
peak e.m.f.	E_o	volt	V	see e.m.f.
period	T	second	s	fundamental unit
permeability	μ	H m^{-1}	—	henry/metre
permeability, vacuum	μ_o	H m^{-1}	—	—
permeability, relative	μ_r	*a ratio*	—	$\mu = \frac{\mu}{\mu_o}$
permittivity	ε	F m^{-1}	—	farad/metre
permittivity, vacuum	ε_o	F m^{-1}	—	farad/metre
permittivity, relative	ε_r	*a ratio*	—	$\varepsilon_r = \frac{\varepsilon}{\varepsilon_o}$
potential, electric	V	volt	V	energy/charge
potential difference	V	volt	V	energy/charge
power	P	watt	W	J s^{-1}
pressure	p	pascal	Pa	N m^{-2}: force/area
radius	r	metre	m	fundamental unit
reactance	X	ohm	Ω	E_o/I_o
refractive index	n	*a ratio*	—	—
resistance	R	ohm	Ω	p.d./current
resistivity, electrical	ρ	ohm-metre	—	resistance × length
relative density	d	*a ratio*	—	ρ_{sub}/ρ_{water}
r.m.s. current	$I_{r.m.s}$	ampere	A	see current
r.m.s. voltage	$V_{r.m.s}$	volt	V	see e.m.f.
slit separation	s	metre	m	fundamental unit
tension	T	newton	N	see force
temperature, Celsius	θ	degree C	°C	from kelvin
temp. interval	θ	degree	° or K	—
temp. absolute	T	kelvin	K	fundamental unit
thickness	d	metre	m	fundamental unit
time	t	second	s	fundamental unit
torque	T	Nm	—	see moment
turns ratio	T	*a ratio*	—	n_{sec}/n_{prim}
(unit of electricity)	—	kW h	—	kilowatt × hour
velocity	u,υ	ms^{-1}	—	distance/time
velocity, angular	ω	second^{-1}	s^{-1}	angle/time
velocity, e.m.waves	c	m s^{-1}	—	—
velocity of sound	υ	m s^{-1}	—	—
volume	V	metre cubed	m^3	l × b × h
wavelength	λ	metre	m	fundamental unit
work	w	joule	J	force x distance (Nm)
weight	W	newton	N	kg m s^{-2}or mg

Are you getting all you want from eem?

EEM/Electronic Engineers Master is **user**-named, **user**-driven, and **user**-sensitive.

You, the electronic engineer, are the individual the thousands of manufacturers represented in EEM are trying to reach. **You** are the reason hundreds of manufacturers place their data pages in EEM—so that **you can specify their product in your project.**

EEM wants to know:

- what's new
- what products you are looking for
- what you call them
- what are their basic parameters
- where do they belong in the EEM Product Sections

What kind of reference material/engineering aids will help you make your electronic component choices:

- glossaries
- nomographs
- charts
- product selection guides

Write to the editor: The Editor
EEM/Electronic Engineers Master

Garden City, NY 11530

MINIGLOSSARY ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise.* The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
